PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, SECOND SESSION

SENATE—*Thursday, September 16, 1982*

(Legislative day of Wednesday, September 8, 1982)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

*Thou shalt love the Lord Thy God with all thy heart, and with all thy soul, and with all thy mind. * * * And thou shalt love thy neighbor as thyself. On these two commandments hang all the law and prophets.*—Matthew 22: 37-40

Father in Heaven, our violent, hostile world is starved for love. Children are starved for love, which is their only real security, and wives are starved for love, because husbands are too busy being successful. Senate staff are starved for love in an atmosphere of competition and struggle for position and power. Senators are starved for love—everybody that gets to them wants something, and they are exploited rather than loved.

And, loving Father, the tragedy is that, in our culture, too often love is considered weakness and is rejected as a matter of policy. Remind us, Lord, that the most powerful force in history is love and that love on a cross conquered our greatest enemy, death. In the name of Him Who is Incarnate Love. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE FOR TODAY AND TOMORROW

Mr. BAKER. Mr. President, after the recognition of the two leaders under the standing order, the distinguished Senator from Georgia (Mr. NUNN) will be recognized on special order for not to exceed 15 minutes.

ORDER FOR ROUTINE MORNING BUSINESS

After the execution of the special order, Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business, not to extend past 10:30 a.m., in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, at the close of morning business, the Senate will resume consideration of the unfinished business, which is House Joint Resolution 520.

Pending at that time will be the Baucus amendment, No. 2040, to the Weicker amendment, No. 2079. By unanimous consent, agreed to last evening, the distinguished Senator from Montana (Mr. BAUCUS) will be recognized when the Senate resumes consideration of this measure.

Mr. President, as I indicated yesterday, the Senate must face up to the fact that we have work to do of an urgent and compelling nature. We have to take care of the entire appropriations process. We have to do the debt limit bill. We have to do such other matters as may come up before the Senate before sine die adjournment.

I urge Senators to consider that we must dispatch this bill, the debt limit bill, as soon as possible, and it is my hope and determination to try to do that during the course of this day.

I see the minority leader smiling at me, and I understand why.

Members should also know that it may be necessary to be in session late today in order to finish this bill. But we have to get on with the business at hand.

I remind Members that tomorrow will be a short day because of the Jewish holiday.

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:30 a.m. tomorrow.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. We will come in at 9:30 a.m. tomorrow, and we will work until perhaps 2 or 3 p.m., depending on travel arrangements on the part of some Members.

Mr. President, I have no need for the remainder of my time under the standing order, and I offer it to the minority leader for his use.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader.

Mr. President, I yield to Mr. PROXMIRE such time as he may require.

Mr. PROXMIRE. I thank the minority leader.

SMASHING VICTORY IN WISCONSIN FOR NUCLEAR REFERENDUM

Mr. PROXMIRE. Mr. President, on Tuesday, Wisconsin voters went to the polls in what was probably the biggest primary election turnout in the history of our State. Why the massive turnout in a year when apathy seemed to rule? A major reason was the presence on the ballot of the first statewide referendum in the Nation on a nuclear weapons freeze. By a smashing 3 to 1 margin of 631,375 to 202,245, Wisconsin people voted to support the freeze. The support was statewide, coming from all sections of our State—urban, rural, suburban. It was supported by our Republican Governor and both of the Republican candidates seeking to succeed him. It was supported by all three of the Democratic candidates. It was debated and discussed at length throughout the State. It was opposed by an articulate group, and the U.S. State Department issued a kind of

"Who needs it?" comment before the vote.

Here is the text of that referendum:

Shall the Secretary of State of Wisconsin inform the President and the Congress of the United States that it is the desire of the people of Wisconsin to have the Government of the United States work vigorously to negotiate a mutual nuclear weapons moratorium and reduction with the appropriate verification with the Soviet Union and other nations?

As I say, the response was a resounding, emphatic overwhelming "Yes."

It is significant because the Wisconsin referendum was carefully drafted and thought out. It called for negotiations leading toward a weapons moratorium. It called for actual reductions in the arsenals on both sides in other nuclear nations. It called for sufficient safeguards so that each side could have confidence in adherence to the terms of the agreement and to preclude cheating. It called specifically for verification of any agreement.

Mr. President, I cite these points because in no other instance that I am aware of has a nuclear freeze or moratorium initiative been drafted with such balance and good commonsense. As a result, Wisconsin did not suffer through the same degree of contentious debate over language differences and subtle changes in meaning that we have seen here in Congress or in other initiatives in the various States and local communities.

As the first of nine statewide referendums this fall, Wisconsin has sent a strong signal to the Nation and to this Congress that our people are tired of waiting for leadership from the national level on the arms control issue.

They are tired of waiting for the administration to act decisively on the three arms control treaties that have been languishing here in the Senate. They are tired of waiting for arms reductions in Europe. They are tired of waiting for a strategic arms treaty with the U.S.S.R. that actually reduces the nuclear arsenals on both sides.

In the absence of national leadership from the White House, the American people have decided to let their leaders know that their patience has grown thin. The world conditions have deteriorated. Proliferation continues. The prospects for nuclear war, whether by premeditation or accident, have grown.

Mr. President, I am proud that my State has given the Federal Government the most resounding kind of mandate to get on with negotiation for mutual—I stress mutual—and verifiable—I stress verifiable—negotiations that will stop this insane and immensely costly march to the suicide of mankind, and very possibly the end of human life on Earth.

No action by this body or by the President is more urgent or could be more important.

U.S. HUMAN RIGHTS POLICY NECESSITATES RATIFICATION OF GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, the newspapers today are filled with accounts of killings and widespread violations of human rights. We, in America, are increasingly aware of the violence which permeates the modern world. Likewise, we understand that the United States must maintain its commitment to international human rights.

In the past, and today, the United States has been a leader in human rights; it has been instrumental in promoting respect for civil and political liberties. Nonetheless, Mr. President, the United States needs to go one step further in protecting the rights of mankind. As violence constantly is used to solve political disputes, the potential for genocide increases.

The issue of genocide cannot be dismissed casually; the newspapers daily remind us of its threat. In Guatemala many, many members of Indian tribes have been killed in connection with that government's counterinsurgency programs. Marlise Simons, in the September 12, 1982, edition of the New York Times, quoted that country's conference of bishops as saying, "Never in our history have such extremes been reached, with the assassinations now falling into the category of genocide."

As a leader in the area of human rights, the United States has upheld the need for individuals to be protected from possible oppression by the state. In order to insure completely the sanctity and quality of human life, our country must extend its human rights policy to include concrete protection for entire racial, religious, and ethnic groups. Policies which protect individuals are useless if the larger group to which the individual belongs is threatened with extermination. The United States must respond to the threat of genocide with concrete action.

Mr. President, although the United States played an instrumental role in drawing up the Genocide Convention, the Senate of the United States has still not yet ratified that treaty. Our position on human rights necessitates speedy ratification of the Genocide Convention.

Mr. President, I thank the Democratic leader, and I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, I yield back my time.

Mr. BAKER. Mr. President, I yield back my time.

Mr. President, I see that the distinguished Senator from Georgia is not yet here. I ask unanimous consent that I may suggest the absence of a quorum without charging it against his time.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDENT pro tempore. The Chair, on behalf of the Vice President, pursuant to Public Law 84-689, appoints the Senator from Texas (Mr. BENTSEN) as a delegate to the North Atlantic Assembly meeting, to be held in London, United Kingdom, November 14-19, 1982.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF SENATOR NUNN

The PRESIDENT pro tempore. Under the previous order, the Senator from Georgia is recognized for 15 minutes.

Mr. NUNN. I thank the Chair.

CRIME IN AMERICA

Mr. NUNN. Mr. President, Senator CHILES and I have been speaking daily on the Senate floor since May 19 of this year, urging Congress to address what we consider to be one of the most pressing problems now facing our country: Crime in America. On that day, over 4 months ago, we introduced S. 2543, the Crime Control Act of 1982, a comprehensive crime package including needed reforms in the areas of bail, sentencing, habeas corpus, and protection of witnesses and law enforcement officials. The bill was patterned on legislation previously introduced by Senator CHILES and myself as a result of numerous hearings before the Permanent Subcommittee on Investigations which I have chaired in the past.

Subsequent to our introduction of S. 2543, Senators THURMOND and BIDEN introduced another comprehensive crime package, S. 2572, on May 26, 1982. That legislation, cosponsored by Senator CHILES and myself, incorporated many of the provisions which we had previously introduced in the Senate in other anticrime bills, includ-

ing bail and sentencing reform, protection of witnesses, and penalties for murder for hire. With both those bills awaiting Senate action, Senator CHILES and I have persisted in reminding our colleagues, time and again, of the urgent need for strong and decisive steps by this Congress against the crime epidemic sweeping across this country.

With those sentiments in mind, I welcomed President Reagan's call to "make America safe again" via the anticrime proposals which he sent to Congress earlier this week.

It is most encouraging to hear the President now come forward to stress those very same legislative priorities which Senator CHILES and I, as well as the present occupant of the chair, Senator THURMOND, and Senator BIDEN and others have been urging for a long time.

We welcome his support, as well as that of all our colleagues, in our efforts to enact tough and meaningful anticrime legislation.

Specifically, the President's proposals speak to three issues of great importance to our criminal law enforcement community. Two of those issues are ones on which Senator CHILES and I previously introduced legislation very similar to the proposals which President Reagan now offers. The President has proposed reform of the insanity defense in Federal criminal trials. On June 24, 1982, I introduced S. 2678, which included three major reforms in this area: First, the adoption of the M'Naghten, or so-called right-wrong test, for the insanity defense; second, placement of the burden of proof of insanity on the defendent, and not the prosecution; and third, commitment procedures for those acquitted by reason of insanity. Senator THURMOND this week introduced proposals on insanity reform based on Judiciary Committee hearings on that issue. That bill adopts essentially the same provisions which I introduced in S. 2678. Although similar to our proposal, the President's bill provides for a slightly different test for the insanity defense, and makes no provision for placement of the burden of proof. I believe in this case that the Thurmond bill, to which I am proud to be a cosponsor, is the preferable approach.

In another area, President Reagan's bill will reform those laws governing habeas corpus relief in our criminal justice system. His proposals are very similar to the habeas corpus reforms which Senator CHILES and I offered in S. 2543 in May of this year and which we have been speaking on daily for over 4 months now. Both our proposals and those now offered by the President would protect our judicial system from the waste and expense of needless and repetitive habeas corpus litigation by career criminals. To do so, both proposals would assign greater weight to State court findings and impose a statute of limitations on the filing of petitions for habeas corpus relief.

Finally, President Reagan has also proposed reform of the exclusionary rule in the Federal judicial system. His bill makes admissible any evidence resulting from a search or seizure where the search or seizure was made in the reasonable good faith belief that it conformed with the requirement of the fourth amendment.

By contrast to some other legislative proposals to reform the exclusionary rule, the President's package does not include, as a deterrent to negligent police conduct, the use of civil liability or administrative sanctions against officials who make good faith, but nevertheless, unconstitutional searches or seizures. The exclusionary rule had long been a cause of concern to both the courts and the Congress, especially in cases where its broad use has resulted in the reversal of criminal convictions on the basis of "legal technicalities." As with other issues of critical importance to law enforcement, the Senate should closely and promptly examine all the proposals for a fair and effective modification of the exclusionary rule.

In sum, in the closing days of this legislative session, the Senate Calendar is becoming more and more crowded with proposals for strong and effective anticrime legislation. Both S. 2543, introduced by Senator CHILES and myself, as well as S. 2572, the Thurmond-Biden crime package, have awaited action on that calendar for several months now. We now have before us a third anticrime package, in the proposals which the President has suggested. Surely, there is no lack of available legislative vehicles for strong action against crime. Neither this Congress, nor the American public, can afford to delay any longer in the battle against crime. As a responsible Congress, we must act now to restore credibility and strength to our criminal justice system. I urge the Senate to do precisely that by the prompt consideration of the proposals which we now have before us.

I might add, Mr. President, if we do not conclude a substantial part of these criminal law reform proposals before we adjourn in early October, I am hopeful that if we do come back for any kind of special session after the November elections and before the next Congress begins, we will give priority to these important crime measures during our deliberations in those legislative days.

Mr. President, if I have remaining time I yield that time back.

ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order there will now be a period for the transaction of routine morning business that will not last past 10:30 a.m. during which Senators may speak for 5 minutes each.

Mr. NUNN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BRADY). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NBC NEWS LINK SOVIET TO ATTEMPT ON POPE'S LIFE

Mr. TSONGAS. Mr. President, I wish to bring to the attention of my colleagues an article published in the New York Times September 15, stating that NBC News has evidence which suggests that the recent assassination attempt on Pope John Paul II was carried out with the knowledge, and perhaps even the assistance, of Soviet and Bulgarian intelligence agencies.

NBC News, in a report in advance of their scheduled September 21 documentary, "The Man Who Shot the Pope—A Study in Terrorism," has reportedly uncovered direct links between Mehmet Ali Agca, the gunman convicted of the assassination attempt, and both the Bulgarian Secret Service and the Soviet KGB. According to the NBC report, the Pope was targeted because of his support for the Solidarity movement in Poland.

I feel that these charges are extremely serious. They implicate the Soviet Union in an extraordinary crime, with exceedingly grave implications. I am appalled by the possibility that the Vatican could have been the victim of organized international terrorism. Of course, I am deeply concerned that the Pope's personal safety be completely assured at all times. We must see to it that all the facts in this matter are rooted out and made public. Pope John II enjoys the love and respect of millions of people of all faiths all over the world. The attempt on his life was a nefarious act, and any conspirators in this crime must be brought to justice. I request unanimous consent that the article, "NBC News Link Soviet to Attempt on Pope's Life," be included in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 15, 1982]

NBC NEWS LINKS SOVIET TO ATTEMPT ON POPE'S LIFE

(By the Associated Press)

NBC News reported yesterday that it had found evidence suggesting that Pope John Paul II was the target of an assassination

attempt with the knowledge and perhaps the assistance of Soviet and Bulgarian intelligence agencies.

NBC News said the Pope was targeted because of his support of the Solidarity movement in Poland. The report also said that the Pope had sent a handwritten letter to Leonid I. Brezhnev, the Soviet leader, in 1980 in which the Polish-born Pope said he would abdicate the papacy and lead the resistance if Soviet troops invaded Poland.

The letter, reportedly delivered by a Vatican envoy, instigated a secret shuttle mission between Moscow, Rome and Warsaw that led eventually to a temporary easing of the Soviet attitude toward Solidarity, NBC News said.

It said its report came after a nine-month investigation by the correspondents Marvin Kalb and Bill McLaughlin. The network released details of the investigation today in advance of the airing of a documentary, "The Man Who Shot the Pope—A Study in Terrorism." It is scheduled to be broadcast Sept. 21.

In an article in the September issue of Reader's Digest, Claire Sterling, author of "The Terror Network," said the shooting of the Pope in St. Peter's Square in May 1981 was in retaliation for the Pope's support of Solidarity. Mrs. Sterling also maintained that the shooting had the backing of the Soviet Union, which she said acted through the Bulgarian intelligence organization.

[At the time of Mrs Sterling's article, the Moscow radio broadcast a denunciation of the allegations, saying, "The absurdity and unfoundedness of this claim are obvious."]

NBC News traced what it called an unbroken line from Mehmet Ali Agca, the Turkish gunman convicted for the shooting of the Pope to organized crime elements in Turkey, the Bulgarian secret service and the K.G.B., the Soviet intelligence agency.

"A Soviet connection is strongly suggested, but it cannot be proved," Mr. Kalb said.

The correspondent said "it seems safe to conclude" that Mr. Agca had "been drawn into the clandestine network of the Bulgarian secret police and, by extension, the Soviet K.G.B."

ESCAPED FROM PRISON IN TURKEY

NBC News said bank records showed that Mr. Agca deposited $10,000 two months before the assassination of a Turkish newspaper editor, Abdi Ipecki. Mr. Agca was convicted of the murder but later escaped from a maximum security prison in Turkey. In addition, Mr. Agca had large sums of money deposited for him in Turkish banks while he was a student at Istanbul University.

NBC News said that Mr. Agca appeared to have been backed financially at every step of the way by organized crime in Turkey and that the Bulgarian secret service has strong ties to the Turkish syndicate.

NBC News quoted Vladimir Sakharov, a former K.G.B. agent who defected, as saying that information held by the Bulgarians would also be known by the K.G.B.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

TEMPORARY INCREASE IN THE PUBLIC DEBT LIMIT

The PRESIDING OFFICER. The Senate will resume consideration of the unfinished business, and the clerk will report by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 520) to provide for a temporary increase in the public debt limit.

The Senate resumed consideration of the joint resolution.

AMENDMENT NO. 2040

The PRESIDING OFFICER. The pending question is amendment No. 2040, by the Senator from Montana.

Under the previous order, the Senator from Montana (Mr. BAUCUS) is recognized.

Mr. BAUCUS. Mr. President, I rise once again in support of the pending amendment as well as the amendment offered by the Senator from Connecticut, and I speak about the court-stripping nature of the first degree amendment to the committee substitute—that is, the amendment by the Senator from North Carolina with respect to school prayer.

For those who do not remember, the pending amendment, the amendment of this Senator, as well as the amendment of the Senator from Connecticut—particularly the amendment of this Senator—simply declares that Federal courts must remain open to those citizens who wish to litigate their constitutional rights.

I have said repeatedly, and I will state once again this morning, that this is the issue—court stripping. It is not a school prayer bill. This is not a voluntary prayer proposal—that is, the amendment offered by the Senator from North Carolina. It has nothing to do with prayer or religion. It has nothing to do with whether or not the Senate will today, on September 16, vote on that issue. Rather, it has to do with whether or not the Senate, today, on September 16, 1982, will begin to set in motion the vicious and pernicious precedent of removing the Supreme Court's power and right to enforce the Constitution.

Mr. President, that is the issue we face here—whether we here today set in motion the vicious and pernicious precedent of removing the Supreme Court's power and right to enforce the Constitution.

The Helms amendment is court stripping. It is court stripping that the Weicker amendment addresses. It is court stripping that the Baucus amendment is focused on. It is court stripping that each Senator must focus on before he or she casts a vote on the underlying issue.

The press reports describing today's forthcoming debate suggest that this dialog and today's discussion will be on the moral issue of school prayer. Nothing could be further from the truth, at least so far as this Senator is concerned.

We are here today because the underlying issue is whether the American public wants the guarantees of our Constitution to mean something. That is why the Senator from Connecticut and I are here, because we are trying to protect those constitutional guarantees and protect that branch of Government which was designed to insure that those guarantees not be infringed upon.

I am confident that if the average citizen knew that what was pending before us today was a court-stripping amendment, that citizen would agree with me that this is not the way to go about responding to unpopular or inappropriate decisions of the Supreme Court.

I might add at this point that it is my firm belief that if the Senate could take a secret, private vote on this issue, the result would be different—that is, the Senate would unanimously agree not to remove Supreme Court jurisdiction over the pending issue.

I should like to make one additional point about the manner in which this amendment is being raised. I do not think this proposal should be before us in the context of a debt limit bill. No issue of such magnitude should be considered as a rider to a money bill of this nature. It should be processed and called up as a free-standing piece of legislation.

This brings me to what I consider an outrageous aspect of consideration of this proposal. There has not been even one witness to testify on the underlying Helms proposal in the Senate, in this Congress or in any other Congress. I repeat: Not even one witness, not one, has ever testified before any committee of the U.S. Senate, in this Congress or any other Congress, on the underlying Helms amendment. Not one witness.

The original Helms proposal in this Congress, S. 481, is pending today before the Separation of Powers Subcommittee, of which I am ranking minority member. The chairman of our committee, Senator EAST, a supporter of the proposal, has not had the opportunity of 1 day of hearings on S. 481. The subcommittee has not been asked to vote on this proposal and the Senate Judiciary Committee has not been asked to vote at all—that is, the full committee has not been asked to vote on this proposal. There has been an end run around the entire subcommittee and the committee process. That is an important point.

Here we are today, with the debt limit bill before us. The principal amendment to the debt limit bill is the amendment of the Senator from North Carolina. It is a very important amendment. It is an amendment which purports to strip the Supreme Court of jurisdiction. That is how important it is. It is an amendment to overrule the U.S. Supreme Court. It is not a trivial amendment.

Here we are today, faced with that amendment, and not one hearing has been held in the Senate, not one witness has ever testified in the Senate, or in any other Congress, on this amendment, and we are asked to vote on it. Because the amendment is so important, I think it should receive due consideration of the committee process, so that we know what we are voting on and, more important, what the ramifications of it are.

Mr. President, I should note that the House of Representatives has had extensive proposals on this matter in the last Congress. In fact, there is a full volume of hearings before the House Judiciary Committee sitting on my desk. I believe it is no small coincidence that the House of Representatives has not responded favorably to court-stripping proposals.

It is because they have studied them. We in the Senate have not studied them. Members of the House have. As I say, it is no small coincidence that the House of Representatives has not responded favorably to court-stripping proposals, because they have studied them.

The House opposition to court stripping is bipartisan. It crosses ideological lines. It is not a partisan matter. I believe that the depth of sentiment in the Senate with respect to court stripping would be similar if the Senate were willing to study the proposal and permit it to come up through the traditional committee process.

During the course of the day, I hope to bring to the attention of the Senate additional matters which I believe should have been considered by the Separation of Powers Subcommittee as well as by the full Judiciary Committee. Unfortunately, that was not done, and therefore I feel compelled to assure that the Senate record is complete on this issue.

Mr. President, following is the resolution of the conference of 50 State supreme court chief justices concerning court-stripping bills. The chief justices of the various State courts met recently. They took up various issues, and one of the issues they took up was the very basic question of court-stripping proposals which now face the U.S. Congress.

I might add, Mr. President, that there are many court-stripping proposals before us. Some of them are specific issues; some are general.

One bill has been introduced in this Congress which would limit Supreme Court review of any Federal constitutional question that has been decided by a State supreme court. Imagine. A bill was seriously introduced in this Congress prohibiting U.S. Supreme Court review of any State supreme court decision which ruled on a Federal constitutional question. To me, that is court-stripping in one of its purest forms. In any event, I should like to read the resolution of the conference of 50 State supreme court chief justices concerning court-stripping bills.

RESOLUTION RELATING TO PROPOSED LEGISLATION TO RESTRICT THE JURISDICTION OF THE FEDERAL COURTS

Whereas, there are presently pending in the United States Congress approximately twenty bills that would strip the federal courts, including the United States Supreme Court, of substantive jurisdiction in certain areas involving prayer in public schools and buildings, abortion, school desegregation and busing, and sex discrimination in the armed services; and

Whereas, the Conference of Chief Justices, without regard to the merits of constitutional issues involved, expresses its concern about the impact of these bills on state courts and views them as a hazardous experiment with the vulnerable fabric of the nation's judicial systems arriving at this position for the following reasons, among others:

A. These proposed statutes give the appearance of proceeding from the premise that state court judges will not honor their oath to obey the United States Constitution, nor their obligations to give full force to controlling Supreme Court precedents;

B. If those proposed statutes are enacted, the current holdings of those Supreme Court decisions targeted by this legislation will remain the unchangeable law of the land, absent constitutional amendments, beyond the reach of the United States Supreme Court of state supreme courts to alter or overrule;

C. State court litigation constantly presents new situations testing the boundaries of federal constitutional rights. Without the unifying function of United States Supreme Court review, there inevitably will be divergence in state court decisions, and thus the United States Constitution could mean something different in each of the fifty states;

D. Confusion will exist as to whether and how federal acts will be enforced in state courts and, if enforced, how states may properly act against federal officers;

E. The proposed statutes would render uncertain how the state courts could declare a federal law violative of the federal Constitution and whether Congress would need to wait for a majority of the state courts to so rule before conceding an act was unconstitutional;

F. The added burden of litigation engendered by the proposed acts would seriously add to the already heavy caseload in state courts: Now, therefore, be it

Resolved, That the Conference of Chief Justices expresses its serious concerns relating to the above legislation, approves the report of the Conference's Subcommittee of the Committee on State-Federal Relations, and directs its officers to transmit that report, together with this resolution, to appropriate members of Congress.

Proposed at the Midyear Meeting in Williamsburg, Virginia on January 28, 1982.

Mr. President, let me just comment on that point. Again this is part of the resolution adopted by the 50 State court chief justices in one of the recent conferences. That resolution says that these proposed statutes, that is, the court-stripping statutes, give the appearance of proceeding from the premise that State court judges will not honor their oath to obey the U.S. Constitution.

Let me explain that. These bills, these court-stripping bills, including the amendment offered by the Senator from North Carolina, would in effect prevent the U.S. Supreme Court from reviewing school prayer in one instance or the other issues that are contained in the other bills. If those bills pass, if they become law, then the Supreme Court could not review those Federal constitutional issues.

What then must State supreme court justices do when faced with these issues, that is, when the school prayer or some other issue comes before a State supreme court? As this resolution states or at least as these court-stripping provisions imply State court judges will not be bound to honor their oath to obey the U.S. Constitution. That is the supreme court judges will not be honorbound to enforce the last U.S. Supreme Court decision on the question even though that court cannot subsequently review that issue again.

That places State supreme court judges in a terrible dilemma. On the one hand, they are sworn to uphold the Constitution. They are so sworn when they take their oath of office and the Constitution is what the Supreme Court says it says. And the latest Supreme Court issue will be the latest ruling on the issue and the judges will be, on the one hand, forced to honor that decision and on the other hand they may feel that the correct result is something else.

So it places the State supreme court judges in a terrible dilemma.

Continuing with the resolution proposed by the conference of 50 State court chief justices.

B. If those proposed statutes are enacted, the current holdings of those Supreme Court decisions targeted by this legislation will remain the unchangeable law of the land, absent constitutional amendments, beyond the reach of the United States Supreme Court or state supreme courts to alter or overrule;

Think of that. If these court-stripping provisions pass and if the amendment of the Senator from North Carolina becomes law, then the latest Supreme Court decision will remain the unchangeable law of the land absent the constitutional amendment.

That is not the result that the proponents of the amendment seek to achieve. The incongruity seems obvious.

Again continuing with the resolution as proposed by the 50 State supreme court judges:

C. State court litigation constantly presents new situations testing the boundaries of federal constitutional rights. Without the unifying function of United States Supreme Court review, there inevitably will be divergence in state court decisions, and thus the United States Constitution could mean

something different in each of the fifty states;

Think of that. If these provisions pass, if these court-stripping provisions pass then not only would the U.S. Supreme Court not be able to review a particular Federal constitutional issue in question, but when each of the 50 State supreme courts takes up that question, we in our country will be faced inevitably with divergence of State supreme court decisions which would mean 50 different interpretations of the same question.

Again continuing with the resolution:

D. Confusion will exist as to whether and how federal acts will be enforced in state courts and, if enforced, how states may properly act against federal officers;

E. The proposed statutes would render uncertain how the state courts could declare a federal law violative of the federal Constitution and whether Congress would need to wait for a majority of the state courts to so rule before conceding an act was unconstitutional;

F. The added burden of litigation engendered by the proposed acts would seriously add to the already heavy caseload in state courts;

Mr. President, that is a very important point. We in Congress are constantly looking for ways to reduce the burden not only of the State courts but more particularly the Federal courts. Our judicial system is overloaded. In fact, I am sure many Members of this body have noted recent observations in the press how various members of the U.S. Supreme Court the last several days have been commenting on the excessive overload of the Federal judiciary. It is not only the Supreme Court of the United States but the Federal judiciary generally.

There have been many articles in the paper where members of the Supreme Court were commenting on this.

I might add it must be a very important issue for them to be addressing because usually members of the U.S. Supreme Court do not publicly comment on the court. It is in very rare instances for members of the Supreme Court to comment publicly on the activities of the court and for several members of the court to recently comment on excessive burden and overload of the judiciary to me certainly indicates that it is a very important issue facing them.

Mr. President, we also note that there are many, many proposals for various specialized courts of appeals. Some propose a tax court of appeals. Others even propose an environmental court of appeals. We have a specialized court of appeals in various proposals, and the main reason for those is the excessive workload facing the courts.

I might add that unless we find some solution to this the problem is going to get worse.

The same is true in the States. The State courts, also, are overloaded. There is something about the nature of our society that we sometimes tend to be a litigious society. We tend, I think, too often to resort to courts to resolve our differences. Our system is overloaded.

These court-stripping proposals as pointed out by the State supreme court judges will add to the already heavy caseload in the State courts. And why will they add to the caseloads in the State court? It is because the Supreme Court and lower Federal courts will not have jurisdiction over these issues and necessarily State courts will be forced to take up determination of these issues placing an even greater burden on already overloaded State courts.

Think about that. If the U.S. Supreme Court and lower Federal courts no longer have jurisdiction over school prayer or whatever issue might be involved here, necessarily all those who agree or disagree with statutes passed by Congress, actions taken by school boards, actions taken by various levels of State government, all those questions will be shoved and pushed to the State courts and added to the State courts' burden, a serious consequence of these court-stripping proposals.

The therefore clause of this resolution now reads as follows:

Now, therefore, be it resolved that the Conference of Chief Justices expresses its serious concerns relating to the above legislation, approves the report of the Conference's Subcommittee of the Committee on State-Federal Relations, and directs its officers to transmit that report, together with this resolution, to appropriate members of Congress.

It is clear, Mr. President, from the stated concerns of this resolution that the State court chief justices are not enamored of these proposals, and they are not enamored because as judges and as chief judges of the various supreme courts of their States they are students of our constitutional form of government, they are serious students of our constitutional form of government. They know that not only do they have heavy case loads but that for the U.S. Supreme Court to be precluded from hearing Federal constitutional questions would result in our form of government, as we know it, being decimated.

You would think it would be in their interest, in the interest of State court chief justices, to want to hear these cases; that is, you would think the State supreme court justices perhaps would not be upset with bills limiting Supreme Court or lower Federal court jurisdiction. After all, it is human nature to like to have more power; it is human nature to like to be able to determine more issues; it is human nature to want more control not only of our lives but of our professions, whatever we do. That is part of our lives.

So you would normally think State supreme court judges would want a little more control over the law and an opportunity to hear more cases, and you would think they would not be upset with efforts by Congress to limit Supreme Court and lower Federal court jurisdiction.

But, no, State supreme court judges do not want more. They know that not only handle it but, more importantly, it seriously undermines our form of Government as we know it.

They know that famous phrase by, who was it, Lord Acton, who said "power corrupts and absolute power corrupts absolutely." They know the value of the separation of powers. They know the value of checks and balances. They know how dangerous it is and how wrong it is for any person, any institution, any branch of government to be too powerful. Power does corrupt and absolute power does corrupt absolutely. That is one of the underlying problems of these bills, because the effect of these bills, these court-stripping bills, it as follows: The Supreme Court would no longer be able to determine Federal constitutional questions. What does that mean? That means we virtually obliterate the Supreme Court because if Congress can limit Supreme Court jurisdiction over school prayer, then Congress can limit Supreme Court jurisdiction over any Federal constitutional issue.

Take the bill of rights—the first amendment, free speech, free press, freedom of religion, freedom of assembly, the right against self-incrimination; and what about the right to bear arms? You know, this effort to limit Supreme Court jurisdiction is a double-edged sword. Sometimes conservatives want to limit Supreme Court jurisdiction. Well, there may be a day when liberals may want to limit Supreme Court jurisdiction over the right to bear arms. What is to prevent some Congress at some time in our country's history from passing a law limiting Supreme Court review over the right to bear arms? It is a double-edged sword; it works both ways.

So I suggest to those of you who are listening, those who are enamored of the prospect of overturning Supreme Court decisions because you disagree with these Supreme Court decisions and are, therefore, enamored of prohibiting Supreme Court review of that issue: Think twice, because as the sword is double-edged. This approach will 1 day come back to haunt you and also prohibit the Supreme Court's jurisdiction over issues that are also near and dear to the hearts of all of us, even through they may not be on some other issue.

So I suggest it is power that corrupts and absolute power that corrupts absolutely, and we cannot preclude the Supreme Court from upholding the Constitution because when we do that we are effectively eliminating the Constitution, and we have eliminated one of the three branches of Government. We no longer have the Supreme Court protecting Americans in their constitutional rights under the U.S. Constitution.

Let us remember, I think we often easily forget, that our country was basically founded because our forefathers wanted to escape the tyranny of legislative whims or the whims of monarchs in European countries.

They also wanted to escape religious persecution. They came here because they wanted to live their lives free from tyranny of kings and queens and free from the tyrannies of rulers.

What did they do, our forefathers? They adopted a Constitution, a Constitution setting forth the rights, the basic rights, of citizens. Probably the most basic declaration of rights of citizens is the Bill of Rights. It is the Bill of Rights, the first amendment, the fourth amendment, search and seizure, you name it, it is the Bill of Rights which protects American citizens from the whims of majorities, from the whims of government, for wnatever reasons government might want to act.

These court-stripping proposals begin to take us down that slippery slope of undermining the Constitution and eventually eliminating the protection of Federal constitutional rights that are so important to our country and our form of government.

I do not think Americans want, I do not think our citizens want, the Constitution destroyed.

You may think that I am exaggerating. After all, the amendment pending is merely an amendment to preclude Supreme Court jurisdiction over the issue of school prayer. Well, that is right. That is the only issue that is before us today—just one particular Federal constitutional issue. But I personally think it is so important that we not set the precedent, that we not enact this amendment today, and that we do whatever we can at whatever cost to prevent Congress from enacting a statute which begins us down the road of limiting Supreme Court jurisdiction, and that is what the issue is all about here today.

I am not at any time going to address the merits of the underlying amendment. We do not get to the merits of the underlying amendment until we discuss the court-stripping nature of the underlying amendment. Once that is taken care of, then we will address the merits.

I must say to my colleagues I would not be standing here today if it was a debate on the merits, because that is an issue on which each of us as Senators should vote on. I am in no way whatsoever inclined to nor do I want to be a part of any effort to prevent a vote on the merits so long as we do not vote on the court-stripping nature of this amendment, because I think it is too dangerous, and I frankly think it is so dangerous that it is a matter that we should discuss quite at length so that we more actually understand its ramifications.

(Mr. ARMSTRONG assumed the chair.)

Mr. BAUCUS. Mr. President, I would now like to read an excerpt from a letter from Prof. William Van Alstyne, He is professor of law at Duke University School of Law. Actually, Mr. President, this letter is so important that I will read the entire letter rather than just an excerpt. This letter is dated August 7, 1981:

DUKE UNIVERSITY,
SCHOOL OF LAW,
Durham, N.C., August 7, 1981.

Senator MAX BAUCUS,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR BAUCUS: Your letter of July 27 asks that I respond to five questions, all of which are felt to be pertinent to S. 481, a bill to foreclose federal court (and Supreme Court) review in any case involving "voluntary" prayers in public schools. As complimented as I am to receive your inquiry, I cannot respond to each question in any comprehensive fashion. Responses which could adequately present the material I believe sufficient to support my conclusions would require literally several hundred pages. Virtually every question you raise has generated substantial academic (as well as political) controversy over the years. No thorough distillation of those controversies can be provided in any one person's answer to you. Indeed, I very much fear that what the Committee must necessarily receive generally will be but "cut" and "paste" profiles of selected materials which, each in its own turn, may be internally consistent and seemingly very persuasive. I am confident, however, that neither of us desires that Congress should seek to resolve these questions by material of that kind—by "choosing" between mutually exclusive (and mutually partisan) submissions of ponderous material.

With this disappointing introduction, I shall nonetheless respond directly to each of the questions in your letter despite the abbreviated (and somewhat summary) form I have been obliged to give them. Insofar as Hearings may subsequently be held, pursuant to which matters I may not address to your satisfaction in this letter may be considered, I would be pleased to supplement this response upon request.

One last word by way of introduction. The questions presented in your letter more-or-less assume their own relevance to S. 481. It is not at all clear to me that that assumption is sound. None of the questions, for instance, goes *directly* to the "correctness" or "incorrectness" of the Supreme Court's school prayer decisions; and, accordingly, nothing in my responses to your questions does so either. To this extent, the inquiry is bound to be inconclusive, as but a single example may make quite clear. The first question (whether the 14th amendment "intended to apply the Bill of Rights to the States") appears to assume that if the 14th amendment does make the Bill of Rights applicable to the states, then the Supreme Court school prayer cases may well be correct; but if the 14th amendment did not contemplate the application of the Bill of Rights to the states, then the Supreme Court school prayer cases are presumably incorrect. Both propositions are *non sequiturs;* both leave out of account an undistributed middle possibility. The fourteenth amendment and the Bill of Rights may be either completely co-extensive, merely coincidentally overlapping, of even mutually exclusive. Even if exactly co-extensive (as I do not think to be so at all), that would say little or nothing about the correctness of the school prayer cases as such. Even if mutually exclusive (as I also think to be not so at all), it says nothing about the correctness of those cases. If partly overlapping (as I think to be the case) it still says very little. In brief, the general disagreement respecting "Incorporation" is germane, but wholly indecisive of how well the Court has interpreted either the "free exercise" of "establishment" clauses of the first amendment or the differently-worded clauses (e.g., respecting "privileges and immunities," "liberty," "equal protection,") of the fourteenth amendment. I am respectful of the Subcommittee's interest, but a bit puzzled as to why so much would appear to turn on this question. I desist from pursuing the matter here, however, as I have occasion to return to the point, perhaps with greater clarity, in what follows. Here, then, briefly, my answers to the question you put.

I. *Was the Fourteenth Amendment intended to apply the Bill of Rights to the States?*

My own view of this profusely-examined controversy is that a number of the "rights" previously protected in the Bill of Rights *were* expected thenceforth to be protected also from systematic disregard by state government. Among such rights, the first amendment itself was furnished as a leading example to illustrate what kinds of rights would be protected from state laws, although it was the "first amendment" as such, rather loosely, and without specific (much less special) reference to "the establishment clause" in particular. The materials on this immensely examined question are, to my satisfaction, unconvincing that *all* of the Bill of Rights would necessarily carry over. Similarly, they are unconvincing that *the degree* to which certain rights identified in the Bill of Rights might thenceforth also be sheltered from infringements by the states would be precisely the same in both instances.

This general view of the matter, incidentally, describes a very widely-shared common ground among virtually all of the Justices of the Supreme Court: even those Justices who have been wholly unpersuaded that there was a literal, (much less a co-extensive) "incorporation" of the Bill of Rights within the framing of the fourteenth amendment have nonetheless concluded that in *many* areas the field of protection is the same. The most recent review of this general question is in Curtis, *The Bill of Rights As A Limitation on State Authority,* 16 WAKE FOREST L. REV. 45 (1980). It may usefully be read together with DEMOCRACY AND DISTRUST (1980) by Professor John Ely of the Harvard Law School. Both may usefully be contrasted with Raoul Berger's thesis (that the fourteenth amendment did nothing whatever other than to constitutionalize the Civil Rights Act of 1866) to see how extraordinary is the range of written opinion on the subject. Of course, were Mr. Berger's thesis thought correct in Congress, and were it then used both neutrally and uniformly to deny all federal courts jurisdiction in respect to *every* kind of case which (according to that thesis) has been "unconstitutionally" decided in the Supreme Court, Congress would end by taking from the federal courts at least 90% of all conceivable cases arising under the fourteenth amendment.

II. *If the 14th Amendment was not intended to incorporate the Bill of Rights, aren't the Supreme Court's school prayer decisions unconstitutional?*

The answer is, necessarily, "no." That much must be clear insofar as even within the majority of Supreme Court Justices who, unlike Mr. Justice Black, reject the notion that the fourteenth amendment is

literally and exactly co-extensive with the first nine amendments, most have nonetheless concluded that the Bill of Rights and the fourteenth amendment do *significantly overlap* in the respective protection each provides. This position overwhelmingly characterizes our law in respect to "freedom of speech" and state (as well as federal) laws that affect it. An impressive number of eminently regarded Justices (*e.g.*, Holmes, Frankfurter, Harlan) not able to subscribe to a literal, "tittle-for-tittle," and "jot-for-jot" notion that the Bill of Rights and the fourteenth amendment are co-extensive, nonetheless concur emphatically that freedom of speech is separately protected by the fourteenth amendment against abridging state action. The treatment of religion in this respect therefore, is not unique.

(Mrs. HAWKINS assumed the chair.)

Mr. BAUCUS. Madam President, I yield to the Senator from North Carolina and ask unanimous consent to do so, so long as I do not at all lose my right to the floor and that immediately upon yielding 30 seconds to the Senator from North Carolina, and yielding to him only for the purposes of filing a cloture motion, that I immediately regain my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Senator.

CLOTURE MOTION

Mr. HELMS. Madam President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment number 2031 as modified, to the committee substitute to House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit.

Jesse Helms, John P. East, Roger W. Jepsen, Jeremiah Denton, Paul Laxalt, Paula Hawkins, Orrin G. Hatch, Jake Garn, Harry F. Byrd, Jr., Steven Symms, S. I. Hayakawa, Don Nickles, James A. McClure, Strom Thurmond, Charles E. Grassley, Malcolm Wallop.

Mr. HELMS. Madam President, I thank the able Senator.

Mr. BAUCUS. I thank the Senator from North Carolina.

The PRESIDING OFFICER. The Senator from Montana has the floor.

Mr. BAUCUS. I thank the Chair.

Madam President, I have been reading from a letter from Professor Van Alstyne from Duke Law School and going into his responses to the second question I posed to him in an earlier letter. That question I posed to him was:

If the 14th amendment was not intended to incorporate the Bill of Rights, aren't the Supreme Court's school prayer decisions unconstitutional?

I am now quoting from Professor Van Alstyne's response to that question.

The answer is, necessarily, "no." That much must be clear insofar as even within the majority of Supreme Court Justices who, unlike Mr. Justice Black, reject the notion that the fourteenth amendment is literally and exactly co-extensive with the first nine amendments, most have nonetheless concluded that the Bill of Rights and the fourteenth amendment do significantly overlap in the respective protection each provides. This position overwhelmingly characterizes our law in respect to "freedom of speech" and state (as well as federal) laws that affect it. An impressive number of eminently regarded Justices (e.g., Holmes, Frankfurter, Harlan) not able to subscribe to a literal, "tittle-for-tittle," and "jot-for-jot" notion that the Bill of Rights and the fourteenth amendment are co-extensive, nonetheless concur emphatically that freedom of speech is separately protected by the fourteenth amendment against abridging state action. The treatment of religion in this respect, therefore, is not unique.

The so-called "incorporation" controversy does not itself resolve the "correctness" of fourteenth amendment adjudication, incidentally, in either direction. Suppose, for instance, one believed (as I do not believe) that the fourteenth amendment exactly and wholly, and co-extensively rendered applicable against the states all of the first nine amendments to the Constitution as interpreted by the Supreme Court against Acts of Congress. If one were also of the opinion, however, that the Supreme Court has "incorrectly" interpreted the first amendment itself as applied directly, to Acts of Congress, then of course one would maintain that the Court has been equally "incorrect" in applying the first amendment to state statute even if, in doing so, the Court had used exactly the same standards in both sets of cases. All that one would be prepared to concede, according to this view, is that the Court was "correct" (in deeming the Bill of Rights to have been incorporated within the fourteenth amendment), and thus merely consistently "incorrect" (insofar as it "erred" in interpreting the first amendment, thereby resulting in carrying over the same error into the fourteenth amendment)! The "incorporation" controversy does not prove the Supreme Court "right" or "wrong" on either matter. The last section of the article (in draft manuscript) I am enclosing for your interest, on the particular subject of free speech, may help to make this point more clearly.

III. If the school prayer decisions are unconstitutional, isn't that sufficient cause for the Congress to remove the Court's jurisdiction from that area?

Again, Madam President, this is a question I posed to various professors, in this case Professor Van Alstyne. I will repeat the question.

III. If the school prayer decisions are unconstitutional, isn't that sufficient cause for the Congress to remove the Court's jurisdiction from that area?

That is one of the underlying issues which faces us today.

Respectfully, I think the answer is plainly "no." The usual way of "correcting" final adjudicative interpretations of the Constitution by the Supreme Court (indeed, with one attempted exception, i.e., the McCardle case, the sole way), has been by proposing amendments which, once ratified, uniformly change the result. One may put the matter more strongly. The usual way of altering final adjudicative Supreme Court interpretations of the Constitution one may believe to be not merely "incorrect" but also "intolerable,"—is by amendment. Each of at least six amendments to the Constitution in reaction to Supreme Court constitutional adjudications have resulted on both grounds.

Let me repeat that paragraph. "Uniformly" is the key word.

Respectfully, I think the answer is plainly "no." The usual way of "correcting final adjudicative interpretations of the Constitution by the Supreme Court (indeed, with one attempted exception, i.e., the McCardle case, the sole way), has been by proposing amendments which, once ratified, uniformly change the result. One may put the matter more strongly. The usual way of altering final adjudicative Supreme Court interpretations of the Constitution one may believe to be not merely "incorrect" but also "intolerable."—is by amendment. Each of at least six amendments to the Constitution in reaction to Supreme Court constitutional adjudications have resulted on both grounds.

The matter is no different on this question. Quarrels there doubtless are respecting the "proper" construction of the establishment clause within the first amendment itself, as well as the "proper" construction of the fourteenth amendment. The history of each amendment is separately controversial in respect to religion. The background of the first amendment's own establishment clause (as it binds Congress divides the best of people, as well as the worst. (Part of that background is strongly "separatist." Part of it is strongly "voluntarist." And a different part is pre-occupied with considerations principally of federalism.) My own view is that the Supreme Court has muddled through these problems none too well, but that it deserves "two cheers" for coping with a text, a history, and an indefatigable litigative tendency in American life that are, in the aggregate, massively perplexing.

That is a wonderful sentence. I will read it again. He is commenting on the Supreme Court's prayer decision.

My own view is that the Supreme Court has muddled through these problems none too well, but that it deserves "two cheers" for coping with a text, a history, and an indefatigable litigative tendency in American life that are, in the aggregate, massively perplexing.

If one is irreconcilably distraught with where these decisions have brought us (as I am not), then still it adds up to no very powerful argument to seek to remove adjudicative federal court jurisdiction, leaving the meaning of the fourteenth amendment to a vagrant career in the differing, wholly unpredictable extent to which the several state supreme courts may (or may not) continue to adhere to the Supreme Court's last words on the subject—such last words as it had occasion to utter prior to an Act of Congress that does not (and cannot) "correct" the Court but merely holds it hostage to an imposed silence. Rather, it adds up, at best, to sufficient reason to propose an amendment and, perhaps, to seek influence in the judicial appointment process insofar as it is within the practical capacity of the Senate to do so.

Let me repeat that paragraph.

If one is irreconcilably distraught with where these decisions have brought us (as I am not), then still it adds up to no very powerful argument to seek to remove adjudicative federal court jurisdiction, leaving the

meaning of the fourteenth amendment to a vagrant career in the differing, wholly unpredictable extent to which the several state supreme courts may (or may not) continue to adhere to the Supreme Court's last words on the subject—such last words as it had occasion to utter prior to an Act of Congress that does not (and cannot) "correct" the Court but merely holds it hostage to an imposed silence.

Rather, it adds up, at best, to sufficient reason to propose an amendment and, perhaps, to seek influence in the judicial appointment process insofar as it is within the practical capacity of the Senate to do so.

For reasons I set forth much more elaborately in earlier testimony (a copy of which is enclosed), I think it immensely ill-advised of Congress to seek the "correction" of "unconstitutional" Supreme Court adjudications by an ad hoc reduction in federal court jurisdiction. Frankly, its power to do so is far from certain—but this aside, it can have no effect by way of "expunging," "reversing," or "overruling" the Court's decision. It does not lessen the felt obligation of State supreme court judges to abide by those decisions (even assuming they would no longer be subject to the certainty of reversal for failure to do so), it leaves the matter uncertain in each separate state, it contemplates inconsistent (even contradictory) outcomes respecting the same clause from state-to-state, and it may generate an expectation that Congress will plunge equally into every area whenever the Court is felt to have gone "wrong."

Let me repeat that paragraph. I think it is, as we say in law school, on all fours.

For reasons I set forth much more elaborately in earlier testimony (a copy of which is enclosed), I think it immensely ill-advised of Congress to seek the "correction" of "unconstitutional" Supreme Court adjudications by an ad hoc reduction in federal court jurisdiction. Frankly, its power to do so is far from certain—but this aside, it can have no effect by way of "expunging," "reversing," or "overruling" the Court's decision. It does not lessen the felt obligation of state supreme court judges to abide by those decisions (even assuming they would no longer be subject to the certainty of reversal for failure to do so), it leaves the matter uncertain in each separate state, it contemplates inconsistent (even contradictory) outcomes respecting the same clause from state-to-state, and it may generate an expectation that Congress will plunge equally into every area whenever the Court is felt to have gone "wrong."

Madam President, I now address question 4. I asked various law professors several questions last year. This is one of the letters in response to several questions. In the fourth question I asked: "Does the Congress have the constitutional authority to remove Supreme Court jurisdiction over an issue like school prayer?"

This is the response of Professor Van Alstyne of Duke University Law School.

I might add that I really, earlier, had no ax to grind in these issues. That is, I wanted to get the best advice of the best legal scholars of the country. At random, I went down a list of law schools in the country and wrote this letter to all the law schools I selected. Those I selected were the law schools which I thought would give the most comprehensive response to my questions. I was not for the issue, and I was not against the issue. I just wanted to know what the legal scholars of our country felt about these proposals. So I wrote lots of letters and got back lots of responses.

I will say, Madam President, that by far, the vast, vast majority of responses were very much in opposition to removal of Supreme Court jurisdiction in constitutional questions. This letter is one response I received. I received many others and, during the course of this day and future days, I shall relate the other responses I received. Let me repeat the question: "Does Congress have the constitutional authority to remove Supreme Court jurisdiction over an issue like school prayer?" This is Professor Van Alstyne's response.

I have addressed this question in its more general form extensively in previous testimony, a copy of which is enclosed. For the reasons very elaborately reviewed in that testimony, I regard the question as very close. It is especially difficult insofar as Congress has never before attempted to employ its power over the appellate jurisdiction of the Supreme Court in this exact fashion, with a single exception, in 1868, which nonetheless failed to yield a useful holding (because Congress had, quite inadvertently, overlooked an alternative procedure by means of which the Supreme Court's appellate jurisdiction remained unimpaired).

The question as presented specifically in the Helms Bill goes directly to what many regard as an "essential function" of the Supreme Court, i.e., the power to provide an adjudicative uniformity of interpretation in respect to a constitutional clause clearly binding upon all state goverments, and with respect to which no department of any state government may therefore possess an unreviewable authority to construe in the state's own favor. The argument is based on certain language within Article III, certain presuppositions respecting the fourteenth amendment, and a good deal of the reasoning and rhetoric in Mr. Justice Story's famous opinion in Martin v. Hunter's Lessee. Despite the excellence (and personal attractiveness) of the argument, for reasons elaborately reviewed in my enclosed testimony, I doubt whether it is sound. To be blunt about the matter, I think it likely that Congress may, if it wishes, "federalize" the meaning of the fourteenth amendment by withholding from all inferior federal courts jurisdiction to decide such cases as raise the question, and by exerting its authority to make "exception" of all such cases from the appellate jurisdiction of the Supreme Court.

Let me add, however, that if I am mistaken in this view, i.e., mistaken in respect to the scope of congressional authority as expressly described in Article III of the Constitution, I think nothing whatever is added by attempting to rely upon Section Five of the fourteenth amendment. I add this seemingly obscure statement because of a recent article published by Raoul Berger which I think to be quite mistaken. It was formerly Mr. Berger's published position that the congressional power respecting federal court jurisdiction (and, specifically, its power to make exception to certain kinds of Supreme Court appellate jurisdiction) was extremely limited—much more limited than I believe to be the case. More recently, without receding at all from that general position, he has nonetheless suggested that so far as Supreme Court review is concerned with state court judgments respecting the interpretation of the fourteenth amendment in particular, Congress may freely cut off any such review under its power in Section Five of the fourteenth amendment to "enforce" the amendment. I entirely disagree. Should your Subcommittee hereafter find itself moved by that argument, I would at that time be pleased to respond.

Finally, in respect to the Helms Bill in particular, there is a difficulty with it that is not necessarily conclusive respecting the unwisdom of adopting it, but which I think the Subcommittee should consider. The Bill (quite understandably) does not attempt to oust federal court jurisdiction respecting cases involving involuntary prayers, but only those involving truly "involuntary" prayers. (And even then, it makes no exception for "voluntary" prayers if composed by state officials.) In brief, it acknowledges that if the case draws into question the constitutionality of an "involuntary" prayer, then a final state court judgement remains fully reviewable respecting its constitutional integrity just as in any other case.

Respectfully, however, a conscientious federal court (whether a district court of the Supreme Court itself) may find that the category of cases thus foreclosed from federal court adjudication on the merits *may* be an empty set. The voluntarism of a particular prayer is highly contextual. Because the Court's own view of the establishment clause has not required the Court generally to decide whether such prayers, in the setting of public schools, involving young children, are or are not "voluntary," it has yet not been obliged to decide that question. But the Helms Bill will force it to do so as a matter of determining its own jurisdiction—a determination it cannot avoid. My own impression is that, in *most* settings, a very persuasive argument can be made that such prayers are not truly "voluntary." Excusal procedures may be provided for objecting families—but recourse to such procedures may stigmatize the dissenting youngster and, depending upon the character of the community, the dominant sentiment of peer groups, and a considerable variety of other factors, exert an unavoidable duress. A court, adjudicating the jurisdictional question in this way, would then conclude that by definition the merits of the cases themselves have not been foreclosed from determination—and proceed at once to hold the public school "prayer" invalid under the establishment (and free exerise) components of the first amendment, as made applicable to the state through the fourteenth amendment.

V. Even if the Congress has such authority, as a matter of public policy is it advisable for the Congress to remove Supreme Court jurisdiction over constitutional issues generally or over the school prayer issue specifically?

At the general level of "advisability" of such a practice, I addressed that question in the (enclosed) prior testimony and thus will not repeat my views at any length. Briefly, I think it extraordinarily ill-advised of Congress, two centuries into the history of our Constitution, even seriously to consider selectively "silencing" the Supreme Court of the United States in respect to the adjudica-

tion of constitutional questions. The very idea that the fourteenth amendment might have sharply differing meanings (as would necessarily be the case if each of the fifty state supreme courts had finality of interpretation for all cases arising in that state), is deeply disturbing. The language of the amendment is imperative: in each of its three significant clauses, it provides that *no* state shall act to violate certain personal freedoms. There is no wisdom in arranging the judicial power to cut off the Supreme Court in a fashion which, operatively, means that the fourteenth amendment would effectively provide that "to the extent determined solely according to each state's own highest court, no state shall [violate certain fundamental, personal freedoms]."

The fourteenth amendment was not meant to be, and ought not be reduced to be, an unreliable set of bus coupons which may or may not be valid as each state decides purely to its own satisfaction to interpret. Not since 1789 have we been organized as a mere confederation. Regardless of one's private views about any particular Supreme Court decision, it is difficult to imagine how conscientious Members of Congress could desire that the fourteenth amendment should be treated no better than a treaty, with each state determining exclusively to its own satisfaction the extent to which it sees fit to interpret it and, accordingly, to consider itself bound by it.

The motivation in this instance so to dismember the fourteenth amendment among the states proceeds from the felt dissatisfaction of some with the manner in which the Supreme Court has interpreted that amendment—that the Court has "erred," and that a limited, surgical corrective, not involving the ordeal of amendment, is therefore in order. If one seriously is concerned with the integrity of constitutional interpretation, however, the device selected is hopelessly misguided. In many states, the state's own supreme court is much less insulated from political influence than is our own, national Supreme Court. Insofar as that is true (as it is in fact true), it necessarily means that the "constitutional" interpretations of such courts are even more likely to turn upon considerations of local influence—that they will possess considerable less integrity, as an original proposition, than what we now receive from the United States Supreme Court. Integrity of interpretation therefore, frankly cannot justify the measure now under consideration.

With respect to the Helms proposal in particular, if recast as a proposal to amend the constitution, thus to permit the resumption of public schools utilizing compulsory attendance laws and compulsory taxation as a means of inculcating the locally-prevailing religion through nominally voluntary prayers (each of which is plainly sectarian and cannot conceivably be otherwise), I do not think much of it but neither do I think it threatens the very foundations of the country. But if it is to be done, then when 'tis done, it were far better to be done as we have proceeded in the past: by an amendment which does not, as does this bill, essentially federalize and dismember the Constitution of the United States.

Madam President, as I mentioned earlier, I wrote various letters to various legal scholars, and I would now like to read the response of Professor Ratner, Legion Lex Professor of Law at the University of Southern California Law Center. This letter is dated September 4, 1981. It is addressed to me:

DEAR SENATOR BAUCUS: The following is in reply to your letter of July 27, 1981 concerning the proposal of Senator Helms to limit lower federal court and Supreme Court jurisdiction over the school prayer issue:

Questions 1 and 2: For over half a century it has been recognized, almost without dispute, that the First Amendment is made applicable to the states by the Due Process Clause of the Fourteenth Amendment. The Supreme Court has long held that the Due Process Clause protects "fundamental rights", and it would be difficult to identify rights more "fundamental" to the functioning of our democratic system than freedom of speech, free exercise of religion, and freedom from government establishment of religion. Indeed, it would be a curious kind of constitution that protected the speech and religion freedoms from undue intrusion by the federal government while allowing the states to flout them at will.

Questions 3, 4, and 5: On May 20, 1981, I testified before the Senate Subcommittee on the Constitution concerning Congressional power to limit the jurisdiction of federal courts, including the appelate jurisdiction of the Supreme Court. I believe that a transcript of the testimony is available. In addition, I submitted to the Subcommittee written statements on the matter, copies of which are enclosed herein.

Madam President, I now read a letter to the Senator from Utah (Mr. HATCH). This letter is dated May 28, 1981. The subject of the letter is regarding hearings before the Senate Subcommittee on the Constitution, "Congressional Power Over the Supreme Court's appellate jurisdiction." Again, this is Professor Ratner writing this letter:

Because I was the first to testify before the Subcommittee on May 20, I did not have the opportunity to reply to those who followed me on that date. I was not present on the following day, but have been furnished with the statement of William Van Alstyne. I am therefore taking the liberty of submitting this supplemental statement in response to some of the comments that relate to my position.

(1) The ambiguity of "essential functions." The essential functions test has been criticized as too ambiguous. That criticism seems to be directed primarily at the words "essential functions"; it does not consider the specific delineation of those functions in my statement to the subcommittee and in my article in 109 U. of Pa. Law Review 157. Of course the words "essential functions" taken alone are ambiguous. But the specification of those functions, namely, to maintain the uniformity and supremacy of the Constitution, laws and treaties of the United States, provides a workable standard for identifying the functions and their impairment. As indicated in my initial statement and in my article, as long as a significant avenue remains open for ultimate resolution by the Supreme Court of conflicts between state and federal laws or in the interpretation of federal law (including the Constitution), the Court's essential functions are not impaired. (A Supreme Court decision is not required in every case that involves such issues, and discretionary review through certiorari is as effective as mandatory review.)

(2) Plain meaning and the spirit of the Constitution. It was suggested that the plain meaning of the exceptions and regulations clause allows impairment by Congress of the essential function of the Court to maintain the uniformity, if not the supremacy, of federal law, but that the actual exercise of such congressional power would violate the "spirit of the Constitution." The "spirit of the Constitution," i.e., the plan and the goals of the Constitution, however, is the essence of the Constitution. Language, and particularly constitutional language, is inherently ambiguous. The exceptions and regulations clause has no plain meaning. It must be interpreted in the context of the overriding constitutional plan, i.e., in the context of the spirit of the Constitution. Thus interpreted it does not confer upon Congress unlimited control over the Court's appellate jurisdiction. "The letter killeth but the spirit giveth life."

(3) The absence of reference to the federal courts in the Supremacy Clause (Article VI). The Clause, which mandates the uniformity of federal law and its supremacy over state law, manifestly requires judicial enforcement and contains an express admonition to the state judges. The federal courts are expressly given power to enforce the Clause by Article III which extends the judicial power of the United States to cases arising under the Constitution, laws, and treaties of the United States and creates a single supreme federal tribunal with appellate jurisdiction over all such cases, whether initiated in federal or state courts, (subject to congressional exceptions and regulations).

(4) For about a century federal criminal cases (tried in two-judge circuit courts) could not be appealed to the Supreme Court. During this period, however, avenues for Supreme Court review remained available in federal criminal cases to resolve conflicting interpretations of the federal constitution and laws: (a) where the circuit judges were divided, they were required to certify the disputed question to the Supreme Court (see Hart and Wechsler's, The Federal Court and the Federal System (2nd ed.) 37); (b) a habeas corpus petition could be filed in the Supreme Court to test (i) constitutionality after conviction, (ii) probable cause for pre-trial commitment, which encompassed statutory, as well as constitutional, interpretation. (See Ratner, 109 U. of Pa. Law Review 196-201, and cases there cited.)

(5) Marshall's position. It has been urged that John Marshall, in early decisions, acknowledged unlimited congressional control over the Court's appellate jurisdiction. A careful reading of *Ex parte Bollman* (8 U.S. 75), *U.S. v. More* (7 U.S. 159), and *Durousseau v. U.S.* (10 U.S. 307), however, indicates that Marshall's views were as follows: (a) Congress has broad discretion in legislating exceptions to the Court's jurisdiction; (b) if Congress does not exercise that discretion the Court retains its full constitutional jurisdiction; (c) if Congress exercises the discretion by specifying cases to which the jurisdiction extends, those cases not designated are impliedly excepted. Marshall did not state that the discretion is unlimited nor undertake to determine its constitutional limits. But 11 years later, in *Cohen v. Virginia* (19 U.S. 264) he declared:

"[T]he necessity of uniformity, as well as correctness in expounding the constitution and laws of the United States, would itself suggest the propriety of vesting in some single tribunal, the power of deciding, in the last resort, all cases in which they are involve . . . . [The framers of the Constitu-

tion] declare, that in such cases, the supreme court shall exercise appellate jurisdiction. Nothing seems to be given which would justify the withdrawal of a judgment rendered in a state court, on the constitution, laws, or treaties of the United States, from this appellate jurisdiction."

I repeat: This is Justice John Marshall, father of the Supreme Court, in the case of Cohens against Virginia:

"[T]he necessity of uniformity, as well as correctness in expounding the constitution and laws of the United States, would itself suggest the propriety of vesting in some single tribunal, the power of deciding, in the last resort, all cases in which they are involved. . . . [The framers of the Constitution] declare, that in such cases, the supreme court shall exercise appellate jurisdiction. Nothing seems to be given which would justify the withdrawal of a judgment rendered in a state court, on the constitution, laws, or treaties of the United States, from this appellate jurisdiction."

(6) Support for the essential-functions test. It is asserted that the essential-functions limitation has no support in the cases, in the Federalist Papers, nor in any statement at the Constitutional Convention. In fact, the essential functions limitation is supported by cases, the Federalist Papers, and statements at the Convention.

(a) *Cases.* Marshall in *Cohens v. Virginia,* Story in *Martin v. Hunters Lessee,* and Taney in *Ableman v. Booth* all emphasize the essential function of the Supreme Court to maintain the uniformity and supremacy of federal law pursuant to the Supremacy Clause. They uphold the Court's jurisdiction to review, under section 25 of the first judiciary act, state court decisions involving the federal Constitution and laws not only because that jurisdiction is authorized by the Constitution but also because it is required by the Constitution. (See quotes in my prior statement pp. 6-8 and in 109 U. of Pa. L. Rev. at 166-167.) In *Ex parte McCardle* the Court, after acknowledging that congress had withdrawn its jurisdiction to hear *an appeal* from a circuit court decision denying habeas corpus to the defendant, recognized the need to preserve its essential appellate functions by emphasizing that it still retained jurisdiction under the Judiciary Act of 1789 to review on a direct petition for habeas corpus the constitutionality of the circuit court's decision. (See prior statement p. 9 and 109 U. of Pa. L. Rev. 178-180.) A few months later in *Ex parte Yerger* (75 U.S. 85) the Court affirmed its jurisdiction to review on direct petition for habeas corpus the constitutionality of a circuit court decision denying the ge a16se6168writ, despite the congressional withdrawal of habeas corpus appeal, and strongly intimated that Congress lacked the power to impair its essential appellate functions by depriving it of all habeas corpus jurisdiction, stating (75 U.S. at 96-103):

"We agree that [the jurisdiction] . . . is given subject to exception and regulation by Congress; but it is too plain for argument that the denial to this court of appellate jurisdiction in this class of cases must . . . seriously hinder the establishment of that uniformity . . . which can only be attained through appellate jurisdiction. . . . These considerations forbid any construction giving to doubtful words [in the statute] the effect of withholding or abridging this jurisdiction. They would strongly persuade against the denial of the jurisdiction even were the reasons for affirming it less cogent than they are."

There is broad language in some of the cases referring to unlimited congressional control over the Court's appellate jurisdiction, (see *Wiscart v. D'Auchy* (3 U.S. 321), *Barry v. Mercein* (46 U.S. 103), *The Francis Wright* (105 U.S. 381)), but the statements are generalized dicta. No case holds that Congress has the power to impair the Court's essential uniformity-supremacy functions because no case involved such an impairment except *Ex parte Yerger* which strongly rejected it.

(b) *The Constitutional Convention.* Numerous statements at the Convention recognized the Supreme Court's appellate jurisdiction as constitutionally essential to maintain the uniformity and supremacy of federal law. In discussing proposals to give the Supreme Court a veto over congressional and/or state legislation, proponents and opponents alike agreed that the Court would at least have ultimate authority to decide the constitutionality of state and federal legislation. In successfully opposing the constitutional establishment of inferior federal courts, Rutledge of South Carolina, a strong states-rights advocate, urged that "the state tribunals might and ought to be left in all cases to decide in the first instance, the right of appeal to the supreme national tribunal being sufficient to secure the national rights and uniformity of judgments." Madison, replying to the question of what redresses would be available if a state imposed prohibited export duties stated: "There will be the same security as in other cases—the jurisdiction of the Supreme Court must be the source of redress. So far only had provision been made by the plan against injurious acts of the States." And by defeating a motion that would have allowed the Supreme Court to exercise appellate jurisdiction "in such manner as the legislature shall direct," the Convention rejected a clear statement of plenary congressional power over that jurisdiction. (See Farrand, *Records of the Constitutional Convention* 79, 97, 109, 124; 2 Farrand, 76, 78, 425, 431, 589; 109 U. of Pa. L. Rev. 161-165, 172-173.)

(c) *The Federalist Papers.* The writings of Madison and Hamilton in *The Federalist* provide further confirmation of the essential functions of the Court.

Madison: (No. 22) "If there is in each state a court of final jurisdiction, there may be as many different final determinations on the same point as there are courts. . . . To avoid the confusion which would unavoidably result from the contradictory decisions of a number of independent judicatories, all nations have found it necessary to establish one court paramount to the rest, possessing a general superintendence, and authorized to settle and declare in the last resort a uniform rule of civil justice."

Madison: (No. 39) "It is true that in controversies relating to the boundary between the two jurisdictions [nation and state], the tribunal which is ultimately to decide is to be established under the general government . . . Some such tribunal is clearly essential to prevent an appeal to the sword and a dissolution of the compact."

Hamilton: (No. 80) "If there are such things as political axioms, the propriety of the judicial power of the government being coextensive with its legislative may be ranked among the number. The mere necessity of uniformity in the interpretation of the national laws decides the question. Thirteen independent courts of final jurisdiction over the same causes, arising upon the same laws, is a hydra in government, from which nothing but contribution and confusion can proceed."

Hamilton: (No. 81) "That there ought to be one court of supreme and final jurisdiction, is a proposition which is not likely to be contested."

Hamilton: (No. 82) "[T]he national and state systems are to be regarded as *one whole.* The courts of the latter will of course be natural anxiliaries to the execution of the laws of the Union and an appeal from them will as naturally lie to that tribunal [the Supreme Court of the United States] which is destined to unite and assimilate the principles of national justice and the rules of national decision."

Sincerely,

LEONARD G. RATNER,
Legion Lex Professor of Law.

I think it is interesting to note that Professor Ratner did not even bother to write a concluding paragraph because the statements of Alexander Hamilton and James Madison in the Federalist Papers being so clear on this point.

It is clear, Madam President, that our Founding Fathers writing the Constitution, looking at the history of the Constitution as we look at the Federalist Papers, all clearly contemplated the essential supremacy of the U.S. Supreme Court to bring our country together as a whole, as a union, as one country.

We also have a system of federalism. We have our State judiciaries. We have our State courts, our State governments. It is by necessity a kind of compromise between one National Government and 50 separate State governments. But certainly if our country is to remain one country, that is not 50 separate countries, we have to have one single tribunal deciding Federal constitutional court issues.

I am not saying we have to have one tribunal deciding State constitutional questions, not at all. Each of the various States has its own State judiciary system to decide State issues, including State constitutional questions. But certainly in fact it goes without saying with respect to Federal constitutional issues if our country is to remain as a whole, as one country, a strong country let alone a country at all we have to have one tribunal, one Supreme Court deciding Federal constitutional issues.

(Mr. EAST assumed the chair).

Mr. BAUCUS. Mr. President, I now have a statement presented to the Senate Subcommittee on the Constitution. This is another statement by Professor Ratner who is Legion Lex Professor of Law at the University of Southern California. The title is "Congressional Power Over the Appellate Jurisdiction of the Supreme Court." Here is what he said:

U.S. SENATE SUBCOMMITTEE ON THE CONSTITUTION: STATEMENT OF LEONARD G. RATNER, LEGION LEX PROFESSOR OF LAW, UNIVERSITY OF SOUTHERN CALIFORNIA

A. CONGRESSIONAL POWER OVER THE APPELLATE JURISDICTION OF THE SUPREME COURT

Article III of the Constitution defines the judicial power of the United States, creates the Supreme Court, and identifies the jurisdiction of that Court. The original jurisdiction of the Court (as a court of first instance) is limited to cases affecting ambassadors, public ministers, and consuls or in which a state is a party, and cannot be modified by Congress. The Court, however, is given appellate jurisdiction, both as to law and fact, over all other cases to which the judicial power of the United States extends "with such exceptions and under such regulations as the Congress shall make" (emphasis added). The language, though not the holdings; of some earlier Supreme Court cases suggests that the exceptions and regulations clause gives congress unlimited control over the appellate jurisdiction of the Court, but such an interpretation is not consistent with the constitutional plan and modern judicial approval of such an interpretation is doubtful. (See Ratner. "Congressional Power Over the Appellate Jurisdiction of the Supreme Court," 109 U. of Pa. L. Rev. 157 (1960); Hart, "The Power of Congress to Limit the Jurisdiction of Federal Courts: An Exercise in Dialectic," 66 Harv. L. Rev. 1362 (1953); Roberts, "Now is the Time: Fortifying the Supreme Court's Independence," 35 A.B.A.J. 1 (1944); Levy, "Congressional Power Over the Appellate Jurisdiction of the Supreme Court: A Reappraisal," 22 N.Y.U. Intra. L. Rev. 178 (1967); Sedler, "Limitations on the Appellate Jurisdiction of the Supreme Court," 20 U. Pitt. L. Rev. 99 (1958); Brant, "Appellate Jurisdiction: Congressional Abuse of the Exceptions Clause," 53 Ore. L. Rev. 3 (1973); Van Alystyne, "A Critical Guide to Ex Parte McCardle," 15 Ariz. L. Rev. 229 (1973); Senator Thomas Kuchel, "Shall the Federal Judiciary Become Subservient to the Congress" (speech, 88th Congr. 2nd Sess.) 110 Congressional Record No. 172, Sept. 9, 1964; Douglas and Black dissenting in *Glidden Co.* v. *Zdanok* 370 U.S. 530 (1960): "There is a serious question whether the McCardle case [upholding a narrow limitation on the Supreme Court's appellate jurisdiction] would command a majority today." But cf. Wechsler, "The Courts and the Constitution," 65 Colum. L. Rev. 1001 (1965).

Constitutional authority to create and abolish inferior federal courts gives Congress plenary control over their jurisdiction (see B below). If Congress also has plenary control over the appellate jurisdiction of the Supreme Court, then Congress may constitutionally do any of the following:

(1) Deprive the Supreme Court of all appellate jurisdiction and abolish the lower federal courts, thereby confining the judiciary of the United States to a single court exercising original jurisdiction over cases affecting ambassadors, public ministers, and consuls, or in which a state is a party.

(2) Deprive the Supreme Court of appellate jurisdiction and other federal courts of all jurisdiction over cases involving the validity, under the Constitution, of state statutes or the conduct of state officials, thereby leaving to the highest court of each state the final determination of such questions.

(3) Deprive the Supreme Court of appellate jurisdiction over any case arising under the Constitution, laws, or treaties of the United States, thereby allowing the federal courts of appeals and the highest state courts to become, in their respective jurisdictions, the final interpreters of federal law.

If such legislation were permissible, Congress could by statute profoundly alter the structure of American government. It could all but destroy the coordinate judicial branch and thus upset the delicately posed constitutional system of checks and balances. It could distort the nature of the federal union by permitting each state to decide for itself the scope of its authority under the Constitution. It could reduce the supreme law of the land as defined in article VI to a hodgepodge of inconsistent decisions by making fifty state courts and eleven federal courts of appeals the final judges of the meaning and application of the Constitution, laws, and treaties of the United States.

One of the most significant aspects of the federal union is disclosed by the declaration in article VI of the Constitution that "this Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding." This constitutional mandate requires (a) that there shall be one supreme federal law throughout the land and (b) that in the event of conflict between that law and the law or authority of any state, the federal law shall prevail.

The supremacy clause standing alone, however, is no more than an exhortation. A tribunal with nationwide authority is needed to interpret and apply the supreme law. Such a tribunal is created by article III, which vests the judicial power of the United States in one Supreme Court and such inferior courts as Congress may establish and extends that power to every case involving the supreme law of the land. The only court created by the article is designated as supreme in contrast to the inferior courts which Congress in its discretion may establish. That court alone is expressly given appellate jurisdiction over cases involving the supreme law of the land whether those cases are initiated in state or federal courts. It is thus the constitutional instrument for implementing the supremacy clause. As such, its essential appellate functions under the Constitution are: (1) to provide a tribunal for the ultimate resolution of inconsistent or conflicting interpretations of federal law by state and federal courts, and (2) to provide a tribunal for maintaining the supremacy of federal law, including the Constitution, when it conflicts with state law or is challenged by state authority.

The process of carrying out these functions is necessarily a flexible one. A Supreme Court decision is not required in every case that involves a state challenge to federal law or an interpretation of federal law in conflict with other cases. A measure of inconsistency in the interpretation and application of federal law is inevitable, and immediate correction is not always imperative. But some avenue must remain open to permit ultimate resolution by the Supreme Court of persistent conflicts between state and federal law or in the interpretation of federal law by lower courts. For this purpose discretionary review through certiorari can be as effective as mandatory review by writ of error or appeal. Although these essential functions would not ordinarily be disrupted by a procedural limitation restricting the availability of Supreme Court review in some but not all cases involving a particular subject, legislation denying the court jurisdiction to review any case involving that subject would effectively obstruct those functions in the proscribed area.

These essential Supreme Court functions were confirmed by the Constitutional Convention, which recognized that the Supreme Court's appellate jurisdiction was required to effectuate the Supremacy Clause. As stated by Rutledge of South Carolina, a strong states-rights advocate: ". . . the right of appeal to the supreme national tribunal [is] sufficient to secure the national rights and uniformity of judgments."

Those were the words of Mr. Rutledge of South Carolina, a strong States' rights advocate. I repeat, a strong States' rights advocate. He says that

The right of appeal to the supreme national tribunal [is] sufficient to secure the national rights and uniformity of judgments. (1 Farrand, Proceedings of the Constitutional Convention 124 (1911). See also The Federalist Papers (Ford ed. 1898) Nos. 22 and 39 (Madison), Nos. 80, 81, and 82 (Hamilton). And, by defeating a motion that would have allowed the Supreme Court to exercise appellate jurisdiction "in such manner as the legislature shall direct" (1 Farrand 425, 431), the Convention rejected plenary Congressional power over that jurisdiction. (See Ratner, supra, 172–73.)

The narrower interpretation of "exceptions and regulations" is supported by dictionaries and treatises in use at the time of the Convention. They indicate that in a legal context an exception cannot destroy the essential characteristics of the broader subject to which it applies and that regulations usually specify conditions for engaging in certain conduct, and sometimes forbid a particular act, but do not ordinarily prohibit the entire activity that is subject to regulation. (See Ratner, supra, 168–171.)

Form an early date the Supreme Court itself has explicitly recognized that its indispensable functions under the Constitution are to resolve conflicting interpretations of federal law and to maintain the supremacy of that law when it conflicts with state law or is challenged by state authority. These functions were delineated in three notable decisions which confirmed the Court's statutory jurisdiction to review cases originating in state courts.

In *Martin* v. *Hunter's Lessee*, 14 U.S. (1 Wheat.) 304 (1806), Story, holding that the Supreme Court could constitutionally review state court decisions involving federal questions as provided by section 25 of the Judiciary Act, noted "the importance, and even necessity of uniformity of decisions throughout the whole United States, upon all subjects within the purview of the constitution." Without a reversing authority to harmonize discordant judgments, he declared, "the laws, the treaties and the constitution of the United States would be different, in different areas. . . . The public mischiefs that would attend such a state of things would be truly deplorable; and it cannot be believed, that they could have escaped the enlightened convention which formed the Constitution. . . . [T]he appellate jurisdiction must continue to be the only adequate remedy for such evils."

In *Cohens* v. *Virginia*, 19 U.S. (6 Wheat.) 264 (1821), Marshall, upholding the Court's authority to review on writ of error a crimi-

nal conviction by a state court involving the interpretation of a federal statute, stated:

"[T]he necessity of uniformity, as well as correctness in expounding the constitution and laws of the United States, would itself suggest the propriety of vesting in some single tribunal, the power of deciding, in the last resort, all cases in which they are involved."

"[The framers of the Constitution] declare, that in such cases, the supreme court shall exercise appellate jurisdiction. Nothing seems to be given which would justify the withdrawal of a judgment rendered in a state court, on the constitution, laws, or treaties of the United States, from this appellate jurisdiction."

And in *Ableman* v. *Booth*, 62 U.S. (21 How.) 506 (1858), Taney, holding that state courts had no jurisdiction to issue habeas corpus for persons in federal custody and that the Supreme Court could review by writ of error the issuance of habeas corpus by state courts in such cases, stated:

"But the supremacy thus conferred on this Government [by the supremacy clause] could not peacefully be maintained, unless it was clothed with judicial power, equally paramount in authority to carry it into execution; for if left to the courts of justice of the several States, conflicting decisions would unavoidably take place . . . and the Constitution and laws and treaties of the United States, and the powers granted to the Federal Government, would soon receive different interpretations in different States, and the Government of the United States would soon become one thing in one State and another thing in another. It was essential, therefore, to its very existence as a Government, that . . . a tribunal should be established in which all cases which might arise under the Constitution and laws and treaties of the United States, whether in a State court or a court of the United States, should be finally and conclusively decided. . . . And it is manifest that this ultimate appellate power in a tribunal created by the Constitution itself was deemed essential to secure the independence and supremacy of the General Government in the sphere of action assigned to it; [and] to make the Constitution and laws of the United States uniform, and the same in every State."

The foregoing cases upheld the Court's jurisdiction to review state court decisions under section 25 of the Judiciary Act not only because that jurisdiction was authorized by the Constitution, but also because it was required by the Constitution. The implication of these decisions is that Congress could not constitutionally deny such jurisdiction to the Court.

Many Supreme Court cases have dealt with specific statutory limitations upon the appellate jurisdiction of the Court. While a few contain broad and ambiguous language suggesting that the "exceptions and regulations" clause confers unlimited congressional power over that jurisdiction, none holds that Congress has power to impair the Court's essential functions.

That is, no case has directly decided that issue or stated that result; that is, "none holds that the Congress has the power to impair the Court's essential function." Not one case; none.

In every case the Court either found no limitation on its jurisdiction or upheld a limitation that did not impair those functions. *Ex Parte McCardle*, 74 U.S. (7 Wall.) 506 (1869) is the case most frequently said to authoritatively uphold plenary congressional power, but it does not. In 1867 Congress had authorized an appeal to the Supreme Court from circuit court decisions denying habeas corpus. Previously the Court could review such decisions only by issuing an original writ of habeas corpus under the authority granted by section 14 of the Act of 1789. McCardle, a civilian convicted by a military commission of obstructing reconstruction, asserted the unconstitutionality of the Reconstruction Acts and took an appeal to the Supreme Court, as authorized by the Act of 1867, from the denial of habeas corpus by a circuit court. After a government motion to dismiss the appeal was denied, but before decision on the merits, Congress, fearing the Court was about to invalidate the Reconstruction Acts, repealed that portion of the Act of 1867 authorizing such appeals. The Court upheld the validity of the repealing statute and dismissed the appeal, stating that "it is hardly possible to imagine a plainer instance of positive exception . . . . Without jurisdiction the court cannot proceed at all in any case." But the Court carefully pointed out that the repeal did not effect its jurisdiction to issue writs of habeas corpus under section 14 of the earlier Act of 1789:

"Counsel seem to have supposed, if effect be given to the repealing act in question, that the whole appellate power of the court, in cases of *habeas corpus*, is denied. But this is an error. The [repealing] act of 1868 does not except from that jurisdiction any cases but appeals from the Circuit Courts under the act of 1867. It does not affect the jurisdiction which was previously exercised."

Clearly the language of *Ex parte McCardle* does not sanction congressional impairment of the essential constitutional functions of the Supreme Court. The statute there upheld did not deprive the Court of jurisdiction to decide McCardle's case; he could still petition the Supreme Court for a writ of habeas corpus to test the constitutionality of his confinement. The legislation did no more than eliminate one procedure for Supreme Court review of decisions denying habeas corpus while leaving another equally efficacious one available.

In contrast with its original jurisdiction, the Supreme Court's appellate jurisdiction under the Constitution is an extensive one, arising not only from the presence of federal questions but also from the status or citizenship of the parties, encompassing issues of both law and fact, and extending to cases which originate in state as well as federal courts. Orderly procedures for invoking that jurisdiction and a method of adjusting it to changing social needs and political attitudes are required. It is reasonable to conclude, therefore, that the Convention gave Congress authority to specify such orderly procedures and to modify the jurisdiction from time to time in response to prevailing social and political requirements, within the limits imposed by the Court's essential constitutional role. It is not reasonable to conclude that the Convention gave Congress the power to destroy that role. Reasonably interpreted the clause means "With such exceptions and under such regulations as Congress may make, not inconsistent with the essential functions of the Supreme Court under this Constitution."

Congressional legislation that restricts the procedures for obtaining Supreme Court review does not transgress constitutional limitations so long as the Court remains available ultimately to resolve conflicting interpretations of federal law and conflicts between state and federal law. But legislation that precludes Supreme Court review in any case that involves a particular subject, such as school prayers or abortion, is an unconstitutional encroachment on the Court's essential functions.

Mr. President, I have a concluding section addressed to congressional power over the jurisdiction of lower Federal courts. That is part of the issue involved here, although as far as the Senator from Montana is concerned, the more important question—the more important and dangerous question—is whether Congress should limit Supreme Court jurisdiction or the jurisdiction of lower Federal courts.

B. Congressional Power Over the Jurisdiction of Lower Federal Courts

Article III confers the judicial power of the United States on "such inferior courts as the Congress may . . . establish." Congressional power to create such courts implies plenary power to specify their jurisdiction. But this congressional power must be exercised in accordance with such constitutional controls as due process and equal protection which limit the exercise of all congressional power.

A congressional statute that withdraws from lower Federal courts jurisdiction to enjoin the enforcement of a particular kind of law, such as laws permitting voluntary school prayers or limiting abortion, presents both due process and equal protection problems. Litigants must have effective access to the courts to challenge the constitutionality of State or Federal laws. In some cases an injunction, or perhaps a declaratory judgment, may be the only effective remedy to prevent enforcement of an unconstitutional law, either because the risk of a criminal defense is to "chilling" or because no criminal statute is involved.

If Federal courts are precluded from giving such preemptive relief, a plaintiff may seek such a remedy in a State court, with ultimate review by the U.S. Supreme Court, but if the appropriate State court is denied the necessary jurisdiction under State law, the plaintiff may be cut off from an effective judicial remedy in violation of due process of law. The combined denial of Federal and State jurisdiction amounts to a denial of the plaintiff's claim without an opportunity to be heard.

Assuming such relief is available in the State courts, a denial of Federal relief to plaintiffs attacking the constitutionality of laws permitting voluntary school prayers or limiting abortion, but not to plaintiffs attacking the constitutionality of other kinds of laws, may constitute a denial of equal protection of the laws. Such an apparently invidious distinction must be justified by a rational basis; that is, by a socially useful purpose. If the purpose is to inhibit Federal judicial consideration of the constitutionality of laws that permit voluntary school prayers or limit abortion, that purpose may be a constitutionally impermissible encroachment on the constitutional power of the courts to determine constitutionality that cannot provide a rational basis for the invidious distinction.

Mr. President, I have been concerned about this issue for some time. In December of last year, I sent a report to my constitutents in my home

State. I would like to read the report. It is a very short statement. I would like to read it into the RECORD at this time.

CONGRESS AND THE COURTS

The genius of America's form of government, as any high school student learns, is its complex system of checks and balances.

By creating three independent branches in their new government—Congress, the courts and the executive—the Founding Fathers tried to make sure no single person or group could ever gain absolute control over the entire government.

This principle has survived two turbulent centuries. Now, however, a disturbing threat has appeared. The separation of powers between the three branches is being challenged by some who disagree with recent Supreme Court decisions on the so-called "social issues," abortion, school prayer and school busing.

Opponents of these decisions, chiefly the New Right, thus far have failed to gain passage of constitutional amendments overruling the Court. So they're trying to remove these issues from the jurisdiction of the Supreme Court and lower federal coutrs.

More than 20 such bills are before Congress this year. One would prohibit federal courts from deciding abortion cases. Another would take away the Supreme Court's jurisdiction over cases involving school prayer. A third would prevent court action on school busing disputes.

Contrary to the claims of their proponents these measures would not outlaw abortion and school busing or legalize school prayer. The only result would be the Supreme Court would no longer provide a uniform, national interpretation of the Constitution. Instead state courts would be given the last word.

Supporters of these bills argue that the Supreme Court acted unconstitutionally in deciding these cases by usurping Congressional authority. However, I believe these bills are an unconstitutional attempt to address that concern. Even if the Supreme Court acted unconstitutionally, Congress should not prescribe an unconstitutional cure. After all, two wrongs do not make a right.

The critical question is not whether a Supreme Court decision is constitutional, but who decides whether it is. Since 1803 the Court has fulfilled that function. But Congress would usurp this authority if these bills pass.

Once Congress takes the first step toward limiting court jurisdiction, who knows where it will stop. If Congress can take away the Supreme Court's jurisdiction over school prayer, could a pro-gun control Congress take away the court's ability to rule on the "right to bear arms?"

There is a way to reverse troubling Supreme Court decisions—the constitutional amendment process that has worked effectively for 200 years. Let's not undermine our system of government by taking constitutional short cuts.

Mr. President, I have spoken now for a couple of hours on this point. It is an issue in which I believe very, very strongly. I think it is fundamental to our form of government. It is fundamental to our lives as Americans, because our lives as Americans depend so deeply upon the Bill of Rights. They depend so much on Federal constitutional rights.

Sometimes, Mr. President, those rights are very clear; sometimes they are not so clear. Certainly, we know that, as a general proposition, under the first amendment, American citizens have the right of free speech. We also have the right of free press. We as American citizens can say what we want about our Government. We can criticize our Government, we can praise our Government, we can say what we want about our Government.

We as Americans can establish our newspapers. We can print, we can publish, we can write books on any subject. There are some limitations—libel, for example—but as a general proposition, we have a right to free speech.

When we get to those shady areas; that is, when Congress attempts to pass limitations on free speech or when Congress attempts to limit freedom of the press, then the question is who is to decide whether or not the Bill of Rights allows that person to continue to speak or whether the Bill of Rights prevents that action by Congress which may attempt to limit freedom of speech or the freedom of the press? The answer, Mr. President, is the Court decides; the Supreme Court decides.

I think it is crucial. It is obvious to me that it has to be the Supreme Court that decides those issues. It cannot be 50 separate State courts to decide freedom of speech, for example, or any other constitutional right. It has to be one tribunal. It is for that reason that I have taken the floor today and shall continue to take the floor, because I believe that if we ever pass a statute which prohibits the U.S. Supreme Court from reviewing any constitutional issue, we shall be sliding down the slippery slope toward obliteration and destruction not only of the Supreme Court, but the U.S. Constitution. If anything should be certain in our complex lives these days, it is the Constitution. We have to keep the Constitution. I think, therefore, it is important for all of us who are interested in this issue to keep talking and address this issue so we may maintain those protections.

Mr. President, the underlying amendment is not a school prayer amendment, it is a court-stripping amendment. It limits Supreme Court review. We cannot allow court stripping under our Constitution.

I might add, as I said earlier today, Mr. President, not one single witness in the Senate or its committees, either in this Congress or any prior Congress, has testified on this issue, the issue being prohibition of Supreme Court review over the issue of school prayer. Not one witness. And here we are today, faced with an amendment, a provision, an attempt to prohibit the Supreme Court from reviewing the constitutional issue of school prayer. Yet there has not been one hearing on this issue before the Senate. I might add the other body, the House, has addressed this issue and has uniformly turned down such requests.

At this time, I ask unanimous consent that I may yield to the Senator from Connecticut without losing my right to the floor; that, upon being recognized again, the continuation of my speech not count as a second speech according to rule XVIII; and that I be allowed to leave the Chamber if I so desire.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered. The Chair recognizes the Senator from Connecticut.

Mr BAUCUS. I thank the Chair. I thank the Senator from Connecticut.

Mr. WEICKER. Mr. President, I should like first to thank the distinguished Senator from Montana and express my admiration of him for his very articulate and eloquent presentation on the matter of stripping the courts of this country of their jurisdiction, especially as it applies to the various social issues that we have had here, on the floor of the Senate. He has been a valued ally in the weeks past. His steadfastness certainly has managed to bring us to the successful point at which we stand right now.

As he has made clear, Mr. President, it is not in any way his position to pass upon matters of busing, school prayer, abortion, or whatever, but rather, to advocate most forcefully the independence of our judiciary system and the necessity to preserve the concept of three separate but equal branches of Government. I think he has done this well and I think because of his efforts, we stand a good chance of leaving the constitutional apparatus intact during this particular session of the Congress.

Whereas I agree with the comments and the substance of what it is the Senator from Montana has been saying, I also have no hesitation in getting into this matter of substance as it applies to the amendment of the distinguished Senator from North Carolina relating to prayer in school. In other words, I not only object to the procedure, I also object to the substance. The same held true certainly on the previous debate. It was not just a matter of procedures related to the abortion amendment, but also the substance.

It will be my intention this afternoon to address myself to the matter of substance. I do not want a State religion in this country. I do not want a State prayer in this country.

That very simply is the issue that sits before this body. There is no prohibition on prayer or on the practice of one's faith as the law exists in this country today.

Everybody is totally free to express their religious beliefs. It is the totality

of that freedom which bothers some. That is what is at issue, the feeling on the part of some that in some way this particular act should be proscribed by governmental authority.

I find it strange, indeed, that this amendment should come from one on the conservative side of the philosophical spectrum. It seems to me the ultimate good to be desired, as far as a conservative philosophy is concerned, is to bring to pass the greatest amount of freedom, not in any way to diminish it or restrict it.

It seems to me that what is to be desired by those on the conservative side of the political spectrum is to assure that the Constitution of the United States is strictly construed.

This amendment is not a strict construction of the Constitution. This is the very loosest of interpretations that is being attempted to be legislated into law. Freedom, total freedom, complete freedom to espouse one's religious beliefs, without any restriction, without any diminution of one's capacity to believe, to pray if that is what is called for in the faith, to proclaim to one's neighbors one's religious beliefs—that is a strict construction. Yet what is being advocated here is a State religion, a State faith, a State prayer.

It sounds a little frightening when you use the word "State" before it, but that is exactly what it is. Nobody is advocating an Episcopalian prayer. Nobody is advocating a Roman Catholic prayer. Nobody is advocating a Baptist prayer or a Jewish prayer. Rather, it is a State prayer.

Last time I rose to speak, I commented on the fact that anything deemed acceptable would be sort of a mishmash of a variety of beliefs and therefore meaningless in a religious sense, but I think that is being too soft on the case. Anything that is written by local government or State government or the U.S. Government that is prayer becomes a State prayer.

Now, who desires that their family, any part thereof or themselves, be subject to the recitation of a State prayer?

I am sure those of the majority faith in this Nation envisage that whatever prayer it is, it is going to be roughly along the lines of what they believe, but that is not so. Or maybe even the next faith in line in terms of numbers, maybe they believe it will be roughly along the lines of what they believe. That is not so at all. Or maybe those of the Jewish persuasion think it will be roughly what they believe in the Judeo-Christian tradition.

No. This is to be a State prayer, a State prayer that accommodates itself and is acceptable to the Constitution of the United States.

That is a rather difficult task. The Constitution of the United States is very specific. The first amendment States:

Congress shall make no law respecting establishment of religion or prohibiting the free exercise thereof.

Here I am arguing against a piece of legislation. This is not just a debate in some forum on the streets of America. This debate is taking place on the floor of the Senate which, as far as I understand, is a part of the Congress. "Congress shall make no law respecting establishment of religion or prohibiting the free exercise thereof."

What are we doing? What is this?

I do not think this is a sense-of-the-Senate resolution. We are arguing an amendment to the debt limit bill. When it passes, and assuming it is passed by the House, the conferees agree, and the President signs it, it is law.

How do we reconcile that with: "Congress shall make no law respecting establishment of religion or prohibiting the free exercise thereof"?

On a procedural basis, there is no way that I am going to reject my oath of office. I took an oath of office to the Constitution. Never mind the substance of the prayer; procedurally, I do not see how we can constitutionally accomplish what is being proposed to us today, in effect, the making of a law, in this instance as it applies to prayer. Now, unless prayer all of a sudden has become a nonreligious act, then why is everybody in such an uproar?

Congress shall make no law respecting establishment of religion or prohibiting the free exercise thereof.

Who is to say whether or not, in whatever prayer is devised, every religion is encompassed? And if they are not included in the prayer, is it then not an embarrassment to those who have not been included? Therefore, the free exercise of their religion is no longer as free when we get through with this particular legislative exercise as when we started.

I do not want a State prayer. I do not want a State faith. I do not want a State religion. What I believe in terms of religion is my own business and nobody else's. I think that applies to the other 200 million people in this country.

It would be very easy if, indeed, these social issues encompasssed merely differences of philosophy as to the appropriate province of Government activity, that is, what should our economic policy be.

Are we going to have Keynesian economics or are we going to have supply-side economics, and so on down the list? Are we going to listen to Mr. Galbraith or Mr. Janeway? What do our social policies consist of, in the sense of whether we are going to have a CETA program or UDAG? None of these matters is in derogation of the Constitution. They are all proper matters for Government. So you take your lumps, up and down, and win some and lose some.

Why this persistence by a few Senators out here on the floor to obstruct—I believe that was the term used—the will of those who are presenting these kinds of amendments? Because, one, they are blatantly unconstitutional in terms of procedure. They are an end run around the amending process of the Constitution, and they are blatantly unconstitutional in terms of their substance.

The saying goes, "Well, then, let the President decide," or, "Let the Supreme Court decide." That is not the role of leadership; and I certainly look upon my 99 colleagues as being just that—they truly are leaders. These are not matters that can be bucked to the next department, be it the executive or the judiciary.

Mr. President, there will be no retreat on this matter. We started out almost 11 months ago. The issue then was busing. At least, that was the issue as verbally framed by the distinguished Senator from North Carolina. We were arguing, in the matter of the Helms-Johnston amendment, busing. Of course, busing was not the issue. The issue, very simply, was what has been spoken to so eloquently during the course of the afternoon by the Senator from Montana. The issue was three separate but equal branches of Government and whether or not the Senate of the United States had the right to tell the courts what to do. That was the issue.

When we started out on that debate 11 months ago, everybody said that Helms-Johnston would be adopted in a matter of 48 hours. It finally was adopted after 9 months and is sitting in the freezer over in the House, which is exactly where it belongs, because under any other conditions of temperature, it would reek to high heavens, so it is best put on ice.

During the course of those 9 months, the American people came to understand that what was involved here was a great constitutional debate. That was not the case when we started. It was busing. We carefully pointed out that if the principle that was being argued in the case of black schoolchildren and discrimination against them, the principle of the Senate being able to tell the courts what to do or not to do, was upheld or voted upon or supported legislatively, then indeed the Senate of the United States could tell the courts what to do insofar as any other citizen of this Nation was concerned.

Maybe it would be that it was unpopular to be elderly. Why, then, could we not go ahead and tell the courts what to do or what not to do in terms of protecting the rights of elderly citizens of this Nation? Maybe it would be unpopular to be a business-

man, and maybe if we did not like what the courts did in upholding the constitutional rights of businessmen, we could tell the courts they could not protect those rights.

Maybe it would be unpopular to be retarded or to be disabled, and that retarded or disabled person would go to the courts for haven; and the Senate, not liking the decision of the court—probably in a monetary sense, let us say—could tell the courts what they could do on behalf of that retarded or disabled person.

Slowly, the country came to understand that the issue was not busing; that the remedy applied to black schoolchildren had nothing to do with that; that, rather, it had to do with the fact that every citizen of this Nation is best protected when he or she has three separate but equal branches of Government to defend their rights.

Certainly, Government would be simpler if we could sort of fold it all into one, but then the citizens of the Nation would be confronted with the fact that they have only one swing at the pitch—only one branch of Government to protect them.

Tell me something: Does everybody want to place their future in the hands of 100 politicians on the floor of the U.S. Senate? Or would you rather have 100 Senators, 435 Representatives, 1 President of the United States, and the countless judges who make up the Federal judiciary?

Therein lies the greatest protection for every one of us. But that was not understood as the debate started on the Helms-Johnston amendment. As the debate progressed, slowly but surely, the news media and the editorial writers and the public came to understand that a very basic principle was involved; that it was worth protecting; and that, regardless of what the temperament of the times was about the act of busing, the fact was that we wanted our courts to remain free; that we did not want 100 politicians determining the future for each of the 200 million American citizens.

I understand what the polls say on school prayer. Everybody is supposed to be sensitive to this, especially those who are running for election. I suppose the poll results in Connecticut are not much different from those across the Nation. People say, "I would like to have prayer in the public schools." The first thing I want everybody to do, as a matter of the education process—and that is not a matter of just educating Senators; this body is no more than a reflection of what the American people think and feel and speak out on—the first thing we are all going to do is to recognize that the Constitution says, right off the crack of the bat, in the first amendment, that Congress shall make no law respecting the establishment of religion or prohibiting the free exercise thereof.

How many people realize that is in there?

But it is in there, and here we are trying to make a law. We need a little careful reading and a little refreshing as to both the Constitution and the history of this Nation.

I do not recall, and I am an Episcopalian myself, the Archbisop of Canterbury being on the Mayflower and for good reason. The people who were on the Mayflower were fleeing from the Archbishop of Canterbury, and they came to these shores specifically to get away from a state religion, and in that particular instance the religion of Great Britain.

The state had prohibited the free exercise thereof of their faith. The state was doing in spades what we are starting to nibble away at here in this Chamber.

So when they wrote the Constitution, the words were clearly set forth so that we would never repeat in this Nation what those who had founded it had themselves endured.

Now, 200 years have gone by, and we forget the lessons of history and we say to ourselves that is all irrelevant; those things used to happen in the old days; they do not happen any more. Maybe we do not stand out there in the middle of Main Street burning people on a cross, maybe we do not crucify them and pound nails through hands, none of these sort of visible acts of prejudice, of religious mischief. But we do it maybe in more subtle ways as we cut the human spirit up—embarrassment, shame, the wariness to speak out for fear of consequence.

And I might add we are doing this to the youngest of all of us. We are trying to take ourselves as adult human beings, with our view, with our rationality and with our capacity to reason, and we say to ourselves people can always say no to school prayer. But we are attributing all this to 6-, 7-, and 8-year-old children. It is weird.

Again, if you want to violate the Constitution and you pass a law with respect to school prayer, please understand. Then you have state prayer, state religion.

I am not here to go ahead and get religion out of the United States. I think it is one of the great strengths we do have, and the more the better both in terms of religion and those who practice it. I am all for it. I urge it. But I do not want government in religion, and the minute you pass a law, government is in religion.

Someone turned to me the other day and said, "Why do you oppose the tuition tax credit?" I said, "Number one, I think it is probably unconstitutional, but let us assume we can get over that hump." I said, "You are cutting public education by about 25 percent for economic reasons saying we do not have enough money to handle all our needs in the country and while cutting public education 25 percent you are allocating $5 billion for private education."

There is no commonsense to that. I just do not think we should do it.

But then the most important point is that the minute you get to the tuition tax credit you have government into the facility, into the church, if it happens to be a church school.

"Oh, no," the person said to me. "That is not so. In other words, this is merely a tax credit. This is not an outright transfer—you know, money being given from A to B rather than a tax credit."

I said, "Believe me, the tax credit is just the same as if the government gave the church school the money and once government gives the money, then it is given on behalf of all the people of this country and therefore all the people of this country have every right to tell that school what they can or cannot do."

I said, "You who practice the particular"—this person was of a particular faith and was arguing for their particular private school run by that faith—"you should be the wariest of all as to what is that is being proposed."

The same holds true here. We legislate. We then have a state religion and a state prayer.

I would hope that every person of a religious bent, every religious leader in this Nation would stand up and tell the Senate of the United States to go ahead and do its business but to stay out of theirs.

I noticed in the newspaper the other day one of the great advocates of school prayer had been interviewed by a group of reporters I will now quote from the New York Times of September 4, 1982:

> People for the American Way, a political counterforce to New Right groups, says it has yet to find anyone who has made a stronger case against the school prayer amendment than the Rev. Jerry Falwell, founder of Moral Majority who is an advocate of the constitutional proposal.

Mind you, this is not a constitutional proposal we have before us. It is a legislative proposal.

> Mr. Falwell is quoted as telling a meeting of the Religious Newswriters Association in New Orleans that because members of Moral Majority represented a variety of denominations, "if we ever opened a Moral Majority meeting with prayer, silent or otherwise, we would disintegrate."
>
> Asked why this reasoning would not apply in classrooms, Mr. Falwell said school prayer was "in the intent and mind of the First Amendment framers."
>
> Cal Thomas, national director of communications for Moral Majority, said his group did not open meetings with prayer because it is a political organization that includes Jews, Catholics, Mormons, Protestants and some "nonreligious" members.

"What kind of prayer would we use?" he asks.

He says it very well. Yet we are supposed to concoct something that apparently is amenable to a group of children and probably amenable only in the sense that they would not understand what it is they are being asked to do.

If it is not proper for mature adults, how does it become proper when the only difference in terms of the conditions is the age of those who are reciting the prayer?

The Constitution is meant to apply to all. It is not one consitution for 6-, 7-, and 8-year-olds and another for 30-, 40-, and 50-year-olds. That is not the basis of our lives here in this Nation. It is not one differentiated as to age in terms of the rights that we hold under the Constitution.

Let me go back in our history, if I might this afternoon, to the year 1785 to read: "A Memorial and Remonstrance Against Religious Assessments" addressed to the Honorable General Assembly of the Commonwealth of Virginia, and composed by none other than James Madison, who I hardly think falls into the screaming liberal, atheist category.

We, the subscribers, citizens of the said Commonwealth, having taken into serious consideration a Bill printed by order of the last Session of General Assembly, entitled "A Bill establishing a provision for Teachers of the Christian Religion," and conceiving that the same, if finally armed with the sanctions of a law, will be a dangerous abuse of power, are bound as faithful members of a free State, to remonstrate against it, and to declare the reasons by which we are determined. We remonstrate against the said Bill,

(Mr. MURKOWSKI assume the Chair.)

Mr. WEICKER. I continue:

1. Because we hold it for a fundamental and undeniable truth, "that Religion or the duty which we owe to our Creator and the Manner of discharging it, can be directed only by reason and conviction, not by force or violence." The Religion then of every man must be left to the conviction and conscience of every man; and it is the right of every man to exercise it as these may dictate. This right is in its nature an unalienable right. It is unalienable; because the opinions of men, depending only on the evidence contemplated by their own minds, cannot follow the dictates of other men: It is unalienable also; because what is here a right towards men, is a duty towards the Creator. It is the duty of every man to render to the Creator such homage, and such only, as he believes to be acceptable to him.

And "him" is with a small and not a capital "h"—

This duty is precedent both in order of time and degree of obligation, to the claims of Civil Society. Before any man can be considered as a member of Civil Society, he must be considered as a subject of the Governor of the Universe: And if a member of Civil Society, who enters into any subordinate Association, must always do it with a reservation of his duty to the general authority; much more must every man who becomes a member of any particular Civil Society, do it with a saving of his allegiance to the Universal Sovereign. We maintain therefore that in matters of Religion, no man's right is abridged by the institution of Civil Society, and that Religion is wholly exempt from its cognizance.

This is James Madison in 1785, and here we are on the floor in 1982 trying to reject the very reasoning which gave birth to this Nation—

True it is, that no other rule exists, by which any question which may divide a Society, can be ultimately determined, but the will of the majority; but it is also true, that the majority may trespass on the rights of the minority.

Now I realize that large portions of our populace who used to be in the minority have achieved majority status, if not in the Nation as a whole, in their community. But I am not going to allow memories to be so short as to feel that once in the majority these principles that brought them to that point no longer apply. The fact is that my faith, protestantism, was de facto the official religion of this Nation up until a few years ago, and if you do not think so, ask those who used to try to run for office who were either of the Catholic faith or of the Jewish faith.

A lot of barriers came tumbling down when men like Abe Ribicoff and John Kennedy were elected, and this is within our lifetime. Now there is nothing unusual in the political sense to sit side by side, Jew and Catholic with Protestant, but for years because protestantism was de facto the religion of this Nation, minorities were discriminated against. I should yearn for those kinds of good old days? They were never contemplated by the founders of this country, and I am not about ready to give them life today.

At one point or another all of us have been in a minority status in this Nation. It is because the minority is not given any additional powers under the Constitution that we enjoy our life in this country either in the minority or in the majority capacity. And it is why many of us who were in the minority now have achieved some sort of majority status.

2. Because of religion be exempt from the authority of the Society at large, still less can it be subject to that of the Legislative Body. The latter are but the creatures and vicegerents of the former. Their jurisdiction is both derivative and limited: it is limited with regard to the co-ordinate departments, more necessarily is it limited with regard to the constituents. The Rulers who are guilty of such an encroachment, exceed the commission from which they derive their authority, and are Tyrants. The People who submit to it are governed by laws made neither by themselves, nor by an authority derived from them, and are slaves.

3. Because, it is proper to take alarm at the first experiment on our liberties. We hold this prudent jealousy to be the first duty of citizens, and one of [the] noblest characteristics of the late Revolution. The freemen of America did not wait till usurped power had strengthened itself by exercise, and entangled the question in precedents.

What a great line: "The free men of America did not wait until usurped power had strengthened itself by exercise and entangled the question in precedents."—

They saw all the consequences in the principle, and they avoided the consequences by denying the principle. We revere this lesson too much, soon to forget it.

The matter of principle, the very constitutional principle at stake here, which started off this whole business of intrusion into the personal, the individual constitutional freedom that we all enjoy, is this: If the Senate of the United States as a matter of principle can tell the courts what to do, then who is safe from the politics of this body? Madison refers to Christians, saying if you establish Christianity as the State religion who then will stop somebody from coming along and saying that this particular sect of Christianity shall dominate? If you intrude upon the rights of black schoolchildren, then why not intrude upon the rights of the elderly, the businessman, the union men, the retarded, and the disabled?

Free men of America did not wait until usurped power had strengthened itself by exercise and entangled the question in precedents. They saw all the consequences in the principle.

Some of us out here are seeing all the consequences in the principle. And all the consequences of what is being proposed here means a State religion and a State prayer.

Now, if we are willing to go ahead and accept that, so be it. But this is not some little innocuous exercise that only relates to a few children bowing their heads and avowing some innocuous words.

They saw all the consequences in the principle, and they avoided the consequences by denying the principle. We revere this lesson too much, soon to forget it.

This was written in 1785. Well, maybe the problem right now is it is 1982, some 200 years later, and maybe it is that we have forgotten. And the object of this exercise on the floor is not to allow that forgetting to take place.

I stated earlier that I understand the political consequences of what I am doing out here. Everybody says, "Oh, let's have a little prayer in school." Well, maybe if we had all fought and died and been pursued and hunted on the matter of our religion as these men and women were, we would not consider this such a minor matter. If we could transport ourselves back to 1785 and live with those fears that in effect had founded a nation, we would not look upon this as some harmless little exercise to bring a little morality into the mainstream of America.

They saw all the consequences in the principle, and they avoided the consequences by denying the principle. We revere this lesson too much, soon to forget it. Who does not see that the same authority which can establish Christianity, in exclusion of all other Religions, may establish with the same ease any particular sect of Christians, in exclusion of all other Sects. That the same authority which can force a citizen to contribute three pence only of his property for the support of any one establishment, may force him to conform to any other establishment in all cases whatsoever.

4. Because, the bill violates that equality which ought to be the basis of every law, and which is more indispensible, in proportion as the validity or expediency of any law is more liable to be impeached. If "all men are by nature equally free and independent," all men are to be considered as entering into Society on equal conditions; as relinquishing no more, and therefore retaining no less, one than another, of their natural rights. Above all are they to be considered as retaining an *"equal* title to the free exercise of Religion according to the dictates of conscience." Whilst we assert for ourselves a freedom to embrace, to profess and to observe the Religion which we believe to be of divine origin, we cannot deny an equal freedom to those whose minds have not yet yielded to the evidence which has convinced us. If this freedom be abused, it is an offence against God, not against man. To God, therefore, not to men, must an account of it be rendered.

Now maybe we get an understanding, I might add, why this Constitution has lasted for so long. What a mind, what a mind to put the Constitution together which has had to last over the centuries. But now you understand the background, as you listen to this letter written by Madison, with a full understanding of their experience and what it is they desired for this Nation.

Indeed, if the Constitution is valid, if it is valid, if it is to withstand the test of time, then who is to say, as is alluded to in Madison's statement, that the true faith is even here? It might not even be here. It might be none of the religions that any of us belong to or any of us profess or believe in. Yet it may be proclaimed the true faith. I do not know.

But I know when that individual comes along or that faith is among us, it should have the same chance to be explained and to grow as those of the accepted faiths today.

Whilst we assert for ourselves a freedom to embrace, to profess and to observe the Religion which we believe to be of divine origin, we cannot deny an equal freedom to those whose minds have not yet yielded to the evidence which has convinced us. If this freedom be abused, it is an offence against God, not against man. To God, therefore, not to men, must an account of it be rendered.

The business of this floor or this Senate is the business of man. The business of God is in the pulpits and the places of worship across this Nation. Let them present their evidence to convince, to bring into the fold, to make believers. That is their job. My job on this floor is to make certain that wherever that takes place it can be done in total freedom. And if you merge, if you merge my job with the priest's or the minister's or the rabbi's job, then, indeed, you have an abomination and a dilution of both ideals.

As the Bill violates equality by subjecting some to peculiar burdens; so it violates the same principle, by granting to others peculiar exemptions. Are the Quakers and Mennonists the only sects who think a compulsive support of their religions unnecessary and unwarrantable? Can their piety alone be intrusted with the care of public worship? Ought their Religions to be endowed above all others, with extraordinary privileges, by which proselytes may be enticed from all others? We think too favorably of the justice and good sense of these denominations, to believe that they either covet pre-eminencies over their fellow citizens, or that they will be seduced by them, from the common opposition to the measure.

5. Because the bill implies either that the Civil Magistrate is a competent Judge of Religious truth; or that he may employ Religion as an engine of Civil policy.

"A competent judge of religious truth." I love it. That is what we are trying to do out here, collectively be a competent judge of religious truth. And I am the first to admit I am totally incompetent of that task and I was not elected to that task.

The judge of religious truth under our Constitution is each one of us. I feel safe with that principle well established. Each one of us, each 1 of 300 million Americans is the judge of religious truth, not one Senator, not 100 Senators, not 435 Congressmen, not a President of the United States, but each one of us.

The best phrase, I suppose, from the Sermon from the Mount, as I understand it in my particular faith is where even the God which I worship, or more particularly the Son which I worship, says, "And when you go into your room to pray, go and shut the door and pray to your Father in secret because he knows what is in your heart."

Each citizen of his country, to use Madison's words, "being a competent judge of religious truth."

The first is an arrogant pretension falsified by the contradictory opinions of Rules in all ages, and throughout the world: The second an unhallowed perversion of the means of salvation.

6. Because the establisment proposed by the Bill is not requisite for the support of the Christian Religion. To say that it is, is a contradiction to the Christian Religion itself; for every page of it disavows a dependence on the powers of this world: it is a contradiction of fact; for it is known that this Religion both existed and flourished, not only without the support of human laws, but in spite of every opposition from them; period of miraculous aid, but long after and not only during the period of miraculous aid, but long after it had been left to its own evidence, and the ordinary care of Providence: Nay, it is a contradiction in terms; for a Religion not invented by human policy, must have pre-existed and been supported, before it was established by human policy. It is moreover to weaken in those who profess this Religion a pious confidence in its innate excellence, and the patronage of its Author; and to foster in those who still reject it, a suspicion that its friends are too conscious of its fallacies, to trust it to its own merits.

7. Because experience witnesseth that ecclesiastical establishments, instead of maintaining the purity and efficacy of Religion, have had a contrary operation. During almost fifteen centuries, has the legal establishment of Christianity been on trial. What have been its fruits? More or less in all places, pride and indolence in the Clergy; ignorance and servility in the laity; in both superstition, bigotry, and persecution. Enquire of the Teachers of Christianity for the ages in which it appeared in its greatest lustre; those of every sect, point to the ages prior to its incorporation with Civil policy. Propose a restoration of this primitive state in which its Teachers depended on the voluntary rewards of their flocks; many of them predict its downfall. On which side ought their testimony to have greatest weight, when for or when against their interest?

8. Because the establishment in question is not necessary for the support of Civil Government. If it be urged as necessary for the support of Civil Government only as it is a means of supporting Religion, and it be not necessary for the latter purpose, it cannot be necessary for the former. If Religion be not within [the] cognizance of Civil Government, how can its legal establishment be said to be necessary to civil Government? What influence in fact have ecclesiastical establishments had on Civil Society? In some instances they have been seen to erect a spiritual tyranny on the ruins of Civil authority; in many instances they have been seen upholding the thrones of political tyranny; in no instance have they been seen the guardians of the liberties of the people. Rulers who wished to subvert the public liberty, may have found an established clergy convenient auxiliaries. A just government, instituted to secure & perpetuate it, needs them not. Such a government will be best supported by protecting every citizen in the enjoyment of his Religion with the same equal hand which protects his person and his property: by neither invading the equal rights of any Sect, nor suffering any Sect to invade those of another.

9. Because the proposed establishment is a departure from that generous policy, which, offering an asylum to the persecuted and oppressed of every Nation and Religion, promised a lustre to our country, and an accession to the number of its citizens. What a melancholy mark is the Bill of sudden degeneracy? Instead of holding forth an asylum to the persecuted, it is itself a signal of persecution.

A signal of persecution. That is exactly what this bill is. Persecution in the sense of trying to impose a State religion, a State religion in this particular instance to be determined by the Senate of the United States.

I cannot tell you of the apprehension that I felt when I read in the newspapers that the President was going to propose a constitutional amendment on prayer, and indeed some of the stories said that it would

actually have the words to be used in that prayer.

I do not want anybody writing any prayers or instructing anybody that they should pray. Not the President, not a Senator, not a Congressman, not a Governor, not a local school official. Nobody. That is completely separate and apart as to whether or not I believe and hope and urge that we be a religious people.

If this Congress could pass a law on prayer, if this Congress in conjunction with the President and school boards can determine what that prayer is to be, what is the situation to be 20 years from now? What can you guarantee me will be the situation in 100 years?

We were given total freedom. Up to this point we have total freedom. It took years to arrive even at that point. But finally we understood our own Constitution, and the courts and the legislatures have agreed that total freedom was to be preferred.

Now, why should I wish something less for my children?

You cannot guarantee me what the words will be. As long as I stick to the Constitution and say no words, then I have acquitted myself of my trust to the people of this Nation that they can say or do whatever they want in terms of their religion. But the first time that a law is passed and prayer is dictated, and even the substance of the prayer is set down, then what this Congress can do another Congress and another President can do better. There is no end to that mischief. The fact is it cannot start. Once started, there is no stopping it. The greatest mischief in the world has been performed in the name and the cause of religion.

We had a little bit of an experiment here in this country with it. I am saying in its roughest stages. We had a few witch trials. We managed to get over that hump. But we have lived for hundreds of years with very cruel discrimination against our fellow Americans based on religion. I mean physical cruelty, not just mental.

Those of my colleagues who are of the Mormon faith can attest to that. Those of the Jewish faith can attest to that.

It degrades from the equal rank of Citizens all those whose opinions in Religion do not bend to those of the Legislative authority. Distant as it may be, in its present form from the Inquisition it differs from it only in degree.

This is James Madison. This is not some liberal Republican or screaming liberal Democrat or somebody from the left wing. This is one of the authors of the Constitution talking in 1785, speaking so clearly, right on target, as to what is before us.

It degrades from the equal rank of Citizens all those whose opinions in Religion do not bend to those of the Legislative authority. Distant as it may be, in its present form, from the Inquisition it differs from it only in degree.

"What is being proposed here differs only in degree from the Inquisition"—again back to that matter of principle.

"The one is the first step, the other the last in the career of intolerance."

"The one is the first step, the other the last"—you see, Mr. President, this was a bill establishing provision for the teachers of the Christian religion that he was lobbying against. That was the bill of that particular day.

"The one is the first step"—that is, the legislation—"the other"—the Inquisition—"the last in the career of intolerance."

The magnanimous sufferer under this cruel scourge in foreign Regions, must view the Bill as a Beacon on our Coast, warning him to seek some other haven where liberty and philanthrophy in their due extent may offer a more certain repose from his troubles.

10. Because, it will have a like tendency to banish our citizens. The allurements presented by other situations are every day thinning their number. To superadd a fresh motive to emigration, by revoking the liberty which they now enjoy, would be the same species of folly which has dishonoured and depopulated flourishing kingdoms.

He knew what he was talking about; did he not? The cream of England came to the United States on this issue. In effect, what he was saying is create those same stricture, narrow the freedom which we have, and we lose the very thing that we have gained, which had given to our Nation, even then, a beginning toward eminence in the world.

11. Because, it will destroy that moderation and harmony which the forbearance of our laws to intermeddle with Religion, has produced amongst its several sects. Torrents of blood have been spilt in the old world, by vain attempts of the secular arm to extinguish Religious discord, by proscribing all difference in Religious opinions. Time has at length revealed the true remedy. Every relaxation of narrow and rigorous policy, wherever it has been tried, has been found to assuage the disease. The American Theatre has exhibited proofs, that equal and compleat liberty, if it does not wholly eradicate it, sufficiently destroys its malignant influence on the health and prosperity of the State. If with the salutary effects of this system under our own eyes, we begin to contract the bonds of Religious freedom, we know no name that will too severely reproach our folly. At least let warning be taken at the first fruits of the threatened innovation. The very appearance of the Bill has transformed that "Christian forbearance, love and charity," which of late mutually prevailed, into animosities and jealousies, which may not soon be appeased. What mischiefs may not be dreaded should this enemy to the public quiet be armed with the force of a law?

12. Because, the policy of the bill is adverse to the diffusion of the light of Christianity. The first wish of those who enjoy this precious gift, ought to be that it may be imparted to the whole race of mankind. Compare the number of those who have as yet received it with the number still remaining under the dominion of false Religions; and how small is the former! Does the policy of the Bill tend to lessen the disproportion? No; it at once discourages those who are strangers to the light of [revelation] from coming into the Region of it; and countenances, by example the nations who continue in darkness, in shutting out those who might convey it to them. Instead of levelling as far as possible, every obstacle to the victorious progress of truth, the Bill with an ignoble and unchristian timidity would circumscribe it, with a wall of defense against the encroachments of error.

13. Because attempts to enforce by legal sanctions, acts obnoxious to so great a proportion of Citizens, tend to enervate the laws in general, and to slacken the bands of Society. If it be difficult to execute any law which is not generally deemed necessary or salutary, what must be the case where it is deemed invalid and dangerous? And what may be the effect of so striking an example of impotency in the Government, on its general authority.

14. Because a measure of such singular magnitude and delicacy ought not to be imposed, without the clearest evidence that it is called for by a majority of citizens: and no satisfactory method is yet proposed by which the voice of the majority in this case may be determined, or its influence secured. "The people of the respective counties are indeed requested to signify their opinion respecting the adoption of the Bill to the next Session of Assembly." But the representation must be made equal, before the voice either of the Representatives or of the Counties, will be that of the people. Our hope is that neither of the former will, after due consideration espouse the dangerous principle of the Bill. Should the event disappoint us, it will still leave us in full confidence that a fair appeal to the latter will reverse the sentence against our liberties.

15. Because, finally, "the equal right of every citizen to the free exercise of his Religion according to the dictates of conscience, is held by the same tenure with all our other rights. If we recurred to its origin, it is equally the gift of nature; if we weigh its importance, it cannot be less dear to us; if we consult the Declaration of those rights which pertain to the good people of Virginia, as the "basis and foundation of government," it is enumerated with equal solemnity, or rather studied emphasis.

Either then, we must say, that the will of the Legislature is the only measure of their authority; and that in the plenitude of this authority, they may sweep away all our fundamental rights; or, that they are bound to leave this particular right untouched and sacred: Either we must say, that they may control the freedom of the press, may abolish the trial by jury, may swallow up the Executive and Judiciary Powers of the State; nay that they may despoil us of our very right of suffrage, and erect themselves into an independent and hereditary assembly: or we must say, that they have no authority to enact into law the Bill under consideration. We the subscribers say, that the General Assembly of this Commonwealth have no such authority: And that no effort may be omitted on our part against so dangerous an usurpation, we oppose to it, this remonstrance; earnestly praying, as we are in duty bound, that the Supreme Lawgiver of the Universe, by illuminating those to whom it is addressed, may on the one hand, turn their councils from every act which would affront his holy prerogative, or violate the trust committed to them: and on the other, guide them into every measure which may be worthy of his [blessing, may

reldound to their own praise, and may establish more firmly the liberties, the prosperity, and the Happiness of the Commonwealth.

Mr. President, that was written by a great American, one of our founders, written by a deeply religious man, and every single warning, every urgent declaration against the danger expressed here applies to what is on this Senate floor right now. I do not care what the percentages of the polls are relative to the matter of prayer. It is the duty of every American to protect the liberties under the Constitution of the United States that are guaranteed to all of us. The fact is that that document must stand for all time: To serve all faiths, existent or in the future, and to make sure that there can be the fullest exercise of anyone's beliefs.

This proposition on the floor of the U.S. Senate today is, in principle, as dangerous as any act of intolerance that has occurred in the history of man or in the history of this Nation. It is, as the author puts it, step one in the career of intolerance.

Mark Twain wrote in his book, "A Connecticut Yankee In King Arthur's Court," chapter No. 10, a passage I am now going to read.

I had started a teacher factory and a lot of Sunday schools the first thing; as a result, I now had an admirable system of graded schools in full blast in those places, and also a complete variety of Protestant congregations all in a prosperous and growing condition. Everybody could be any kind of a Christian he wanted to; there was perfect freedom in that matter. But I confined public religious teaching to the churches and the Sunday schools, permitting nothing of it in my other educational buildings. I could have given my own sect the preference and made everybody a Presbyterian without any trouble, but that would have been to affront a law of human nature: spiritual wants and instincts are as various in the human family as are physical appetites, complexions, and features, and a man is only at his best, morally, when he is equipped with the religious garment whose color and shape and size most nicely accommodate themselves to the spiritual complexion, angularities, and stature of the individual who wears it: and besides I was afraid of a united Church; it makes a mighty power, the mightiest conceivable, and then when it by and by gets into selfish hands, as it is always bound to do, it means death to human liberty, and paralysis to human thought.

Why does this Congress choose to ignore history, indeed, to defy it? Are we certain, in other words, that we are going to be able to do the right thing; that we have a better idea than the Constitution of the United States? Do we want to tinker around with this matter of religion?

Thomas Jefferson, in a letter written January 1, 1802, to a committee of the Danbury Baptist Association in my State of Connecticut, said:

The affectionate sentiments of esteem and approbation which you are so good as to express towards me, on behalf of the Danbury Baptist Association, give me the highest satisfaction. My duties dictate a faithful and zealous pursuit of the interests of my constituents, and in proportion as they are persuaded of my fidelity to those duties, the discharge of them becomes more and more pleasing.

Believing with you that religion is a matter which lies solely between man and his God, that he owes account to none other for his faith or his worship, that the legislative powers of government reach actions only, and not opinions, I contemplate with sovereign reverence that act of the whole American people which declared that their legislature should "make no law respecting an establishment of religion, or prohibiting the free exercise thereof," thus building a wall of separation between church and state. Adhering to this expression of the supreme will of the nation on behalf of the rights of conscience, I shall see with sincere satisfaction the progress of those sentiments which tend to restore to man all his natural rights, convinced he has no natural right in opposition to his social duties.

I reciprocate your kind prayers for the protection and blessing of the common Father and Creator of man, and tender you for yourselves and your religious association, assurances of my high respect and esteem.

So again, we have the exact same expression as we encountered in the letters from James Madison.

(Mr. HAYAKAWA assumed the chair.)

Mr. WEICKER. The Nation's first Catholic President, John F. Kennedy, spoke out on behalf of the separation of church and state, and he spoke out very vigorously. It is no wonder, because it was not until his election that the religious barriers against Catholics came crumbling down at all levels of society.

Protestantism was de facto the national religion and Catholics, Jews, and all other faiths suffered because of it.

During a campaign address in 1960, Kennedy told the Greater Houston Ministerial Association:

I believe in an America where the separation of church and state is absolute. * * *

Obviously, the President knew what words he was using, and he used them with precision—absolute. There is nothing in there that permits for qualification. No exception. Absolute. What we are seeing this afternoon, believe me, is not absolute. It is a waffling on the first amendment of the Constitution of the United States:

I believe in an America where the separation of church and state is absolute, where no Catholic prelate would tell the President how to act, and no Protestant minister would tell his parishioners for whom to vote, where no church or church school is granted any public funds for political preference, and where no man is denied any public office merely because his religion differs from the President who might appoint him or the people who might elect him.

When the Supreme Court banned official school prayers in the New York public school system in 1962, Kennedy commented:

We have in this case a very easy remedy and that is to pray ourselves. And I think it would be a welcome reminder to every American family that we can pray a good deal more at home, we can attend our churches with a good deal more fidelity, and we can make the true meaning of prayer more important in the lives of all our children.

Those are pretty strong words coming from the President, and they are as true today as when they were spoken.

This is not to say that spokesmen for all the denominations in this Nation have not enunciated the same thoughts. They have.

Most main-line churches have come out against voluntary school prayer. Their objections:

First, it would violate first amendment prohibitions against the establishment of religion.

Second, a least-common-denominator prayer trivializes prayer.

Third, religious instruction is the responsibility of the religious family and the religious community.

Rev. James Dunn, executive director of the Baptist Joint Committee on Public Affairs has stated: "Real prayer is always free. What the court has done is to protect religious liberty."

Father Timothy Healy, president of Georgetown University, stated:

The question is whose prayer? How do we find a formula acceptable to all, offensive to none, and not so general that it would merely echo the less inspired bits of Fourth of July oratory?

Nathan Z. Dershowitz, speaking for the American Jewish Congress and 10 other Jewish organizations, said:

To a child in a classroom, no part of the school routine is voluntary. It cannot be made so by the cruel device of telling them that they are allowed to brand themselves as pariahs by leaving the classroom, or by standing there and remaining conspicuously silent.

Theodore White in "The Making of the President 1960," wrote as follows:

There remains one last division of the past to be considered as the Americans moved to consider their candidates—the largest and most important division in American society, that between Protestants and Catholics.

Mind you, this book is "The Making of the President," in 1960.

America as a civilization began with religion. The first and earliest migrants from Europe, those who shaped America's culture, law, tradition and ethics, were those who came from England—and they came when English civilization was in torment over the manner in which Englishmen might worship Christ. All through the seventeenth century, as the settlers arrived from the downs, the moors, and the villages of England, they came scarred with the bitterness and intensity of the religious wars of that era, wars no less bloody and ferocious for the fact that they were fought between Protestant sects, Protestant against Protestant. The harshness of Cromwell, that somber figure, was a reflection of the harsh-

ness with which Protestants assailed each other, as well as Catholics, over sect and dogma.

Is there anybody who needs to be reminded that this still goes on today?

The conflict in Northern Ireland is one still between Protestants and Catholics, with the terrible human toll that division takes hourly. It is hard to believe. It is hard for any of us to believe, in this day and age, that such terrible mayhem is done in the name of religion. Northern Ireland is not a matter of history. It is a matter of our life today. That is the ultimate step, is it not? This is the first step.

To return to White:

• • • migrants began the building of a new society in a new world; and out of this bitterness they distilled, though not without a struggle, that first great landmark in America's unique civilization, that first of the creative American compromises that was to set America apart from the old world: freedom of worship, the decision that government should have no right to make inquiry into the faith of its citizens and that the state should remain forever divorced from any religious establishment. Never in civilization, since the earliest ziggurats and temples went up in the mud-walled villages of prehistoric Mesopotamia, had there been any state that left each individual to find his way to God without the guidance of the state. In retrospect, this is probably the greatest historic decision enshrined in the American Constitution.

The Americans of the age were not an irreligious people; and the fact that they were Christian was very important, for the marks of Christianity lay all across the Constitution. Although Christianity has never been the *guarantee* of a democratic state anywhere in the world, no democracy has ever thrived successfully for any period of time outside of Christian influence; without the quality of mercy and forgiveness, there is only logic and reason to guide a state, and these guarantee no freedom to any man. What the American Constitution did was to accept and code a working compromise that had been reached by men and women of English descent escaped from the fratricidal wars of religion in Europe and unwilling to transfer such wars to the new land. Each man would worship in his own manner; and the state would limit itself to the affairs of Caesar. For the Protestants who created the American state, the very antithesis of these ideas was the code of the Church of Rome, which their forefathers had repudiated in England over two hundred years before.

Not until the 1850s did the Protestant civilization of America begin to include a serious proportion of Catholics, and then (apart from the historic New Orleans community) it was a Catholicism confined to the few large cities of the Eastern seaboard, where the great Irish migration was beginning to arrive. And not until 1891 did the United States census historically begin to estimate, from Catholic sources, the number of Catholics in the American population. In that year, estimates the census, there were in America 8,277,000 Catholics out of a total population of 64,361,000 in America—or 13 per cent. By 1928, the year an American Catholic, Alfred E. Smith, first ran for President, the proportion had grown to 16 per cent (or 19,689,000 out of 120,501,000). In 1957 the United States conducted a special census of religion in America, and in that year one has the choice of two divergent sets of figures. Following the old tables and accepting Catholic estimates of Catholic communicants, America held 34,564,000 Catholics out of an estimated total population of 171,229,000 citizens, or 20 per cent. Accepting instead the special census figure of 43,037,000 Catholics at that time, the Catholic proportion of Americans amounted to 26 per cent.

The huge difference between the official Catholic claim and the higher estimate of the Bureau of the Census—a difference of 8,600,000 in the year 1957—illustrates the trickiness of all figures on religion in the United States. Some groups—such as the Christian Scientists—refuse to offer any estimate of their numbers at all. Some Protestant groups, such as the Lutherans, count all members of their faith from the moment of baptism, as do the Catholics. Other (and most Protestant) groups count their communicants only from the age of thirteen or fourteen. For some years Jewish groups numbered only the male heads of household; now Jewish groups estimate their numbers on the basis of established congregations (it is estimated that there are 5,400,000 Jews in the United States today, the largest Jewish community since the Destruction of the Temple). All figures on religious breakdowns in the United States, either by state or nation, are thus guesses, subject to error of up to 20 per cent.

It is obvious, however, from the spread of the census figures since 1890 that the increasing percentage of Catholics has come first from the great south and central European migrations of the early 1900s (Italian, Polish, some Czech, some German Catholic); and has thereafter been amplified by the Catholic birth rate. Dr. Donald N. Barrett of the University of Notre Dame has estimated that in the years 1950–1959 the Catholic population of the United States increased by 35.8 per cent while the general population increased by 16.6 per cent. Or in other words, as he has said, "Forty-one per cent of the total United States growth in 1950–1959 was derived from the Catholic sector of the population."

Such a statistical development reflects, of course, a change in the composition of American life, of which American politics has been aware for generations. From the Eastern Seaboard all the way through to St. Paul, Minnesota (or Omaha, Nebraska) this change has for a full generation been the working problem of practicing politicians of both parties.

In general, and for reasons quite apart from faith, most Catholics have voted Democratic. They have voted Democratic because when they arrived as immigrants in the large industrial cities they found the national political machinery at the time of their arrival in the hands of Republicans who distrusted big cities; Catholic immigrants entered, naturally, into the party that sought and cultivated their votes, the Democratic. Not only did they enter—within a period of fifty years they had come to lead and possess the Democratic Party in a bloc of states that stretched from New England to Illinois. In New York State, for example, in a recent year, of sixty-two counties in the state, the Democratic County Committeemen in fifty-seven were Catholic.

And the book goes on to place into the statistics the role of those of the Catholic faith in American politics, a role denied them by past persecution.

So many of my Catholic friends just as fellow members of my Protestant faith think because of their numbers they are outside this argument. Who is to say that 100 years from now we will not be in a minority?

I suggest as a protection of our religious beliefs we hold fast to the principle involved.

I never believed either in my political career or before embarking on that that I would on the floor of the Senate be arguing against a State religion and a State prayer. To me that is something that belonged in other nations in the future or had belonged as a matter of history to other countries.

This is an abomination. It is a persecution. It is an elimination of the rights guaranteed under the Constitution.

Those who argue as we do on the floor of the Senate, if I may say so, are not irreligious men and women. Indeed, what we are fighting for is religion, religion in all of its forms, not in the form of the Senator from North Carolina or indeed the Senator from any other State, but in the form that is most pleasing to us as individuals, not as Senators.

I remember it was only a matter of a year ago when we had this issue here on the Senate floor and although I am not willing to dredge up unpleasant memories, I remember very unseemly incidents that occurred between good friends in the course of debating this issue.

The incident should have never taken place, all the participants being decent people, kind people, religious people, persons respecting the rights of others. But the minute the subject turns to religion, believe me, even on the Senate floor the temperatures start to rise and people say things that they regret later, and that happened right here a year ago.

There is no end to this mischief. There is no end to it.

At the various levels of government, local, State, and Federal, as people argue what prayer should be, what it should consist of, I hate to contemplate the passions that are going to be aroused.

Who is going to write the prayer? And if a prayer can be established by one session of the Senate then why not another prayer 2 years from now or 4 years from now or 6 years from now?

These are the matters of principle that are at issue in the course of this debate.

I had occasion to read the UPI press release that came as a result of our action yesterday, and I wish to share it with my colleagues. The title of it was "Abortion," by Wesley Pippert.

WASHINGTON (UPI).—In President Reagan's second Capitol Hill defeat in as many weeks, the antiabortion legislation he sought to make law was put to rest.

The measure was a major goal of Reagan and the new right, but liberals Wednesday,

following a 2-month filibuster, successfully had it brushed aside—at least for this year.

Senator Jesse Helms, N.C., sponsor of the antiabortion amendment, took the floor and promised the political implications of the vote would go far beyond the capitol.

Waving a copy of the Senate roll call recording the 47-46 vote to set the measure aside, Helms warned: "This is a record each Senator who voted 'aye' will have to live with."

Helms said the vote could spill over into campaigns, noting that former Sens. George McGovern, S.C., John Culver, Iowa, and Birch Bayh, Ind., who favored the right to choose abortion, were defeated in 1980.

The article goes on from there. I knew and I argued the principle of separation of powers; in other words, I argued against court-stripping as it applied to the matter of busing, and I was threatened with the same business, that "any Senator who takes the position that Senator WEICKER takes will be said to be for busing." Knowing the negative implications that had, regardless of the fact that it was a constitutional debate that related to court-stripping, to the principle that was being established that applied to all of us, not just black children, many of my colleagues here were afraid to stand up. Many did, and that is why it took so long, 10 months, before anything happened. But they were afraid of that threat, and I saw that threat come to pass in my own situation in Connecticut where during the Republican phase of the operation NCPAC was up in Connecticut saying, "Senator WEICKER is for forced busing."

Do you know what I am going to hear on the basis of this argument here today? "Senator WEICKER is against prayer."

I just want it clearly stated that Senator WEICKER is for the Constitution of the United States and for the ability of every American to pray as he or she sees fit, and I am not going to have any U.S. Senator or President of the United States tell us that we have to pray, and then following that what it is we will pray. That is the issue.

Those who fought court-stripping, fought for an undiluted Constitution, and the guarantee that the courts of this Nation would be available to every American, those who fought the matter of abortion did so on the basis that this was a personal decision, did so on the basis that the law of this land is clear, that it is not to be circumvented by some legislative maneuver, and that if constitutional change is to be accomplished it must be done by the Constitution.

Those who fight for the first amendment and religious freedom do so in defense of the Constitution of the United States. The fact is that, as a result, there will be more, not less, religion in this country. What is being advocated in the form of a State prayer is less religion. It naturally restricts. No prayer can contemplate all that resides within 200 million human beings. So it is by its nature restrictive, and by nature of just having to perform the act, it impinges on our freedom.

I think there are some who feel the problems we have today are going to be resolved by running a group of children through a prayer ceremony. Let me tell you the problems we have today are far more prevalent in the adult community than they are in the first, second, and third grades of this Nation.

A lot of people will say, "You fellows in the Senate, you start the day with prayer, so why should not that apply to others?"

Well, I do not have to be here to listen to the prayer, and if I do not like it, I can walk out. It is just as simple as that.

Some 6- or 7- or 8-year-old kid is not going to do that. Attendance at school is not voluntary; it is mandatory, and no child is going to get up and walk out even though the prayer is offensive to his or her belief.

Most adults do not go through that for fear of some form of embarrassment. Why cause one Senator to be put in the position of being embarrassed, of feeling an outcast, of feeling queer, or whatever?

I usually find the person who says the least about his religion is the most religious person on the block, and the one who is going around spouting the Bible and talking about good works and all the rest of it usually has something to hide.

If you want an exercise that might do some good, I would not worry about ramming a pro forma prayer down the throats of a bunch of schoolchildren. I just think we ought to use our time here on the Senate floor advocating that the whole Nation pray for us and hope some good might come of that.

The issue is whether or not this Constitution of the United States is going to be around for our kids in the same form that it is or was for us. That is the reason why this cannot be permitted just to go the way of any old legislation. This is not legislation. Legislation is written, is allowed to disappear or is canceled from the books, and philosophies change and parties change, the White House changes, numbers in the Senate and House all change, but one thing that remains constant is the Constitution of the United States.

There seems to be a great impatience on the part of a lot of people to change it as if all of our ills can be attributed to concepts and the words of that document.

I remind everybody the problem in this country today is not the Constitution of the United States. The economy is the problem, 10.5 million people out of work is the problem, and that is what we ought to be spending our time on, but we are not. We want to tinker with the one thing that works.

Education is the big problem. So many young people cannot go to college, cannot go to graduate school, cannot get an education. That is a problem.

Housing, too. Three percent of the people in this country now—only 3 percent now—can afford to buy a house. I say that is a problem. You are not going to have that last very long before you will have some kind of political upheaval. These are problems, and these problems are dealt with by each generation and its representatives. Both the problem and the solution change. But the Constitution stays. No matter what goes on, that stays, and in this instance, it is the guarantee that whatever beliefs exist today and those that have yet to be proclaimed will be done so in the fullest possible freedom.

Let me once again just read just the most pertinent passages of Madison's Remonstrance Against Religious Assessments.

2. Because if religion be exempt from the authority of the Society at large, still less can it be subject to that of the Legislative Body. The latter are but the creatures and vicegerents of the former. Their jurisdiction is both derivative and limited: it is limited with regard to the co-ordinate departments, more necessarily is it limited with regard to the constituents. The preservation of a free government requires not merely, that the metes and bounds which separate each department of power may be invariably maintained; but more especially, that neither of them be sufferd to overleap the great. Barrier which defends the rights of the people.

Mr. President, I ask unanimous consent that I be allowed to yield the floor at this point without this being construed as the end of a speech for the purpose of the two-speech rule and without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the Senator for yielding to me.

SENATE SCHEDULE

Mr. President, for a variety of reasons, which I will elaborate on later and as the circumstances mature and develop, it appears that there is no good and useful purpose to be served by asking the Senate to remain late this evening. Therefore, I expect that the Senate will observe more or less regular adjournment hours or recess hours today; that is to say, approximately 6 p.m.

I would point out that tomorrow we will be in from 9:30 a.m., by the order previously entered, until approximately 2 p.m., so that Members may observe a Jewish religious observance which begins at sundown on Friday.

A cloture vote will occur on Monday against further debate on the Helms amendment. A time certain has not been set, except as that time is set under the rule. I will explore the pos-

sibility of setting a mutually convenient time for that vote on cloture on Monday with the minority leader and with the principals involved in this debate.

Mr. President, I must reluctantly also announce that, contrary to my previous statement, we will not be able to finish the debt limit bill today. As a matter of fact, I do not know when we are going to be able to finish the debt limit bill, but we will cross that bridge a little later. But, for the moment, I wish to rescind my notice that the Senate will be in late tonight, I wish to rescind my statement that I will strive to try to complete this bill today, and to say we will be in from 9:30 a.m. until 2 p.m. tomorrow and that there will be a cloture vote on Monday next.

Mr. President, I thank the Senator for yielding.

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I thank the majority leader for his reasonable statement because I think it is an accurate reflection of where we stand. I commend him for his proceeding in the way he has. The Senator from Tennessee knows how much it means to this Senator.

Mr. President, I also wish at this point to commend my colleague, the Senator from Connecticut (Mr. WEICKER). He has an accurate vision of what really is at stake here; that is, this is a court-stripping amendment which precludes the Supreme Court's jurisdiction over cases involving school prayer.

I particularly appreciate his unbending support for the Constitution. I think too often too few in our country continually give respect and support to the Constitution. Certainly the Senator from Connecticut is one who has stood in the forefront many, many times in this body and on many, many occasions, far more than any other single Member of the body that comes to mind at this moment. It means a lot to this Senator that the Senator from Connecticut is such a strong supporter of the Constitution and the basic principles of our form of government which have kept our country going so long. He is certainly one of the most eloquent defenders of those principles, and I wish to tell this body how much his eloquence, support, and perseverance means to this Senator.

Mr. President, this has been a long battle so far. I expect it will be an even longer one. The recent announcement by the Senator from Tennessee, the majority leader, certainly indicates that it will be a long, protracted battle. But I think, Mr. President, the issue is important. It is important for the people and the country to know that to adopt this underlying amendment would be to undermine our Constitution.

Mr. President, I wish to now read a statement by law Prof. Lawrence Sager of the New York University School of Law. This actually is a condensation of a longer law review article than Mr. Sager had written on attempts to limit the jurisdiction of the courts on constitutional questions.

Mr. President, as I have often stated, the reason I am speaking is not so much because I am opposed to the merits of the underlying amendment. Although I think there are some difficulties in the underlying amendment, my primary reason in taking the floor is because the underlying amendment is not an up-or-down vote on the merits of school prayer. In fact, the Supreme Court has ruled on that issue. We in the Congress certainly cannot, by statute, simply overrule decisions of the U.S. Supreme Court.

Rather, I am taking the floor because of the way in which the statute is framed. The statute attempts to overturn a Supreme Court decision, not by direct effort but, rather, by an indirect effort; that is, by pivoting Supreme Court review over school prayer issues.

Mr. President, it is my fervent, deeply held view that it would be pernicious for this body, for the Senate and/or the Congress, to adopt that amendment; that is, it would be a pernicious precedent for the U.S. Senate to, by statute, prohibit the Supreme Court's jurisdiction over school prayer or over any other single Federal constitutional question. For us to begin sliding down that slippery slope, for us to begin to limit by statute Supreme Court jurisdiction over Federal constitutional issues, will be for us to begin to undermine, in fact, to destroy our Federal Constitution.

Our form of Government is based upon three separate branches of Government—the executive, the legislative, and the judicial. If Congress, by statute, can say to the Supreme Court, "You, the U.S. Supreme Court, can no longer hear any cases over this issue, a Federal constitutional issue, or in the future over any Federal constitutional issue," than we, the U.S. Congress, will have effectively eliminated one of our three branches of Government.

As so often has been pointed out, if our Bill of Rights, if our Federal constitutional guarantees—freedoms of speech, press, assembly; right against self-discrimination; and all the various rights contained in our Constitution—if they mean anything, they have to be protected by a Federal judiciary and, more importantly, by the U.S. Supreme Court.

Because, if Congress can eliminate this Constitution—and we would be so doing or going in that direction by adopting this statute—then we effectively can eliminate those Federal constitutional guarantees. We can effectively prohibit the Supreme Court from reviewing any issue. We can effectively tell American citizens that the rights in the Constitution are only as good as a majority of the Members of Congress believe them to be.

That is to say, we would be telling American citizens, "Well, sure, free speech is important, but it, for some other reason in an election year, 2 months before an election, for whatever reason Congress wants to limit some opposition party from making some statements, and the majority party in the Congress is of such a persuasion," then we are telling the American people that, "Free speech is OK in some years but not good in some other years."

Certainly, under our constitutional form of government, it would be impermissible for Congress to undertake any such efforts.

It is critical that we do not begin by setting the precedents for limiting the Supreme Court jurisdiction over constitional issues.

Now, Mr. President, I will read a statement which is a condensation of a larger article by Prof. Lawrence Gene Sager.

CONSTITUTIONAL LIMITATIONS OF CONGRESS' AUTHORITY TO REGULATE THE JURISDICTION OF THE FEDERAL COURTS

(By Lawrence Gene Sager)

INTRODUCTION

Pending in Congress are a number of bills that seek to limit the jurisdiction of the federal courts to hear claims or grant remedies in various types of constitutional cases. These bills threaten a gross breach of the institutional premises by which our nation, for 200 years, has chosen to govern itself, and the adoption of any one of them would set a dangerous and unworthy precedent. At risk is our tradition of governance that has made the judicial branch of the federal government the ultimate arbiter of the Constitution. Tampering with that tradition in the manner proposed by these bills would be both unconstitutional and unwise.

The language, structure and history of Article III of the Constitution, taken alone, indicate that Congress has a broad, but imprecisely defined, power to regulate the jurisdiction of the federal courts. The lower federal courts take their jurisdiction from statutory grants by Congress, and Congress clearly can withhold from their jurisdiction substantial portions of the reservoir of jurisdiction provided in Section 2 of Article III. Indeed, the framers of the Constitution contemplated the possibility that Congress might choose to create no lower federal courts at all—a possibility that seems academic today. In contrast, the existence of the Supreme Court is stipulated by Article III, and the whole of the jurisdiction itemized in Section 2 is constitutionally conferred on the Court. The appellate jurisdiction of the Supreme Court, however, is provided in Article III "with such Exceptions and under such Regulations as the Congress shall make," and Congress can remove from the jurisdiction of the Court some of the cases that fall within Section 2.

But from Article III itself, and from the logic of the constitutional scheme of which it is a pivotal part, there flow significant limitations on the power of Congress to reg-

ulate the jurisdiction of the federal courts. Moreover, the Bill of Rights and reconstruction amendments to the Constitution provide important additional limitations on the exercise of whatever powers Congress might otherwise possess under Article III. While the precise scope of congressional authority in this area may remain unclear, the power of Congress to shape the jurisdiction of the federal courts is clearly limited by three important constitutional principles:

(1) The Supreme Court must be available to superintend state and local compliance with the Constitution, unless Congress has provided equally effective and independent review elsewhere within the federal judiciary;

(2) Congress cannot strip from the jurisdiction of the federal courts a narrow group of cases which involve constitutional claims to which Congress is hostile; and

(3) Congress cannot cripple the federal courts by denying them the authority to issue all reasonably effective remedies in particular groups of cases.

The bills presently pending in Congress that propose jurisdictional or remedial responses to Supreme Court precedent in the areas of abortion rights, school prayer, and mandatory busing to desegregate public schools, share the vice of violating one or more of these constitutional limitations. They also violate Congress' own tradition of prudence, restraint and respect in dealing with the federal judiciary, and do so at a time when a like restraint is being urged on the courts by both the executive and legislative branches. The ill-wisdom of the course these bills chart is as striking as their illegality.

I. FEDERAL JUDICIAL SUPERINTENDENCE OF STATE AND LOCAL COMPLIANCE WITH THE CONSTITUTION

Supreme Court review of state conduct is the cornerstone of our constitutional scheme. Without it or an equally effective and independent alternative source of federal judicial review, the legal structure upon which our identity as a nation depends would be fatally undermined. Congress has never doubted this: from the first Judiciary Act of 1789 to this day, it has adopted legislation that assured the Supreme Court of jurisdiction to superintend state compliance with the Constitution. Throughout our history, Congress has removed various portions of the Court's Article III jurisdiction, but this head of jurisdiction has always been made available to the Court, despite crises and concerns that would have tempted an unscrupled Congress to curb the Court's authority. As a result of Congress' fidelity to this basic premise of our constitutional order, there has never been a judicial test of Congress' power to reverse this unvarying pattern of respect for the logic of the Constitution. But there is no dearth of clear judicial sentiment on the essentially of federal review of state conduct. There are a number of powerful Supreme Court statements on the matter, of which this language from *Dodge v. Woolsey* is a good example:

[O]ur national union would be incomplete and altogether insufficient for the great ends contemplated, unless a constitutional arbiter was provided to giver certainty and uniformity, in all of the States, to the interpretation of the constitution and legislation of congress; with powers also to declare judicially what acts of the legislatures of the States might be in conflict with either.

A closer look at the history and structure of Constitution's provisions for a federal judiciary strongly supports these sentiments and the tradition of two centuries to which they pend.

A. The History and Logic of Our Federal Scheme.—The issue around which all else in the Constitutional Convention revolved was the status of the attending states.

That was an important point when our Founding Fathers met to frame our Constitution. That is, what should be the status of the States that attended the Constitutional Convention?

Would they remain sovereign members of an interstate compact, or would they be folded into a genuinely national structure—to which they as states would be subordinate and to whose authority their citizens would be answerable directly? In the end there emerged from the Convention a rather clear commitment to a governmental structure that was distinctly more centralized than that of the Articles of Confederation. As part of this move toward nationhood, the framers put critical restraints on state autonomy into the Constitution itself and gave Congress legislative authority to direct a strong national government.

The commitment to nationhood raised the question of how the legal subordination of the states would be effectuated. Initially, attention and debate focused on a congressional "negative," or veto, of state laws. But the Convention rejected this means of control, opting in its stead for judicial supervision of state conduct. The supremacy clause was the product of this clear and conscious decision to rely on judicial control; the unanimous adoption of its prototype followed immediately upon the heels of the Convention's rejection of the congressional negative.

With judicial supervision as the Convention's chosen means of controlling the states, the structure of the American judiciary became a matter of great importance. On the day following the repudiation of the congressional negative and adoption of the supremacy clause, the Convention approved the compromise which James Madison had engineered earlier in committee. Controversy in this area had centered on the question of the lower federal courts, with opponents of an extensive federal judiciary arguing that the Supreme Court could adequately guarantee federal interests. Under the Madisonian compromise, the Constitution neither created nor forbade the creation of the lower federal courts. Their existence was left to the discretion of Congress.

Thus, as the delegates to the Constitutional Convention made their peace on issue after issue, the Supreme Court's superintendence of state compliance with national law emerged as the fulcrum of the national government. Direct legislative supervision of state conduct was abandoned, and the possibility was embraced that no subordinate federal judiciary necessarily had to be established. What remained was the Supreme Court, whose jurisdiction was consciously tailored to the role of supervising the enforcement of the supremacy clause. There was serious debate on the question whether the appellate oversight of the Court was sufficient as a restraint on the states, but none about its necessity. Unless the state courts were answerable to the Supreme Court, the scheme of the Constitution would have had little to recommend it over the Articles of Confederation.

An interesting point, there, as Professor Sager points out:

There was serious debate on the question whether the appellate oversight of the Court was sufficient as a restraint on the states, but none about its necessity. Unless the state courts were answerable to the Supreme Court, the scheme of the Constitution would have had little to recommend it over the Articles of Confederation.

Mr. President, Professor Sager now deals with the judicial independence requirements of article III.

Article III stipulates that federal judges are to be contained in office during good behavior and without diminution in salary. These provisions were placed in Article III in order to secure judicial independence, which is a core value in our constitutional tradition, and must be understood as limiting the power of Congress to channel Article III cases to the state courts without providing for federal judicial review. If Congress can place any group of cases it chooses in the exclusive province of the state courts, it can subvert the judicial independence requirements of Article III at will. The obvious relationship between federal review and the commitment of Article III to judicial independence was recognized early by Justice Marshall, writing for the Court in *Cohens* v. *Virginia:*

"It would be hazarding too much to assert that the judicatures of the States will be exempt from the prejudices by which the legislatures and people are influenced, and will constitute perfectly impartial tribunals. In many states the judges are dependent for office and for salary on the will of the legislature. The constitution of the United States furnishes no security against the universal adoption of this principle. When we observe the importance which that constitution attaches to the independence of judges, we are the less inclined to suppose that it can have intended to leave these constitutional questions to tribunals where this independence may not exist."

Thus, while Article III embodies the understanding that Congress might choose to create no lower federal courts or to endow them with limited jurisdiction, and apparently gives Congress power to effectuate some restrictions on Supreme Court jurisdiction, these powers cannot be used in combination utterly to defeat the judicial independence requirements which are also stipulated in Article III. State judges do not enjoy Article III security, and unrestricted use of the state courts as exclusive forums for Article III business is wholly inconsistent with our constitutional commitment to an independent judiciary. The Article III compromise entitles Congress to use state courts in lieu of inferior federal courts to hear Article III cases in their initial stages. But there plainly must be limits on Congress' ability to make the state courts exclusive arbiters of Article III matters; and those limits are crossed when Congress attempts to divest the Supreme Court and all other federal courts of jurisdiction at least to review state court decisions on matters arising under the federal Constitution.

The question is not an entirely novel one. Congress has created various entities—ranging from courts martial to administrative agencies—which do Article III business but whose members do not enjoy Article III security. Just as with delegations of Article III business to the state courts, unlimited exercises of this sort by Congress would nullify the judicial independence provisions of Article III. The Court has consistently referred to such limits, and has had the occasion to invalidate adjudicatory schemes that overstep them. When the Court has evaluat-

ed congressional delegations of Article III business to non-Article III tribunals, it has held of critical importance: a) the significance and sensitivity of the pertinent Article III business, and b) the ultimate availability of Article III review.

Constitutional challenges to governmental conduct raise issues of great national importance. No other area of adjudication is as likely to excite public controversy an to invite political manipulation of the judiciary. Artilce III's commitment to judicial independence is nowhere more important than here. And no practical necessity could justify Congress in denying federal review of constitutional claims that have been directd to the federal courts. Under some circumstances, Congress can relegate the adjudication of Article III cases to the state courts, but it must provide persons who advance claims of federal constitutional right an opportunity to secure effective and independent review of the state court's disposition in an Article III court. Any other reading of Article III would permit Congress to circumvent the article's tenure and salary requirements.

(Mr. MATTINGLY assumed the chair.)

Mr. BAUCUS. Mr. President, I wish now to depart from Professor Sager's statement and refer to some other matters, particularly some editorial comments of various papers around the country on this issue. I believe it is important for Members listening and other Senators to know that the press has commented on these bills. I might add, I am hard pressed to think of any single editorial comment that is in favor of these court-stripping bills. All of them that I am aware of are opposed.

Last spring, the Washington Post printed an important and, I think, one of the better editorials on how these court-stripping bills could undermine our Federal courts. The Post correctly pointed out that this issue is the single most important item on our Nation's noneconomic agenda for the eighties; that is, all these court-stripping bills that apply to various issues where Americans disagree with Supreme Court decisions.

I might add, Mr. President, that I, too, am not particularly enamored with all the Supreme Court decisions. Indeed, there are some which I do not like at all, but the way we change Supreme Court decisons is by constitutional amendment. In fact, several amendments to our Constitution are the direct result of public dissatisfaction with Supreme Court decisions. The 16th amendment certainly is one such example. There are many others. I suggest that we as Americans continue to pursue the amendment process rather than try to eliminate the Supreme Court as a remedy to unpopular Supreme Court decisions.

This is what the Washington Post had to say:

What development on the Hill has constitutional scholars profoundly worried and legal bigwigs warning about the prospect of a crisis in the government? It is the introduction of legislation in Congress to limit the jurisdiction of the federal courts to decide constitutional questions. Senator Max Baucus of Montana has referred to this issue as "the single most important item on our nation's non-economic agenda in the 1980s," and he is not alone in this view.

More than 30 bills have now been introduced in the House and Senate that would take from the federal courts the power to decide certain cases. Most of the bills are responding to controversial Supreme Court decisions on subjects such as prayer in the schools, busing and abortion. These rulings, because they are grounded in the Constitution itself, cannot be overturned by statute. A constitutional amendment would be required in each instance, but amending the Constitution takes time and great political strength. Amendments must be proposed by a two-thirds vote of each house of Congress and then ratified by the legislatures of three-fourths of the states. Because each of the single issue constituencies opposing a Supreme Court decision would find it difficult to mobilize enough support to amend the Constitution, their leaders in Congress have proposed another tactic designed to accomplish the same result. They would pass a law—by simple majority vote—removing a certain class of cases from the jurisdiction of the federal courts, thus, leaving constitutional questions in sensitive areas up to the 50 individual states courts.

This approach to constitutional law, like the Roosevelt court-packing plan of the 30s, seeks to control the decisions of the courts by undermining their very structure. If the strategy succeeds, the judiciary would no longer be an independent and equal branch of government, and no rights would endure without the consent of Congress.

David Brink, the President of the American Bar Association warns, "If we permit Congress, or even the people, to avoid (the amendment) process at will by simple majorities, we have . . . lost our Constitution as the supreme law of the land." Four former Attorneys General and three former solicitors general have advised members of the House and Senate Judiciary Committees that "Congress is not empowered by the Constitution selectively to restrict the jurisdiction of the federal courts."

Tipping the balance of power so carefully crafted by the Founding Fathers is a dangerous game, and Congress should refuse to play.

I should now like to refer to some editorials in the papers in my own State of Montana. The following is an August 19, 1982, statement by the Great Falls Tribune, the major daily in Great Falls, Mont. The editorial is entitled, "Anti-Abortion Bill Involves Courts, Too."

Mr. President, I might add that the issue with respect to that bill is the same as the issue now before us—that is, limiting the Supreme Court review over Federal constitutional questions.

The long-awaited Senate abortion debate began Monday in a farcical way. Sen. Jesse Helms, R-N.C., introduced only part of his anti-abortion legislation—and kept secret the exact contents until Wednesday.

Another Republican senator, Oregon's Bob Packwood, who opposes the legislation, continued the spirit of that first day of debate by reading from a book he said was "A History of Abortion in America." Packwood was leading a filibuster against the Helms bill.

By Wednesday midday, though, Helms had suffered at least one defeat. He lost on a move to set aside counter-proposals by Sen. Max Baucus, D-Montana, and Sen. Lowell Weicker, R-Conn. Baucus offered an amendment that said "the federal courts must remain open to litigants whose claims arise out of the federal Constitution."

It's taken a while for the Senate to get around to the anti-abortion matter, which "new right" organizations have pushed ever since they helped elect Ronald Reagan and a Republican-dominated Senate. In past weeks, they've criticized the Reagan administration for its lack of aggressive action on that matter and others.

Now that the moment for debate has arrived, the Senate has a chance to unequivocally tell Helms and others of his ilk that they're stepping over constitutional boundaries. Senators got a good start Wednesday when they opposed Helms' request to table the Baucus and Weicker amendments.

The proposal Helms finally revealed, which is weaker than his human life bill, says that "scientific evidence demonstrates the life of each human being begins at conception." Helms would prohibit use of federal money for abortion, including medical research and training in federally funded medical schools. His measure says the U.S. Supreme Court was wrong in 1973 when it legalized most abortions.

With such a measure, the Senate comes close to legislating morality; it clearly is overstepping its legislative duties in trying to declare when life begins—a matter on which even scientists and religious authorities cannot agree. But another, more wide-reaching matter is at stake with the Helms legislation.

It is just one of several proposals that would take away the authority of the Supreme Court and federal district courts to hear various cases. Curiously enough, Helms didn't include words to bar high court jurisdiction on abortion in his newest proposal. But he added school prayer to it; the measure says the Supreme Court shall not have jurisdiction over lower court rulings or state legislation that would allow return to prayer in the schools.

Abortion and prayer are two issues Helms and others would like to get away from the Supreme Court. The reason why is simple: they don't like the way the high court ruled in those areas.

Rather than allow the Supreme Court to issue authoritative interpretations of federal law, they would prefer to entrust the matters to state court jurisdiction. This is not an example of federalist yearnings to return powers to the states; it is a violation of the spirit of the Constitution.

Supreme Court decisions assure uniformity across the country on constitutional matters. The uniformity is crucial; it is the cement that binds the various states into one nation. Stripping the highest court in the land of some of its authority and giving it to state courts assures a variety of interpretations of what is constitutional—and not only in the areas of abortion or prayer. Congress could try to limit jurisdiction in any number of other areas.

Baucus, a member of the Judiciary Committee that first considered the Helms abortion legislation, has spoken out strongly and steadily for more than a year about the dangers of stripping courts of judiciary power. The entire Senate now has the opportunity to make sure the campaign against limiting

court jurisdiction is close to an end rather than just beginning.

Mr. President, just 3 days later, the Missoulian, the daily in Missoula, Mont., called the Helms amendments wolves in sheep's clothing. This is what the Missoulian had to say in an editorial on page 4:

The United States Senate decisively rejected last week those twin wolves in sheep's clothing, the abortion and school prayer bills.

These misnamed "social issues" are not as they seem. They seem to block abortion. They seem to allow prayer in public schools.

Those issues by themselves are grist for spirited debate.

But those issues were not what was at stake last week in the Senate. The real issue was whether Congress would strip the Supreme Court of the United States of its power to review public laws.

Sen. Jesse Helms of North Carolina tried to slip the abortion and school prayer amendments through. The abortion measure would have reversed the Supreme Court's ruling that abortion is legal. The other amendment would have prevented the court from reviewing lower court rulings and state laws that permit prayer in public schools.

Montana Sen. Max Baucus countered with a measure declaring that it's the task of federal courts, not Congress, to rule on constitutional issues, including abortion and school prayer.

The Baucus measure won, 59-38.

After the vote Sen. Lowell Weiker of Connecticut declared that the so-called "social issues" are now dead for the year. Perhaps, perhaps not.

They will return, either after Labor Day or next year. Every time they do, the Senate should knock them on the head.

It's a strange quirk of ideology that the supporters of the abortion and school prayer measures are called conservative.

Their proposals to rip away powers that the Supreme Court has held for nearly 200 years is revolutionary in the extreme. It would set up a dangerous and unnecessary confrontation between two branches of government. If the power of Congress prevailed in such a confrontation, and the court was stripped of its authority to review laws that Congress didn't want reviewed, the way would be cleared for totalitarian destruction of the court protections Americans now enjoy.

Stripping the Supreme Court of its review power is among the first things a fascist or communist regime would do. It's radical. It's wrong.

Let the issues of abortion and school prayer be debated in Congress and during elections. Let laws be passed about them if the urge is there.

But leave intact the Supreme Court's power to review those laws or this nation flirts with destruction of its constitutional safeguards.

There is a concluding sentence.

Mr. President, I should like now to read an editorial from the Miles City Star, which is the major paper in Miles City, Mont. I think it is important to read it into the RECORD at this point. The title is "Turning the Helms."

Jesse Helms tried to pull a fast one on the U.S. Constitution and his fellow senators Wednesday. Montana Sen. Max Baucus was among those who brought the North Carolinian up short.

Helms, the Senate's leading conservative, offered two measures to reverse court rulings on issues dear to conservative hearts. The first would have barred Supreme Court review of lower court rulings or legislation permitting prayer in public schools. A second included a congressional finding that human life begins at conception and that constitutional safeguards extend to the unborn fetus.

What graveled Baucus and others was the sneaky way Helms brought his proposals to the floor under wraps and tried to hang them on the latest bill to hike the nation's debt ceiling—a measure that must be passed. Their response came in the form of amendments stipulating that Helms' proposals would not be construed to limit the federal courts' power to rule on the constitutional issues surrounding both abortion and school prayer.

The amendments stopped Helms in his tracks, at least for the time being. There is a lot of sympathy for his ideas in Congress and around the country. Declaring certain areas out-of-bounds to the courts, however, is a dangerous way to set government and social policy.

As one senator put it, the nation "is headed toward gridlock and ultimately toward anarchy" if federal courts are stripped of their power to review cases Congress would rather have the final say in.

The system of checks and balances that has kept the executive, legislative and judicial arms of the federal government from abusing power will not tolerate the tinkering Helms had in mind. If the courthouse doors can be shut to one kind of case, they can be shut, period.

We should not leave the keys to that door in the hands of a mere majority of the U.S. Congress.

Mr. President, on April 29 of this year, I praised the ABA for its leadership in taking a strong stand against these court-stripping proposals, and I should like now to summarize a portion of that statement today.

For the past 18 months the Congress has continually debated the constitutionality and wisdom of congressional attempts to strip the Federal courts of their jurisdiction over controversial constitutional issues. In general, these legislative initiatives have been promoted by single-issue constituencies who are unhappy with a specific Supreme Court decision. Fortunately, there are citizens and organizations who have been willing to analyze these proposals not only for their impact on a specific social issue, but also for their impact on our Constitution and our system of government.

In particular, the American Bar Association has taken a strong position in opposition to these court-stripping bills. Under the leadership of its able president, David R. Brink, the ABA has been a forceful and important voice in bringing the real risks of the court-stripping bills to the attention of the American public. Unfortunately, the ABA has been criticized for speaking out on these fundamental constitutional issues. I believe the ABA should be praised for its leadership in this area, not condemned.

Yesterday, April 28, 1982, Mr. Brink displayed courage and leadership by continuing to speak out on behalf of an independent judicial branch. His excellent statement before the National Press Club underscores the need for our continued vigilance of the basic principles of our system of government. I commend Mr. Brink's remarks to my colleagues.

This is the statement presented at the National Press Club on April 28 of this year by Mr. Brink, the president of the American Bar Association:

THE SEPARATION OF POWERS—WHOSE OX IS BEING GORED?

May 1 is Law Day. And it is a special Law Day—Law Day twenty-five. Its theme is A Generation of Progress. President Eisenhower proclaimed the first Law Day in 1958 and on April 16 President Reagan proclaimed Law Day 25. Each year we in the United States celebrate our commitment to our unique heritage of two centuries of liberty, democracy, justice and the rule of law.

Let us make no mistake. That heritage, and our progress in it, are no accident. They are the product of a unique and inspired document, the Constitution of the United States of America, that serves the world as a model of representative democracy. The genius of that model is the doctrine of separation of powers that divides government into three branches, each having an assigned role and each operating to a degree as a check and balance on the others. We have conferred on the executive a role of policymaking and administration, on the legislative the power to initiate laws to serve changing public needs, and on the judicial the interpretation of law and the preservation of the fundamental rights secured to our citizens by our organic document.

Sometimes in the press of current problems we forget the origin of our system of government and the source of our liberties. We must never forget the wellsprings of our heritage and our progress. But the Constitution is not self-executing. To make its grand policies a reality, it needs interpretation and enforcement by the courts and wise implementation and extension by the legislative and executive branches. It needs the coordinated work of all three branches of government.

Today it sometimes seems that our national interest in the Constitution is centered on just one aspect of the Constitution—the separation of powers. We are endangering our continued progress under the rule of law by preoccupation with turf disputes over the roles of the three branches of government. And the arguments over the separation of powers largely depend on whose ox is being gored.

Members of the executive and legislative branches have, and should have, many opportunities for public expression of their views on the roles of the three branches of government. The judicial branch is enjoined by its own Code of Judicial Ethics from public commentary on matters that may come before it and hence is inhibited in making statements in its own defense. Thus it often falls to the American Bar Association—as the national voice of the legal profession—to defend the judicial branch or to try to bring some balance to the debate. When the ABA acts in this role, it is classi-

fied by some commentators as ultraconservative and by others as ultraliberal. We are neither. We are apolitical and we simply try to bring our special perspective as full-time students of law and the Constitution to enlightenment of the ongoing national debate. We are only viewed as political, or conservative or liberal, according to whose ox is being gored.

Currently, members of both the executive and legislative branches have charged publicly and repeatedly that the judicial branch has overstepped its constitutional role and has engaged in policymaking functions that are reserved to the other branches. In my opinion, those charges are, at best, debatable. It must be remembered, first, that, unlike the executive and the legislative, the courts do not initiate policy on their own motion; they simply decide actual cases between opposing parties that have not been resolved by the other branches. What has happened, I think, is that the executive and legislative branches have either failed to develop constitutional solutions to state or federal problems, have failed to enforce laws already on the books or have left policies unclear so that they require court interpretation. In some instances they have dumped implementation of policies in controversial areas on the courts, which have to decide the cases and which have no means to defend themselves from the attacks by the public and by other branches of government that follow their decisions.

Let me cite a few instances briefly and one at greater length. On the matter of tax exemption for colleges that have racially discriminatory policies, the executive had a hot potato. First it decided to suspend denial of tax exemptions that seemed settled. Then it said it would seek legislation that would deny tax exemption. Acting on requests from the legislative branch, the executive finally said that it would dump the hot potato on the Court. If the Court decides simply that denial is mandated by the Constitution, by existing federal statutes and proper regulations and by previous Court decisions, it may be attacked by both branches of government for making unpopular policy.

Other instances of unpopular judicial solutions result from failure of the states or the federal government to provide specific tests, specific remedies or real enforcement of constitutional principles or general statutes. For example, in the case of the Civil Rights Act of 1964 and the Voting Rights Act of 1965, the intent of Congress was to put teeth into the Amendments to the Constitution that had been the law of the land for a century or more but had not by themselves resulted in eliminating discrimination in many parts of the country. But Congress did not define the tests of discriminatory practices beyond repeating the words of the Constitution. That dumped the question of interpretation on the Court—and its decisions under the one statute were attacked by conservatives and under the other, by liberals. In the case of the Voting Rights Act, the position of the ABA is that Congress originally intended to prevent the fact of discrimination and that to do so it incorporated the "effects" or "results" test of discriminatory action that then represented the constitutional law on the subject. In extending the Voting Rights Act for the third time, Congress should handle the hot potato itself and adopt a results test in the law.

I could cite a number of other instances in which the other branches of government have used the courts as their dumping grounds for hot potatoes and then castigated the courts for the way they handle them. But that would take time from my discussion of the most significant and dangerous new type of attack on the courts. I refer, of course, to the more than 30 bills now before the Congress that would deprive the federal courts of their historic and vital jurisdiction of power to grant remedies in what all agree are constitutional cases. Because that judicial role is fundamental to the separation of powers and the preservation of our system of government. I have been quoted as saying that those bills are leading us to the most serious constitutional crisis since our Civil War. That quote is accurate and I believe it more strongly than ever.

Let me say four preliminary things. The first is that my stand on these bills is not purely personal and that the House of Delegates of the ABA—our policymaking body—supported it by an overwhelming majority. Second, the ABA does not take a position either way on the subject matter of these particular bills—abortion, prayer in school or means of achieving school desegregation. What we do oppose is the process used—taking constitutional questions away from the third branch of government and opening the door to elimination of the judicial branch in its constitutional role. Third, the battle over the federal jurisdiction issue is not between the courts—or the ABA—and the executive. The Administration, so far as I know, has not initiated or taken a position on these bills.

Mr. President, I might digress at this point and point out that the present Attorney General has very much taken a position on these bills. He finds it unwise. He does not think Congress should attempt to overturn the Supreme Court decision through this process, that is, by court stripping.

I am not sure what the administration's position is on the substance of the issue, but my understanding is that the administration does support a constitutional amendment in an attempt to overturn the Supreme Court decision.

Mr. President, I agree with the administration. I am not saying I would support the amendment, but I do very much support the amendment process. That is the process that all people who are attempting to overturn the Supreme Court should use, that is, a constitutional amendment process.

I now continue Mr. Brink's statement to the National Press Club:

I find it encouraging that Attorney General Smith has repeatedly urged strict observance of the separation of powers. I therefore hope that in response to calls from Chairman Rodino, our Association and press commentators, the Administration will take a firm stand in opposition to these bills.

As I said, Mr. President, that is exactly what the administration has done. They have taken the position against trying to overturn unpopular Supreme Court decisions by stripping the court of jurisdiction over that particular issue.

Fourth, the battle is not yet with the Congress, nor is it with either Republicans or Democrats in Congress. For there are members of both parties on both sides of the question. And I hope that those Members of Congress in both parties who value the fundamental structure of our nation more than they do seemingly popular solutions to the hot potato social problems of the day will join to defeat these bills.

The question whether the federal courts have overstepped their constitutional role, or have merely answered the difficult constitutional questions that have been dumped on them, may be debatable. But it is beyond debate that the present bills in Congress would overstep the constitutional role of Congress and endanger our system of government.

The argument is one of both law and policy. As to the legal question, constitutional scholars have expressed differing views on the constitutionality of these bills. The preponderant view appears to be that they are unconstitutional as applied to either the United States Supreme Court or the lower federal courts.

Some of the relevant materials are Article III of the Constitution, which says, among other things, that the judicial power of the United States extends to all cases arising under the Constitution, and the due process clause of the Fifth Amendment, which guarantees that no person shall be deprived of life, liberty or property without due process of law. Congress cannot exercise either such undefined power as it has under Article III to make exceptions to the jurisdiction of the Supreme Court or its power to create, change or abolish the inferior federal courts in any manner that would deprive our citizens of due process or deny the equal protection of the laws. Nor can Congress, by a "bootstraps" process, confer on itself any of the other powers that are otherwise expressly denied it by Amendments to the original Constitution. Therefore, Congress cannot, either directly or under the guise of limiting jurisdiction, change remedies, and thereby change the constitutional law or define juridical processes in such a way as to deprive citizens of substantive rights guaranteed by the Bill of Rights and other parts of our Constitution. If Congress forecloses citizens from fundamental constitutional rights or remedies in the federal courts with the intent or effect of having different law applied by differently constituted courts, it clearly has deprived them of due process and equal protection. And that is precisely the intent, and would be the effect, of these bills.

Those who read only a portion of Article III of the Constitution say that the exceptions clause of Article III grants Congress unlimited power to take away the jurisdiction of the Supreme Court, and that the power of Congress to create inferior Article III courts implies the power to abolish those courts or selective portions of their jurisdiction. But if the whole of Article III, the balance of the Constitution and the subsequent Amendments are also read, it is clear that the framers could not have intended any such result.

The proponents of these bills claim that most Americans disagree with our Constitution, as interpreted by the branch of Federal Government to which our forefathers entrusted interpretation of the Constitution and protection of our rights. If, indeed, our Nation does disagree with rights, under the Constitution, in the areas of abortion, prayer in schools or desegregation, there is a perfectly good way to change it. That is the amendment process involving the States and the people and requiring more than simple majorities. And our forefathers never

intended that Congress, alone, by a simple majority vote, could obtain the same result.

For if the Congress, by a simple majority vote, could rewrite the Constitution, a future Congress could wipe out Federal jurisdiction and remedies in all constitutional cases. Then, at best, we would have 50 Federal constitutions—one for each State. And if State legislatures followed the example of Congress and deprived State courts of constitutional jurisdiction, we would have no judicial review at all in constitutional cases. We would have a purely parliamentary system of government, without either an enforceable written national Constitution or a court having the power to declare the process unconstitutional. The founders of our country clearly did not intend to create a tripartite system of Federal Government that so easily could be rendered a nullity. So these bills all must be deemed legally unconstitutional.

But, even more important, these bills must be opposed on grounds of policy.

I might add, Mr. President, the foregoing analysis was addressing the reason why these bills must be important as a matter of legal policy, that is, under the Constitution.

Now he returns to why these bills must be opposed in terms of public policy apart from the legal requirements.

The admitted purpose of these bills is to change the constitutional law as interpreted by the judicial branch of federal government. That purpose betrays a terrible cynicism about our state judicial systems, for it is based on the belief that variations that are pleasing to current local majorities will be read into our national organic document by local courts. If that belief is unfounded, as I think it is, the bills are pointless. If it is well founded, it tells us that the proponents are willing to convert America into a kind of league of independent states instead of one nation.

This is another instance of the constitutional hot potato being handed to the courts, but this time it is, in part, the state courts. And the state courts do not want the constitutional responsibility the proponents would thrust upon them. The Conference of Chief Justices, representing all our state court systems, passed a resolution on January 30, 1982, without dissent, that viewed these bills with the gravest concern, citing many strong arguments.

Most of the apologists for the theory that the Congress can eliminate or control the federal courts say that enactment of these bills will teach the court a needed lesson. That is about as responsible as suggesting that we can teach the other superpowers of the world a valuable lesson by firing a first nuclear missile at them now. Neither effort to teach a lesson can be stopped after the first salvo; either one will result in further warfare and destruction.

So we much ensure that Congress, as it has repeatedly in the past, once again declines the ultimate confrontation. For if we leave it to the Supreme Court to be the sole defender of the role of the federal courts, we face the certainty of grievous damage to our system. If, in accordance with the law as I believe it to be, the Supreme Court declares these bills unconstitutional, the current critics of the role of the judicial branch will be moved to declare the decision self-serving and proof that the Courts are overstepping their role. That will produce a clamor of further unjustified attacks on our courts and legal system and possible constitutional amendments to eliminate or limit the judicial branch. But if, contrary to my expectations, the court sustains the bills, each Congress, according to its mood, will remove more and more of the jurisdiction of the federal judiciary until it is gone. Either way we face a terrible division of our country and risk the destruction of our free system of government.

George Washington, in his moving Farewell Address to the nation, issued a clear warning: "If, in the opinion of the people, the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the consititution designates. But let there be no change by usurpation; but though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil, any partial or transient benefit which the use can at any time yield."

Abraham Lincoln strongly disagreed with the Dred Scott decision of the United States Supreme Court. Yet he said of the Court: "We think its decisions on constitutional questions, when fully settled, should control, not only the particular cases decided, but the general policy of the country, subject to be disturbed only by amendments of the Constitution as provided in that instrument itself. More than this would be revolution."

Those are the words of Abraham Lincoln. They are short, they are succinct, to the point, and worth repeating:

We think its decisions on constitutional questions, when fully settled, should control, not only the particular cases decided but the general policy of the country, subject to be disturbed only by amendments of the Constitution as provided in that instrument itself. More than this would be revolution.

I do not believe the proponents of these bills really want to launch a missile that could plunge us into internal strife and destroy our rights, the courts or our Constitution. But they are shortsighted in not seeing what they are starting. They are risking our most fundamental values to dispose of a hot potato—to secure what they believe are popular and expedient solutions to current and transient problems.

But if they are successful in that, they also risk the Generation of Progress we celebrate on Law Day.

Mr. President, again, I am reading a statement of Mr. Brink that he gave on Law Day, May 1, of this year, before the National Press Club. Mr. Brink is the president of the American Bar Association.

They threaten forfeiture of our progress in broader access to law and justice, equal protection of all our citizens, including minorities and the poor, and eradication of discrimination of all kinds. But, more than that, they threaten the rights of all of us. Once the door is opened, the rights of free speech, free press, free assembly and free exercise of religion could be the next to be abolished or curtailed.

Whose ox is being gored? It is not just the ox of one branch of government in a turf dispute with another. It is our entire system of government. It is the ox of all of us—the American people. I think of the great words of John Donne that come down to us from 1624. I wish I had time to read his magnificent text. But let me quote his final words. . . . "Never send to know for whom the bell tolls; it tolls for thee."

The ox of a free legal profession is gored. The ox of a free press is gored. The bell tolls for all Americans. And it is the duty of the press and lawyers—both in their separate ways protectors of our citizens and seekers of the truth—to tell these truths again and again. We must tell them until all members of Congress and all Americans realize that our system and our rights must be preserved. We may then warrant that when another generation under the rule of law has passed, it, too, will be a generation of progress.

Mr. President, as I mentioned several times today, I speak in opposition to the underlying amendment of the Senator from North Carolina because it prohibits Supreme Court review of the Federal constitutional issue. I think it is extremely important to spend time addressing this.

As I have said repeatedly and I will state once again, as I did this morning, the issue of court access and court stripping is the issue before us. It is not school prayer, it is not voluntary prayer, it has nothing to do with prayer or religion. It has to do with whether or not the Senate will today, on September 16, 1982, begin to set in motion the vicious and pernicious precedent of removing the Supreme Court's power and right to enforce the Constitution.

Mr. President, it is court stripping that the Helms amendment is about. It is court stripping that the Weicker amendment addresses. It is court stripping that the Baucus amendment is focused on. It is court stripping that each and every Senator must focus on before they cast a vote on the underlying issue.

The press reports describing today's forthcoming debate suggest that this dialog and today's discussion will be on the volatile issue of school prayer. Nothing could be further from the truth. We are here today because the underlying issue is whether the American public wants the guarantees in our Constitution to mean something. That is why the Senator from Connecticut, who has done a magnificent job, and I are here—because we are trying to protect those constitutional guarantees and protect that branch of Government which was designed to insure that those guarantees not be infringed upon.

I am convinced that if the average citizen knew that what was pending before us today was a court stripping amendment, they would agree with me that this is not the way to go about responding to unpopular or inappropriate decisions of the Supreme Court.

Mr. President, I also would like to make one additional point about the manner in which this amendment is being raised.

I do not think that this proposal should be before us in the context of a debt limit bill. No issue of such great magnitude should be considered as a rider to a money bill of this nature. It should be processed and called up as a freestanding piece of legislation.

Which brings me to what I consider an outrageous aspect of the consideration of this proposal. There has not been one single witness to testify on the underlying Helms legislation in the Senate in this Congress or any other Congress. The original Helms proposal in this Congress, S. 481, is pending before the Separation of Powers Subcommittee of which I am the ranking minority member.

Senator EAST, the chairman of that subcommittee, who is a supporter of this proposal, has not had 1 day of hearings on S. 481. The subcommittee has not been asked to vote on this proposal. The Senate Judiciary Committee has not been asked to vote on this proposal. The entire subcommittee and committee process has been totally end run.

This Helms amendment is here without any serious Senate consideration.

I should also note that the House of Representatives has had extensive hearings on this proposal in the last Congress. There is a full volume of hearings from the House Judiciary Committee sitting here on my desk. I believe it is no small coincidence that the House of Representatives has not favorably responded to court stripping proposals. It is because the House has studied them, has held hearings, has looked into this question; whereas, this body has not held hearings; and not one witness has testified. This body has not looked into the serious nature of the question.

The House opposition to court stripping is bipartisan and crosses ideological lines. I believe the depth of sentiment in the Senate against court stripping would be similar if the Senate were willing to study the proposal and permit it to come up through the traditional committee process.

I hope during the course of today to bring to the Senate's attention additional materials which I believe should have been considered by the Separation of Powers Subcommittee and the full Senate Judiciary Committee. Unfortunately, they were not, and, therefore, I feel compelled to insure that the Senate record is totally complete on this issue.

(Mr. COCHRAN assumed the chair.)

Mr. BAUCUS. Mr. President, the following is a report of the American Bar Association, approved by the American Bar Association House of Delegates in the summer of last year. This is to follow the statement of Mr. Brink that I referred to earlier. Mr. Brink is the president of the American Bar Association. I referred earlier to his statement of the National Press Club of April 28 of this year. Now I would like to refer and read, in part, the resolution of the American Bar Association which was approved by the ABA House of Delegates last December.

REPORT WITH RECOMMENDATION—AMERICAN BAR ASSOCIATION REPORT TO THE HOUSE OF DELEGATES—SPECIAL COMMITTEE ON COORDINATION OF FEDERAL JUDICIAL IMPROVEMENTS

RECOMMENDATION

Be it Resolved, that the American Bar Association opposes the legislative curtailment of the jurisdiction of the Supreme Court of the United States or the inferior federal courts for the purpose of effecting changes in constitutional law.

REPORT

Before the 97th Congress are more than a score of bills which would strip from the original jurisdiction of the lower federal courts certain subject areas involving controversial decisions of the Supreme Court of the United States, notably abortion, school prayers, and busing. Enactment of such legislation would require persons claiming rights under one or another of these decisions to bring suit in state courts. Moreover several of these bills would deny the Supreme Court appellate jurisdiction to review the decisions of the state courts with respect to those issues that could be brought only in the state courts.

Sponsors of these bills clearly avow that their purpose is to bring about an altering of the constitutional interpretations that now prevail. The belief is apparently that state courts, if given exclusive power to decide such suits without fear of Supreme Court review, will not follow the precedents established in these areas by the Nation's highest Court.

The Committee recommends to the Association the adoption of this resolution because of one overriding conviction; the necessity to protect the integrity of the courts of this Nation, federal and state, from misdirected legislative efforts to achieve something that can be done only through constitutional amendment. The issue is not abortion; it is not busing; it is not prayer in the public schools; it is not any of a number of things that may occasion dissatisfaction with particular decisions. We are sure that the Members of the Association have many various positions on these substantive questions, as we do. But the real issue, the only issue, is whether, as a matter of policy and of constitutional permissibility, this Nation is going to adopt a device whereby each time a decision of the Supreme Court of a lower federal court offends a majority of both Houses of Congress the jurisdiction of the federal courts to hear that issue will be stripped away. We do not believe that is a system the Framers intended nor one that we should strive to institute.

Supreme Court decisions interpreting the Constitution establish binding precedents which are subject to alteration by the people through the process of constitutional amendment. The Framers provided in Article V a means of changing the Constitution and deliberately made it difficult to achieve. The "leaden-footed process of constitutional amendment," as Justice Frankfurter called it, with the requirement of extraordinary majorities in Congress and among the States, was designed to make sure that transient majorities could not easily change our fundamental law. Are we to believe that after constructing this formidable barrier to easy change, the Framers intentionally or inadvertently also put in place a system in which simple majorities could bring about a rewriting of constitutional law?

The American Bar Association has long opposed efforts, from whatever spectrum of the political scene, to alter constitutional interpretation through means other than constitutional amendment. We stood in opposition to the "Court-packing" plan of the late 1930's, which would have altered prevailing law by stacking the Court's membership. More than thirty years ago we called for the adoption of assurance that jurisdictional manipulation would not and could not be used to work substantive changes in the Constitution. In 1958, the Association opposed bills pending in Congress that would have denied the Supreme Court review of decisions involving alleged subversives in various fields. That policy is Association policy today and the Committee calls on the House to reaffirm it and extend it.

Central to this position is recognition of the great power which Congress possesses under the Constitution to structure and to allocate the jurisdiction of the Supreme Court to hear appeals and the jurisdiction of the lower Federal courts—and of the limits on that power. Article III stipulates that the High Court has appellate jurisdiction over practically the entire range of Federal judicial matters, subject to such "exceptions and regulations" as Congress provides. Clearly, then, Congress may regulate how cases come to the Court and could deny the Court appellate jurisdiction over some classes of cases altogether, as in fact it has historically done. It could, for example, make a lower Federal Court's decisions with respect to interpretation of the tax laws or admiralty issues final.

Even greater is Congress' power with respect to the lower Federal courts. The compromise at the Constitutional Convention was to create "one Supreme Court" and to leave in legislative discretion whether and when to create and to do away with any "inferior" Federal courts. Some of the Framers wanted constitutional assurance of lower courts, but the prevailing number thought that Congress should be able to leave to State court adjudication matters of national interest, subject to Supreme Court review. And to safeguard the national interest and the integrity of constitutional rights, the Framers write in Article VI, the "Supremacy Clause," the guarantee that the Constitution, Federal laws, and treaties would be the "supreme law of the land" and that "the judges in every State shall be bound thereby, anything in the constitution or laws of any State to the contrary notwithstanding." Moreover, the same article requires State judges, as well as all other State officers, to be bound by oath or affirmation to support the Constitution of the United States.

Necessarily, it follows that if the Constitution empowers Congress to provide or not to provide for lower Federal courts, it empowers Congress to vest in such lower Federal courts that it creates all or only some of the jurisdiction it could give and thus to allocate between State and Federal courts the judicial power of the Nation in such ways as it deems to serve the best interests of the States and the Nation. That has been the understanding from the beginning on which Congress has acted and the decisions of the U.S. Supreme Court are consistent in affirming the correctness of that understanding.

It is thus not with any reservations with respect to congressional power generally that the committee recommends this resolu-

tion. Rather, we are actuated by specific constitutional reservations, more substantial as to Supreme Court appellate jurisdiction than as to lower Federal court jurisdiction, and by what we believe to be compelling policy considerations against the property and desirability of the bills now pending before Congress.

Even were the constitutional considerations compellingly clear in favor of the validity of these bills, as they are not, we would urge opposition.

First, if it is likely, as we by no means concede it is, that the meaning ascribed to a constitutional provision can be changed by the simple device of divesting jurisdiction from one set of courts and giving it to another, then indeed we have a Constitution writ on sand and the integrity of our amending process is eroded. It is central to our fundamental charter that ordinary legislation can be changed through ordinary legislation and the Constitution only through amendment. We should resoundingly reject the counsel of those who tell us there is another way. Down that route lie barely-hidden hazards to constitutional governance.

Second, to accept the explicit judgment of the sponsors of these bills that shifting jurisdiction will result in substantive change requires us to dishonor the thousands of State judges who, by oath and conscience, are bound to adhere to established precedent enunciated by the Supreme Court. We do not doubt that the great majority of State judges will do their duty. Nonetheless, this legislation is pernicious in concept even if it does not achieve its purpose.

It is bad because it suggests State judges will depart from their oaths. It is bad because it constitutes a congressional invitation to them to depart from their oaths; it says to State judges that Congress believes some decisions are so wrong they ought to be changed and those judges should do it. It is wrong because hundreds or thousands of State judges who are subject to periodic elections will be put in peril. The same interest groups that extract from an elected Congress jurisdictional alterations will demand from elected State judiciaries that they accept the congressional invitation to change. Federal judges are insulated from this and other pressures; the Framers deliberately provided for independence to prevent just these pressures. Congress should not subject State judges to often hard choices between oath and career.

Finally, if most State judges honor their oaths, the status of the objected-to constitutional decisions will be frozen in place. The Supreme Court cannot hear such cases and perhaps overrule them or alter them in any way. And as new fact situations arise, State court interpretations will begin to create somewhat different rules which will vary from State to State.

Third, either because of disagreement with the substance of these decisions or because of electoral pressures, some State judges may indeed accept the invitation of Congress and refuse to follow Supreme Court precedent. Because there would be no Supreme Court review, in those States, Federal constitutional law would change and the Constitution would mean something different from State to State. This result would be pernicious because fundamental liberties—whether the ones which are the subjects of these bills or others in the future if these succeed—will have been altered in some States and depreciated in all because of the demonstration that, contrary to what we have always believed, constitutional rights are subject to evanescent majority opinion. While the constitutional rights at peril today may not be valued by some, those at peril tomorrow may be freedom of speech, or just compensation for property taken for public use, or the guarantee against impairment of the obligation of contracts.

Even were Congress to adopt an approach, which is found in a few of the pending bills, of depriving the lower Federal courts of jurisdiction and continuing Supreme Court review of State court decisions in those areas, we believe that should be opposed as well. Basic to that effect would be a conclusion that alteration of substantive law could still be achieved which contains the same insult to State judges and the same possible injury to them. Supreme Court review could always alleviate some of the problem should some State judges depart from precedent, but the High Court's caseload is such that it could insure adherence to precedent only by taking an inordinate number of State cases in these areas to the neglect of its many other functions in interpreting national law.

Certainly, in the absence of Supreme Court review, the command of the Supremacy Clause that the Constitution be the "supreme law of the land" could become a nullity. Since the adoption of the Judiciary Act of 1789, a constant feature of the history of Federal court jurisdiction in this country, upon which the Nation continues to depend, has been the review by the U.S. Supreme Court of State court interpretations on questions of Federal constitutional law. If, as Justice Holmes reminded us, a page of history is worth a volume of logic, that singular fact stands as a practically unanswerable argument against jurisdictional legislation that would remove Supreme Court review of State court interpretation of the Constitution.

With regard to the constitutional validity of these bills, the committee doubts that, with respect to the Supreme Court's appellate jurisdiction, they can be sustained as proper "exceptions and regulations" and we have reservations about the bills' divestitures of lower Federal court jurisdiction as well. Numerous arguments have been addressed to the questions, some based on theories of the "essential functions" of the Federal courts, some on equal protection concepts governing the decision to restrict jurisdiction over certain disfavored issues, but we believe the correct analysis to be grounded upon what limits the Constitution itself places upon congressional exercise of any of its granted powers. The Constitution explicitly authorizes Congress to make exceptions to the Supreme Court appellate jurisdiction and implicitly to determine what, if any, jurisdiction the lower Federal courts are to have. Proponents of these bills read these authorizations not only as if they are plenary powers but as if they are completely unrestrained. But this cannot be so. The Constitution authorized Congress to regulate interstate commerce, to tax, to spend money, to create a postal system. None of these powers is conferred in language that then says, "but you cannot regulate commerce to deny the right to transport political literature across State lines," or "but you cannot bar from the mails newspapers that oppose the position of the majority in Congress." Rather, these powers are conferred in the manner in which Chief Justice Marshall described the commerce power in Gibbons against Ogden. "This power, like all others vested in Congress, is complete in itself, may be exercised to its utmost extent, and acknowledges no limitations, other than are prescribed in the Constitution."

Just so is the power to structure jurisdiction. It is complete in itself, may be exercised to its utmost extent, and acknowledges no limitations, other than are prescribed in the Constitution. And what is prescribed in the Constitution? The first amendment, the fourth amendment, and the fifth amendment, and all the other limitations upon the powers conferred on Congress in other parts of the Constitution obviously are those limitations. They restrain the power of Congress to legislate with respect to other constitutional provisions under granting clauses which would appear on their face to be unlimited. To construe the congressional power to structure jurisdiction the way the proponents would construe it would be to make it the only power conferred on Congress that is beyond the constraints of other provisions of the Constitution. Obviously, this cannot be so.

Important to this issue is the fact that while the authorization to Congress to structure the jurisdiction of the courts is contained in the body of the Constitution adopted in 1789, the relevant limitations are in the Bill of Rights, proposed and adopted in 1791, which are operative as to all of Congress' powers conferred in the Constitution itself. Thus, even if the Framers in the Convention did not conceive of the jurisdictional powers being limited, althought it is likely they did, adoption of the Bill of Rights did so limit them. Madison, we must remember, stated in the House of Representatives on June 8, 1789, that the Amendments he proposed would not be "parchment barriers" to Federal action, because "independent tribunals of justice will consider themselves in a peculiar manner the guardians of those rights."

No Supreme Court precedent stands in the way of this reading. The McCardle case (1869) is of limited value, not only because it arose in the context of post-Civil War radicalism, but because, as the Court plainly stated, it did not bar all access to the Supreme Court but only one avenue of appellate review. Within 3 years of McCardle, the Court in the Klein case (1872) held unconstitutional an attempted exercise of congressional power over its jurisdiction for the purpose of nullifying the President's pardoning power. Certainly, McCardle lends support to the proponents of these bills but far less support than they pretend.

The only complexity that enters into the argument is that when Congress removes from the jurisdiction of the Federal courts an issue, it does not by that act alone violate one of the constitutional constraints. That is to say, when it denies to the lower Federal courts and to the Supreme Court authority to hear a suit arising out of the institution of a prayer in the public schools, it does not establish a religion. The establishment clause is violated when some State or local authority imposes a prayer requirement and a State court refuses to follow Supreme Court precedent and to strike down the imposition. But just as Congress could not itself violate the establishment clause, it cannot authorize the States to violate the establishment clause. The authorization, when acted on in the jurisdictional context, would violate the establishment clause and could not validly prevent exercise of the Supreme Court's appellate jurisdiction to give a remedy for the violation. The congressional jurisdiction *provision* would be void.

We think it plain that the Constitution thus bars a manipulation of the Supreme Court's appellate jurisdiction for the purpose of effecting substantive changes in constitutional law. More difficult is resolution of the issue when what Congress enacts takes from the Federal and gives to the State courts jurisdiction to entertain such suits subject to Supreme Court review. Theoretically, High Court review should prevent effectuation of the forbidden constitutional change and save the statute. But it may be that the practical difficulties of Supreme Court review do not allow for adequate protection of constitutional rights under the circumstances. It may be that State legislatures would restrict State court jurisdiction and powers to afford adequate relief or to process cases that can be taken to the Supreme Court with sufficient promptness to protect rights. It may be that other unforeseen situations arise. In that eventuality, can it be doubted that serious constitutional questions would arise?

Because the policy considerations are so substantial and because the constitutional propriety of these bills is open to such serious reservations, we urge The House—

That is the ABA House of Delegates—

To adopt as the position of the association a simple, forthright policy: To oppose the curtailment of the jurisdiction of the Federal courts for the purpose of effecting constitutional change that is properly the province only of the amending process. Irrespective of the subject involved and regardless of our individual beliefs with respect to any of them, the overriding consideration is that we support the integrity and independence of Federal courts, whether we agree with particular decisions or not, and that we support the integrity and inviolability of the amending process.

We ask reaffirmation of the principle that Elihu Root, leader of the American bar, enunciated in 1912. "If the people of our country yield to the impatience which would destroy the system that alone makes effective these great impersonal rules and preserves our constitutional government, rather than endure the temporary inconvenience of pursuing regulated methods of changing the law, we shall not be reforming, we shall not be making progress, but shall be exhibiting . . . the lack of that self-control which enables great bodies of men to abide the slow process of orderly government rather than to break down the barriers of order when they have struck the impulse of the moment."

In No. 78 of "The Federalist", Alexander Hamilton explained that Federal judges had been given the maximum degree of independence and protection possible because they had a critical function to perform. They must assure, he said, that the limitations on legislative authority are enforced. "Limitations of this kind can be preserved in practice no other way than through the medium of the courts of justice, whose duty it must be to declare all acts contrary to the manifest tenor of the Constitution void. Without this, all the reservations of particular rights or privileges would amount to nothing."

We do not believe the great rights set out in the first, fourth, fifth, and other provisions of the Constitution "amount to nothing." We deem it critical to their continued meaningfulness that these bills under consideration and others like them be defeated.

That, Mr. President, as I stated, is the report of the American Bar Association house of delegates, and I commend that report to all Senators.

Mr. President, I now ask unanimous consent that I might yield to the Senator from Connecticut without losing my right to the floor; that upon being rerecognized a continuation of my speech not be counted as a second speech under rule XIX, and I be allowed to leave the Chamber when I have so yielded.

I also ask unanimous consent that the Senator from Connecticut be permitted to yield the floor under the same conditions.

The PRESIDING OFFICER. Is there objection to the request? The Chair hears none, and it is so ordered.

Mr. BAUCUS. Mr. President, I make that same request with respect to the Senator from Missouri; that is, that he also be permitted to yield the floor under the same conditions.

The PRESIDING OFFICER. Is there objection to the request?

Mr. WEICKER. Mr. President, I say to my distinguished friend from Montana and my good friend from Missouri that I am quite prepared, if the Senator from Missouri is ready, to have him go forward.

Mr. BAUCUS. Mr. President, I yield, under the same circumstances and conditions, to the Senator from Missouri.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Missouri is recognized.

THE HELMS SCHOOL PRAYER PROPOSAL: AMENDING THE CONSTITUTION BY THE BACK DOOR

Mr. EAGLETON. Mr. President, the Founders of this Nation combined genius and pragmatism. Thus, at the same time that they were crafting the breathtakingly innovative system of government outlined in our Constitution, they realized that their plan for a stable and lasting constitutional democracy would only be realized if they protected the rights embodies in that document against the political passions that can arise in the body politic and in the State and National Legislatures. The Founders clearly recognized the need, to quote Alexander Hamilton in Federalist No. 78, to "guard the Constitution and the rights of individuals from the efforts of those ill humors which the arts of designing men or the influence of particular conjectures disseminate among the people . . . ."

I submit that the proposal before us to strip the Federal courts of jurisdiction over cases involving so-called voluntary school prayer is a perfect example of just how foresighted the Founders were. For, here we have a clear instance in which Members of this body allow their strong disagreement with a Supreme Court interpretation of the Constitution to reach such a fever pitch that they endorse an extraordinary and, I submit, unconstitutional congressional response. For, simply put, what Senator HELMS proposes is to amend the Constitution by passage of a mere statute, rather than through the constitutional amendment process provided by article V of the U.S. Constitution.

If we follow this route, we will open up a vast array of civil liberties protections embodied in our Constitution to wholesale revision or nullification whenever a bare congressional majority might find it appropriate. This result is fatally inconsistent with the scheme of government intended by our Founding Fathers, the trend of almost 200 years of constitutional jurisprudence and the warnings of a host of legal scholars and experts who are appalled by the longrun implications of amending the Constitution through the back door.

A BACK DOOR ATTEMPT TO AMEND THE CONSTITUTION

It is important to realize at the outset that, however its proponents might choose to portray it, this proposal is nothing less—or more—than an attempt to change the legal effect of the first amendment to the Constitution through enactment of a mere statute.

In our constitutional democracy, the provisions of the Constitution of the United States are the "Supreme Law of the Land . . . any Thing in the Constitution or Laws of any State to the Contrary notwithstanding." (article VI, clause 2). The final interpreter and expounder of the Constitution's terms is the U.S. Supreme Court. From these commonplace truths that have characterized our system since the early days of the Constitution, there flows a straightforward result: when the Supreme Court ruled in the 1962 case of Engel against Vitale, and in subsequent cases, that prayer in school violated the clause of the first amendment which prohibits governmental establishment of religion, these decisions became part of the law of the land binding on the States. The Court's decision in the school prayer cases became inextricably bound in the fabric of the Constitution.

Indeed, this is shown by the subsequent actions of those who found the decision objectionable. Recognizing that the Court's interpretation of the Establishment of Religion clause of the first amendment was the law of the land, various Senators and Representatives have proposed literally hundreds of amendments to the Constitution to remove the judicial gloss on the first amendment they find so objectionable.

Senator HELMS would reject the admittedly time-consuming avenue of a constitutional amendment, in favor of a simpler and more ingenious route. He and his followers would simply have Congress strip the Federal courts of jurisdiction to hear cases involving

so-called voluntary prayer. Of course, Senator HELMS proposal cannot alter the jurisdiction of the State courts, so they would be left as forums of last resort in school prayer cases. However, the proposal clearly banks on State courts being less than zealous in discharging their duty to protect and defend the Constitution by enforcing the spirit and letter of current Supreme Court decrees. As Senator HELMS made clear in 1981 when he introduced the forerunner of this proposal, he and his supporters expect adjudication of school prayer cases in State, not Federal court to "restore to the American people the fundamental right of voluntary prayer in the public schools," current law notwithstanding.

Thus, the Helms school prayer court-stripping proposal is a classic example of amending the Constitution through the back door. Is the approach expedient? Yes. Is it clever? Quite so. Is it constitutional? After carefully examining this question, I submit that there is only one answer that this body can in good faith give, and that answer is "no."

THE DIMENSION OF THE DANGER IN ACCEPTING THE HELMS APPROACH

Most of my statement will focus on the time-honored constitutional principles from which this proposal would sharply and radically depart. However, lest the discussion over this proposal seem arcane or legalistic, I want to paint in very, very concrete terms just what would be the result of adopting it. For, I believe that acceptance of the Helms view would subject a vast universe of the most essential constitutional liberties to, in essence, a congressional popularity contest.

Now it is Senator HELMS who wants to do some court-stripping to reverse years of consistent jurisprudence on school prayer questions. Tomorrow it may be another Senator who, annoyed at this or that pronouncement from the Federal courts, seeks to strip them of authority to hear cases alleging a violation of free speech rights. On an on the process would go until freedom of the press, the right to be free from arbitrary government action, equal protection, and other vital civil liberties become the subject of numerous legislative redefinitions.

Particularly in this age of mass communication, opinions can be formed at the speed of sound. Passions run high. Conveyance of these passions to Congress can occur almost instantaneously. Once we open Pandora's box by accepting statutory redefinition of the Constitution, it would become very, very difficult for Members of Congress to close it against any powerful pressure group with a grudge against a particular court ruling.

STATUTORY REVISION OF CONSTITUTIONAL GUARANTEES IS FATALLY AT ODDS WITH THE GOVERNMENTAL SYSTEM OUR FOUNDERS ESTABLISHED

Of course, the consequences I have just attributed to the Helms proposal are the very consequences that our Founding Fathers feared and sought to avoid when establishing our Constitution.

The Founders worked with knowledge of the infamous Shays' Rebellion of 1786, in which followers of Daniel Shays in Massachusetts crowded around the courthouses and kept the courts from processing debt claims. And the drafters of the Constitution were also aware of numerous instances during the Articles of Confederation period in which State legislatures yielded to political pressure and passed laws undercutting the ability of the National Government and courts to enforce debts, protect interstate commerce and safeguard civil liberties. So, too, did the Framers worry about the need to protect the Federal courts against the national legislature, an institution, in Madison's colorful prose in Federalist No. 48, suspected of "everywhere extending the sphere of its activity and drawing all power into its impetuous vortex."

THE FOUNDERS INTENDED THAT STRONG AND INDEPENDENT COURTS GIVE MEANING TO THE CONSTITUTIONAL GUARANTEES

This historical record figured prominently in the work of the Founders. They clearly recognized that, as James Madison stated in Federalist No. 22, the newly established Constitution and the laws adopted thereunder would be "a dead letter without courts to expound and define their true meaning and operation." The Founders sought to reverse the chaos and disunion that were present during the earlier government under the Articles of Confederation by drafting a Constitution with a broad judicial power that was both unified, under one Supreme Court, and independent from fundamental incursion by the other branches of government.

Several provisions of the Constitution bear witness to the desire, as exemplified in the quote I cited earlier from Alexander Hamilton, to "guard the Constitution and rights of individuals" from the temporary passions of politics. Thus, under article III, section 1, the Federal judges who would be interpreting the Constitution and the individual liberties enunciated in it were given life tenure during good behavior and protected against retaliation through diminution in salary.

Further, article V protected the provisions of the Constitution from temporary pressures for change in a very direct way: by providing that change was to come through a constitutional amendment preceded by an extraordinary consensus that change was justified—a consensus represented by the fact that two-thirds of each House of Congress and three-fourths of the State legislatures supported the change. This amendment process was clearly intended to be the exclusive mode for altering the meaning of the Constitution. This is implicit in the form and structure of the document. It was made explicit in the constitutional debates of the time. For example, there is this marvelously foresighted warning from Alexander Hamilton in Federalist No. 78:

> It is not to be inferred from [the right of the people to amend the Constitution] that the representatives of the people, whenever a momentary inclination happens to lay hold of a majority of their constituents, incompatible with the provisions of the existing Constitution, would on that account be justified in a violation of these provisions.

THE FOUNDERS' INTENTIONS HAVE BEEN HONORED THROUGH ALMOST 200 YEARS OF (AT TIMES CONTROVERSIAL) SUPREME COURT REVIEW

The best testament to the weightiness and appropriateness of the Founders' judgment is that, while the Surpeme Court has been a subject of controversy ever since its early assertion of the right in Marbury against Madison to "say what the law is," we have never in almost 200 years of experience with the Constitution acted to make the Court utterly dependent on the whim of another branch of government, and that in essence is what Senator HELMS would do.

Not that we have blithely accepted every action and decision of the Supreme Court. Far from it! Beginning with Thomas Jefferson's desire to impeach Chief Justice Marshall, and continuing through the "Impeach Earl Warren" bumper stickers of the late 1950's and beyond, Americans have often expressed their vehement dissatisfaction with particular members and decisions of the Federal courts. Yet, we have never let our outrage at particular court actions lead us to place at risk the fundamental authority and independence of the courts.

Examples of our ultimate respect for judicial independence abound. Thus, although Abraham Lincoln absolutely abhorred the Dred Scott case and its tolerance of slavery, he refused to embrace radical reprisals against the Supreme Court of Chief Justice Taney. Instead, he declared that the Supreme Court's "decisions on constitutional questions, when fully settled, should control, not only the particular cases decided, but the general policy of the country, subject to be disturbed only by amendments of the Constitution as provided in that instrument itself."

Lincoln warned: "More than this would be revolution."

So did respect for the independence of the Court prevail when President Franklin Roosevelt tried to change the direction of constitutional interpretation through legislation to pack the

Supreme Court with judges more to the President's ideological liking. There was substantial sympathy with President Roosevelt's New Deal programs. There was substantial opposition to the Supreme Court's view that they violated the Constitution. However, President Roosevelt got nowhere with his Court-packing plan. The Congress recognized the radical longrun implication of placing the Court at the mercy of future congressional enactments. As a unanimous Senate Judiciary Committee stated in 1937:

> It is essential to the continuance of our constitutional democracy that the Judiciary be completely independent of both the Executive and Legislative branches of the Government, and we assert that independent courts are the last safeguard of the citizen, where his rights come into conflict with the power of governmental agencies.

This tradition of respecting the Supreme Court's institutional independence continues today in most quarters. In fact, it is noteworthy that the tradition is very much in evidence in recent public statements by those who have had their share of strong disagreements with the decisions of the present Supreme Court.

For example, while Senator GOLDWATER believes that the Supreme Court is wrong on abortion, school prayer and other issues, he told the Senate in March 1982, that he deeply regrets today's "frontal assault on the independence of the Federal courts." The Senator pronounced recent efforts to restrict court review powers "a dangerous blow to the foundations of a free society."

Another example is current Attorney General William French Smith. The Attorney General is very fond of criticizing "judicial activism" in general and Federal court decisions in particular. Despite this, the Attorney General warned in a recent letter to Chairman THURMOND of the Judiciary Committee against measures that would "reduce the Supreme Court to a position of impotence in the tripartite constitutional scheme." The Attorney General indicated his clear concern about any proposal that would deprive the Supreme Court of "the ability to protect its core constitutional functions against the power of Congress."

Further, the chief justices of the State supreme courts can be expected to have periodic and—if the Missouri chief justice is any indication—pronounced disagreements with the direction of particular Supreme Court decisions. Despite this, the Conference of State chief justices, comprised of all 50 of the chief justices, was so concerned with the threat pending court-stripping legislation poses to the Supreme Court that it issued a unanimous statement condemning such measures in January of this year.

NO COMPELLING PRINCIPLE JUSTIFIES RADICAL DEPARTURES FROM OUR SYSTEM AND TRADITION

Of course, there are some critics of the present Court who are willing to run long-term constitutional risks in order to achieve shorter term changes in legal decisions. Over 30 bills have been introduced in this Congress to change by mere statute current Court decisions on such controversial topics as busing, school prayer and abortion. With Senator HELMS leading the charge, the Senate took the ill-advised step in 1979 of approving a school prayer court-stripping proposal. Senator HELMS was also instrumental in recent Senate action to limit significantly Federal court remedial powers in busing cases.

After reviewing the constitutional plan and almost two centuries of adherence to it, I am compelled to ask of those who would fundamentally alter the institutional relationship of the courts to the Congress: what new flash of insight, what new principle of political philosophy recommends such a fundamental change? Have we suddenly discovered that the elaborate system of checks and balances against constitutional erosion established by the Founding Fathers is merely an unnecessary roadblock? Have we found, after all these decades of believing that a strong and independent court system was essential to our constitutional plan, that we were wrong all along?

Frankly, I have not heard anything to convince me that the Founders or those who have followed their lead were wrong about human nature, politics or the precarious status of precious constitutional rights.

THE EXCEPTIONS AND REGULATIONS POWER OF ARTICLE III, SECTION 2 IN NO WAY JUSTIFIES HELMS PROPOSAL

Instead, because its incompatibility with the general constitutional plan and tradition is so manifest, court-stripping is more often defended on a narrower ground. Advocates say that in approving article III, section 2 of the Constitution, which gives Congress power to make "exceptions" to and "regulations" for the Supreme Court's appellate jurisdiction, the Founders of this Nation were granting to Congress the right to strip constitutional decisions of their meaning through jurisdictional limitations.

This characterization of the exception and regulations power runs headlong into the observation with which I began—that in establishing our Constitution, the Founders showed remarkable commonsense. I have noted that the Founders carefully crafted the judicial power to ensure that it would function in a unified and independent manner. Several of the constitutional provisions that protect court independence were debated at length. For the exception and regulations clause to justify the kind of court-stripping legislation Senator HELMS urges, we would have to conclude that, notwithstanding their strong, consistent interest in protecting court independence, the Founders included a power which Congress could use to circumvent that independence and to end-run the sole means which the Constitution prescribes for its amendment.

Before we attribute such a nonsensical intent to the Founders, we should at least get a firm grasp on history. In a recent and important article in the Harvard Law Review, New York University Law School Prof. Lawrence Sager explained the derivation of the exceptions and regulations power as follows:

> The "exceptions and regulations" language first emerged in the Committee of Detail Draft. It was adopted by the [Constitutional] Convention on August 27 without a ripple of recorded debate, concern or explication. In light of this quiescence, it is hard to imagine that the Framers were consciously adopting a provision that could completely unravel one of the most basic aspects of the constitutional scheme to which they had committed themselves.

The Attorney General of the United States backed up Professor Sager's interpretation in a May 6, 1982, letter to Senator STROM THURMOND. The Attorney General noted that, before it adopted the exceptions and regulations power, the Constitutional Convention rejected a resolution providing that "the judicial powers shall be exercised in such manner as the legislature shall direct." The Attorney General saw this as rejection of "a clear statement of plenary congressional power over the Court's appellate jurisdiction" and an important key to the Founders' understanding of the exceptions and regulations clause. The Attorney General concluded:

> In light of the value placed on the Supreme Court's appellate jurisdiction, as evidenced by the other actions of the Convention, it seems highly unlikely that the Framers would have agreed, without the slightest hint of controversy, to a provision that would authorize Congress to interfere with the Court's core constitutional functions.

Perhaps respected legal scholar Henry Hart said it best. He called the reasoning behind an expansive view of the exceptions power "monstrous illogic." As the distinguished professor put it:

> To build up a mere power to regulate jurisdiction into a power to affect rights having nothing to do with jurisdiction! And into a power to do it in contradiction to all the other terms of the very document which confers the power to regulate jurisdiction!

Despite the clash between commonsense and the conception of the exceptions power inherent in the Helms proposal, its advocates often point—ironically—to Supreme Court opinions to shore up their argument. In particular, they cite the 1869 case of Ex Parte

McCardle, which upheld a congressional restriction on Supreme Court jurisdiction under one of several habeas corpus statutes.

But most legal scholars believe that reliance on the McCardle case for court-stripping legislation, such as the Helms school-prayer proposal, is profoundly misplaced. Among other reasons, later cases clarify that congressional power over Court jurisdiction does not permit all avenues for Supreme Court review in constitutional cases to be cut off.

For example, in Ex Parte Yerger, decided soon after McCardle, the Supreme Court rejected the argument that Congress could and did strip the Court of another source of its habeas corpus jurisdiction. The Court refused to abide further inroads on its jurisdiction beyond that permitted in McCardle, finding that "the imprisoned citizen, however unlawful his imprisonment may be in fact, is wholly without remedy unless it can be found in the appellate jurisdiction of this court."

An even clearer rejection of jurisdiction-stripping in constitutional cases came two years after McCardle, in the case of United States against Klein. Klein invalidated a restriction on Supreme Court jurisdiction substantially similar to the restriction proposed by Senator HELMS. In 1870, the Congress was outraged by a Supreme Court ruling it saw as too lenient to persons whose property had been seized because they had engaged in pro-Confederate activities during the Civil War. Disagreeing with the Supreme Court's interpretation of the due process rights to which these former propertyholders were entitled, the Congress added to an unrelated money bill a rider depriving the Supreme Court of jurisdiction over cases involving former propertyholders who had received Presidential pardons.

In striking down this congressional court-stripping effort, the Court ruled in Klein that the exceptions power does not permit withholding of jurisdiction "as a means to an end," when that end is to prevent assertion of the constitutional rights claimed by the former landowners. In its decision, the Court asked rhetorically whether Congress could legitimately use the exceptions power to avoid an "adverse" result. The Court answered its own question with an emphatic, "No."

Thus, a careful analysis of the exceptions and regulations clause and case law interpreting it leads me to share the conclusion of the present Attorney General that the Helms school prayer bill is unconstitutional. In an extensively documented letter to the chairman of the Senate Judiciary Committee, the Attorney General concluded:

> There is little doubt that congress possesses some power to regulate the appellate jurisdiction of the Supreme Court . . . Congress may not, however, consistent with the Constitution make "exceptions" to Supreme Court jurisdiction which would intrude upon the core functions of the Supreme Court as an independent and equal branch in our system of separation of powers.

A host of other legal experts agree, including former Solicitor General and now U.S. Circuit Court Judge Robert Bork, distinguished Harvard Law Prof. Laurence Tribe, and the governing body of the American Bar Association, which called court-stripping proposals "misdirected legislative efforts to achieve something that can be done only through constitutional amendment."

THE AMENDMENT'S REFERENCE TO "VOLUNTARY" PRAYER IS A MEANINGLESS LIMITATION

In sum, this proposal, like all jurisdiction-stripping proposals, is fundamentally out of step with our constitutional plan and tradition. It draws no comfort in the final analysis from the article III, section 2 exceptions and regulations power. In my judgment, these deficiencies alone warrant a vote against this proposal and for our constitutional democracy.

However, I believe the proposal is doomed by one additional and important deficiency: the attempt to limit court-stripping to cases involving "voluntary" school prayer. This notion that school prayer can be divided into the categories of "voluntary" and "nonvoluntary," and that this proposal affects only the former, has been crucial to public support of school prayer proposals. Indeed, when President Reagan proposed his school prayer amendment, he took pains to argue that no school child would be "forced or coerced or pressured to take part in any religious exercise."

I have long been skeptical about whether there is such a thing as "voluntary prayer" in the inherently coercive setting of a public classroom. And my doubts were recently echoed by two religious leaders from my home State of Missouri. Writing in the St. Joseph Gazette, Rev. Charles Bayer, pastor of the First Christian Church in St. Joseph, noted that:

> Every teacher is an authority figure. We want it that way—otherwise, classrooms would be chaotic. And when that teacher imposes his or her religious heritage on children—or the school board does—then the rights of a free people have been substantially subverted. . . . Can anyone really assume that a Mormon prayer in a Salt Lake City grade school could possibly be voluntary, or a prayer offered by a Moonie in a school they dominate, or a cultic petition by some new Jim Jones?

In answering this question with a strong "No," Reverend Bayer reached the same result as Rev. Reuben Koehler, conference minister of the St. Louis Association of the Missouri Conference, United Church of Christ. Replying to an editorial broadcast over a St. Louis radio station, Reverend Koehler stated:

> It is impossible to devise a prayer that is acceptable to all groups and any effort to do so trivializes prayer by robbing it of depth and meaning. If the prayer really contains the depth and meaning of my own religious beliefs, it will inevitably violate the religious beliefs of others whose faith preference is different from mine.

But even if we put aside these doubts, which have been echoed many times in the religious community, and assume that prayers offered by individual students or teachers are "voluntary," we could not labor under the illusion that this would be the full extent of prayers covered by the Helms court-stripping amendment. Rather, I suggest that we look to the recent experience in Alabama to see just how much governmental coercion can be brought to bear in the name of "voluntary" prayer.

Last month, when the Alabama State Legislature passed a law to permit what it called voluntary school prayer in school classrooms, it included in the text of the legislation an authorized prayer written by the son of Alabama's present Governor. Indeed, news reports indicated that during the debate on the measure, individual legislators engaged in the absurd spectacle of arguing the relative merits of the Governor's son's prayer and the Lord's Prayer in the Bible!

I submit that this is the very kind of nonvoluntary, government-sponsored prayer which the Supreme Court correctly found unconstitutional under the first amendment. It is the very kind of prayer which this proposal would unwisely remove from Federal court jurisdiction.

One does not have to be antiprayer to question whether the notion of voluntary prayer has any meaning in law or commonsense. This Nation's religious organizations obviously believe very strongly in the value and sanctity of prayer—as I do. However, the largest and most influential of this Nation's religious organizations, including the Baptist Joint Committee on Public Affairs, the Lutheran Council, the United Presbyterian Church, the American Jewish Congress, the United Church of Christ, the United Methodist Church, the Episcopal Church and others all oppose proposals to alter current Supreme Court rulings. Clearly, these organizations have concluded, as I have, that freedom of religious exercise will be more carefully protected by keeping government out of the prayer-writing business than by a scheme in which school boards and State legislatures could intrude deeply into individual religious matters, limited solely by the meaningless notion of "voluntary" prayer.

CONCLUSION

I have concluded that the school prayer jurisdiction-stripping amendment jeopardizes the fundamental underpinning of our constitutional de-

mocracy. It would set a dangerous precedent.

I oppose the amendment, and I urge other Senators to do the same.

Mr. President, I ask unanimous consent that I may yield the floor to the Senator from Tennessee (Mr. BAKER) without this being considered as the end of a speech for the purpose of the two-speech rule.

The PRESIDING OFFICER (Mr. COHEN). Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the Senator.

Mr. President, I am ready to close. We will have a fair amount of routine business to transact.

Mr. President, I ask unanimous consent that, when the Senate resumes consideration of this measure on tomorrow, the distinguished Senator from Montana (Mr. BAUCUS) will be first recognized.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

(The following proceedings occurred during the address by Mr. BAUCUS and are printed at this point by unanimous consent.)

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. President, I ask unanimous consent that the Senator may be permitted to yield to me without prejudice to his rights to the floor.

Mr. BAUCUS. Also, Mr. President, that my speech not be counted as a separate speech under rule XIX. With those provisos, I shall be very happy to yield to the Senator from Louisiana.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, some of my colleagues asked me to make available by way of the CONGRESSIONAL RECORD a statement that I had made which appeared in the Washington Post regarding the flat tax. At their request, I ask unanimous consent that this appear in the RECORD under morning hour. In addition, Mr. President, I wish to include an additional statement I made on the same subject this morning to the Ad Hoc Committee for a Responsible Tax Policy.

I ask unanimous consent that this not appear as an interruption of the Senator's remarks, but rather that it appear in the morning hour.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE FLAT TAX

Mr. LONG. Mr. President, many persons have asked what I think of proposals to replace our progressive rate income tax system with a so-called flat rate income tax.

My answer to them is simple: "If you're rich, you'll love it; if you're not rich, look out."

A pure flat rate income tax would eliminate all deductions and tax everyone at a single rate. For example, with a flat rate of 10 percent, a $20,000-a-year worker would pay $2,000 in Federal income taxes, while a person with a $200,000-a-year income would pay $20,000.

Our "progressive" system permits deductions and taxes individuals at rates ranging from 12 to 50 percent, depending on income. This system is based on the principle that those with large incomes should pay a higher percentage than those with low incomes.

Advocates of a flat rate tax have correctly argued that our present system is complicated and in need of simplification. The question is whether it is justifiable to shift the tax burden from the rich to the middle and low income in the name of simplicity.

In my view, simplification of the tax system and flat rates are completely separate issues. If it is desirable to close loopholes in order to reduce tax rates, that can be done without the massive shift in tax burden involved in a flat rate tax. I am concerned that some proponents of a flat rate system are using simplification merely as a convenient slogan to justify big tax cuts for the rich at the expense of middle- and low-income taxpayers.

Much of the support for a flat rate tax is inspired by the belief that "fat cats" use loopholes to avoid paying their fair share of taxes under the present system. But what constitutes a loophole is in the eye of the beholder.

I doubt that many middle-income homeowners consider their home mortgage interest deductions a "loophole." But how do the millions of taxpayers who do not own their homes view this deduction?

Other deductions—or "loopholes"—that would be eliminated by a flat rate tax include charitable and church donations, consumer installment interest, State and local taxes, union dues, medical bills, moving expenses, alimony, and educational expenses.

Employer-paid fringe benefits, such as health and life insurance, pension contributions, subsidized parking, and educational expenses, would be subject to full taxation. Also, subject to immediate taxation would be the gain a homeowner makes when he sells his home. Presently, homeowners are permitted to defer tax payment on the sale of their home if they purchase a new one of equal or higher value within a certain period.

Congress, Joint Committee on Taxation recently reported how an 11.8-percent flat rate tax on adjusted gross income would affect taxpayers. Using adjusted gross income figures for 1984, the Joint Committee found that the amount of taxes paid by persons with incomes below $30,000 would increase by percentages ranging from 12.8 to an astronomical 1,259. However, taxes for those earning more than $30,000 a year would decrease by amounts ranging from 5 percent to 53.2 percent.

In studies on flat rate taxes, the Congressional Research Service found that under present law, taxpayers with adjusted gross incomes below $30,000 a year pay 41 percent of the total of Federal income taxes raised from individuals. However, if a flat rate tax of 15.5 percent were imposed, that same group of moderate- and low-income taxpayers would end up paying 58.2 percent of all Federal income taxes raised from individuals.

This is not the kind of treatment our democratic form of government has historically considered fair.

Sponsors of some of the flat rate bills attempt to remedy the built-in inequities of this type of system by allowing some deductions, by increasing the personal exemption allowance, by exempting low-income persons from all taxes and by imposing several—rather than a single—tax rates. All that most of these modifications do is simply reduce the degree of unfairness in an inherently unfair system.

I know that once one type of deduction in a flat rate tax system is allowed, Congress would be unable to resist the pressure for numerous other deductions.

Justice and fairness require that those who make large amounts of money should pay a higher rate of tax on income than middle- and low-income families. It seems totally unfair to have a person earning $15,000 a year paying the same rate as someone making $1 million.

I strongly support reducing taxes and simplifying our income tax system, and have worked to do so for many years. Our efforts toward simplification made it possible last year for 40.7 percent of the taxpayers to file their income taxes on the so-called short form, which usually can be completed in less than 1 hour. Another sign of progress in our efforts at tax simplification is the fact that 79 percent of taxpayers in 1980 chose not to itemize their deductions.

Further work toward simplification is needed, and I intend to continue to push for a simpler and fairer tax system.

I am not arguing that the concept of a flat rate income tax should be ignored. In fact, I favor giving this idea a thorough study, as the Senate Finance Committee, on which I serve as the ranking Democrat, is scheduled to do later this year.

Perhaps a way can be found to structure a flat rate income tax system that will be fair to all. But until such a system is found, the flat rate income tax will not have my support.

Mr. President, I ask unanimous consent that remarks made on this subject to the Ad Hoc Committee for a

Responsible Tax Policy be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR RUSSELL B. LONG

One of the things that's concerning me about the flat rate tax concept is that many middle income people think they support it because they feel the rich aren't paying their share and because they're frustrated by the complexity of the tax system.

What many don't realize is that 70 percent of people right now do not itemize their deductions. Whether they use the long form or the short form, 70 percent of the people take the zero bracket amount and do not itemize.

As many of you know, completing a tax form using the zero bracket amount doesn't take too long.

Now, I'm for simplifying even further.

But my experience has been that any time you go to simplify the tax code for someone and he finds he is going to pay more taxes because you simplified it, he has lost all interest immediately. He'll say: "Count me out because I'm not for it."

It would be easy enough to make a relatively few minor changes in the tax laws.

For example, we could provide the taxpayer with a choice of short forms to complete. Let's say you're claiming as your major deduction interest on a housing mortgage.

Well, we could have a special short form for people who have a home mortgage but not many other deductions. The same could hold true for persons who have a major casualty deduction. We'd have a separate form for such persons.

Now, I'm not saying the taxpayer would fill out the short form, plus a home mortgage deduction form. Rather there would be a single short form for people with home mortgage deductions.

We could make it so that 95 percent of all people could use a short form.

That would then leave it so that you'd have only about 5 percent who would have to deal with more complex forms.

Then you really wouldn't have a great number who would complain about the complexity.

Now, let's talk about the complexity for a moment.

Why is it there?

Those complexities got there because the people who are claiming it wanted it that way, and Congress studied it and concluded that it made for greater fairness and better justice.

There are a lot of things people would strongly object to taking away. For example, if you go to a flat tax, you're going to have to knock out the charitable deduction; that is, you're going to have to pay taxes on contributions to the church or to United Way.

The flat rate tax has a great number of problems. But the one great thing that is very difficult to justify—unless you are one of those very wealthy people who would be benefited by it—is that in almost every case it means a major tax cut for those who are very wealthy, and it means a major tax increase for the middle income people.

Now, I think this flat rate tax idea for now is just a lot of talk—it's not going to happen soon.

But it is one of those things that could sneak up on us if we don't keep a close watch and continue to point out the problems with it.

It's one of those things that those who stand to benefit from it don't mind spending a lot of money to make it look like the best idea since sliced bread.

I, for one, am going to continue to point out the problems with this system.

When those who are going to have to pay more taxes to benefit those who are far better off economically—then they're not going to be all that excited about it at all.

For those who are very wealthy, they're not just paying as much as they would like you to believe.

They're paying more than middle income people, to be sure. But on the average they're paying about 30 percent or 28 percent of their economic income in taxes, on the average. Here I am talking about people who are making $200,000 or over.

I have great difficulty feeling that those people are being crucified on that basis.

Mr. LONG. I thank the Senator. I ask unanimous consent that my interruption not appear in the course of his very fine and well-considered remarks.

Mr. BAUCUS. Mr. President, I thank the Senator from Louisiana. I very much appreciate his comments on the flat tax. I would not mind if the Senator from Louisiana would tell us a little more about it than the statement put in the RECORD. I look forward to reading it in tomorrow's RECORD. I mean that in all seriousness, because this is an issue that is coming out next year.

Mr. LONG. I thank the Senator. I simply find that there is more than one side of the argument.

Mr. BAUCUS. I know that. It is an issue that Americans are interested in. I agree with the Senator that there is more than one side to the argument. I am glad the Senator from Louisana is helping address the issue by giving us the opportunity to have his wisdom and experience in this area.

Mr. LONG. I thank the Senator.

(Conclusion of earlier proceedings.)

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 5:30 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

SCHEDULE FOR FRIDAY AND MONDAY

Mr. BAKER. Mr. President, we will be ready to close down shortly. I would say, by way of summary, for those who may be listening in their offices, that there is an order for the Senate to convene tomorrow at 9:30 a.m. There will be at least one special order, after the recognition of the two leaders, and then a period for the transaction of routine morning business, after which the Senate will resume consideration of the pending measure and the Baucus amendment will be the pending question.

Under the previous order, the Senator from Montana (Mr. BAUCUS) will be first recognized to continue debate on that measure.

Mr. President, it is anticipated that the Senate will continue to debate that measure during the day tomorrow until approximately 2 p.m., when it is the present intention of the leadership to ask the Senate to stand in recess over until Monday next because of a religious observance which will involve a number of Members of the Senate, which begins at sundown Friday.

Mr. President, on Monday there will be a cloture vote pursuant to the provisions of rule XXII against further debate on the Helms amendment. An effort is being made at this time to negotiate time other than the rule time to suit the maximum convenience of Senators for that to occur. I hope that we can arrange that cloture vote at 5 p.m. on Monday next and without the mandatory quorum as provided under rule XXII.

ORDER FOR THE RECOGNITION OF SENATOR CHILES ON TOMORROW

Mr. BAKER. Mr. President, I have one matter which I am sure would meet with favor by the minority leader. I ask unanimous consent that on tomorrow after the recognition of the two leaders under the standing order, the distinguished Senator from Florida (Mr. CHILES) be recognized on a special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONGRATULATIONS TO SENATOR STAFFORD

Mr. BAKER. Mr. President, I will shortly be in a position to take care of the routine business of the Senate, I believe. In the meantime, I see our friend from Vermont is on the floor.

May I take this opportunity to offer him my congratulations on his recent victory in the Republican primary in the State of Vermont.

Mr. STAFFORD. I say to the majority leader that I appreciate his comment very much.

Mr. BAKER. Mr. President, until the minority leader has an opportunity to reach the floor, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2801, THE WILDERNESS PROTECTION ACT OF 1982

Mr. BAUCUS. Mr. President, Interior Secretary James Watt has challenged Congress to resolve the questions surrounding oil and gas leasing in wilderness areas and land being considered for wilderness.

I, for one, gladly accept this challenge. I am pleased to join my colleague from Washington, Senator JACKSON, in sponsoring S. 2801. I believe this is the most appropriate way to resolve, once and for all, several significant questions.

This Nation's wilderness areas are viewed by many as attractive sources of oil, gas, and minerals. In Montana alone, over 550 applications are pending for leases on the Bob Marshall, Great Bear, Anaconda-Pintlar, Scapegoat, and Gates of the Mountains wilderness areas, to name a few.

In my State, as elsewhere, feelings run high when it comes to leasing these precious national assets. When Secretary Watt proposed issuing permits for seismic activities in the Bob Marshall Wilderness, Montana's response was loud and clear: "Save the Bob."

My colleague, Representative PAT WILLIAMS, who represents Montana's western congressional district, led the fight to invoke the emergency powers included in section 204(e) of the Federal Land Policy and Management Act. While this section permitted the House Interior and Insular Affairs Committee to block Secretary Watt's plan, it did not permanently resolve the future of the Bob.

Now Secretary Watt, lease applications in hand, has given Congress an ultimatum: If Congress does not act by the end of this session, he will issue the permits. That is why Congress must act without hesitation.

S. 2801, and an identical bill that passed the House of Representatives overwhelmingly, would end this controversy. These bills would withdraw—permanently and immediately—the National Wilderness Preservation System (except land in Alaska) from oil, gas, oil shale, coal, phosphate, potassium, sulfur, gilsonite, and geothermal leasing.

The bills also would withdraw several areas from mineral leasing laws:

Land that is managed by the Forest Service and recommended for wilderness under RARE II;

Areas recommended for further planning under RARE II until 1 year after implementation of the forest plan recommending the area for wilderness;

Congressionally designated wilderness study areas for as long as their mandate stipulates.

S. 2801 also permits an ongoing minerals inventory of withdrawn lands.

In case of urgent national need, S. 2801 permits the President, with congressional concurrence, to open lands that have been withdrawn. And the Jackson bill gives the Interior Secretary authority to permit oil and gas development under wilderness areas if it can be done by directional drilling from outside the wilderness areas.

Clearly we must answer the questions raised about energy and mineral development in wilderness areas. But, at the same time, I hope we can keep this issue in perspective. A 4-year study conducted by the Department of Energy's Oak Ridge, Tenn., laboratory concludes that wilderness may contain only 3 percent of the Nation's undiscovered gas resources.

Another study, conducted by Leonard L. Fischman, author and natural resource economist, concludes that designated wilderness areas contain about 1.1 percent of the oil and 1.2 percent of the gas located on Federal land. Potential wilderness areas contain about 3.4 percent of the oil and 2.5 percent of the gas, according to this analysis.

These studies make a powerful case that invading this Nation's undisturbed wilderness can produce very little energy. Yet despite this conclusion, the Reagan administration is determined to go ahead with the assault on America's wilderness.

I believe the administration's approach is shortsighted. I have had the privilege to spend time in many wilderness areas. I have grown to appreciate wilderness and the importance of these lands to our national heritage. Much like our great cities, these wild lands contribute to the richness and unique character of our country.

Congress is charged with protecting this heritage. We must not take our duty lightly.

DEATH OF ALASKA'S OLDEST RESIDENT

Mr. STEVENS. I was deeply saddened to learn of the death of Alaskan Belle Herbert. Belle was Alaska's oldest resident. Her presence will be missed.

Throughout her life in the village of Chalkyitsik, Belle was a true Alaskan, a leader and a friend. The truth of her real age remains a mystery because the records of her birth date were never clear. But, we know she passed the century mark.

Belle enriched Alaska with many stories of the past upon which the future may be built. She was a legend in her own time and known throughout the State for her countless stories about her land, the great land. I am thankful that Belle gave us many of her stories in the form of, "Shandaa, In My Lifetime." This story is told in her native language of Gwich'in Athabaskan and in English. Belle has left us with an invaluable sense of tradition, culture and history of our Alaska people and their culture. Her legend will live on in Alaska.

BELLE

Mr. MURKOWSKI. Mr. President, it is with sorrow that I learned of the death of Alaska's oldest citizen, Belle Herbert.

No one really knew how old she was because of conflicting birth records. It is estimated, however, that she was between the ages of 105 and 127. Belle lived all of her life in the village of Chalkyitsik, a few miles above the Arctic Circle. She was known all over the State for her wonderful stories about life in Alaska during her lifetime.

It is always a very sad event when the elder of a family passes from this life, but the wealth of knowledge and tradition that is left behind only enhances the lives of all the rest of the family. We as Alaskans have lost our elder, but Belle has left us her story, "Shandaa, In My Lifetime." It is a beautiful story and is told in Gwich'in Athabaskan, her native language, and English.

It is also fitting to take this opportunity to thank the Alaska Native Language Center of the University of Alaska for arranging this story as well as countless others who provided their talents.

ADDRESS BY BENJAMIN L. PALUMBO

Mr. DECONCINI. Mr. President, a distinguished American, Benjamin L. Palumbo, recently delivered an address to the Third Biennial Conference of the National Italian American Foundation, which I believe merits our attention. Mr. Palumbo directs his remarks to the role Italian-Americans can and should play in helping to resolve the complex problems which face all Americans. The conference dealt with the future of American democracy, and Mr. Palumbo looks at this future by looking at our past efforts to assure all equal access to our political system. These remarks are especially important now in light of the recent extension of the Voting Rights Act and serve to remind us all that the future of American democracy is dependent on the quality of our political debate. I feel that we should all pay heed to Mr. Palumbo's very relevant comments. I ask unanimous consent that the address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS OF BENJAMIN L. PALUMBO

Welcome to the Third Biennial Conference of the National Italian American Foundation.

First let me pay tribute to the Foundation's hardworking and dedicated staff for

the splendid support which they have given to this Conference. I would like them all to stand for a round of applause.

I would like also to thank my co-chairs Lucy Falcone and Bob DiPietro for their magnificent efforts in this undertaking. All this could not have happened without them. You'll be hearing more from them later.

In this room are several hundred United States citizens. United States citizens who have chosen to call themselves Italian-Americans.

I would like to take a few moments to share with you my thoughts about why we have chosen to do so. And also to deal with the significance of this conference.

To do that we must come face to face with a reality about the United States. And that reality is that the United States was not merely born in revolution but continues to this day to be a revolutionary society.

What is meant by this? How does it affect us? What obligations does it place on us?

Let us begin at the beginning.

Two hundred and six years ago in Massachusetts—"by the rude bridge that arched the flood"—the "shot heard round the world" was fired. Thus was begun the revolution from which was born our country.

It was a revolution of blood and fire. But it was also one of ideas . . . and ideals.

The words given by Phillip Mazzei to his friend Thomas Jefferson went to the heart of our Declaration of Independence: "All men are created equal." Two centuries after the last echo of the last shot fired in that revolution faded away, those words still echo round this world.

In the U.S., the power of that ideal of equality and freedom has inspired multiple and continuous revolutions.

The most obvious was the struggle against slavery called the Civil War. But there have been others, seemingly more prosaic, but resulting in enormous changes nevertheless.

Many have occurred within the lifetimes of most of the people in this room. Indeed, some are still underway.

But because they have been largely gradual and peaceful, and because our citizens still remain largely isolated behind huge oceans, most have been unable to contrast these upheavals with lifestyles elsewhere and thereby fully grasp their significance.

Yet these revolutions have changed forever the old static relationships of man to society, just as dramatically as the Revolution of '76 changed forever the relationship of Americans to the British crown.

Let us examine some of these revolutions.

One was that of "rising expectations." It was given force by the sacrifices demanded in World War II. One of its early manifestations was the GI Bill of Rights. Until its passage higher education had been mostly the preserve of the privileged. After the GI Bill, millions whose education would have ended with high school, went on to colleges and universities. In doing so they created the climate which led to acceptance of the unprecedented notion of higher education for all capable of handling it. We have become the most educated society in the world because this revolutionary idea became the accepted norm.

Another example was the advent of post World War II prosperity. It put America on wheels; built vast highway networks; and opened huge tracts of land for development. It lead to acceptance of the idea that the American dream of a single family home with a car, or two, in the driveway, could and should become reality. The pursuit of that dream made us the most mobile society the world has ever known, resulting in tumultous mass migrations from South to North, farm to city to suburb, and now East to West.

In the early '50s, while this material revolution was in progress, the Supreme Court of the United States rightly struck down the laws segregating the races.

This was a momentous and overdue decision. Suddenly whites and blacks found their dialogue of the deaf was over and that they had to know and understand each other in the aftermath of this decision. Black, White, Brown, Red, and Yellow Americans are even now trying to sort out their relations, with the end of this process still not in sight.

In the '60s, Angelo Roncalli, otherwise known as John XXIII, dramatically changed the outlook of the Catholic Church. In so doing, he altered the way American Catholics relate to their fellow citizens of all persuasions; and vice versa. For most of us in this room that has had special meaning.

In the '60s and '70s began the stirrings of the Women's Movement. It was a natural and inevitable outgrowth of several powerful factors: WWII which placed millions of women in the work force; the post war boom which required a workforce far larger than the male segment of our society alone could provide; the availability of higher education without restrictions as to its end use; and the commitment against discrimination, made to Blacks, whose application to the problem of discrimination against women could hardly be denied. The ramifications of this movement are no where near being played out as everyone here is surely aware.

Still another decision of the Supreme Court caused a veritable earthquake in the political and social landscapes. In what may have been its most momentous decision of this century, the Court entered the "thicket" of legislative reapportionment and congressional redistricting and breathed life into the phrase "one man, one vote". State legislature, the Congress, and their constituencies have not been the same since. And adjustments in political power paralleling population shifts guarantee major changes every 10 years in the politics of the U.S.

The late 60's, 70's, and into the 80's has witnessed the breakdown of the traditional political parties. Republicans and Democrats still vie for victory, but the old automatic voting patterns have weakened, the number of independents has grown, turnouts in elections have continued to decline, acceptable definitions of the terms Democrat and Republican appear elusive, and the rise of one-issue groups armed with money and manpower is steering the nation's political system into unchartered waters.

While all this turmoil was taking place the great technological leap began. Epitomized by television—soon to pale by comparison to the computer age—it spread rapidly across the land. Night after night it beamed the same shows, the same news, and the same sports into every corner of America, putting a veneer of homogenization on what was thought by some to have been the dawning of the age of the melting pot.

But, ladies and gentlemen, something went awry; the melting pot didn't melt.

It is true these revolutions had set people adrift, separating them from old familiar ties and associations. But what was not waiting for these countless millions was the warm embrace of an alternative American culture. Instead, there was a void. And suddenly the most frequently asked question of the 70's was—"who am I?"

The answer to this question was bewildering for many, easier for some. Blacks, for example, answered by asserting their right to be both Black and American. And ethnics by asserting their right to be both ethnic and American.

In these reactions was a powerful truth: there is no agreement on the description of the typical American. For there is no typical American. There are, quite simply, many kinds of Americans.

That truth gives us the answer to the question of why we choose to describe ourselves as Italian Americans. In a rootless society, constantly on the move, filled with lonely people loosened from their moorings striving to identify themselves, our declaration of common heritage gives us a certain sense of self, and helps fill that void. Most important, it frees us from the frustrations of excessive introspection and allows us to concentrate on the enormous problems around us.

This country needs that kind of citizen. It needs citizens able to withstand the constant buffeting of the winds of change. It needs citizens able and willing to look clearly at the world, examine its problems intelligently, and support rational sound solutions. Rootlessness exacerbates this need; but the existence of people with a sense of self helps fulfill it.

And therein lies both the significance of this Conference and the answer to the question of our obligations as Italian American members of a revolutionary society.

Today armed with our sense of self, we can and must embrace this opportunity to contribute to the well-being of our country, which has contributed the opportunity for well-being to us. An opportunity which began when our immigrant ancestors arrived, in the words of song by writer Neil Sedaka "to live in the light of the beacon of liberty."

The contribution which this Conference represents will find its expression in you. For it is our goal that the several hundred Italian Americans—and their guests and friends—who have come to partake of our efforts will leave here better informed about some of the important issues of our times.

This Conference was not meant to be a meaningless exercise. We have not sought an occasion for smugness; for patting ourselves on our backs in congratulations of our impressive heritage.

To do that would have been to invite you to ignore the future in favor of the past. That would have been grossly inconsistent with our heritage. Our immigrant ancestors came to these shores to secure the future not to celebrate the past. And most assuredly that is our intent today.

For we have planned this Conference with, above all, a concern for the future. Specifically, for the future of our American democracy. A future which is utterly dependent on the quality of the country's political debate which, in turn, rises or falls on the existence of an informed and interested electorate.

Through your participation in workshops on the family, education, contemporary politics, and international relations we intend to make our contribution to the existence of an informed and interested electorate and thereby to help strengthen American democracy.

We ask all of you to take very seriously the warning of the great revolutionary Thomas Jefferson, who told us that "if a nation expects to be ignorant and free . . . it expects what never was and never will be."

And be guided, we beg you, by the spirit of the great Italian revolutionary Guiseppe Mazzini who wrote "Three things are sacred, tradition, progress, association—the immense voice of God which the centuries transmit to me through the universal tradition of humanity . . . tells me that the Family, the Nation, and Humanity are the three spheres within which the individual has to labor for the common end. . ."

I submit to you we have a sense of ourselves. That we are here because our immigrant ancestors were concerned with the future, and we can be no less concerned.

And that the Jeffersonian and Mazzinian ideals, forged in the crucible of the American and Italian struggles for independence and liberty, are what this Conference, and we, are all about.

Thank you.

MESSAGES FROM THE HOUSE

At 9:59 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 923) to amend chapter 207 of title 18, United States Code, relating to pretrial services.

The message also announced that pursuant to the provisions of section 4(a) of Public Law 96-114, the minority leader has reappointed as members of the Congressional Award Board the following: William R. Bricker of New York, N.Y.; and Roberta van der Voort of Kansas City, Mo.; and appointed John G. McMillian of Washington D.C., to fill the vacancy caused by the expiration of the term of John Swearingen.

The message further announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 6946. An act to amend title 18 of the United States Code to provide penalties for certain false identification related crimes.

ENROLLED BILLS AND JOINT RESOLUTION

The message also announced that the Speaker has signed the following enrolled bills and joint resolution:

S. 2582. An act to amend the act to establish a Permanent Committee for the Oliver Wendell Holmes Devise, and for other purposes;

H.R. 1710. An act to authorize the use of the frank for official mail sent by the Law Revision Counsel of the House of Representatives;

H.R. 3620. An act transferring certain Federal property to the city of Hoboken, N.J.;

H.R. 3835. An act for the relief of Rutherford K. Clarke and his wife Ida T. Clarke;

H.R. 6068. An act to authorize appropriations for fiscal year 1983 for intelligence and intelligence-related activities of the U.S. Government, for the Intelligence Community Staff, for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for the fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, and for other purposes; and

S.J. Res. 194. Joint resolution to provide for the appointment of Nancy Hanks as a citizen regent of the Board of Regents of the Smithsonian Institution.

The enrolled bills and joint resolution were subsequently signed by the President pro tempore (Mr. THURMOND).

At 10:30 a.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 2273. An act to amend section 7 of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706) to extend authorizations for appropriations, and for other purposes.

At 1 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 907. An act to amend sections 351 and 1751 of title 18 of the United States Code to provide penalties for crimes against Cabinet officers, Supreme Court Justices, and Presidential staff members, and for other purposes.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 6056. An act to make technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980.

H.R. 6804. An act to provide subsistence allowances for members of the Coast Guard officer candidate program, and for other purposes.

H.R. 6956. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1983, and for other purposes.

ENROLLED BILL SIGNED

The message further announced that the Speaker has signed the following enrolled bill:

S. 923. An act to amend chapter 207 of title 18, United States Code, relating to pretrial services.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE BILLS REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated.

H.R. 6056. An act to make technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980; referred to the Commttee on Finance.

H.R. 6956. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1983, and for other purposes; to the Committee on Appropriations by unanimous consent.

HOUSE BILL PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 6946. An act to amend title 18 of the United States Code to provide penalties for certain false identification related crimes.

HOUSE BILL HELD AT THE DESK

The following bill was ordered held at the desk by unanimous consent.

H.R. 6804. An act to provide subsistence allowances for members of the Coast Guard officer candidate program, and for other purposes.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary reported that on today, September 16, 1982, he had presented to the President of the United States the following enrolled bill and joint resolution:

S. 2582. An act to amend the act to establish a Permanent Committee for the Oliver Wendell Holmes Devise, and for other purposes; and

S.J. Res. 194. Joint resolution to provide for the appointment of Nancy Hanks as a citizen regent of the Board of Regents of the Smithsonian Institution.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-1170. A joint resolution adopted by the Legislature of the State of California; to the Committee on Agriculture, Nutrition, and Forestry:

"SENATE JOINT RESOLUTION NO. 64

"Whereas, Agriculture is California's chief industry, leading the country with over $13 billion in gross cash farm receipts and providing many hundreds of thousands of jobs from on-farm production and the processing and marketing sectors; and

"Whereas, the impact of California agriculture from the production of 250 various crops and livestock products extends far beyond the borders of this state and significantly affects the entire nation's balance of trade; and

"Whereas, The Counties of Fresno and Tulare rank first and second, respectively, as California's leading agricultural counties in total value of production, amounting to over $3.3 billion in sales annually; and

"Whereas, Natural disasters in the form of hail storms on March 28, 1982, and frost on or about April 7, 1982, devastated the southwestern and southeastern portions of both counties, extensively damaging crops; and

"Whereas, The Fresno County Agricultural Commissioner had documented that 3,019 growers, suffered losses of $122,273,852 to their raisin, winegrape, tablegrape, plum, nectarine, peach, apricot, strawberry, and

almond crops as a direct result of these two natural catastrophes; and

"Whereas, The Tulare County Agricultural Commissioner has assessed the damage to be $20,343,244, affecting 15,975 acres of virtually the same crops held by approximately 1,500 farmers; and

"Whereas, The extent of the damage due to the unseasonable frost varied from 5% to 90%, and the damage due to the hail varied from 10% to 100%, depending for both on the specific location and crop type; and

"Whereas, Most of the growers hit by the disasters have small farming operations and are not diversified enough to readily absorb their losses; and

"Whereas, Unemployment is abnormally high in the area with the economy in the two counties significantly impacted by the natural disasters, especially in the many small farm communities; and

"Whereas, The Boards of Supervisors for Fresno and Tulare Counties have requested the Governor of California to designate their counties as United States Department of Agriculture (USDA) Farmers Home Administration emergency loan areas and the Governor, in turn, has made such a request to the federal government; and

"Whereas, The USDA County Emergency Boards developed damage assessment reports in conjunction with the agricultural commissioners for Fresno and Tulare Counties and the USDA State Emergency Board reviewed these reports, concurred with their damage assessments and has recently referred their conclusions directly to the Secretary of Agriculture for his determination; and

"Whereas, It is in the best interest of the State of California, and the United States as a whole, that the Secretary of Agriculture make a favorable finding in this matter as soon as possible; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California memorializes the United States Secretary of Agriculture to make a favorable finding on the designation of Fresno and Tulare Counties in the State of California as USDA Farmers Home Administration emergency loan areas at the earliest time possible; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of Agriculture, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1171. A joint resolution adopted by the Legislature of the State of California; to the Committee on Armed Services:

"SENATE JOINT RESOLUTION No. 69

"Whereas, The State of California has the largest retired military community in the United States; and

"Whereas, California includes among its population over 195,000 retired military personnel in addition to their dependent families; and

"Whereas, These military retirees receive over $180,000,000 per month in retired military pay which equates to over $2 billion annually, much of which goes for the daily living expenses of the retired military community and thus helps support the economy of the State of California; and

"Whereas, It is believed that the contributions of the retired military community to this country are beyond most people's realization; and

"Whereas, The health care of our retired military community should be of primary concern to the Department of Defense because of the large outlay of existing federal funds through CHAMPUS for private care of retired military personnel; and

"Whereas, The Department of Defense has military on-base hospital facilities in California which, through expansion, could accommodate retired military personnel and dependents in addition to active duty personnel; and

"Whereas, Expanding existing on-base hospital facilities will mean design, construction, and added personnel all of which are sorely needed in the present state of the economy; and

"Whereas, Outlays for hospital construction and additional personnel will not only provide needed jobs, but over the long period will reduce, or eliminate to a large degree, the need for CHAMPUS funds, thus producing a savings to the Department of Defense; and

"Whereas, These savings could be put to effective use to stimulate other areas of the economy; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully requests the President and Congress of the United States to enact legislation recognizing the medical needs of retired military personnel and their families by expanding medical facilities on defense installations to permit use by retired personnel who now rely on private care, so that expansion of these facilities will not only create construction jobs for unemployed workers, but also reduce over the next decade CHAMPUS payments for private care; and be it further

"Resolved, That the Legislature of the State of California supports enactment of legislation to address these matters; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, to the Senate Armed Services Committee, to the House Armed Services Committee, and to the chairman of each committee of the Senate and House of Representatives for consideration of legislation."

POM-1172. A joint resolution adopted by the Legislature of the State of California; to the Committee on Armed Services:

SENATE JOINT RESOLUTION No. 47

"Whereas, Since 1951, the federal government has made payments to school districts educating students from federally connected families whose parents work on or who live and work on federal property not subject to state property taxes; and

"Whereas, The federal government, under the McCullough vs. Maryland decision, does not pay state property taxes; and

"Whereas, Post exchanges and commissaries on federal property do not collect state sales tax; and

"Whereas, The federal government, under the provisions of the Soldiers and Sailors Relief Act, enables military personnel stationed in California to be exempt from California state income taxes; and

"Whereas, The federal government is the largest property holder in the state and has military installations which occupy valuable property around the state's major harbors and which cover hundreds of square miles in other areas of the state; and

"Whereas, In the 1980-81 fiscal year, the federal government burdened the California schools with 46,046 students whose parents both lived and worked on nontaxpaying federal property, and 183,642 students whose parents worked on nontaxpaying federal property, although the parents lived on property that did pay property taxes; and

"Whereas, The federal government has instituted a policy of eliminating impact aid that has reduced impact aid revenues of 413 school districts in California from $93,957,170 in the 1979-80 fiscal year to $48,754,896 in the 1981-82 fiscal year; and proposes to further reduce impact aid payments to the state in the 1982-83 fiscal year to $34,312,000; and

"Whereas, The loss of these funds to the school districts of California has created a situation that has drastically reduced education offerings to all students and has shifted the burden to other residents who do pay taxes; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to:

"(a) Restore impact aid funding for all federally connected students in California.

"(b) Institute a policy which will recognize the federal obligation to assist school districts in meeting the burden of educating children from federally connected families who are living or working on nontaxpaying federal property.

"(c) Recognize that the provision of an adequate educational program for the military dependents and other federally connected children is beneficial to the morale of citizens serving in the armed forces of the United States and to those communities that are impacted by federal activities; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1173. A petition from a citizen of Richmond, Vermont, requesting that the entire 1983 budget deficit be deducted from the 1983 military budget, and that at least 1 percent of the remaining military budget be spent on a concerted effort to develop a mutually acceptable program of multilateral disarmament; to the Committee on Armed Services.

POM-1174. A resolution adopted by the Evangelical Covenant Church of America opposing what appears to be a disproportionate amount of the proposed Federal Budget designated for defense and calling for a reduction of the 1983 proposed Defense Budget to a level no greater than the real dollar 1982 Defense Budget; to the Committee on Armed Services.

POM-1175. A petition from a citizen of Burlington, Vermont, requesting that the entire 1983 budget deficit be deducted from the 1983 military budget, and that at least 1 percent of the remaining military budget be spent on a concerted effort to develop a mutually acceptable program of multilateral disarmament; to the Committee on Armed Services.

POM-1176. A petition from a citizen of Waconia, Minnesota, urging the United States Senate to make our dollar "good as

gold" by supporting Senate Bill 6 to return America's currency to the gold standard; to the Committee on Armed Services.

POM-1177. A joint resolution adopted by the State of California; to the Committee on Banking, Housing, and Urban Affairs:

ASSEMBLY JOINT RESOLUTION No. 105

"Whereas, Both the United States and the State of California have adopted the goal of ensuring a decent home and suitable living environment for every family; and

"Whereas, Over 315,000 new housing units are needed annually for the next five years for California to keep pace with housing demand; and

"Whereas, Only 105,000 homes and apartments were built in California in 1981; and

"Whereas, Housing demand is expected to remain high as a result of new household formation and in-migration, which demand can only be met by a sustained and high level of housing production; and

"Whereas, Housing construction provides new job opportunities in housing and other fields, and produces additional sales, income and property taxes to support government services; and

"Whereas, Decisions to locate or expand business and industrial facilities in the state are influenced by the availability and affordability of housing for workers; and

"Whereas, The Reagan Administration has proposed elimination of the Section 8 new construction program—the only major federal housing construction program; and

"Whereas, the Reagan Administration has recommended a program of housing vouchers which, instead of funding construction of new housing, would enable the holders of vouchers to compete for housing in the existing stock; and

"Whereas, The Reagan Administration has proposed to convert all existing Section 8 certificates to housing vouchers; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the United States Congress to permit each state to utilize any funds available for housing vouchers, in excess of funds needed to convert existing Section 8 housing certificates to housing vouchers, for a state-designed and state-implemented program to stimulate new rental housing production; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative in the Congress of the United States."

POM-1178. A joint resolution adopted by the Legislature of the State of California; to the Committee on Banking, Housing, and Urban Affairs:

ASSEMBLY JOINT RESOLUTION No. 96

"Whereas, The State of California has an insufficient supply of internal credit to meet the homeownership demands of its citizens; and

"Whereas, The Federal Home Loan Mortgage Corporation has been and continues to be a major external supplier of available mortgage credit for California homebuyers; and

"Whereas, During the last four years, the Federal Home Loan Mortgage Corporation has significantly contributed to fulfilling the housing credit demands of Californians by purchasing over $11 billion in California home loans; and

"Whereas, The Federal Home Loan Mortgage Corporation operate as a housing investment conduit between the nation's capital investment markets and California's housing market; and

"Whereas, Federal legislation is now pending in the Senate and House of Representatives of the United States Congress to enable the corporation to raise additional capital to support the expansion of its housing services and volume capacity to purchase and guarantee home loans; and

"Whereas, The legislation to increase the capital base of the Federal Home Loan Mortgage Corporation proposes to raise capital through the issuance of public common stock without reliance on governmental subsidies or appropriations; and

"Whereas, The Federal Home Loan Mortgage Corporation with additional capital will be capable of expending its urgently needed services to California homebuyers and mortgage lenders; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California expresses its support for the legislation now in the Senate and House of Representatives of the United States Congress that will enable the corporation to increase its capital base through private sector mechanisms and therefore allow the corporation to expand its valuable services to California homebuyers; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1179. A joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

ASSEMBLY JOINT RESOLUTION No. 90

"Whereas, The State of California and Californians are major consumers of telecommunications and information services in the nation's preeminent information economy; and

"Whereas, California has always supported a policy of universal access to telecommunications and information services, acknowledging it as vital to the health of the state's economy and civic life; and

"Whereas, Access to telecommunications and information services, at reasonable costs, contributes to the growth of commerce, the effectiveness of government, the delivery of educational benefits, the development of an informed and active citizenry, and the reliability of emergency and public safety services; and

"Whereas, The California Public Utilities Commission has responsibly and effectively secured the benefits of traditional telecommunications services for all Californians, and in so doing upheld the state's proper and sovereign role; and

"Whereas, The Congress is currently considering legislation which would, if enacted, radically alter the existing structure of telecommunications regulation in the United States; and

"Whereas, The recent settlement between the United States Department of Justice and the American Telephone and Telegraph Company calls into question many of the fundaments underlying proposed legislation regarding telecommunications; now, therefore, be it

"Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to refrain from enacting proposed legislation regarding telecommunications until the legislation incorporates all of the following principles: (1) there shall be universal access to telecommunications and information services in the United States, (2) these services shall be reasonably priced so that smaller users of these services shall not be economically penalized in favor of larger users of these services, (3) the corporate reorganizations of American Telephone and Telegraph Company shall be structured to insure the future viability of local telephone companies and the continued availability of reliable, high quality telephone service at affordable cost, (4) there shall be an enlarged role for consumers in the making of telecommunications policy at all levels of government, and (5) the states' ability to design and implement telecommunications policy now and in the future shall not be abrogated or reduced; and be it further

"Resolved, That the Legislature of the State of California also requests the Governor of the State of California and the California Public Utilities Commission cooperate in petitioning the Congress to incorporate these principles in any telecommunications legislation; and be it further

"Resolved, That each Senator and Representative from California in the Congress seek to amend proposed legislation regarding telecommunications, and any other related legislation as may be introduced in the current session of Congress, to incorporate those principles; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States; to the Speaker of the House of Representatives; to the Chairman of the Senate Subcommittee on Communications; to the Chairman of the House Subcommittee on Telecommunications, Consumer Protection, and Finance; to each Senator and Representative from California in the Congress of the United States; to the Governor of the State of California; and to the California Public Utilities Commission."

POM-1180. A joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

SENATE JOINT RESOLUTION No. 37

"Whereas, The United States Coast Guard is a branch of the armed services originally created to defend our coastline and to ensure safe and orderly marine navigation in our territorial waters; and

"Whereas, During the last 10 years, the Coast Guard has been given many additional responsibilities pursuant to numerous federal acts, including the Boat and Safety Act, the Port and Waterways Safety Act, the Port and Tanker Safety Act, the Fishery Conservation and Management Act, the Water Pollution Control Act, the Clean Water Act, and the OCS Land Act Amendments, and

"Whereas, During this same period, the buying power of annual Coast Guard appropriations has remained approximately unchanged; and

"Whereas, The United States Department of Transportation has announced substantial cutbacks to take effect March 15th, 1982, in basic Cosat Guard services; and

"Whereas, the proposed loss of services in California includes the elimination of the

Vessel Traffic Service in San Francisco Bay; and

"Whereas, The 1981 Coast Guard's Vessel Traffic Service, by directing over 65,000 movements in San Francisco Bay, provided essential safety services for vessels using the bay and its numerous ports and harbors, including inland delta ports; and

"Whereas, San Francisco Bay is one of only four areas in the country which, because of its unique conditions, has Coast Guard Vessel Traffic Service; and

"Whereas, The Coast Guard has in the past stated that the Vessel Traffic Service is a major factor in avoiding ship collisions; and

"Whereas, Termination of this service will pose a serious threat to navigation and create unnecessary risks to life, property, and the environment; and

"Whereas, The United States Department of Transportation has begun negotiations with California maritime representatives to explore alternatives permitting continuance of Vessel Traffic Service in San Francisco Bay; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress and the President of the United States to support legislation providing for the agreements necessary to continue Vessel Traffic Service; and be it further

"Resolved, That the United States Department of Transportation is requested to continue negotiations with the California maritime industry and concerned citizens to explore the feasibility of alternatives for joint public and private sector operation of a marine navigation traffic system; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Secretary of Transportation."

POM-1181. A joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

"SENATE JOINT RESOLUTION No. 53

"Whereas, In December 1981, the Department of the California Highway Patrol published a study on tank truck accidents entitled 'California Tank Truck Accident Survey,' examining tank truck accidents, comparing them with all truck accidents, and determining what action might be necessary to reduce their occurrence and severity; and

"Whereas, The general findings under the study were that:

"(1) Tank trucks are involved in accidents that are more severe in terms of fatalities and injuries than other truck accidents.

"(2) Tank truck accidents differ from other truck accidents mostly in terms of overturns, cargo spills, fires, and mechanical defects.

"(3) Tank trucks hauling liquids require special skill of the driver in lane-changing or swerving manevers and on curves.

"(4) Methods are available for modifying the design of tank trucks to reduce the number of tank truck caused accidents and the hazardous effects of the accidents that would still occur.

"(5) Guidelines are available for establishing performance limits for improved stability against overturn and improved protection against cargo leakage after an overturn; and

"Whereas, Additional findings under the study were that almost 60 percent of the cargoes of tank truck vehicles are composed of hazardous materials, that is, cargoes of petroleum products, chemicals or acids or compressed or liquefied gas, with over half of the cargoes carrying petroleum products; and

"Whereas, Fatal collisions such as the recent collision occurring in California in the Caldecott Tunnel involving a tank truck vehicle carrying a cargo of flammable products, causing numerous deaths and injuries, must be safeguarded against; and

"Whereas, Tank truck vehicles, were found in the study to be unstable, overturning far more frequently than trucks in general; and

"Whereas, When a tank truck overturns in an accident, the occurrence of a fatality is twice as likely as in a nonoverturn tank truck accident; and

"Whereas, After a tank truck overturns 53 percent of the spills were found in the study to have occurred through cracks, ruptures or punctures of the tank, resulting in fires in almost half of these spill accidents, with 40 percent of these fires due to cargoes of gasoline; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes Congress to investigate and regulate by enacting appropriate laws and regulations, the design of tank truck vehicles, including, but not limited to, establishing standards for the improvement of roll and tilt stability, pressure retention and leakage limits on dome covers, vents, and safety valves, equipment maintenance, equipment inspection, and the training and selection of tank truck drivers; and be it further

"Resolved, That the Congress is urged to review research performed by both the federal government and other organizations as part of the requested investigation regarding the design of tank truck vehicles, and to consult with California authorities in the development of standards for the design of tank truck vehicles; and be it further

"Resolved, That the Congress is requested to hold public hearings in adopting practical solutions to design deficiencies of tank truck vehicles to be applicable nationwide; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives and to each Senator and Representative from California in the Congress of the United States."

POM-1182. A joint resolution adopted by the Legislature of the State of California; to the Committee on Energy and Natural Resources:

ASSEMBLY JOINT RESOLUTION No. 112

"Whereas, There is a recognized need for a regional downhill ski area on Mt. Shasta; and

"Whereas, To accommodate the relocation of downhill skiing, wilderness boundary lines must be legislated for Mt. Shasta; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact legislation to finalize the Mt. Shasta Wilderness Area in order to reestablish skiing on Mt. Shasta; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1183. A joint resolution adopted by the Legislature of the State of California; to the Committee on Energy and Natural Resources:

ASSEMBLY JOINT RESOLUTION No. 98

"Whereas, The United States government has expressed the policy of reducing the nation's dependence upon imported petroleum and increasing the nation's capability to foster the greater use of renewable and alternative technologies, including hydroelectric power; and

"Whereas, Hydroelectric energy is an inexpensive source of electrical power, the use of which could reduce the cost of energy to consumers; and

"Whereas, The transmission capability to transport hydroelectric power from such sources are currently available or are being developed; and

"Whereas, The use of hydroelectric energy rather than oil for electric power production would significantly lessen the amount of uncontrolled emissions to the California environment; now, therefore, be it

"Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California hereby requests the United States Department of Energy to investigate the possibility of securing hydroelectric energy from proposed hydroelectric projects, including, particularly, the securing of this energy for areas of California which are heavily dependent upon petroleum resources for the generation of electric energy; and be it further

"Resolved, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact appropriate legislation to ensure full federal support of all potential hydroelectric energy sources; and be if further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the United States Department of Energy, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States.

REPORTS OF COMMITTEE

The following reports of committee were submitted:

By Mr. COCHRAN, from the Committee on Appropriations, without amendment:

S. 2911. An original bill making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-545).

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 450. Resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1844.

S. Res. 452. Resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2329.

By Mr. ANDREWS, from the Committee on Appropriations, without amendment:

S. 2914. An original bill making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-546).

By Mr. ABDNOR, from the Committee on Appropriations, without amendment:

S. 2916. An original bill making appropriations for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-547).

By Mr. D'AMATO, from the Committee on Appropriations, without amendment:

S. 2917. An original bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-548).

By Mr. GARN, from the Committee on Appropriations, with amendments:

H.R. 6956. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-549).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Justin Dart, of California, to be a Member of the Board of Directors of the Communications Satellite Corporation until the date of the annual meeting of the Corporation in 1985.

(The above nomination was reported from the Committee on Commerce, Science, and Transportation with the recommendation that it be confirmed, subject to the nominee's commitment to respond to appear and testify before any duly constituted committee of the Senate.)

Mr. PACKWOOD. Mr. President, for the Committee on Commerce, Science, and Transportation, I also report favorably two nomination lists in the Coast Guard which were printed in the CONGRESSIONAL RECORD of August 4, 1982, and, to save the expense of reprinting them on the Executive Calendar, I ask unanimous consent that these nominations lie on the Secretary's desk for the information of Senators.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. COCHRAN, from the Committee on Appropriations:

S. 2911. An original bill making appropriations for agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1983, and for other purposes; placed on the calendar.

By Mr. METZENBAUM (for himself, Mr. RIEGLE, Mr. BAUCUS, Mr. LEVIN, Mr. RANDOLPH, Mr. BURDICK, Mr. PELL, Mr. SARBANES, and Mr. CANNON):

S. 2912. A bill to provide that the amount of unnegotiated social security checks shall be returned to the social security trust funds, and for other purposes; to the Committee on Finance.

By Mr. SIMPSON (for himself, Mr. CRANSTON, Mr. THURMOND, Mr. STAFFORD, Mr. KASTEN, Mr. DENTON, Mr. MURKOWSKI, Mr. RANDOLPH, Mr. MATSUNAGA, Mr. DECONCINI, and Mr. MITCHELL):

S. 2913. A bill to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans, to increase the rates of dependency and indemnity compensation for surviving spouses and children of disabled veterans, and to modify and improve the education and vocational rehabilitation programs administered by the Veterans' Administration and veterans' employment programs administered by the Department of Labor, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. ANDREWS, from the Committee on Appropriations:

S. 2914. An original bill making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes; placed on the calendar.

By Mr. MATSUNAGA:

S. 2915. A bill for the relief of Dr. Samuel J. Wong and Mrs. Agnes J. Wong, husband and wife; to the Committee on the Judiciary.

By Mr. ABDNOR, from the Committee on Appropriations:

S. 2916. An original bill making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1983, and for other purposes; placed on the calendar.

By Mr. D'AMATO, from the Committee on Appropriations:

S. 2917. An original bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes; placed on the calendar.

By Mr. CHAFEE (for himself, Mr. BENTSEN, Mr. WALLOP, Mr. MITCHELL, Mr. DANFORTH, Mr. BOREN, Mr. GRASSLEY, Mr. MATSUNAGA, Mr. GARN, Mr. HEFLIN, and Mr. SYMMS):

S. 2918. A bill to permit the investment of employee benefit plans in residential mortgages; to the Committee on Finance and the Committee on Labor and Human Resources, jointly, by unanimous consent.

By Mr. LUGAR (for himself and Mr. BIDEN):

S. 2919. A bill to help insure the Nation's independent factual knowledge of Soviet-bloc countries, to help maintain the national capability for advanced research and training on which that knowledge depends, and to provide partial financial support for national programs to serve both purposes; to the Committee on Foreign Relations and the Committee on Labor and Human Resources, jointly, by unanimous consent.

By Mr. HEINZ (for himself, Mr. JEPSEN, Mr. PERCY, Mr. SPECTER, and Mr. GLENN):

S. 2920. A bill to authorize the sale of defense articles to U.S. companies for incorporation into end items to be sold to friendly countries; to the Committee on Foreign Relations.

By Mr. CHILES:

S. 2921. A bill to amend the Congressional Budget and Impoundment Control Act of 1974 to reform the congressional budget process, and for other purposes; to the Committee on the Budget and the Committee on Governmental Affairs, pursuant to the order of August 4, 1977, with instructions that if one committee reports, the other committee has 30 days of continuous session to report or be discharged.

By Mr. ROBERT C. BYRD:

S.J. Res. 247. Joint resolution proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MURKOWSKI:

S. Res. 467. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1562; to the Committee on the Budget.

By Mr. DOLE (for himself, Mr. LEAHY, Mr. ANDREWS, Mr. BAUCUS, Mr. BIDEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BURDICK, Mr. CANNON, Mr. CHAFEE, Mr. DANFORTH, Mr. DIXON, Mr. FORD, Mr. GORTON, Mr. HATFIELD, Mr. HEINZ, Mr. HUDDLESTON, Mr. INOUYE, Mr. JACKSON, Mr. JEPSEN, Mr. JOHNSTON, Mr. KENNEDY, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. RIEGLE, Mr. ROTH, Mr. STAFFORD, Mr. TSONGAS, Mr. WEICKER, and Mr. ZORINSKY):

S. Con. Res. 121. Concurrent resolution expressing the sense of the Congress that the United States should maintain Federal involvement in, and support for, the child nutrition programs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. METZENBAUM (for himself, Mr. RIEGLE, Mr. BAUCUS, Mr. LEVIN, Mr. RANDOLPH, Mr. BURDICK, Mr. PELL, Mr. SARBANES, and Mr. CANNON):

S. 2912. A bill to provide that the amount of unnegotiated social security checks shall be returned to the social security trust funds, and for other purposes; to the Committee on Finance.

CREDITING THE SOCIAL SECURITY TRUST FUNDS FOR UNCASHED CHECKS

● Mr. METZENBAUM. Mr. President, the legislation I am introducing today is designed to correct an inequity in

current law that prevents the Treasury from returning approximately $200 million that should rightfully be deposited in the social security trust funds. That money, which represents many thousands of uncashed social security checks, is a resource that should be made available to the hard-pressed social security system.

In the half century since the social security system was established, a considerable number of checks made out to social security recipients have not, for a variety of reasons, been cashed. In some cases, checks were lost. Some were destroyed or simply forgotten. In other cases, recipients died before cashing their checks. But in spite of the fact that these checks have been accumulating for many years, current law prevents the Treasury from either canceling the unnegotiated checks or returning the money to the social security fund. Thus, the unclaimed money winds up in a kind of limbo.

This anomalous situation creates an unfair burden on elderly Americans. They are told on the one hand that the social security system is poised on the brink of financial disaster. On the other, millions of dollars in unclaimed funds, which Congress clearly intended to be used for the benefit of recipients, is presently lost to the social security trust funds. Before any other efforts are made to resolve the financial problems of social security, Congress should take this simple and fair step of restoring to social security, funds that rightfully belong in social security accounts.

We should note, Mr. President, that in addition to the estimated $200 million already accumulated in unclaimed funds, the trust funds could stand to lose in the next 4 years an additional $100 million unless this problem is resolved.

There have been many proposals and suggestions for strengthening the financial status of social security. Many of these proposals are highly controversial, like cutting benefits or raising the retirement age. But here, Mr. President, we have the opportunity to make a fair and non-controversial change to benefit our elderly citizens. All those who are concerned about the system should join me in taking this simple step to credit social security with these badly needed funds.●

By Mr. CHAFEE (for himself, Mr. BENTSEN, Mr. WALLOP, Mr. MITCHELL, Mr. DANFORTH, Mr. BOREN, Mr. GRASSLEY, Mr. MATSUNAGA, Mr. GARN, Mr. HEFLIN, and Mr. SYMMS):

S. 2918. A bill to permit the investment by employee benefit plans in residential mortgages; by unanimous consent, referred jointly to the Committee on Finance and the Committee on Labor and Human Resouces.

RESIDENTIAL MORTGAGE INVESTMENT ACT OF 1982

Mr. CHAFEE. Mr. President, today I am introducing the Residential Mortgage Investment Act of 1982 which seeks to broaden the ability of employee benefit plans to invest in the mortgage market.

Many housing finance experts believe that current laws and regulations affecting pension funds are unduly restrictive when it comes to home mortgage investments. Pension funds must meet so many legal requirements before they can purchase mortgages that it puts even the most solid mortgage investments at a competitive disadvantage with other types of assets.

The goal of this legislation is to open the way for all prudent investments, including mortgages, to be treated equally under the Nation's pension laws. It does not by any means require pension funds to put their money into home mortgages, nor is it intended to permit pension funds to make investments at below market rates.

The Residential Mortgage Investment Act is an important step in recognizing that the traditional sources of housing finance—deposits held at our community savings and loan associations—will not be enough to satisfy the demands of future home buyers. The mortgage market is undergoing dramatic change as is the rest of the financial industry. Congress should do everything in its power to assure that, as these changes occur, barriers are removed to the free flow of investor dollars into the housing market. The significance of the legislation is that it will help remove these barriers and will create an incentive for the financial sector of our economy to increase the supply of capital for prudent mortgage investments.

While I cannot overstate the importance of this bill, neither do I want to create the impression that it will be the instant answer to the problems of the U.S. housing industry. It will not. Testimony from the hearing I conducted recently on pension fund investments in the mortgage market indicated clearly that the main obstacle to fund investors is that mortgages have not yet been packaged as attractively as other kinds of securities. As a result, pension fund managers have not been as willing to invest in mortgages as they have in more traditional assets. The Residential Mortgage Investment Act will open the door to more rapid development of a private sector secondary market for mortgage investments. This should help improve the liquidity and soundness of mortgage securities and make it easier for pension funds to acquire them.

Mr. President, I will schedule hearings on this measure in my Finance Subcommittee on Savings, Pensions, and Investment Policy just as soon as possible. I want to seek the assistance of the pension industry, organized labor, the housing industry and the administration in coming to a legislative proposal we can all support; one that will modernize the mechanisms of home mortgage finance along with the other revolutionary changes we are now seeing in our financial institutions.

As far as I am concerned, the details of this proposal will be subject to the most careful scrutiny. While the housing industry has very serious problems which we seek to remedy, my primary consideration in any legislation dealing with pension funds is that the benefits promised to workers and retirees be protected. In that regard, I do have some concerns about provisions in the bill that could open the way for pension funds to engage directly in making individual mortgage loans as would a savings and loan or mortgage company. The general thrust of the legislation is clear, however, and is intended to be as much a benefit to pension funds as it is to the housing sector.

Mr. President, I urge all my colleagues to join Senators BENTSEN, WALLOP, MITCHELL, DANFORTH, BOREN, MATSUNAGA, HEFLIN, GRASSLEY, GARN, and me in cosponsoring the Residential Mortgage Investment Act of 1982. I ask unanimous consent that the text and description of the bill be printed in the RECORD at this point.

Mr. President, I also ask unanimous consent that the bill be jointly referred to the Committee on Finance and the Committee on Labor and Human Resources.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2918

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Residential Mortgage Investment Act of 1982.".

SEC. 2. DEFINITIONS.

For purposes of this Act—

(1) EMPLOYEE BENEFIT PLAN.—The term "employee benefit plan" means—

(A) For purposes of applying this Act with respect to section 406 of the Employee Retirement Income Security Act of 1974, an employee benefit plan within the meaning of section 3(3) of such Act (29 U.S.C. 1002(3)); and

(B) For purposes of applying this Act with respect to section 4975 of the Internal Revenue Code of 1954, as amended, a plan within the meaning of subsection (e)(1) of such section 4975 of the Internal Revenue Code of 1954, as amended.

(2) QUALIFIED MORTGAGE TRANSACTION.—The term "qualified mortgage transaction" means—

(A) The issuance of a commitment by one or more employee benefit plans or a pool to provide mortgage financing to purchasers of residential dwelling units, either by making or participating in residential mortgage loans directly to purchasers or by purchas-

ing residential mortgage loans or participation interests in residential mortgage loans orignated by a third party,

(B) The receipt of a fee in exchange for issuing such a commitment,

(C) The actual origination or purchase of a residential mortgage loan, or of a participation interest therein, pursuant to such a commitment,

(D) The direct origination or purchase, by one or more employee benefit plans or a pool, of a residential mortgage loan, or of a participation interest therein, in cases other than those in which such a commitment has been issued,

(E) The sale, exchange, or transfer of a residential mortgage loan, or of a participation interest therein, by an employee benefit plan or a pool, prior to maturity date of such loan, and

(F) The servicing of a residential mortgage loan (or a participation interest therein) by an employee benefit plan in accordance with this Act, including (but not limited to) collecting mortgage payments, assuring that taxes and insurance premiums for the residential dwelling units are paid, and making decisions relating to, and handling, foreclosures, and

(G) The purchase or sale, or commitment to purchase or sell an interest in a pool consisting solely of residential mortgage loans, but only if conducted in accordance with the practices customary in the residential mortgage industry.

(H) The formation and operation by one or more employee benefit plans of a pool or pools of residential mortgage loans.

(I) The purchase of sale, or commitment to purchase or sell a mortgage-backed security.

(3) ARM'S-LENGTH.—The term "arm's-length" means in accordance with customary practices in the residential mortgage industry.

(4) POOL.—The "pool" means an aggregation of funds or of residential mortgage loans aggregated for purposes of investment by one or more plans, pursuant to terms and conditions customary in the residential mortgage industry.

(5) RESIDENTIAL MORTGAGE LOAN.—The term "residential mortgage loan" means a mortgage on a residential dwelling unit, in fee simple, or leasehold (A) under a lease for not less than 99 years which is renewable or (B) under a lease having a period of not less than 50 years to run from the date the mortgage was executed.

(6) RESIDENTIAL DWELLING UNIT.—The term "residential dwelling unit" includes (but is not limited to)—

(A) A detached house, a townhouse, manufactured housing, a condominium unit, a unit in a housing cooperative, a unit in a multi-unit subdivision (planned unit development) restricted by recorded documents which limit the use of the unit to residential purposes and provide for maintenance and facilities, or

(B) A structure consisting of two or more residential dwelling units (as defined in paragraph (A) herein).

(7) COMMITMENT.—The term "commitment" means a contractual obligation of an employee benefit plan, or a pool, the terms and conditions of which are customary in the residential mortgage industry, to provide mortgage financing to purchasers of residential dwelling units.

(8) PARTICIPATION INTEREST.—The term "participation interest," in connection with a residential mortgage loan means an ownership interest in such mortgage loan ownership of which is held in common with one or more other persons.

(9) ORIGINATION.—The term "origination" means the process by which long-term financing is obtained for the purchasers of residential dwelling units under construction or then existing.

(10) MORTGAGE-BACKED SECURITY.—A certificate representing a fractional undivided interest in a mortgage pool, or a participation in a mortgage pool, which is held in trust and is secured by mortgages or deeds of trust on residential property, including undistributed cash and property which had secured such obligations and has been acquired by foreclosure.

(11) PARTICIPANT; BENEFICIARY; PERSON; STATE.—The terms "Participant," "beneficiary," "person," and "State" shall have the meaning given such terms, respectively, in section 3 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002).

SEC. 3. EXEMPTION.

(a) GENERAL RULE.—Section 406 other than 406(b) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1106) and Section 4975 other than 4975(c)(1) (E) and (F) of the Internal Revenue Code of 1954, as amended, shall not apply with respect to any qualified mortgage transaction engaged in by an employee benefit plan, provided said transaction is at arm's-length.

(b) PREEMPTION OF STATE LAW.—Subsection (a) shall supersede any and all State laws insofar as they may now or hereafter relate to qualified mortgage transactions to the extent engaged in by employee benefit plans.

SEC. 4. EFFECTIVE DATE.

The provisions of this Act shall take effect on the date of the enactment of this Act.

DESCRIPTION OF SENATE BILL (S. 2918)

Mr. CHAFEE. Mr. President, S. 2918, the "Residential Mortgage Investment Act of 1982" permits employee benefit plans to invest in the mortgage market (including mortgage-backed securities) and engage in a variety of mortgage related transactions provided prudence and arm's-length standards are met. Specifically, the bill permits plans to engage in "qualified mortgage transactions" involving "qualified mortgage loans" provided the transactions are at arm's-length. The bill exempts "qualified mortgage transactions" from a portion of the prohibited transaction provisions of the Employee Retirement Income Security Act of 1974 (ERISA), the Internal Revenue Code of 1954, as amended (the code) and any contrary provisions of State law. The effective date is the date of enactment.

PERMITTED TRANSACTIONS

Provided the underlying residential mortgage loan is prudent, the bill permits a broad range of transactions, if at arm's-length. It permits a plan, a group of plans, or a mortgage pool to do the following:

First. Issue commitments to provide mortgage financing to purchasers of residential dwelling units. This may be done either by making or participating in the mortgage loans directly to the purchases or by purchasing loans or participation interests in such loans that are originated by a third party;

Second. Receive a fee for issuing a commitment;

Third. Originate or purchase a mortgage loan or a participation interest in such a loan pursuant to the commitment;

Fourth. Directly originate or purchase a mortgage loan or participation interest in a mortgage loan in situations where no commitment has been issued;

Fifth. Sell or exchange a mortgage loan, or participation interest in a mortgage loan, prior to its maturity date;

Sixth. Provide services incidental to a mortgage loan or a participation interest in a mortgage loan, such as collecting mortgage payments, assuring that taxes and insurance premiums for the residential dwelling units are paid, and making decisions relating to, and handling, foreclosures;

Seventh. Purchase or sell, or commit to purchase or sell, an interest (including mortgage-backed securities) in a mortgage pool but only if the transaction is conducted in accordance with the practices customary in the residential mortgage industry; and

Eighth. Form and operate a pool or pools of mortgage loans.

Ninth. Purchase, sell or commit to purchase or sell a mortgage-backed security.

Mr. DANFORTH. Mr. President, I am pleased to join Senator CHAFEE as a cosponsor of this legislation. The idea behind this bill is sound. On the one hand, the housing market is in desperate need of additional sources of funds for new mortgages; on the other hand, pension funds, which control nearly a trillion dollars of investment capital, should be allowed to take advantage of any investment which is in the best interests of its beneficiaries.

Under recently-issued Labor Department regulations, pension funds are allowed to invest in mortgage-backed securities issued by the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. This has the potential of both providing sound new investments for pension funds and injecting new capital into the housing market.

This bill would expand the Labor Department's initiative by removing restrictions that prevent other types of mortgage investments by pension funds. For this reason, I am cosponsoring the bill. However, like Senator CHAFEE, I do have some reservations about it in its current form. While I agree with the intent of the bill, I am concerned that, as presently drafted, it may not provide sufficient safeguards for protecting the interests of the participants and beneficiaries of pension funds. Without such safeguards I

could not support enactment of the legislation.

I look forward to working with Senator CHAFEE between now and the time that the Finance Committee acts on this bill. It is my hope that a proposal can be worked out which will meet the objectives of this bill while insuring adequate protection for those whose retirements are dependent on private pension funds.

My other concern is with the possibility that this bill could become a vehicle for any number of other pension proposals, particularly in the area of multiemployer pension plans.

In my view, rushing into such changes without a thorough study of the issues would be a serious mistake. Therefore, I will oppose the attachment of substantive amendments to this bill unless they have been carefully examined and enjoy broad support.

By Mr. LUGAR (for himself and Mr. BIDEN):

S. 2919. A bill to help insure the Nation's independent factual knowledge of Soviet-bloc countries, to help maintain the national capability for advanced research and training on which that knowledge depends, and to provide partial financial support for national programs to serve both purposes; jointly referred to the Committee on Labor and Human Resources and the Committee on Foreign Relations, by unanimous consent.

SOVIET BLOC RESEARCH BILL

Mr. LUGAR. Mr. President, as the Senate moves through its business of the day, there are over 300 American specialists at Moscow's Institute of the USA and Canada watching our every move. These 300 "Americanists" are joined by over 7,000 other foreign affairs specialists at a dozen similar institutes scattered around Moscow. Beyond these academic specialists are countless others toiling away in far less visible institutions.

One might assume that we have similar research capabilities to examine the Soviet Union; we do not. Fewer than 200 Americans will probably complete their doctoral-level training in Soviet studies this year. The hard truth is that our national capacity to analyze the views and actions of our primary adversary in the world is eroding. For example, it would be difficult to find more than about a half-dozen American specialists on Soviet policy toward Japan or Mexico, on natural resource development in Siberia, or on ethnic relations in Soviet central Asia.

Mr. President, we are losing our capability to analyze the Soviet Union. Projecting current trends into the future forecasts a considerable deficiency by the late 1980's. And in this case, what we do not know can hurt us. In 5 years, we will need to know about Soviet research capabilities in solar energy. Will we be able to know whether or not the Uzbeks are restive, or the Soviet family unit has broken down? When we undertake our own strategic planning, will we be able to assess the impact of massive investment in Siberia upon Soviet strategic capabilities? During the 1970's, we learned a great deal from talented and hard-working Government and academic specialists about Soviet petroleum needs, health problems, and ethnic tensions. Will there be equally capable analysts available in 1990?

At the moment, there is every reason to believe that we will not have the right skills in the right quantity to know our adversary. I bring to my colleagues' attention a recent GAO report, which noted that many Government agencies anticipated increasing difficulties throughout the decade in acomplishing the research they will need about the Soviet Union. Talented, experienced research scholars, young and old, are shifting to other fields of study, while fewer and fewer gifted graduate students are entering. Not only will there be fewer specialists for Government agencies to hire, but there will be fewer teachers to train those specialists the Government will need. A national capability painstakingly built up over two decades will be lost. It will take decades and enormous cost to recreate it once it is gone.

Given this alarming state of affairs, what can we do to change this situation? The first point to be made is that there is time to reverse the trend. A well thought-out and financially responsible program to support academic Soviet studies and to provide new personnel for Government and other services can help to meet our national need and do so at modest cost. The second point is that time is running out. By the end of the 1980's, nearly half of the recognized academic experts currently working on Soviet affairs will be dead or retired.

We have, then, an opportunity to revitalize Soviet studies in this country, and to do so in time to meet an approaching shortage of trained specialists for Government service, corporate and academic work, and journalistic assignments. If we act now, we can secure our national capacity to analyze our primary global adversary without creating a new agency or bureaucracy and, to repeat, without making a major financial investment.

It is for these reasons that Senator BIDEN and I join together to propose the endowment of $50 million to establish a Soviet Bloc Research and Trust Fund.

The endowment would be invested and reinvested by the U.S. Treasury and the interest from that investment would be used to support a national program of advanced research for broad dissemination to the public and to Government policymakers and the training of research specialists under university auspices in the United States as well as support for their studies in East European countries and the Soviet Union.

The interest from the fund would be used to support the ongoing activities of the National Council for Soviet and East European Research, the International Research and Exchanges Board, and the Woodrow Wilson International Center for Scholars, as well as to create new programs to help universities around the country support their own research in Soviet and East European studies.

How would this new endowment help ease the developing manpower shortage in Government and academic Soviet and East European studies programs? The National Council, the International Research and Exchanges Board, and the Wilson Center would work together with American universities and research institutes to develop a flexible, comprehensive, integrated research and manpower training program for current specialists in the field, as well as for young, developing specialists. The aim would be to provide sufficient support throughout the training and research cycle to encourage new people to enter the field while keeping Soviet and East European studies sufficiently attractive to keep those specialists already in the field active.

It is critical to note that the consequences of the decline of academic Soviet studies for the U.S. Government are ominous. First, as the academic community declines, so does the potential pool of applicants for Government positions. Second, the opportunities for an exchange of ideas and mutual stimulation among scholars and Government analysts are reduced. Finally, over the long run, the Government will undoubtedly find it necessary to create training programs to meet internal needs. Such a process will cost more to initiate than sustaining current institutions. The proposed program, then, will help us avoid otherwise necessary and larger expenses later in the decade.

Mr. President, it is in the national interest to reverse the decline in our performance. A one-time appropriation is all that this reversal will require; once created, the fund will require no further appropriations. The fund would be a stable source of income which would be easily and responsibly administered by reputable and existing national institutions like the National Council for Soviet and East European Research, the International Research and Exchanges Board, and the Woodrow Wilson International Center for Scholars. Mr. President, it is vital that we place a firm foundation under the whole field and regain our diminishing potential to know our

adversary—the Soviet Union. I urge my colleagues to join with Senator BIDEN and me to see that this happens.

Mr. BIDEN. Mr. President, I am pleased to join with my colleague on the Foreign Relations and Intelligence Committees, Senator LUGAR, in cosponsoring this legislation to create a Soviet bloc research and training fund.

By a modest, one-time commitment of always scarce funds, we can provide a continuing basis for the improvement and expansion of our intellectual resources in an area vital to our own national security.

There is no need to be reminded of the critical position which Moscow occupies on the stage of world affairs. The Soviet Union, whether we like it or not, continues to be the central problem for American foreign policy. It controls the last massive empire on Earth, dominating the Eurasian landmass, and directing the political fortunes of a number of client states on its Eastern European and Asian peripheries. In recent years, it has not only acquired the ability to project its military power on a global scale, but it has acted on that ability and has presented the United States and the Western alliance with a series of challenges which demand urgent action.

The sources of Soviet domestic and foreign policy behavior are kaleidoscopic and complicated. Some sophisticated sense of those behavioral patterns, and the intricate interplay between obvious Soviet strengths and no less obvious Soviet weaknesses, is indispensable in the formation of an effective American policy toward the U.S.S.R.

Throughout much of the 1970's, the Soviets, fearful of China, burdened by the rising costs of empire, and faced with an intimidating range of new economic problems, attempted to court the United States in their own peculiar way, attempted to find some new pattern of accommodation with the United States. By the late 1970's that fitful attempt at accommodation had broken down. The Soviets had sought economic and political benefits from the American connection on the basis of their own groundrules.

From the very beginning in 1972, there had been no common understanding of international rules of behavior. Soviet actions in Angola, the Horn of Africa, the Middle East, and Afghanistan reflected their minimalist interpretation of modified confrontation with the West. They in turn have offered a long string of supposed justifications, charging American neglect of an hostility toward a stable relationship with the Soviet Union. The Afghan invasion itself is claimed to be a reaction to American collusion with China which meant to destablize a friendly state on Russia's sensitive southern borders. Soviet petulance has made them more dangerous, and heightened their traditional feelings of isloation and paranoia.

Yet, it remains to be seen whether they will be prepared to go it alone in the decades to come, to go it alone in the face of mounting economic and social challenges at home. The price for them would be very high indeed.

Recent reports on the Soviet economy have not been rosy. Along with declining industrial growth rates, the Kremlin will be faced with increasing tensions between military and civil priorities, tough decisions on economic investments and regional development, serious gaps between energy needs and resources, and a new complex of rising civilian expectations of unpredictable dimensions. Not the least of these challenges will be the ethic revival affecting the numerous non-Russian nationalities which now make up almost 50 percent of that population. The dismal experiment at creating a plastic and monochrome Soviet man has failed and given way among most of these minority peoples to a renewed search for ethnic and cultural identity in the rich and diverse traditions of the past. This search for roots will take on increasingly complex and urgent forms. It is process which will severely test Moscow's skills at central control. All of these factors will condition Moscow's decisions on its military policies and posture abroad, on its going ahead, or not, with sophisticated but expensive weapons systems, on the nature of its political and economic relations with the United States and the West.

As the Soviet leadership and Soviet society as a whole wrestle with these issues in the years ahead, we will need all the information and help we can get in forming wise decisions of our own. It will be important to understand which factors and pressure points might serve both to modify Soviet aggressive behavior abroad and to push the Soviet leadership toward a more moderate involvement in a stable global community. It is in our own best interests to be closely informed on these evolving patterns in Soviet society, and to build a firm and consistent policy on the basis of this information. Nothing is more destructive of the purposes of American policy than such a lack of basic data and expertise. We need some hard facts and sophistication about these matters. We need a research and analysis capability which will allow us to dig out structural trends and to construct a creative and anticipatory long-term policy.

Our technical and photographic intelligence is superb. American science and technology have put the best apparatus in the world at our disposal. What we lack and badly need is a matching political analysis component.

It is in this area especially that trends have been working against us over the last decade or more. The financial crisis of the universities has resulted in a striking contraction in critical departmental areas. The social sciences themselves—especially political science, economics, international relations, and sociology—have moved away from a focus on area studies to more general, theoretical, and methodological concerns. What all these shifts in financing and support have meant is that fewer competent young area specialists are being both trained and hired in the universities, and the pool of able area analysts is shrinking. Nowhere is this more obvious than in the case of the minority languages and cultures of the Soviet Union. In those very few university centers around the country where some of these critical tools are still being taught, there is little reason for a bright young specialist to begin the long and tough study of an exotic and peripheral language if there are no economic and professional incentives to encourage him or her that such hard-won skills will find some support, employment and use.

What we need is a new program of incentives to pull our existing resources and institutions together, make the most of what we have, and build upon this basis for the future.

While primary attention must be given to the health of the university training base, to which this bill devotes substantial attention, three major noncampus institutions created to serve that university base are critical actors in this enterprise. They are natural allies in the process of developing a national research capability, and each performs a complementary function along the spectrum of training, experience, dissemination, and utilization. Through its overseas programs with Eastern Europe and the Soviet Union, IREX guarantees indispensable on-the-ground experience, firsthand country contact, and access to otherwise unobtainable primary data and human resources. The Woodrow Wilson International Center provides an excellent forum in Washington where academic specialists can meet comfortably and productively with representatives of the Government and the media to exchange insights and perspectives on both intellectual issues and public affairs. The National Council for Soviet and East European Research serves as an interface mechanism between Government and academic analysts, attempting to identify priority areas of common public and professional concern for further urgent inquiry, offering incentive grants to attract essential expertise. Taken together with the universities, these institutions complete the cycle of training, experience, and dis-

semination which shapes our national research and analysis capacity on the Soviet bloc.

We need to recognize the unity of this spectrum of existing resources and the role which they play in forming our national analysis establishment. They have functioned from hand to mouth for years; we need to devise a support package to put them on a stable long-term basis. As a nation with global commitments and responsibilities, we cannot afford to let these capabilities wither. First-rate language and area specialists are not produced overnight. Building a policy analysis component demands foresight and attention.

The Soviets themselves make no such mistake in attending to their own capabilities. They have invested enormous resources in creating a comprehensive research establishment in Moscow with thousands of linguistically trained, area-experienced specialists. The Institute for the Study of USA and Canada, the Institutes on the Far East, Latin America, Africa, World Economy and International Relations, and several other centers of the Soviet Academy house almost 10,000 leading policy-oriented analysts in Moscow alone. Whatever the quality of that analysis, the size of the enterprise is staggering. By comparison, the current state of the American effort is embarrassing at best.

We need the best minds and talents this Nation can afford in this effort to understand our major competitor. The need is obvious, and the sum we are talking about is modest. One thing this country cannot afford in such a critical policy area is ignorance.

By Mr. HEINZ (for himself, Mr. JEPSEN, Mr. PERCY, Mr. SPECTER, and Mr. GLENN):

S. 2920. A bill to authorize the sale of defense articles to U.S. companies for incorporation into end items to be sold to friendly foreign countries; to the Committee on Foreign Relations.

ARMS EXPORT CONTROL

Mr. HEINZ. Mr. President, today I am introducing legislation which will amend the Arms Export Control Act. U.S. Government arsenals presently do not have the authority to sell components they manufacture to U.S. defense contractors for incorporation into end items and subsequent export to friendly foreign nations.

Under current law, foreign buyers must approach respective Government arsenals and commercial suppliers separately through foreign military sales (FMS) cases. The result is a duplication of costs and efforts; the industry bears the cost of marketing a weapons system, while the U.S. Government must bear the cost of marketing the components of weapons systems. The present method of doing business often means the loss of contracts to U.S. companies and the loss of jobs to American workers.

This legislation will eliminate this duplication of effort and marketing costs to the Federal Government.

This legislation will reduce administrative costs to the U.S. Government. It will help our Nation sustain a vibrant domestic defense production base and provide for increased employment opportunities in our commercial defense industry and U.S. Government arsenals.

This legislation is not designed to stimulate or increase commercial arms sales. Nor is it intended to add to drawdowns of U.S. stocks that would result in adverse impact on U.S. force readiness.

Under the provisions of this legislation, all arms sales will be scrutinized by the Department of Defense, State and the Arms Control and Disarmament Agency in order to insure that arms sales coincide with our Nation's foreign policy goals.

Mr. President, this legislation will make it easier for our Government defense facilities and commercial plants to work together for the benefit of American security interests and for the benefit of American workers.

I respectfully urge my colleagues to support this legislation.

By Mr. CHILES:

S. 2921. A bill to amend the Congressional Budget and Impoundment Control Act of 1974 to reform the congressional budget process, and for other purposes; pursuant to the order of August 4, 1977, referred jointly to the Committee on the Budget and the Committee on Governmental Affairs.

BALANCED BUDGET ENFORCEMENT ACT OF 1982

● Mr. CHILES. Mr. President, today I am introducing the "Balanced Budget Enforcement Act of 1982." This package of amendments to the Budget Act is designed to implement the goals of the constitutional amendment to balance the budget which was passed by the Senate on August 4, 1982. My bill also adds a new title creating the "Regulatory Budget Act of 1982." These amendments will move the congressional budget process to a new level of effectiveness. This is the package of amendments which I first outlined on May 6 when I introduced Senate Joint Resolution 196. The major provisions of my bill are:

First, require budget resolutions to show a balance of outlays and revenues.

Second, require a "payback" surplus to pay back any deficits incurred during a recession or other time that the waiver provisions is invoked. This will prevent the tendency to squeeze in permanent new spending programs when a recession makes a waiver necessary and keeps the national debt from being increased.

Third, require a temporary tax increase in the year after any "unanticipated deficits." This will offset the temptation to balance the annual statement by overoptimistic economic or estimating assumptions.

Fourth, codify "reconciliation" on the first budget resolution as a "deficit reduction bill."

Fifth, require that any year for which the current law outlays exceed current law revenues, there shall be a "deficit reduction bill" of sufficient magnitude to eliminate the deficit.

Sixth, define a method for limiting taxes and outlays as a percent of gross national product (GNP).

Seventh, prohibit off-budget spending.

Eighth, make 5-year budget limits binding, to prevent new entitlement spending from being adopted at a low cost, then ballooning in later years.

Ninth, make committee allocations binding. For the Appropriations Committee, make subcommittee allocations binding, and subdivide allocations for regular and supplemental bills.

Tenth, institute a regulatory budget process.

It is clear that the budget process needs to be strengthened. While we have come a long way in the last 8 years, we still have a long way to go to get fiscal policy under control. When I first came to the Senate, back before we wrote the Budget Act of 1974, we had total chaos. Congress voted spending bills one by one, never having to vote on the total level of Federal spending or on the level of deficit caused by that spending. The Budget Act at least forces us to focus on the bottom line.

The first major weakness we found in the act was that we could not effectively enforce the spending cuts assumed in the budget resolution. Somehow, the authorizing committees went ahead with their new spending first, and never got around to making the cuts. We changed that in 1980 when, on my motion, we put reconciliation into the first budget resolution. By doing that, we moved the budget cuts up to the first item of business and got them enacted.

However, we have now found a new weakness. If the spending cuts are not specifically linked to a balanced-budget requirement, they can still leave us with huge deficits. We found that in 1981. While Congress passed the full $135 billion in spending cuts proposed by the President, the tax cuts enacted at the same time cost $405 billion in the same years. The deficits were therefore increased tremendously.

CHANGE RECONCILIATION TO "DEFICIT REDUCTION BILL"

A key reform I am proposing today is therefore to change "reconciliation" to a "deficit reduction" bill, and re-

quire it to contain a package of spending cuts or tax changes of sufficient size to insure that outlays do not exceed revenues. Reconciliation would be put on the first budget resolution, which would be binding. However, we would prohibit putting nonbudgetary items into reconciliation. One problem which creates uncertainty in the budget process is having everybody working from different baselines. My bill defines a "current law" baseline concept for both Congress and the admininstration. That way, we can at least be able to tell whether a proposed budget figure is a "cut" or an "increase," since the law will specify the base that is being cut from or added to. While we will probably still have differences over economic assumptions and outlays rates, we will have brought at least one more item into focus.

Having a fixed baseline also tells you how much of a deficit reduction bill you need. My bill says that if current law outlays exceed current law revenues by $50 billion, then you need a package of at least $50 billion worth of spending cuts and/or tax increases. While that sounds so simple as to be obvious, it is a basic relationship missing from our current budgetary procedures. And that is why the deficit is growing instead of shrinking.

My bill also prohibits the budget resolution from providing for an increase in tax revenues as a percent of gross national product, so that the budget will not be balanced by increasing the tax burden. We would use a 5-year average, to avoid the annual uncertainties of the economic cycle. This provision could be waived by a simple majority rollcall vote on a separate resolution setting forth the amount of revenue increase over the limit, and the purpose for which the increased revenues would be spent. If Congress wanted to take additional spending responsibilities, it would have to say clearly that it was doing so, and raise the taxes for that purpose.

Mr. President, we all know that it is impossible to balance the Federal budget during a recession. But we also know that Congress tends to use recessions, or the threat of them, as an excuse to run deficits at all times, and to push through permanent spending increases. If we are going to maintain the flexibility to run deficits during recessions, we are going to have to set up some countermeasures to minimize the deficits. My bill contains two such countermeasures.

PAYBACK PROVISIONS FOR RECESSION DEFICIT

First, any time Congress votes a waiver of the balanced-budget provision due to a recession, it will commit itself to running a surplus in the following 2 years to payback the deficit and related interest costs. Knowing that further spending cuts or tax increases are required will restrain recession deficits to the unavoidable minimum.

PAYBACK PROVISION FOR "UNANTICIPATED DEFICIT"

Second, if spending estimates change during the year, producing an unanticipated deficit, Congress will have to either pass a midyear deficit reduction bill or enact a temporary tax surchange in the following year to pay off the deficit and interest. The danger of triggering a visible tax surcharge will counteract the tendency to use phony estimates or overoptimistic economic assumptions to project a balanced budget. Since the temporary tax increase will be excluded from the calculation of the allowable level of future revenues, running a deficit one year will not lead to a permanently higher level of taxes and spending in future years.

PROHIBIT OFF-BUDGET SPENDING

There are two other major loopholes in the present Budget Act which my bill would eliminate. First, it would require all Federal outlays to be counted in the budgets of both Congress and the President. I find it incredible that right now we have about $20 billion a year in so-called off-budget spending which is not counted in the Federal deficit. This is not some old problem left over from the free-spending days of Democratic control. To meet its reconciliation targets last year, the Senate Energy Committee reduced spending by saying that about $3 billion a year in outlays for the strategic petroleum reserve would simply not be counted in the budget. Of course, we still have to borrow the money to pay out, so about $10 billion will be added to the national debt over 3 years, but it will not show up in the official deficit. My bill will prohibit that kind of abuse.

In addition to prohibiting off-budget spending by outlawing creative accounting, my bill establishes a full-scale credit budget control process. As the pressure to limit spending has grown, Congress and various administrations have developed programs of assistance by direct loans, loan guarantees, and secondary credit market transactions. While many of the programs serve valuable functions, particularly for housing and small business, they have a significant economic impact. Congress should therefore account for them and create a control process parallel to our procedures for allocating direct spending.

CLOSE THE ENTITLEMENT LOOPHOLE

Next, I would make the budget resolution ceilings binding for 5 years. We have learned that entitlement spending cannot be controlled 1 year at a time. It takes a year just to go through all the technicalities of changing the law, rewriting the regulations, and training people to implement the changes. The present Budget Act contains a huge loophole—new entitlement spending is not subject to a point of order if it does not begin until a year after the budget resolution takes place. So committees can get around the budget limits in two ways. First, they can start a program very small so it fits within the current year's budget, knowing it will grow later on. Second, they can postpone the effective date for a year, and get around the act entirely. My bill closes both those loopholes.

Many people have been wary about making the budget resolution binding for 5 years, due to the uncertainty of future-year economic projections. I remember that several years ago when I proposed putting 5-year ceilings into the resolution—instead of just the report—Chairman Muskie raised the issue of uncertainty, and we compromised on a 3-year budget resolution. By and large, putting those multiyear numbers into the resolution has been a success, in terms of increasing our control of new spending proposals. It has become very difficult to get away with slipping in a small new program whose costs will balloon in future years. My response to the issue of uncertainty is that the key concern is that everybody play by the same rules. Whatever economic assumptions we use to make up the budget resolution are those we use to keep score on individual bills. While changing economics are likely to make the overall spending totals vary—usually in the direction of a bigger deficit—we will not find ourselves faced with whole new programs not anticipated when the budget plan was drawn up. These will get updated in future years. The important thing is not that we have certainty in our future projections, but that we have a clear picture of the direction we are heading in. If we seem to be on a course that will open up huge future deficits, due to entitlements, defense increases, or tax cuts, then the sooner we take corrective action, the better. To say we do not need corrective action because the economy may grow faster and close the deficits is to ignore the experience of the last 10 years, where actual deficits far exceed projections.

MAKE COMMITTEE ALLOCATIONS BINDING

Another enforcement problem we have had is that while we allocate spending limits to each committee, only the grand totals are formally binding and subject a spending bill to a point of order. We only have an "atom bomb" type of threat. We can stop all spending when all money runs out, but we cannot stop individual spending bills that cause the overruns. Assume for example, that Congress did not provide money for a new public jobs program in its budget resolution. If the Human Resources Committee got that bill to the floor first, before other programs for which

spending was assumed were considered, there would not be budgetary control. On the appropriations side, we usually consider one bill at a time. We had problems for several years with the Appropriations Committee bringing out bills that were overbudget, but saying, "we are still within our total, we'll make it up in a later bill." Of course, they would save a popular bill like defense until the end, and the cuts would not get made. In a similar manner, Appropriations can use up its allowance for supplemental needs, like pay raises, in the regular bills, and force Congress to come up with extra money later on, under threat of mass layoffs of employees late in the year. My bill eliminates these problems in three ways:

First, spending allocations to authorizing committees would be binding on each individual committee, and a point of order would lie against any bill which exceeded the allocation.

Second, the allocations to subcommittees made by the Appropriations Committee would be binding, and a point of order would lie against any bill which exceeded the allocation.

Third, the allocation to the Appropriations Committee would be divided into an allocation for regular bills and supplementals, and the Appropriations Committee would have to reflect that division in its subcommittee allocations.

In all cases where a point of order would lie against a bill for exceeding the budget allocation, a point of order would lie against any floor amendment which would cause the bill to go over the top.

These changes would convert the budget resolution from a nonbinding set of targets to a real budget. It would show everyone that we are serious about keeping to our own budget ceilings.

REALISTIC TIMETABLES

Many Members of Congress and many outside commentators have criticized the timetables in the Budget Act as unrealistic and unworkable. Some of the pressures are an unavoidable consequence of a rational budget process. For example, you just have to hold off appropriations bills until you have a budget resolution saying what total will be available to spend; but you also have to have all the bills in place before the fiscal year starts. Reconciliation does have to be done in a short time after the budget resolution is passed, so that the agencies can write new regulations for entitlement programs and the Tax Code, if you are going to actually reduce the deficit in the coming fiscal year.

However, once you have reconciliation—which will now be called a deficit reduction bill—on the first budget resolution, there is simply no need for a second resolution in September. The economic projections and reestimates for a September resolution have to be locked in by the end of July to do the technical work and make the policy choices. The economy does not change enough from May to July to give a substantially different picture of the coming year, and too many uncertainties remain in pending legislation. On the other hand, by the time we get the President's budget in January, we have a full picture of both the economy and legislative status, and we usually end up revising the second budget resolution each winter. I therefore propose we make the following modifications to the budgetary timetable:

First, move the CBO annual report forward from April 1, to March 1, to give all committees the value of better estimates of current law spending and revenues;

Second, make the first budget resolution—completed by May 15—binding, including a "deficit reduction bill" to make any tax and entitlement spending changes necessary to balance the budget.

Third, require completion of the "Deficit Reduction Bill" by July 15, so the Appropriations Committee has time to complete its bills before October 1.

Fourth, allow Congress to revise the budget resolution at any time, including an additional deficit reduction bill if the January reestimates show an unanticipated deficit.

REGULATORY BUDGET

Another major step forward in my bill is to add a new title XI which creates an entire regulatory budget process. In the regulatory arena, we are about at the level we were in for spending control about 10 years ago, before we had the Budget Act. We know that we have created a mass of regulations, covering everything from safe food, to clean air and water, to highway safety and occupational health. We know that many or most of these regulations are worthwhile, but we do not know their total cost. And we have no way of setting priorities on where we need to see regulations tightened, and where we want them relaxed. When the administration comes in an says "all regulations have to be drastically reduced because they cost too much," we have no rational response. We cannot say, "here is our regulatory budget. We agree that the following regulations can be relaxed, but if you keep the others, the total cost will be acceptable." Each time a new proposal comes up, to either create a new regulation or scrap an existing one, the economists set about reinventing the wheel. We get many conflicting reports about what total regulations in that particular area cost. The public would be better served if we had an ongoing analysis of the cost of regulations in each major function.

Recognizing that we are at an early state of the art in developing regulatory cost analyses, I am proposing that for the first 2 years, we just make the grand totals binding. As we develop the detailed cost allocations in those years, we would move to a full-scale regulatory budget that moved parallel to the spending budget. The budget resolution would set forth broad functional totals The authorizing and appropriations committees would then work out the specific levels by agency and by program. The regulatory budget would follow the same detailed development process as the spending budget, so the administration would be supplying Congress with detailed information about its proposals. This would give the committees of Congress a vastly improved capacity for oversight of the executive agencies and their regulatory activities.

Mr. President, these are the major provisions of my bill. However, such a major change in the Budget Act requires many more changes in detailed provisions. I therefore ask unanimous consent that a detailed description of these provisions appear at this point in the RECORD, followed by the text of the amendment and a "cordon print" showing how the Budget Act would read if these changes were adopted.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DESCRIPTION OF SENATOR CHILES' "BALANCED BUDGET ENFORCEMENT ACT OF 1982"

(S. 2921): Changes to existing sections of the Congressional Budget Act of 1974:

Section 1(a) is amended to label Title XI as the "Regulatory Budget Act of 1982."

1(b), Table of Contents, is amended to reflect new items.

Section 2, the Declaration of Purposes is amended to include the achievement of a balanced Federal budget under most economic circumstances, and to include the control of Federal credit activities.

Section 3, Definitions. New terms are added relating to the credit budget; defines principles for estimating "current law levels" of budget authority, outlays, spending authority and revenues, to be used as a baseline for "Deficit Reduction" directions.

Section 202: Duties of the Congressional Budget Office. Required to provide information on credit budget and estimates related to revenue limitation, including estimates of Gross National Product (GNP), estimates of current law outlays and revenues as percent of GNP. Annual report is moved forward from April 1 to March 1 and required to include 5-year estimates of spending, revenues and credit activity.

Section 300: Timetable for Congressional Action. July 15: date for Congress to complete action on Deficit Reduction Bill; Eliminate dates for Second Concurrent Resolution and Reconciliation. Note: Budget Resolution sets dates for Committees to report Deficit Reduction legislation.

Section 301: Concurrent Resolution.

(a)(1) Required to include 5 fiscal years.

(3) Deficit is eliminated as part of resolution except under special conditions.

(b) Reconciliation is codified as "Deficit Reduction" direction and bill.

(1) Deficit reduction must be of sufficient magnitude to ensure that outlays not exceed revenues (revenues are subject to a percent of GNP limitation; see 301, A, B).

(2) Allows Budget Committee to report Deficit Reduction legislation if other committees fail to meet their Deficit Reduction directions by specified date.

(3) Prohibits inclusion of non-budgetary items in bill.

(4) Allows floor amendments to propose alternative deficit reduction legislation, other than that reported by Committees, despite germaneness provision. Increase time for floor debates to 20 hours or four hours time number of Committees with directions, whichever is greater.

(6) Regulatory Budget is included as an item in the Concurrent Resolution on the Budget.

(c) Views of Other Committees: made consistent with Credit Budget, with special role for Banking Committees.

(d) Budget Committee Report: (6) must show five-year estimates of spending and revenues as dollars and as percent of GNP.

(7) Must contain a statement describing whether the Budget Resolution complies with the Balanced Budget and Tax Limitation provisions or a statement of why the Committee recommends a waiver of these provisions.

Section 301A (New Section): Outlays Shall Not Exceed Revenues.

(a)(1) Mandates that Budget Resolution shall be balanced.

(2) Establishes points of order against Resolution or floor amendments thereto which would cause outlays to exceed revenues.

(b) Limits Revenues as percent of GNP; establishes points of order to enforce limit.

(c)(1) Requires outlays, revenues and GNP to be estimated by the Congressional Budget Office.

(2) Excludes temporary tax surcharge from inclusion in revenues per GNP.

(d) Provisions for balance and revenues per GNP do not apply in times of war or U.S. troops engaged in combat.

(e)(1) Allows waiver of Balanced Budget in time of recession by majority roll call vote.

(2) Requires a surplus to pay back any recession-based deficits, plus interest in two years following.

(f) Elimination or Repayment of "Unanticipated Deficit".

(1) If mid-year re-estimates show unanticipated deficit, a revised Budget Resolution with a Deficit Reduction Bill is required.

(2) To the extent deficit cannot be eliminated in current year, the next year's budget resolution must contain a provision to instruct Finance and Ways and Means to report temporary tax increases sufficient to pay off debt; these would not be included in permanent tax base.

Section 301B (New Section) Prohibits Off-Budget Spending: All spending and revenues, including outlays for credit activities or other activities presently placed "off budget" shall be included in Budget Resolution estimates (another section of the bill makes this apply to the President's Budget request).

Section 302(b) Committee Allocations: Adds enforcement.

(1) Appropriations Subcommittee allocations further divided between regular and supplemental bills.

(2) Credit totals allocated by Subcommittees.

Section 303(b) is Stricken: Eliminates out-year loophole for spending or revenues, so they cannot "leap-frog" budget resolution.

Section 304: Revisions: Allows revisions of the binding First Budget Resolution, including revisions to or inclusion of a Deficit Reduction Bill.

Section 310(a): Enforcement.

Makes First Budget Resolution totals binding.

Makes Committee allocations binding.

For Appropriations Committee, makes subcommittee allocations binding, including the separate allocation for regular and supplemental bills.

Provides points of order against any bill, or any amendment to a bill, which would cause the above ceilings to be breached.

Section 405. Credit activities must be subject to appropriations.

Section 605. Current Services Budget: Conform to definition of current law levels of spending and revenues.

Section 904(b). Sections mandating a balanced budget, limitation on revenues per GNP, prohibition of off-budget spending and points of order are excluded from the provision allowing the Act to be waived by a majority of members present and voting.

Title XI: Creates a regulatory budget procedure that is parallel to the spending budget process.

Budget and Accounting Act of 1921: President's budget to conform to the above amendments to the Congressional Budget Act:

(1) Include Credit Budget.

(2) Outlays not exceed revenues.

(3) Revenues not exceed percent GNP.

(4) Seek waiver from Congress for national economic emergency, such as recession.

(5) Prohibit off-budget spending.

S. 2921

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Balanced Budget Enforcement Act of 1982".

GENERAL PROVISIONS

SEC. 2. (a) Subsection (a) of the first section of the Congressional Budget and Impoundment Control Act of 1974 is amended by striking out "and" before "title X" and by inserting before the period a comma and "and title XI may be cited as the 'Regulatory Budget Act of 1982' ".

(b) Section 2 of such Act is amended—

(1) by striking out "and" after the semicolon in paragraph (4);

(2) by redesignating paragraph (5) as paragraph (7); and

(3) by inserting after paragraph (4) the following new paragraphs:

"(5) to achieve a balanced Federal budget under most economic circumstances;

"(6) to provide for the congressional determination each year of the appropriate level of gross obligations for the principal amount of direct loans and the appropriate level of commitments to guarantee loan principal; and".

(c)(1) Section 3 of such Act is amended—

(A) by inserting a semicolon and "DETERMINATION OF ESTIMATES" at the end of the section heading;

(B) by inserting "(a) DEFINITIONS.—" before "For purposes";

(C) by inserting "and" after the semicolon in subparagraph (A) of paragraph (4);

(D) by striking out subparagraph (B) of such paragraph;

(E) by redesignating subparagraph (C) of such paragraph as subparagraph (B), and (in such subparagraph) by striking out "any other" and inserting in lieu thereof "a"; and

(F) by adding at the end thereof the following:

"(6) The term 'direct loan' means a disbursement of funds by the United States or any officer or agency thereof (not in exchange for goods or services) under a contract which requires the repayment of such funds with or without interest, and in addition includes—

"(A) direct participation in a loan made and held by another person or government;

"(B) the purchase (through secondary market operations) of a loan made by another person or government; and

"(C) the acquisition of a federally guaranteed loan made by another person or government, as collateral or in satisfaction of default or other guarantee claims.

"(7) The term 'current law budget authority' means the total amount of budget authority which would be necessary to carry out programs and activities during a fiscal year at the same level as such programs and activities were carried out in the preceding fiscal year without any policy changes in such programs and activities.

"(8) The term 'current law outlays' means the total amount of outlays which would be made to carry out programs and activities during a fiscal year at the same level as such programs and activities were carried out in the preceding fiscal year without any policy changes in such programs and activities.

"(9) The term 'current law spending authority' means the total amount of spending authority described in section 401(c)(2)(C) which would be effective in a fiscal year to carry out programs and activities during that fiscal year at the same level as such programs and activities were carried out during the preceding fiscal year without any policy changes in such programs and activities.

"(10) The term 'current law revenues' means the total amount of revenues that would be received in a fiscal year if the provisions of the revenue laws which were in effect for the fiscal year preceding such fiscal year remained in effect for such fiscal year without change.

"(b) DETERMINATION OF ESTIMATES.—In determining current law budget authority, current law outlays, and current law spending authority for a fiscal year, the Director of the Congressional Budget Office or the Committees on the Budget of the Senate and the House of Representatives, as the case may be, shall—

"(1) only include adjustments for additional costs, workloads, or utilizations if such adjustments are provided for by statute and if the budget authority and spending authority described in section 401(c)(2)(C) for such costs, workloads, or utilizations are provided by statute at the time the Director makes such determinations; and

"(2) assume, for any program or activity for which a law has been enacted authorizing the enactment of new budget authority for the fiscal year prior to the fiscal year for which the Director is making such determinations, but for which a law has not been enacted (at the time of making such determinations) authorizing the enactment of new budget authority for such fiscal year, that a law will be enacted authorizing the enactment of new budget authority for such program or activity for such fiscal year in an amount equal to the amount authorized for the fiscal year prior to such fiscal year

unless the law authorizing the enactment of new budget authority for the program or activity for such prior fiscal year indicates that the reauthorization of such program or activity was not intended by the Congress.".

(2) The item relating to section 3 in the table of contents in subsection (b) of the first section of such Act is amended by inserting before the period a semicolon and "determination of estimates".

(d)(1) Section 202(a) of the Congressional Budget Act of 1974 is amended by striking out "and (3)" and inserting in lieu thereof the following: "(3) information with respect to direct loans and guarantees of loan principal, (4) estimates of the gross national product for a fiscal year, (5) estimates of the ratio that current law outlays for a fiscal year bear to the gross national product for such fiscal year (stated as a percentage), (6) estimates of the ratio that current law revenues for a fiscal year bear to the gross national product for such fiscal year (stated as a percentage), and (7)".

(2) Section 202(f) of such Act is amended—

(A) by striking out "April 1" in paragraph (1) and inserting in lieu thereof "March 1";

(B) by inserting "the fiscal year in progress," before "the fiscal year commencing" in such paragraph;

(C) by inserting "and the succeeding four fiscal years," after "October 1 of that year," in such paragraph;

(D) by striking out "and (B)" in such paragraph and inserting in lieu thereof the following: "(B) the levels of direct loans and guarantees of loan principal, (C) a specification of the gross national product for the fiscal year preceding the fiscal year in progress, (D) estimates of the gross national product for the fiscal year in progress and each of the succeeding five fiscal years, (E) estimates of the ratio, for the fiscal year in progress and each of the five succeeding fiscal years, that current law outlays for each such fiscal year will bear to the gross national product for each such fiscal year (stated as a percentage), (F) estimates of the ratio, for the fiscal year in progress and each of the five succeeding fiscal years, that current law revenues for each such fiscal year will bear to the gross national product for each such fiscal year (stated as a percentage), and (G)"; and

(E) by adding at the end thereof the following new sentence: "In preparing such report, the Director shall use the economic assumptions most recently published by the Director.".

REVISION OF TIMETABLE

SEC. 3. Section 300 of the Congressional Budget Act of 1974 is amended to read as follows:

"TIMETABLE

"SEC. 300. The timetable with respect to the congressional budget process for any fiscal year is as follows:

"On or before:	Action to be completed:
November 10	President submits current services budget.
15th day after Congress meets.	President submits his budget.
March 1.....	Congressional Budget Office submits report to Budget Committees.
March 15.....	Committees and joint committees submit reports to Budget Committees.
April 15	Budget Committees report concurrent resolution on the budget to their Houses.
May 15.....	Committees report bills and resolutions authorizing new budget authority.
May 15.....	Congress completes action on concurrent resolution on the budget.
July 15.....	Congress completes action on deficit reduction bill or deficit reduction resolution, or both, implementing concurrent resolution on the budget.
7th day after Labor Day.	Congress completes action on bills and resolutions providing new budget authority and new spending authority.
October 1	Fiscal year begins.".

CONCURRENT RESOLUTION ON THE BUDGET

SEC. 4. (a)(1) Section 301 of the Congressional Budget Act of 1974 is amended by striking out "FIRST" in the section heading.

(2) The item relating to section 301 in the table of contents in subsection (b) of the first section of the Congressional Budget and Impoundment Control Act of 1974 is amended by striking out "first".

(b) Section 301(a) of the Congressional Budget Act of 1974 is amended—

(1) by striking out "first" in the matter preceding paragraph (1);

(2) by inserting "for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years," before "the appropriate" in paragraph (1);

(3) by inserting "for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years," before "an estimate" in paragraph (2);

(4) by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years, the amount, if any, of the surplus in the budget which is appropriate in light of economic conditions and all other relevant factors, or, in any case in which the provisions of subsection (a) of section 301A do not apply in accordance with subsection (d) of such section or are waived under subsection (e) of such section, the amount, if any, of the deficit in the budget which is appropriate in light of economic conditions and all other relevant factors;";

(5) by inserting "for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years," before "the recommended" in paragraph (4);

(6) by inserting "for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years," before "the appropriate" in paragraph (5);

(7) by redesignating paragraphs (6) and (7) as paragraphs (8) and (9), respectively; and

(8) by inserting after paragraph (5) the following new paragraphs:

"(6) for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years, the appropriate level of total gross obligations for the principal amount of direct loans and the appropriate level of total commitments to guarantee loan principal;

"(7) for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years, an estimate of gross obligations for the principal amount of direct loans and an estimate of commitments to guarantee loan principal for each major functional category, based on allocations of the appropriate level of total gross obligations for the principal amount of direct loans and the appropriate level of total commitments to guarantee loan principal;".

(c) Section 301(b) of such Act is amended to read as follows:

"(b) Deficit Reduction Instructions; Additional Matters.—(1) The concurrent resolution on the budget referred to in subsection (a) shall also, to the extent necessary to insure that total budget outlays for any fiscal year do not exceed total revenues for such fiscal year and to carry out section 301A—

"(A) specify the total amount by which new current law budget authority for the fiscal year beginning on October 1 of the year in which the concurrent resolution is adopted, and current law outlays associated with such new current law budget authority, and current law spending authority for such fiscal year, are to be changed;

"(B) specify the total amount by which new budget authority for such fiscal year, and outlays associated with such budget authority, and new spending authority described in section 401(c)(2)(C) which will be effective in such fiscal year, contained in laws, bills, and resolutions within the jurisdiction of a committee, are to be reduced below the level of current law budget authority, current law outlays, or current law spending authority for such fiscal year, respectively, and direct that committee to determine and recommend changes to accomplish a change of such total amount and to report such determinations and recommendations in accordance with paragraph (2)(A) by a specified date;

"(C) specify the amount by which budget authority initially provided for fiscal years preceding such fiscal year, and budget outlays associated with such budget authority, contained in laws, bills, and resolutions within the jurisdiction of a committee are to be changed and direct that committee to determine and recommend changes to accomplish a change of that total amount and to report such determinations and recommendations in accordance with paragraph (2)(A) by a specified date;

"(D) specify the total amount by which revenues for such fiscal year are to be changed and direct the committees having jurisdiction to determine and recommend changes in the revenue laws, bills, and resolutions to accomplish a change of such total amount and to report such determinations and recommendations in accordance with paragraph (2)(A) by a specified date;

"(E) specify the amount by which the statutory limit on the public debt is to be changed and direct the committees having jurisdiction to recommend such change and to report such recommendations in accordance with paragraph (2)(A) by a specified date;

"(F) specify the total amount by which gross obligations for the principal amount of direct loans or commitments to guarantee loan principal are to be changed and direct

the committees having jurisdiction to determine and recommend changes in the laws, bills, and resolutions providing or specifying the authority to make such obligations or commitments and to report such determinations and recommendations in accordance with paragraph (2)(A) by a specified date; or

"(G) specify and direct any combination of the matters described in subparagraphs (A), (B), (C), (D), (E), and (F).

"(2)(A) If a concurrent resolution is agreed to in accordance with paragraph (1) containing directions to one or more committees to determine and recommend changes in laws, bills, or resolutions, and—

"(i) only one committee of the House or the Senate is directed to determine and recommend changes, that committee shall promptly make such determination and recommendations and shall, by the date specified pursuant to paragraph (1)(A), report to its House a deficit reduction bill or a deficit reduction resolution, or both, containing such recommendations; or

"(ii) more than one committee of the House or the Senate is directed to determine and recommend changes, each such committee so directed shall promptly make such determination and recommendations, whether such changes are to be contained in a deficit reduction bill or deficit reduction resolution, and shall, by the date specified pursuant to paragraph (1)(A), report such recommendations to the Committee on the Budget of its House, which upon receiving all such recommendations, shall report to its House a deficit reduction bill or deficit reduction resolution, or both, carrying out all such recommendations without any substantive revision.

(B) Notwithstanding subparagraph (A), if a concurrent resolution is agreed to in accordance with paragraph (1) containing directions to one or more committees to determine and recommend changes in laws, bills, and resolutions in order to reduce new budget authority, outlays, or new spending authority described in section 401(c)(2)(C), or to change revenues, and any such committee—

(i) does not report such changes by the date specified in such concurrent resolution pursuant to paragraph (1)(A); or

(ii) by such specified date, reports changes in laws, bills, and resolutions which will result in—

(I) a reduction in new budget authority, outlays, or new spending authority described in section 401(c)(2)(C) in an amount which is less than the amount specified in the directions contained in such concurrent resolution; or

(II) a change in revenues in an amount which is less than the amount specified in such directions,

the Committee on the Budget of the House or the Senate, as the case may be, shall report a deficit reduction bill or deficit reduction resolution, or both, containing changes in laws, bills, and resolutions which will result in a reduction in new budget authority, outlays, or new spending authority described in section 401(c)(2)(C) in an amount sufficient to comply with such directions or a change in revenues sufficient to comply with such directions.

"(C) For purposes of this paragraph, a deficit reduction resolution is a concurrent resolution directing the Clerk of the House of Representatives or the Secretary of the Senate, as the case may be, to make specified changes in bills and resolutions which have not been enrolled.

"(D) A deficit reduction bill or a deficit reduction resolution may not contain provisions—

"(i) which decrease the total amount of Federal revenues for a fiscal year below the level of current law revenues for such fiscal year, except in order to carry out section 301A(b);

"(ii) which accomplish decreases in outlays in one fiscal year by postponing such outlays to one or more succeeding fiscal years; or

"(iii) which are predominantly nonbudgetary in nature or which modify programs or activities in a manner which is not necessary to reduce the total amount of new budget authority for a fiscal year and spending authority which will be effective during a fiscal year.

"(3) Congress shall complete action on any deficit reduction bill or deficit reduction resolution reported under this subsection not later than July 15 of each year.

"(4)(A) Except as provided in subparagraphs (B) and (C), the provisions of subsections (b) and (c) of section 305 for the consideration in the Senate of concurrent resolutions on the budget and conference reports thereon shall also apply to the consideration in the Senate of deficit reduction bills and deficit reduction resolutions reported under this subsection and conference reports thereon.

"(B) Debate in the Senate on any deficit reduction bill or deficit reduction resolution reported under this subsection, and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than 20 hours or a number of hours which is equal to the product of the number of committees of the Senate which have reported provisions included in such bill or resolution multiplied by four, whichever is greater.

"(C) It shall be in order in the Senate to consider any amendment to a deficit reduction bill or a deficit reduction resolution which provides for reductions in budget authority or spending authority described in section 401(c)(2)(C) or increases in revenues if such amendment does not contain matters which are nonbudgetary in nature, does not modify programs in a manner which is not necessary to reduce budget authority or spending authority described in section 401(c)(2)(C), or does not change the provisions of the revenue laws in a manner other than a manner which is necessary to increase or decrease revenues in accordance with deficit reduction instructions included in a concurrent resolution on the budget pursuant to paragraph (1)(D).

"(5) The concurrent resolution on the budget referred to in subsection (a) may also require—

"(A) a procedure under which all or certain bills and resolutions providing new budget authority or providing new spending authority described in section 401(c)(2)(C) for such fiscal year shall not be enrolled until such concurrent resolution has been agreed to, and, if a deficit reduction bill or deficit reduction resolution, or both, are required to be reported under this subsection, until Congress has completed action on that bill or resolution, or both; and

"(B) any other procedure which is appropriate to carry out the purposes of this Act.

"(6) The concurrent resolution on the budget referred to in subsection (a) shall include the section containing provisions to establish a regulatory budget required by section 1105(a).".

(d) Section 301(c) of such Act is amended—

(1) by striking out ", and budget outlays resulting therefrom," in paragraph (2) and inserting in lieu thereof "and budget outlays resulting therefrom, and of the total amounts of gross obligations for the principal amount of direct loans and commitments to guarantee loan principal,"; and

(2) by inserting before the last sentence the following new sentence: "The Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate shall each also submit to the Committee on the Budget of its House its recommendations as to the appropriate level of total gross obligations for the principal amount of direct loans and the appropriate level of total commitments to guarantee loan principal.".

(e) Section 301(d) of such Act is amended—

(1) by striking out "first" each place it appears before "concurrent resolution on the budget";

(2) by redesignating paragraphs (7) and (8) as paragraphs (8) and (9), respectively; and

(3) by striking out paragraph (6) and inserting in lieu thereof the following:

"(6) for the period of five fiscal years beginning with such fiscal year, a specification for each major functional category, of—

"(A) the levels of total budget outlays, total new budget outlays, total new budget authority, and total revenues for each fiscal year in such period;

"(B) the level of the surplus or deficit, if any, for each such fiscal year;

"(C) an estimate of the ratio that total outlays for each such fiscal year will bear to the gross national product for each such fiscal year (stated as a percentage);

"(D) an estimate of the ratio that total revenues for each such fiscal year will bear to the gross national product for each such fiscal year (stated as a percentage); and

"(E) the estimated levels of tax expenditures (the tax expenditures budget) for each such fiscal year;

"(7) a statement describing whether the concurrent resolution complies with the provisions of subsection (a) of section 301A, or whether the Committee on the Budget recommends that such provisions be waived in accordance with subsection (e) of such section;".

(f) Section 301(e) of such Act is amended—

(1) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth";

(2) by striking out "first" before "concurrent resolution on the budget" each place it appears in paragraphs (1) and (2); and

(3) by inserting "referred to in subsection (a)" after "concurrent resolution on the budget" each place it appears in paragraphs (1) and (2).

BALANCED BUDGET REQUIRED

SEC. 5. (a) Title III of the Congressional Budget Act of 1974 is amended by inserting after section 301 the following new section:

"OUTLAYS SHALL NOT EXCEED REVENUES

"SEC. 301A. (a) LIMITATION ON OUTLAYS.—

"(1) The appropriate level of total budget outlays set forth in any concurrent resolution on the budget for any fiscal year beginning after September 30, 1983, shall not exceed the recommended level of Federal revenues set forth in such concurrent resolution for such fiscal year.

"(2) It shall not be in order in the Senate or the House of Representatives to consider any concurrent resolution on the budget for

any fiscal year beginning after September 30, 1983, or any amendment thereto or any conference report thereon if—

"(A) the adoption of such resolution as reported;

"(B) the adoption of such amendment; or

"(C) the adoption of the resolution in the form recommended in such conference report;

would cause—

"(i) the appropriate level of total budget outlays set forth in such concurrent resolution for such fiscal year to exceed the recommended level of Federal revenues set forth in such concurrent resolution for such fiscal year; or

"(ii) the total amount by which new budget authority provided for such fiscal year, and outlays associated with such budget authority, and new spending authority described in section 401(c)(2)(C) which will be effective in such fiscal year are to be changed (as specified in such concurrent resolution pursuant to subparagraph (B) of section 301(b)(1)) to be insufficient to insure that total budget outlays for such fiscal year do not exceed total revenues for such fiscal year.

"(b) LIMITATION ON REVENUES.—

"(1) The recommended level of Federal revenues set forth in a concurrent resolution on the budget for a fiscal year beginning after September 30, 1983, shall not exceed an amount which bears the same ratio to the gross national product for such fiscal year as the average of the ratios of estimated total revenues for each of the five fiscal years preceding such fiscal year to the estimated gross national product for each such fiscal year.

"(2) It shall not be in order in the Senate or the House of Representatives to consider any concurrent resolution on the budget for any fiscal year beginning after September 30, 1983, or any amendment thereto or any conference report thereon if—

"(A) the adoption of such resolution as reported;

"(B) the adoption of such amendment; or

"(C) the adoption of the resolution in the form recommended in such conference report;

would cause the recommended level of Federal revenues specified in such concurrent resolution for such fiscal year to exceed the amount prescribed by paragraph (1).

(3)(A) The Committee on the Budget of the Senate or the House of Representatives may report a separate concurrent resolution providing that the recommended level of Federal revenues set forth in a concurrent resolution on the budget for a fiscal year may exceed the amount prescribed by paragraph (1) for such fiscal year if such separate concurrent resolution specifies the amount by which the recommended level of Federal revenues set forth in such separate concurrent resolution on the budget will exceed such prescribed amount and the purpose for which such excess amount of revenues will be expended.

"(B) If, after the Committee on the Budget of the Senate or the House of Representatives reports a concurrent resolution under subparagraph (A), such concurrent resolution is agreed to by a rollcall vote of the Senate and the House of Representatives, paragraphs (1) and (2) shall not apply to the concurrent resolution on the budget with which the concurrent resolution permitting such excess amount of revenues is concerned.

"(c) DETERMINATION OF OUTLAYS, REVENUES, AND GROSS NATIONAL PRODUCT.—

"(1) For purposes of subsections (a) and (b), the budget outlays to be made during a fiscal year, the revenues to be received during a fiscal year, and the gross national product for a fiscal year shall be determined on the basis of estimates made by the Director of the Congressional Budget Office.

"(2) For purposes of subsection (b), the recommended level of Federal revenues set forth in a concurrent resolution on the budget shall not include any revenues which would be included in such concurrent resolution by operation of subsection (f)(2).

"(d) INAPPLICABILITY IN TIME OF WAR.—The provisions of subsections (a) and (b) shall not apply to any concurrent resolution on the budget for a fiscal year in which a declaration of war is in effect or in which the Armed Forces of the United States are engaged in combat.

"(e) WAIVER FOR RECESSION.—

"(1) By a rollcall vote of the Members of each House of Congress present and voting, Congress may include in a concurrent resolution on the budget for a fiscal year a provision waiving the provisions of subsections (a) and (b) with respect to such fiscal year if the Congress determines, and includes a statement of such determination in such provision, that a national economic emergency, such as a recession, makes compliance with the provisions of such subsections impracticable in such fiscal year. For purposes of the preceding sentence, a recession is a decline in the gross national product during any two consecutive fiscal quarters.

"(2) If Congress waives the provisions of subsection (a) with respect to a fiscal year, and outlays are estimated to exceed revenues in such fiscal year, the concurrent resolutions on the budget for the succeeding two fiscal years shall set forth, in the aggregate, a recommended level of Federal revenues which exceeds the appropriate level of total budget outlays set forth in such concurrent resolutions for such fiscal years by an amount at least equal to the sum of—

"(A) the amount by which outlays exceeded revenues in such preceding fiscal year; and

"(B) the amount of any interest which will be payable on the public debt as a result of the amount described in subparagraph (A).

"(f) ELIMINATION OR REPAYMENT OF UNANTICIPATED DEFICIT.—If, after an examination of the Budget transmitted by the President under section 201(a) of the Budget and Accounting Act, 1921, and the report of the Director of the Congressional Budget Office under section 202(f) of this Act, the Committee on the Budget of the Senate or the House of Representatives estimates that outlays will exceed revenues in the fiscal year in progress, such committee shall—

"(1) report to the Senate or the House of Representatives, as the case may be, a concurrent resolution under section 304 revising the concurrent resolution on the budget for the fiscal year in progress, and containing deficit reduction instructions described in section 301(b) in an amount sufficient to insure that total outlays for such fiscal year do not exceed total revenues for such fiscal year; or

"(2) in any case in which such committee determines that compliance with paragraph (1) is impracticable, include in the concurrent resolution required to be reported under section 301(a) for the succeeding fiscal year deficit reduction instructions to the committees having jurisdiction to determine and recommend changes in the revenue laws, bills, and resolutions which require such committees to report legislation to increase revenues temporarily in order to raise an amount of revenues equal to the sum of—

"(A) the amount by which outlays are estimated to exceed revenues during the fiscal year in progress; and

"(B) the amount of any interest which will be payable on the public debt as a result of the amount described in subparagraph (B).".

(b) The table of contents in subsection (b) of the first section of the Congressional Budget and Impoundment Control Act of 1974 is amended by inserting after the item relating to section 301 the following new item:

"Sec. 301A. Outlays shall not exceed revenues.".

(c)(1) Chapter 11 of title 31, United States Code, is amended by adding at the end thereof the following new section:

"§ 1115. Outlays shall not exceed revenues.

"(a) Notwithstanding any other provision of law, the budget transmitted pursuant to section 1105 of this title, the supplemental summary submitted pursuant to section 1106(a) of this title, or any statement of changes submitted pursuant to section 1106(b) of this title, shall not—

"(1) contain—

"(A) any request for budget authority for a fiscal year which will result in an estimate of total outlays which exceeds, or

"(B) any estimate of total outlays for a fiscal year which exceeds,

the estimate of total revenues for such fiscal year contained in such budget, summary, or statement; or

"(2) set forth an estimate of total revenues for a fiscal year which exceeds an amount which bears the same ratio to the estimated gross national product for such fiscal year as the average of the ratios of estimated total revenues for each of the five fiscal years preceding such fiscal year to the estimated gross national product for each such preceding fiscal year.

"(b) The provisions of subsection (a) shall not apply to any such budget, summary, or statement submitted for a fiscal year if a declaration of war is in effect or the Armed Forces of the United States are engaged in combat at the time such Budget, summary, or statement is submitted.

"(c) The President may submit such a budget, summary, or statement for a fiscal year which does not comply with subsection (a) if the President determines that a national economic emergency, such as a recession, makes compliance with the provisions of such subsection impracticable in such fiscal year. For purposes of the preceding sentence, a recession is a decline in the gross national product during any two consecutive fiscal quarters. The President shall include in any such budget, summary, or statement, a description of his determination under this subsection and a recommendation that the Congress waive the provisions of subsection (a) of section 301A of the Congressional Budget Act of 1974 with respect to any concurrent resolution on the budget for such fiscal year, in accordance with subsection (e) of such section.".

(2) The table of sections for chapter 11 of title 31, United States Code, is amended by adding at the end thereof the following new item:

"§ 1115. Outlays shall not exceed revenues.".

ALL ACTIVITIES ON-BUDGET

SEC. 6. (a)(1) Title III of the Congressional Budget Act of 1974 is amended by inserting after section 301A (as added by section 5(a) of this Act) the following new section:

"INCLUSION OF ALL FEDERAL ACTIVITIES IN CONCURRENT RESOLUTIONS ON THE BUDGET

"SEC. 301B. Notwithstanding any other provision of law, the appropriate level of total budget authority and total budget outlays, the recommended level of Federal revenues, the appropriate level of total gross obligations for the principal amount of direct loans, and the appropriate level of total commitments to guarantee loan principal, set forth in any concurrent resolution on the budget shall include the budget authority and outlays for, revenues and receipts from, gross obligations for the principal amount of direct loans by, and commitments to guarantee loan principal by, all activities of all departments, agencies, establishments, and instrumentalities of the Federal Government.".

(2) The table of contents in subsection (b) of the first section of the Congressional Budget and Impoundment Control Act of 1974 is amended by inserting after the item relating to section 301A (as added by section 5(b) of this Act) the following new item:

"Sec. 301B. Inclusion of all Federal activities in concurrent resolutions on the budget.".

(b) Section 606 of the Congressional Budget Act of 1974 is repealed.

(c)(1) Section 607 of such Act is redesignated as section 606.

(2) The table of contents in subsection (b) of the first section of the Congressional Budget and Impoundment Control Act of 1974 is amended by striking out the item relating to section 606 and redesignating the item relating to section 607 as the item relating to section 606.

(d) Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(e) Notwithstanding any other provision of law, the President shall include in the budget submitted under subsection (a) proposed budget authority, direct loans, and commitments to guarantee loan principal, and estimates of outlays and receipts, for all activities of all departments, agencies, establishments, and instrumentalities of the Federal Government.".

ALLOCATIONS

SEC. 7. (a) Section 302(a) of the Congressional Budget Act of 1974 is amended—

(1) by inserting "and the appropriate levels of total gross obligations for the principal amount of direct loans and total commitments to guarantee loan principal" before "among each committee"; and

(2) by inserting "or authorizing such obligations and commitments" before the period.

(b) Section 302(b) of such Act is amended—

(1) by striking out "and (B)" in paragraph (1) and inserting in lieu thereof "(B) further subdivide the amount with respect to each such subcommittee between amounts to be provided in regular appropriation Acts and amounts to be provided in supplemental appropriation Acts, and (C)";

(2) by striking out "and" after the semicolon in such paragraph;

(3) by redesignating paragraph (2) as paragraph (3); and

(4) by inserting after paragraph (1) the following new paragraph:

"(2) the Committee on Appropriations of each House shall also, after consulting with the Committee on Appropriations of the other House, subdivide among its subcommittees the allocation of gross obligations for the principal amount of direct loans and commitments to guarantee loan principal allocated to it in the joint explanatory statement accompanying the conference report on such concurrent resolution; and".

(c) Section 302(c) of such Act is amended by striking out "or 310".

COMPLETION OF ACTION ON CONCURRENT RESOLUTION ON THE BUDGET

SEC. 8. (a)(1) The section heading for section 303 of the Congressional Budget Act of 1974 is amended by striking out "FIRST".

(2) The item relating to section 303 in the table of contents in subsection (b) of the first section of the Congressional Budget and Impoundment Control Act of 1974 is amended by striking out "First concurrent" and inserting in lieu thereof "Concurrent".

(b) Section 303(a) of the Congressional Budget Act of 1974 is amended—

(1) by striking out "first";

(2) by inserting "referred to in section 301(a)" after "concurrent resolution on the budget"; and

(3) by striking out "pursuant to section 301".

(c) Subsection (b) of section 303 of such Act is repealed. Subsection (c) of such section is redesignated as subsection (b).

REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET

SEC. 9. Section 304 of such Act is amended—

(1) by striking out "first";

(2) by inserting "referred to in section 301(a)" after "concurrent resolution on the budget" the first place it appears;

(3) by striking out "pursuant to section 301"; and

(4) by adding at the end thereof the following new sentence: "Such revisions may include changes in the deficit reduction instructions included in such concurrent resolution on the budget pursuant to section 301(b) or the inclusion of such instructions in the concurrent resolution on the budget making such revisions.".

PROCEDURES FOR CONSIDERATION OF CONCURRENT RESOLUTIONS ON THE BUDGET; COMMITTEE ACTION ON APPROPRIATION BILLS

SEC. 10. (a) Section 305(a)(3) of the Congressional Budget Act of 1974 is amended—

(1) by striking out "first"; and

(2) by inserting "referred to in section 301(a)" after "concurrent resolution on the budget".

(b) Section 305(b)(1) of such Act is amended by striking out ", except that, with respect to the second required concurrent resolution referred to in section 310(a), all such debate shall be limited to not more than 15 hours".

(c) Section 305(b)(3) of such Act is amended—

(1) by striking out "first"; and

(2) by inserting "referred to in section 301(a)" after "concurrent resolution on the budget".

(d) Section 307 of such Act is amended by inserting ", and the appropriate levels of total gross obligations for the principal amount of direct loans and total commitments to guarantee loan principal," after "and new budget authority".

REPORTS, SUMMARIES, AND PROJECTIONS

SEC. 11. (a) Section 308(a) of the Congressional Budget Act of 1974 is amended—

(1) by striking out "and" after the semicolon in paragraph (1)(C);

(2) by striking out "first" in subparagraph (A) of paragraph (2);

(3) by inserting "referred to in section 301(a)" after "concurrent resolution on the budget" in such subparagraph;

(4) by striking out the period at the end of subparagraph (B) of paragraph (2) and inserting in lieu thereof a semicolon and "and"; and

(5) by inserting after paragraph (2) the following new paragraph:

"(3) in the case of a bill or resolution specifying the level of gross obligations for the principal amount of direct loans or the level of commitments to guarantee loan principal, how such levels compare with the appropriate level of total gross obligations for the principal amount of direct loans or the appropriate level of total commitments to guarantee loan principal, as the case may be, set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year and the reports submitted under section 302.".

(b) Section 308(b) of such Act is amended—

(1) by striking out "and" after the semicolon in paragraph (3);

(2) by striking out the period at the end of paragraph (4) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following new paragraph:

"(5) an up-to-date tabulation comparing the gross obligations for the principal amount of direct loans and the commitments to guarantee loan principal for such fiscal year in bills or resolutions on which the Congress has completed action to the appropriate level of total gross obligations for the principal amount of direct loans and the appropriate level of total commitments to guarantee loan principal set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year and the reports submitted under section 302.".

(c) Section 308(c) of such Act is repealed.

COMPLETION OF ACTION ON CERTAIN BILLS AND RESOLUTIONS

SEC. 12. (a)(1) The section heading for section 309 of the Congressional Budget Act of 1974 is amended by striking out "AND CERTAIN NEW SPENDING AUTHORITY" and inserting in lieu thereof ", SPECIFYING DIRECT LOANS OR LOAN GUARANTEE COMMITMENTS, OR PROVIDING CERTAIN NEW SPENDING AUTHORITY; CONGRESS MAY NOT ADJOURN UNTIL CERTAIN ACTIONS ARE COMPLETED".

(2) The item relating to section 309 in the table of contents in subsection (b) of the first section of the Congressional Budget and Impoundment Control Act of 1974 is amended by striking out "and certain new spending authority" and inserting in lieu thereof the following: ", specifying direct loans or loan guarantee commitments, or providing certain new spending authority; Congress may not adjourn until certain actions are completed".

(b) Section 309 of the Congressional Budget Act of 1974 is amended—

(1) by inserting "(a) COMPLETION OF ACTION ON CERTAIN BILLS AND RESOLUTIONS.—" before "Except";

(2) by inserting "or specifying the level of gross obligations for the principal amount of direct loans or the level of commitments to guarantee loan principal for such fiscal

year," after "October 1 of such year," in paragraph (1);

(3) by striking out "the reconciliation bill for such year, if required to be reported under section 310(c)" in such paragraph and inserting in lieu thereof "any deficit reduction bill for such year required pursuant to deficit reduction instructions, or revisions of deficit reduction instructions, included in a concurrent resolution revising a concurrent resolution on the budget under section 304"; and

(4) by adding at the end thereof the following new subsection:

"(b) LIMITS ON ADJOURNMENT.—It shall not be in order in either the House of Representatives or the Senate to consider any resolution providing for the adjournment sine die of either House unless—

"(1) action has been completed on the concurrent resolution on the budget required to be reported under section 301(a) for the fiscal year beginning on October 1 of such year, and, if a deficit reduction bill or resolution, or both, is required to be reported under section 301(b) for such fiscal year, unless the Congress has completed action on that bill or resolution or both;

"(2) action has been completed on the bills and resolutions to which subsection (a) applies and on all continuing appropriation bills and resolutions; and

"(3) the Committees on the Budget of the House of Representatives and the Senate have each reported to their respective Houses a notice certifying that the total amount of new budget authority provided for in each of the bills and resolutions described in paragraph (2), and the total amount of budget outlays associated with such budget authority, comply with the allocations of total budget authority and budget outlays under section 302.".

ELIMINATION OF SECOND REQUIRED CONCURRENT RESOLUTION ON THE BUDGET

SEC. 13. (a) Section 310 of the Congressional Budget Act of 1974 is repealed. Section 311 of such Act is redesignated as section 310.

(b) The table of contents in subsection (b) of the first section of the Congressional Budget and Impoundment Control Act of 1974 is amended by striking out the item relating to section 310 and redesignating the item relating to section 311 as the item relating to section 310.

CERTAIN LEGISLATION MUST BE WITHIN APPROPRIATE LEVELS

SEC. 14. (a)(1) The section heading for section 310 of the Congressional Budget Act of 1974 (as redesignated by section 13(a) of this Act) is amended by inserting a comma and "LOANS AND LOAN GUARANTEE COMMITMENTS," after "NEW SPENDING AUTHORITY".

(2) The item relating to section 310 in the table of contents in subsection (b) of the first section of the Congressional Budget and Impoundment Control Act of 1974 (as redesignated by section 13(b) of this Act) is amended by inserting "loans and loan guarantee commitments," after "new spending authority,".

(b) Section 310(a) of the Congressional Budget Act of 1974 (as redesignated by section 13(a) of this Act) is amended to read as follows:

"(a) LEGISLATION SUBJECT TO POINT OF ORDER.—After the Congress has completed action on the concurrent resolution on the budget referred to in section 301(a) for a fiscal year, and, if a deficit reduction bill or resolution, or both, for such fiscal year are required to be reported under section 301(b) for such fiscal year, after that bill has been enacted into law or that resolution has been agreed to, it shall not be in order in either the House of Representatives or the Senate to consider any bill, resolution, or amendment providing new budget authority for such fiscal year or any of the four succeeding fiscal years, providing new spending authority described in section 401(c)(2)(C) to become effective during such fiscal year or any of the four succeeding fiscal years, specifying the levels of total gross obligations for the principal amount of direct loans or total commitments to guarantee loan principal for such fiscal year or any of the four succeeding fiscal years, or reducing revenues for such fiscal year or any of the four succeeding fiscal years, or any conference report on any such bill or resolution, if—

"(1) the enactment of such bill or resolution as reported;

"(2) the adoption and enactment of such amendment; or

"(3) the enactment of such bill or resolution in the form recommended in such conference report;

would—

"(A) cause the appropriate level of total new budget authority or total budget outlays set forth for any fiscal year in the most recently agreed to concurrent resolution on the budget for such fiscal year to be exceeded;

"(B) cause revenues for any such fiscal year to be less than the recommended level of Federal revenues set forth in such concurrent resolution for such fiscal year;

"(C) cause the appropriate level of total gross obligations for the principal amount of direct loans or the appropriate level of total commitments to guarantee loan principal set forth for any such fiscal year in such concurrent resolution to be exceeded;

"(D) cause the appropriate level of total new budget authority and budget outlays for any such fiscal year allocated under section 302 to the committee of the Senate or the House of Representatives, as the case may be, and to the subcommittees of the Committee on Appropriations of the Senate and the House of Representatives, as the case may be, having legislative jurisdiction over such bill, resolution, amendment, or conference report, to be exceeded;

"(E) in the case of a bill, resolution, amendment, or conference report providing regular or supplemental new budget authority for any such fiscal year, cause the total amount of new budget authority and budget outlays for such fiscal year allocated under section 302 to regular new budget authority or supplemental new budget authority and to the subcommittee of the Committee on Appropriations of the Senate or the House of Representatives, as the case may be, having legislative jurisdiction over such bill, resolution, amendment, or conference report, to be exceeded; or

"(F) cause the appropriate level of gross obligations for the principal amount of direct loans or the appropriate level of commitments to guarantee loan principal allocated under section 302 to the subcommittee of the Committee on Appropriations of the Senate or the House of Representatives, as the case may be, having legislative jurisdiction over such bill, resolution, amendment, or conference report to be exceeded.

For purposes of this subsection, the term "regular new budget authority" means new budget authority provided in a regular appropriation Act and the term "supplemental new budget authority" means new budget authority provided in a supplemental appropriation Act.".

REPORTING OF AUTHORIZING LEGISLATION

SEC. 15. Section 402(a) of the Congressional Budget Act of 1974 is amended by inserting "or which authorizes the guarantee of loan principal for a fiscal year," after "enactment of new budget authority for a fiscal year,".

LIMITATION ON LEGISLATION PROVIDING AUTHORITY TO MAKE DIRECT LOANS OR TO GUARANTEE LOAN PRINCIPAL

SEC. 16. (a) Title IV of the Congressional Budget Act of 1974 is amended by adding at the end thereof the following new section:

"LEGISLATION PROVIDING AUTHORITY TO MAKE DIRECT LOANS OR TO GUARANTEE LOAN PRINCIPAL

"SEC. 405. It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which provides, extends, or enlarges authority to incur obligations for the principal amount of direct loans or obligations for the guarantee of loan principal (or any amendment which provides, extends, or enlarges such authority) unless that bill, resolution, or amendment also provides that such authority is to be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.".

(b) The table of contents in subsection (b) of the first section of the Congressional Budget and Impoundment Control Act of 1974 is amended by inserting after the item relating to section 404 the following new item:

"SEC. 405. Legislation providing authority to make direct loans or to guarantee loan principal.".

CURRENT SERVICES BUDGET

SEC. 17. (a) Section 605(a) of the Congressional Budget Act of 1974 is amended to read as follows:

"(a) On or before November 10 of each year (beginning with 1983), the President shall submit to the Senate and the House of Representatives a statement containing estimates of current law budget authority, current law outlays, current law spending authority, and current law revenues for the ensuing fiscal year. The estimates of current law budget authority, current law outlays, and current law spending authority submitted pursuant to this section shall be shown by function and subfunctions (in accordance with the classifications in the budget summary table entitled "Budget Authority and Outlays by Function and Agency" used in the Budget submitted pursuant to section 201(a) of the Budget and Accounting Act, 1921), by major programs within each such function, and by agency. Accompanying these estimates shall be the economic and programmatic assumptions underlying such estimates, such as the rate of inflation, the rate of real economic growth, the unemployment rate, program caseloads, and pay increases.".

(b) Section 605(b) of such Act is amended by striking out "estimated outlays and proposed budget authority" and inserting in lieu thereof "estimates".

RULEMAKING POWER

SEC. 18. (a) Section 904(a) of the Congressional Budget Act of 1974 is amended by striking out "and 1017" and inserting in lieu thereof "1017, 1105, 1106, and 1107".

(b) Section 904(b) of such Act is amended by striking out "or IV" and inserting in lieu

thereof "(except section 301A or 301B) or title IV".

REGULATORY BUDGET

SEC. 19. (a) The Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new title:

"TITLE XI—REGULATORY BUDGET PROCEDURE

"STATEMENT OF FINDINGS AND PURPOSE

"SEC. 1101. (a) The Congress finds that—

"(1) Federal rules and regulations often impose excess costs of compliance upon the non-Federal sector;

"(2) Federal rules and regulations have grown in number and scope so rapidly that the agencies and the Congress have not had an adequate opportunity to examine the costs of compliance with such rules and regulations; and

"(3) it is the responsibility of the Congress to determine the appropriate levels of costs of compliance with Federal rules and regulations.

"(b) It is the purpose of this title to require the Congress to establish, for each fiscal year, a regulatory budget for each major functional category used in the concurrent resolution on the budget for such fiscal year which sets the maximum costs of compliance with all rules and regulations promulgated under activities within each such functional category.

"DEVELOPMENT OF REGULATORY COSTS ANALYSIS PROCEDURES

"SEC. 1102. (a) The President shall—

"(1) establish criteria for use in the determination of which rules or regulations are rules or regulations within the meaning of this title and furnish such criteria to the head of each agency; and

"(2) develop methods of determining the costs of compliance with rules or regulations and furnish such methods to the head of each agency.

"(b) In developing the methods required under subsection (a)(2), the President shall—

"(1) take such action as may be necessary to insure that such methods are based upon the most accurate available statistical and accounting knowledge and techniques; and

"(2) provide, to the maximum extent feasible, that such methods are uniform for all agencies while taking into account the different functions of each agency.

"(c)(1) At least ninety days before the submission of the criteria and methods required under subsection (a) to the head of each agency, the President shall—

"(A) publish such criteria and methods in the Federal Register in order to solicit public comments thereon for a period not in excess of forty-five days; and

"(B) submit such criteria and methods to the Comptroller General, the Chairman of the Administrative Conference of the United States, and the Director for their review and comments.

"(2) The Comptroller General, the Chairman of the Administrative Conference of the United States, and the Director shall submit comments and recommendations concerning the criteria and methods submitted pursuant to paragraph (1)(B) within forty-five days of the receipt of such criteria and methods.

"(d) Each year, at a time and in a manner consistent with the provisions of sections 1103 and 1104, the President shall review and update the criteria and methods established under this section in accordance with the procedures established by this section.

"(e) The President may delegate his responsibilities under this section to the Director of the Office of Management and Budget.

"(f) The head of each agency shall utilize the criteria and methods developed by the President under this section to carry out section 1103.

"REGULATORY COST COMPLIANCE REPORTS

"SEC. 1103. (a)(1) Each year, the head of each agency shall conduct a study of the costs of compliance with rules and regulations promulgated by that agency. The head of each agency shall utilize the criteria established by the President under section 1102 in conducting the study required under this subsection.

"(2) The head of each agency shall submit a report to the Director of the Office of Management and Budget and the Comptroller General by the November 10 preceding the beginning of each fiscal year. The report shall contain the results of the study required under paragraph (1), and shall include—

"(A)(i) a statement of the costs of compliance for the fiscal year ending on the September 30 prior to the day on which the report is submitted;

"(ii) a comparison of the costs of compliance for such fiscal year with the regulatory budget, if any, established for such fiscal year under section 1105; and

"(iii) a full explanation for any costs of compliance which exceeded the regulatory budget for such fiscal year; and

"(B) a statement of the estimated costs of compliance for the fiscal year in progress when the report is submitted and for the succeeding fiscal year—

"(i) with rules and regulations of such agency in effect on the date on which the report is submitted;

"(ii) with rules and regulations of such agency which are to be issued, or are expected to be issued, after the date on which the report is submitted; and

"(iii) with all rules and regulations of such agency as specified in clauses (i) and (ii).

"(3) The report required by this subsection shall contain an allocation of the costs of compliance specified in such report pursuant to paragraph (2) among the major functional categories used in the most recently agreed to concurrent resolution on the budget for the fiscal year in which the report is submitted.

"(b) The Director of the Office of Management and Budget shall compile the reports submitted by agencies under subsection (a) and shall submit such reports to the President.

"REGULATORY BUDGET RECOMMENDATIONS

"SEC. 1104. (a) Except as provided in subsection (b), the Budget transmitted pursuant to section 201(a) of the Budget and Accounting Act, 1921, for each fiscal year shall include a regulatory budget for each agency which shall contain recommendations for the maximum costs of compliance with all rules and regulations of each agency during the fiscal year for which the Budget is submitted. If the proposed regulatory budget for any agency is less than the estimated total costs of compliance determined by the agency head under section 1103(a)(2)(B), the Budget message shall recommend specific actions which may be taken during such fiscal year to reduce the costs of compliance.

"(b) The regulatory budget required under subsection (a) for each of the first two fiscal years to which this title applies shall only contain recommendations for the maximum costs of compliance during each such fiscal year with all rules and regulations which each agency expects to issue during each such fiscal year. If the proposed regulatory budget for rules and regulations expected to be issued by any agency in any such fiscal year is less than the estimated costs of compliance determined by the agency head under section 1103(a)(2)(B)(ii), the Budget message shall recommend specific actions which may be taken during such fiscal year to reduce such costs of compliance.

"(c) Each regulatory budget for an agency required under subsection (a) for a fiscal year shall contain an allocation of the costs of compliance with the rules or regulations of the agency among—

"(1) the major functional categories used in the Budget transmitted for such fiscal year pursuant to section 201(a) of the Budget and Accounting Act, 1921; and

"(2) the committees of the Senate and the House of Representatives having legislative jurisdiction over the programs and activities of the agency.

"(d) The President shall submit with the regulatory budget required by this section for each agency for each fiscal year a copy of the report submitted by the agency under section 1103(a) by November 10 of the fiscal year preceding such fiscal year.

"REGULATORY BUDGET

"SEC. 1105. (a)(1) The concurrent resolution on the budget referred to in section 301(a) for a fiscal year shall include a separate section containing a regulatory budget which, except as provided in paragraph (2), establishes the maximum costs of compliance with all rules and regulations of all agencies which will be in effect during such fiscal year. In developing such regulatory budget, the Congress shall utilize the reports submitted by the head of each agency pursuant to section 1103 (a) and the recommendations submitted by the President pursuant to section 1104.

"(2) The regulatory budget included pursuant to paragraph (1) in the concurrent resolution on the budget referred to in section 301(a) for each of the first two fiscal years to which this title applies shall only set the maximum costs of compliance during each such fiscal year with all rules and regulations which each agency expects to issue during each such fiscal year.

"(3) Each regulatory budget required under paragraph (1) for a fiscal year shall contain an allocation of the costs of compliance with all rules or regulations of all agencies which will be in effect during a fiscal year among—

"(A) the major functional categories used in the concurrent resolution on the budget in which such regulatory budget is included; and

"(B) the committees of the Senate and the House of Representatives having legislative jurisdiction over the programs and activities of the agency.

"(b) On or before March 15 of each year, each standing committee of the House of Representatives shall submit to the Committee on the Budget of the House, each standing committee of the Senate (and each other committee of the Senate which has legislative jurisdiction) shall submit to the Committee on the Budget of the Senate, and the Joint Economic Committee and Joint Committee on Internal Revenue Taxation shall submit to the Committees on the Budget of both Houses its views and esti-

mates with respect to the establishment of the maximum costs of compliance with rules and regulations which relate to matters within the respective jurisdiction or function of such committee or joint committee.

"(c) The report accompanying the concurrent resolution on the budget in which a regulatory budget is included shall contain an allocation of the costs of compliance for each major functional category specified in such regulatory budget among each agency which administers activities within each such category.

"REPORTS AND SUMMARIES OF CONGRESSIONAL ACTION

"SEC. 1106. (a) Whenever a committee of either House reports a bill or resolution to its House, the report accompanying that bill or resolution shall contain a statement, prepared after consultation with the Director, which contains an estimate, for the fiscal year in which such bill or resolution is to be effective and each of the four succeeding fiscal years, of the costs of compliance with the rules or regulations required to carry out the provisions of such bill or resolution.

"(b) The Director shall issue periodic reports detailing and tabulating the progress of congressional action on bills and resolutions which will create costs of compliance as a result of rules or regulations required to carry out the provisions of such bill or resolution. Such report shall include—

"(1) an up-to-date tabulation of the costs of compliance with rules or regulations required to carry out the provisions of each such bill or resolution on which Congress has completed action;

"(2) an up-to-date status report on all bills and resolutions which would create such costs of compliance; and

"(3) an up-to-date comparison of the maximum costs of compliance established pursuant to section 1105 with the costs of compliance—

"(A) with rules or regulations in effect on the date of such report; and

"(B) with rules or regulations required to carry out the provisions of bills or resolutions on which Congress has completed action.

"(c) The estimate of costs of compliance required by subsection (a), the tabulation of the costs of compliance required by paragraph (1) of subsection (b), and the comparison of the costs of compliance required under paragraph (3) of such subsection shall include an allocation of such costs of compliance among—

"(1) the agencies who will issue the rules or regulations from which such costs of compliance will result;

"(2) the major functional categories used in the concurrent resolution on the budget most recently agreed to under title III; and

"(3) in the case of a tabulation required under paragraph (1) of subsection (b) or a comparison required under paragraph (3) of such subsection, the committees of the Senate and the House of Representatives having legislative jurisdiction over the bill or resolution for which such tabulation or comparison, as the case may be, is made.

"NEW LEGISLATION MUST BE WITHIN REGULATORY BUDGET

"SEC. 1107. (a) After the Congress has completed action on the concurrent resolution on the budget referred to in section 301(a) for a fiscal year, it shall not be in order in either the House of Representatives or the Senate to consider any bill, resolution, or amendment which would result in additional costs of compliance in such fiscal year, or any conference report on such bill or resolution, if—

"(1) the enactment of such bill or resolution as reported;

"(2) the adoption and enactment of such amendment; or

"(3) the enactment of such bill or resolution in the form recommended in such conference report;

would cause the total costs of compliance for such fiscal year to exceed the maximum costs of compliance established in the regulatory budget for such fiscal year included in such concurrent resolution on the budget.

"(b) For purposes of subsection (a), the costs of compliance during a fiscal year shall be determined on the basis of estimates made by the Committee on the Budget of the House of Representatives or the Senate, as the case may be.

"(c)(1) The committee of the Senate which reports any bill or resolution may, at or after the time it reports such bill or resolution, report a resolution to the Senate (A) providing for the waiver of subsection (a) with respect to such bill or resolution, and (B) stating the reasons why the waiver is necessary. The resolution shall then be referred to the Committee on the Budget of the Senate. The Committee on the Budget shall report the resolution to the Senate, within 10 days after the resolution is referred to it (not counting any day on which the Senate is not in session) beginning with the day following the day on which it is so referred, accompanied by that committee's recommendations and reasons for such recommendations with respect to the resolution. If the committee does not report the resolution within such 10-day period, it shall automatically be discharged from further consideration of the resolution and the resolution shall be placed on the calendar.

"(2) During the consideration of any such resolution, debate shall be limited to one hour, to be equally divided between, and controlled by, the majority leader and the minority leader or their designees, and the time on any debatable motion or appeal shall be limited to 20 minutes, to be equally divided between, and controlled by, the mover and the manager of the resolution. In the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from the time under their control on the passage of such resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal. No amendment to the resolution is in order.

"(3) If, after the Committee on the Budget has reported (or been discharged from further consideration of) the resolution, the Senate agrees to the resolution, then subsection (a) of this section shall not apply with respect to that bill or resolution referred to in the resolution.

"DEFINITIONS

"SEC. 1108. For purposes of this title—

"(1) the term 'agency' has the meaning given to it by section 551(1) of title 5, United States Code;

"(2) the term 'Comptroller General' means the Comptroller General of the United States;

"(3) the term 'costs of compliance' means, with respect to an agency, the costs imposed upon the non-Federal sector as a result of compliance with rules or regulations promulgated by that agency, including wages, salaries, benefits, capital costs, rents, interest, State and local taxes, and costs due to data collection and recordkeeping, preparation and submission of forms, data, and reports, purchase of necessary equipment, management time, training, and changes in the quality or mixture of raw materials or output, except that such term does not include normal business or recordkeeping costs which would exist in the absence of such rules or regulations;

"(4) the term 'Director' means the Director of the Congressional Budget Office;

"(5) the term 'non-Federal sector' means an individual, partnership, association, corporation, business trust or legal representative thereof, organized group of individuals, labor organization, State or territorial government or branch thereof, or political subdivision of a State or territory or a branch thereof; and

"(6) the term 'rule or regulation' has the meaning given to the term 'rule' by section 551(4) of title 5, United States Code.

"EFFECTIVE DATE

"SEC. 1109. The provisions of this title shall take effect on the date of its enactment, except that the provisions of sections 1103 through 1107 shall apply only with respect to the first fiscal year beginning at least eighteen months after the date of enactment of this title, and succeeding fiscal years.".

(b) The table of contents in section (1)(b) of such Act is amended by adding at the end thereof the following new items:

"TITLE XI—REGULATORY BUDGET PROCEDURE

"Sec. 1101. Statement of findings and purpose.
"Sec. 1102. Development of regulatory costs analysis procedures.
"Sec. 1103. Regulatory cost compliance reports.
"Sec. 1104. Regulatory budget recommendations.
"Sec. 1105. Regulatory budget.
"Sec. 1106. Reports and summaries of congressional action.
"Sec. 1107. New legislation must be within regulatory budget.
"Sec. 1108. Definitions.
"Sec. 1109. Effective date.".

SUBMISSION OF PRESIDENT'S BUDGET

SEC. 20. Section 1105(a) of title 31, United States Code, is amended—

(1) by striking out "referred to in section 301(a)(1)-(5)" in paragraph (15) and inserting in lieu thereof "referred to section 301(a)(1)-(7)";

(2) by striking out "(2 U.S.C. 632(a)(1)-(5))." in such paragraph and inserting in lieu thereof "(2 U.S.C. 632(a)(1)-(7))."; and

(3) by adding at the end thereof the following new paragraph:

"(25) all essential facts regarding direct lending by the Government, and guarantees by the Government of the repayment of indebtedness incurred by another person or government.".

APPLICABILITY

SEC. 21. The provisions of this Act, and the amendments and repeals made by this Act, shall apply with fiscal years beginning after September 30, 1983, except that the provisions of the Regulatory Budget Act of 1982, as added by section 19 of this Act, shall be effective in accordance with section 1109 of such Act.

BUDGET ACT OF 1974, AS AMENDED BY SENATOR CHILES "BALANCED BUDGET ENFORCEMENT ACT OF 1982 AND "REGULATORY BUDGET ACT OF 1982"

SHORT TITLES; TABLE OF CONTENTS

SECTION 1. (a) SHORT TITLES.—This Act may be cited as the "Congressional Budget and Impoundment Control Act of 1974". Titles I through IX may be cited as the "Congressional Budget Act of 1974", and title X may be cited as the "Impoundment Control Act of 1974", and title XI may be cited as the "Regulatory Budget Act of 1982".

(b) TABLE OF CONTENTS.—

Sec. 1. Short titles; table of contents.
Sec. 2. Declaration of purposes.

Sec. 1106. Reports and summaries of congressional action.
Sec. 1107. New legislation must be within regulatory budget.
Sec. 1108. Definitions.
Sec. 1109. Effective date.

DECLARATION OF PURPOSES

SEC. 2. The Congress declares that it is essential—

(1) to assure effective congressional control over the budgetary process;

(2) to provide for the congressional determination each year of the appropriate level of Federal revenues and expenditures;

(3) to provide a system of impoundment control;

(4) to establish national budget priorities;

(5) to achieve a balanced Federal budget under most economic circumstances;

(6) to provide for the congressional determination each year of the appropriate level of gross obligations for the principal amount of direct loans and the appropriate level of commitments to guarantee loan principal; and

(7) to provide for the furnishing of information by the executive branch in a manner that will assist the Congress in discharging its duties.

DEFINITIONS; DETERMINATION OF ESTIMATES

SEC. 3. (a) DEFINITIONS.—For purposes of this Act—

(1) The terms "budget outlays" and "outlays" mean, with respect to any fiscal year, expenditures and net lending of funds under budget authority during such year.

(2) The term "budget authority" means authority provided by law to enter into obligations which will result in immediate or future outlays involving Government funds, except that such term does not include authority to insure or guarantee the repayment of indebtedness incurred by another person or government.

(3) The term "tax expenditures" means those revenue losses attributable to provisions of the Federal tax laws which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of tax liability; and the term "tax expenditures budget" means an enumeration of such tax expenditures.

(4) The term "concurrent resolution on the budget" means—

(A) a concurrent resolution setting forth the congressional budget for the United States Government for a fiscal year as provided in section 301; and

(B) a concurrent resolution revising the congressional budget for the United States Government for a fiscal year as described in section 304.

(5) The term "appropriation Act" means an Act referred to in section 105 of title I, United States Code.

(6) The term "direct loan" means a disbursement of funds by the United States or any officer or agency thereof (not in exchange for goods or services) under a contract which requires the repayment of such funds with or without interest, and in addition includes—

(A) direct participation in a loan made and held by another person or government;

(B) the purchase (through secondary market operations) of a loan made by another person or government; and

(C) the acquisition of a federally guaranteed loan made by another person or government, as collateral or in satisfaction of default or other guarantee claims.

(7) The term "current law budget authority" means the total amount of budget authority which would be necessary to carry out programs and activities during a fiscal year at the same level as such programs and activities were carried out in the preceding fiscal year without any policy changes in such programs and activities.

(8) The term "current law outlays" means the total amount of outlays which would be made to carry out programs and activities during a fiscal year at the same level as such programs and activities were carried out in the preceding fiscal year without any policy changes in such programs and activities.

(9) The term "current law spending authority" means the total amount of spending authority described in section 401 (c) (2) (C) which would be effective in a fiscal year to carry out programs and activities during that fiscal year at the same level as such programs and activities were carried out during the preceding fiscal year without any policy changes in such programs and activities.

(10) The term "current law revenues" means the total amount of revenues that would be received in a fiscal year if the provisions of the revenue laws which were in effect for the fiscal year preceding such fiscal year remained in effect for such fiscal year without change.

(b) DETERMINATION OF ESTIMATES.—In determining current law budget authority, current law outlays, and current law spending authority for a fiscal year, the Director of the Congressional Budget Office or the Committees on the Budget of the Senate and the House of Representatives, as the case may be, shall—

(1) only include adjustments for additional costs, workloads, or utilizations if such adjustments are provided for by statute and if the budget authority and spending authority described in section 401(c)(2)(C) for such costs, workloads, or utilizations are provided by statute at the time the Director makes such determinations; and

(2) assume, for any program or activity for which a law has been enacted authorizing the enactment of new budget authority for the fiscal year prior to the fiscal year for which the Director is making such determinations, but for which a law has not been enacted (at the time of making such determinations) authorizing the enactment of new budget authority for such fiscal year, that a law will be enacted authorizing the enactment of new budget authority for such program or activity for such fiscal year in an amount equal to the amount authorized for the fiscal year prior to such fiscal year unless the law authorizing the enactment of new budget authority for the program or activity for such prior fiscal year indicates that the reauthorization of such program or activity was not intended by the Congress.

* * * * *

DUTIES AND FUNCTIONS

SEC. 202. (a) ASSISTANCE TO BUDGET COMMITTEES.—It shall be the duty and function of the Office to provide to the Committees on the Budget of both Houses information which will assist such committees in the discharge of all matters within their jurisdictions, including (1) information with respect to the budget, appropriation bills, and other bills authorizing or providing budget authority or tax expenditures, (2) information with respects, to revenues receipts, estimated future revenues and receipts, and changing revenue conditions, (3) information with respect to direct loans and guarantees of loan principal, (4) estimates of the gross national product for a fiscal year, (5) estimates of the ratio that current law outlays for a fiscal year bear to the gross national product for such fiscal year (stated as a percentage), (6) estimates of the ratio that current law revenues for a fiscal year bear to the gross national product for such fiscal year (stated as a percentage), and (7) such related information as such committees may request.

* * * * *

(f) REPORTS TO BUDGET COMMITTEES.—

(1) On or before March 1 of each year, the Director shall submit to the Committees on the Budget of the House of Representatives and the Senate a report, for the fiscal year in progress, the fiscal year commencing on October 1 of that year, and the succeeding four fiscal years, with respect to fiscal policy, including (A) alternative levels of total revenues, total new budget authority, and total outlays (including related surpluses and deficits), (B) the levels of direct loans and guarantees of loan principal, (C) a specification of the gross national product for the fiscal year preceding the fiscal year in progress, (D) estimates of the gross national product for the fiscal year in progress and each of the succeeding five fiscal years, (E) estimates of the ratio, for the fiscal year in progress and each of the five succeeding fiscal years, that current law outlays for each such fiscal year will bear to the gross national product for each such fiscal year (stated as a percentage), (F) estimates of the ratio, for the fiscal year in progress and each of the five succeeding fiscal years, that current law revenues for each such fiscal year will bear to the gross national product for each such fiscal year (stated as a percentage), and (G) the levels of tax expenditures under existing law, taking into account projected economic factors and any changes in such levels based on proposals in the budget submitted by the President for such fiscal year. Such report shall also include a discussion of national budget priorities, including alternative ways of allocating budget authority and budget outlays for such fiscal year among major programs or functional categories, taking into account how such alternative allocations will meet major national needs and affect balanced growth and development of the United States. In preparing such report, the Director shall use the economic assumptions most recently published by the Director.

(2) The Director shall from time to time submit to the Committees on the Budget of the House of Representatives and the Senate such further reports (including reports revising the report required by paragraph (1)) as may be necessary or appropriate to provide such committees with information, data, and analyses for the performance of their duties and functions.

* * * * *

TITLE III—CONGRESSIONAL BUDGET PROCESS TIMETABLE

SEC. 300. The timetable with respect to the congressional budget process for any fiscal year is as follows:

On or before:	Action to be completed:
November 10	President submits current services budget.
15th day after Congress meets.	President submits his budget.
March 1	Congressional Budget Office submits report to Budget Committees.
March 15	Committees and joint committees submit reports to Budget Committees.
April 15	Budget Committees report first concurrent resolution on the budget to their Houses.
May 15	Committees report bills and resolutions authorizing new budget authority.
May 15	Congress completes action on concurrent resolution on the budget.
July 15	Congress completes action on deficit reduction bill or deficit reduction resolution, or both, implementing concurrent resolution on the budget.
7th day after Labor Day.	Congress completes action on bills and resolutions providing new budget authority and new spending authority.
October 1	Fiscal year begins.

ADOPTION OF CONCURRENT RESOLUTION

SEC. 301. (a) ACTION TO BE COMPLETED BY MAY 15.—On or before May 15 of each year, the Congress shall complete action on the concurrent resolution on the budget for the fiscal year beginning on October 1 of such year. The concurrent resolution shall set forth—

(1) for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years, the appropriate level of total budget outlays and of total new budget authority;

(2) for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years, an estimate of budget outlays and an appropriate level of new budget authority for each major functional category, for contingencies, and for undistributed intragovernmental transactions, based on allocations of the appropriate level of total budget outlays and of total new budget authority;

(3) for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years, the amount, if any, of the surplus in the budget which is appropriate in light of economic conditions and all other relevant factors, or, in any case in which the provisions of subsection (a) of section 301A do not apply in accordance with subsection (d) of such section or are waived under subsection (e) of such section, the amount, if any, of the deficit in the budget which is appropriate in light of economic conditions and all other relevant factors;

(4) for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years, the recommended level of Federal revenues and the amount, if any, by which the aggregate level of Federal reve-

nues should be increased or decreased by bills and resolutions to be reported by the appropriate committees;

(5) for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years, the appropriate level of the public debt, and the amount, if any, by which the statutory limit on the public debt should be increased or decreased by bills and resolutions to be reported by the appropriate committees;

(6) for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years, the appropriate level of total gross obligations for the principal amount of direct loans and the appropriate level of total commitments to guarantee loan principal;

(7) for the fiscal year beginning on October 1 of the year in which the resolution is adopted and each of the four succeeding fiscal years, an estimate of gross obligations for the principal amount of direct loans and an estimate of commitments to guarantee loan principal for each major functional category, based on allocations of the appropriate level of total gross obligations for the principal amount of direct loans and the appropriate level of total commitments to guarantee loan principal;

(8) if required by subsection (e), the calendar year in which, in the opinion of the Congress, the goals for reducing unemployment set forth in section 4(b) of the Employment Act of 1946 should be achieved; and

(9) such other matters relating to the budget as may be appropriate to carry out the purposes of this Act.

(b) DEFICIT REDUCTION INSTRUCTIONS; ADDITIONAL MATTERS.—(1) The concurrent resolution on the budget referred to in subsection (a) shall also, to the extent necessary to insure that total budget outlays for any fiscal year do not exceed total revenues for such fiscal year and to carry out section 301A—

(A) specify the total amount by which new current law budget authority for the fiscal year beginning on October 1 of the year in which the concurrent resolution is adopted, and current law outlays associated with such new current law budget authority, and current law spending authority for such fiscal year, are to be changed;

(B) specify the total amount by which new budget authority for such fiscal year, and outlays associated with such budget authority, and new spending authority described in section 401(c)(2)(C) which will be effective in such fiscal year, contained in laws, bills, and resolutions within the jurisdiction of a committee, are to be reduced below the level of current law budget authority, current law outlays, or current law spending authority for such fiscal year, respectively, and direct that committee to determine and recommend changes to accomplish a change of such total amount and to report such determinations and recommendations in accordance with paragraph (2)(A) by a specified date;

(C) specify the amount by which budget authority initially provided for fiscal years preceding such fiscal year, and budget outlays associated with such budget authority, contained in laws, bills, and resolutions within the jurisdiction of a committee are to be changed and direct that committee to determine and recommend changes to accomplish a change of that total amount and to report such determinations and recommendations in accordance with paragraph (2)(A) by a specified date;

(D) specify the total amount by which revenues for such fiscal year are to be changed and direct the committees having jurisdiction to determine and recomend changes in the revenue laws, bills, and resolutions to accomplish a change of such total amount and to report such determinations and recommendations in accordance with paragraph (2)(A) by a specified date;

(E) specify the amount by which the statutory limit on the public debt is to be changed and direct the committees having jurisdiction to recommend such change and to report such recommendations in accordance with paragraph (2)(A) by a specified date;

(F) specify the total amount by which gross obligations for the principal amount of direct loans or commitments to guarantee loan principal are to be changed and direct the committees having jurisdiction to determine and recommend changes in the laws, bills, and resolutions providing or specifying the authority to make such obligations or commitments and to report such determinations and recommendations in accordance with paragraph (2)(A) by a specified date; or

(G) specify and direct any combination of the matters described in subparagraphs (A), (B), (C), (D), (E), and (F).

(2)(A) If a concurrent resolution is agreed to in accordance with paragraph (1) containing directions to one or more committees to determine and recommend changes in laws, bills, or resolutions, and—

(i) only one committee of the House or the Senate is directed to determine and recommend changes, that committee shall promptly make such determination and recommendations and shall, by the date specified pursuant to paragraph (1)(A), report to its House a deficit reduction bill or a deficit reduction resolution, or both, containing such recommendations; or

(ii) more than one committee of the House or the Senate is directed to determine and recommend changes, each such committee so directed shall promptly make such determination and recommendations, whether such changes are to be contained in a deficit reduction bill or deficit reduction resolution, and shall, by the date specified pursuant to paragraph (1)(A), report such recommendations to the Committee on the Budget of its House, which upon receiving all such recommendations, shall report to its House a deficit reduction bill or deficit reduction resolution, or both, carrying out all such recommendations without any substantive revision.

(B) Notwithstanding subparagraph (A), if a concurrent resolution is agreed to in accordance with paragraph (1) containing directions to one or more committees to determine and recommend changes in laws, bills, and resolutions in order to reduce new budget authority, outlays, or new spending authority described in section 401(c)(2)(C), or to change revenues, and any such committee—

(i) does not report such changes by the date specified in such concurrent resolution pursuant to paragraph (1)(A); or

(ii) by such specified date, reports changes in laws, bills, and resolutions which will result in—

(I) a reduction in new budget authority, outlays, or new spending authority described in section 401(c)(2)(C) in an amount which is less than the amount specified in the directions contained in such concurrent resolution; or

(II) a change in revenues in an amount which is less than the amount specified in such directions.

the Committee on the Budget of the House or the Senate, as the case may be, shall report a deficit reduction bill or deficit reduction resolution, or both, containing changes in laws, bills, and resolutions, which will result in a reduction in new budget authority, outlays, or new spending authority described in section 401(c)(2)(C) in an amount sufficient to comply with such directions or a change in revenues sufficient to comply with such directions.

(C) For purposes of this paragraph, a deficit reduction resolution is a concurrent resolution directing the Clerk of the House of Representatives or the Secretary of the Senate, as the case may be, to make specified changes in bills and resolutions which have not been enrolled.

(D) A deficit reduction bill or a deficit reduction resolution may not contain provisions—

(i) which decrease the total amount of Federal revenues for a fiscal year below the level of current law revenues for such fiscal year, except in order to carry out section 301A(b);

(ii) which accomplish decreases in outlays in one fiscal year by postponing such outlays to one or more succeeding fiscal years; or

(iii) which are predominantly nonbudgetary in nature or which modify programs or activities in a manner which is not necessary to reduce the total amount of new budget authority for a fiscal year and spending authority which will be effective during a fiscal year.

(3) Congress shall complete action on any deficit reduction bill or deficit reduction resolution reported under this subsection not later than July 15 of each year.

(4)(A) Except as provided in subparagraphs (B) and (C), the provisions of subsections (b) and (c) of section 305 for the consideration in the Senate of concurrent resolutions on the budget and conference reports thereon shall also apply to the consideration in the Senate of deficit reduction bills and deficit resolutions reported under this subsection and conference reports thereon.

(B) Debate in the Senate on any deficit reduction bill or deficit reduction resolution reported under this subsection, and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than 20 hours or a number of hours which is equal to the product of the number of committees of the Senate which have reported provisions included in such bill or resolution multiplied by four, whichever is greater.

(C) It shall be in order in the Senate to consider any amendment to a deficit reduction bill or a deficit reduction resolution which provides for reduction in budget authority or spending authority described in section 401(c)(2)(C) or increases in revenues if such amendment does not contain matters which are nonbudgetary in nature, does not modify programs in a manner which is not necessary to reduce budget authority or spending authority described in section 401(c)(2)(C), or does not change the provisions of the revenue laws in a manner other than a manner which is necessary to increase or decrease revenues in accordance with deficit reduction instructions included in a concurrent resolution on the budget pursuant to paragraph (1)(D).

(5) The concurrent resolution on the budget referred to in subsection (a) may also require—

(A) a procedure under which all or certain bills and resolutions providing new budget authority or providing new spending authority described in section 401(c)(2)(C) for such fiscal year shall not be enrolled until such concurrent resolution has been agreed to, and, if a deficit reduction bill or deficit reduction resolution, or both, are required to be reported under this subsection, until Congress has completed action on that bill or resolution, or both; and

(B) any other procedure which is appropriate to carry out the purposes of this Act.

(6) The concurrent resolution on the budget referred to in subsection (a) shall include the section containing provisions to establish a regulatory budget required by section 1105(a).

(C) VIEWS AND ESTIMATES OF OTHER COMMITTEES.—On or before March 15 of each year, each standing committee of the House of Representatives shall submit to the Committee on the Budget of the House, each standing committee of the Senate shall submit to the Committee on the Budget of the Senate, and the Joint Economic Committee and Joint Committee on Internal Revenue Taxation shall submit to the Committees on the Budget of both Houses—

(1) its views and estimates with respect to all matters set forth in subsection (a) which relate to matters within the respective jurisdiction or functions of such committee or joint committee; and

(2) except in the case of such joint committees, the estimate of the total amounts of new budget authority and budget outlays resulting therefrom, and of the total amounts of gross obligations for the principal amount of direct loans and commitments to guarantee loan principal, to be provided or authorized in all bills and resolutions within the jurisdiction of such committee which such committee intends to be effective during the fiscal year beginning on October 1 of such year.

The Joint Economic Committee shall also submit to the Committees on the Budget of both Houses, its recommendations as to the fiscal policy appropriate to the goals of the Employment Act of 1946. The Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate shall each also submit to the Committee on the Budget of its House its recommendations as to the appropriate level of total gross obligations for the principal amount of direct loans and the appropriate level of total commitments to guarantee loan principal. Any other committee of the House or Senate may submit to the Committee on the Budget of its House, and any other joint committee of the Congress may submit to the Committees on the Budget of both Houses, its views and estimates with respect to all matters set forth in subsection (a) which relate to matters within its jurisdiction or functions.

(d) HEARINGS AND REPORT.—In developing the concurrent resolution on the budget referred to in subsection (a) for each fiscal year, the Committee on the Budget of each House shall hold hearings and shall receive testimony from Members of Congress and such appropriate representatives of Federal departments and agencies, the general public, and national organizations as the committee deems desirable. Each of the recommendations as to short-term and medium-term goals set forth in the report submitted by the Members of the Joint Economic Committee under subsection (c) may be considered by the Committee on the Budget of each House as part of its consideration of such concurrent resolution, and its report may reflect its views thereon, and on how the estimates of revenues and levels of budget authority and outlays set forth in such concurrent resolution are designed to achieve any goals it is recommending. On or before April 15 of each year, the Committee on the Budget of each House shall report to its House the concurrent resolution on the budget referred to in subsection (a) for the fiscal year beginning on October 1 of such year. The report accompanying such concurrent resolution shall also include, but not be limited to—

(1) a comparison of revenues estimated by the committee with those estimated in the budget submitted by the President;

(2) a comparison of the appropriate levels of total budget outlays and total new budget authority, as set forth in such concurrent resolution, with total budget outlays estimated and total new budget authority requested in the budget submitted by the President;

(3) with respect to each major functional category, an estimate of budget outlays and an appropriate level of new budget authority for all proposed programs and for all existing programs (including renewals thereof), with the estimate and level for existing programs being divided between permanent authority and funds provided in appropriation Acts, and each such division being subdivided between controllable amounts and all other amounts;

(4) an allocation of the level of funding of Federal revenues recommended in the concurrent resolution among the major sources of such revenues;

(5) the economic assumptions and objectives which underlie each of the matters set forth in such concurrent resolution and alternative economic assumptions and objectives which the committee considered;

(6) for the period of five fiscal years beginning with such fiscal year, a specification for each major functional category, of—

(A) the levels of total budget outlays, total new budget outlays, total new budget authority, and total revenues for each fiscal year in such period;

(B) the level of the surplus or deficit, if any, for each such fiscal year;

(C) an estimate of the ratio that total outlays for each such fiscal year will bear to the gross national product for each such fiscal year (stated as a percentage);

(D) an estimate of the ratio that total revenues for each such fiscal year will bear to the gross national product for each such fiscal year (stated as a percentage); and

(E) the estimated levels of tax expenditures (the tax expenditures budget) for each such fiscal year;

(7) a statement describing whether the concurrent resolution complies with the provisions of subsection (a) of section 301A, or whether the Committee on the Budget recommends that such provisions be waived in accordance with subsection (e) of such section;

(8) a statement of any significant changes in the proposed levels of Federal assistance to State and local governments; and

(9) information, data, and comparisons indicating the manner in which, and the basis on which, the committee determined each of the matters set forth in the concurrent resolution, and the relationship of such matters to other budget categories.

(e) ACHIEVEMENT OF GOALS FOR REDUCING UNEMPLOYMENT.—

(1) If, pursuant to section 4(c) of the Employment Act of 1946, as amended, the President recommends in the Economic Report that the goals for reducing unemployment set forth in section 4(b) of such Act be achieved in a year after the close of the five-year period prescribed by such subsection, the concurrent resolution on the budget referred to in subsection (a) for the fiscal year beginning after the date on which such Economic Report is received by the Congress may set forth the year in which, in the opinion of the Congress, such goals can be achieved.

(2) After the Congress has expressed its opinion pursuant to paragraph (1) as to the year in which the goals for reducing unemployment set forth in section 4(b) of the Employment Act of 1946, as amended, can be achieved, if, pursuant to section 4(e) of such Act, the President recommends in the Economic Report that such goals be achieved in a year which is different from the year in which the Congress has expressed its opinion that such goals should be achieved, either in its action pursuant to paragraph (1) or its most recent action pursuant to this paragraph, the concurrent resolution on the budget referred to in subsection (a) for the fiscal year beginning after the date on which such Economic Report is received by the Congress may set forth the year in which, in the opinion of the Congress, such goals can be achieved.

(3) It shall be in order to amend the provision of such resolution setting forth such year only if the amendment thereto also proposes to alter the estimates, amounts, and levels (as described in section 301(a)) set forth in such resolution in germane fashion in order to be consistent with the economic goals (as described in sections 3(a)(2) and 4(b) of the Employment Act of 1946) which such amendment proposes can be achieved by the year specified in such amendment.

OUTLAYS SHALL NOT EXCEED REVENUES

SEC. 301A. (a) LIMITATION ON OUTLAYS.—

(1) The appropriate level of total budget outlays set forth in any concurrent resolution on the budget for any fiscal year beginning after September 30, 1983, shall not exceed the recommended level of Federal revenues set forth in such concurrent resolution for such fiscal year.

(2) It shall not be in order in the Senate or the House of Representatives to consider any concurrent resolution on the budget for any fiscal year beginning after September 30, 1983, or any amendment thereto or any conference report thereon if—

(A) the adoption of such resolution as reported;

(B) the adoption of such amendment; or

(C) the adoption of the resolution in the form recommended in such conference report;

would cause—

(i) the appropriate level of total budget outlays set forth in such concurrent resolution for such fiscal year to exceed the recommended level of Federal revenues set forth in such concurrent resolution for such fiscal year; or

(ii) the total amount by which new budget authority provided for such fiscal year, and outlays associated with such budget authority, and new spending authority described in section 401(c)(2)(C) which will be effective in such fiscal year are to be changed (as specified in such concurrent resolution pursuant to subparagraph (B) of section 301

(b)(1)) to be insufficient to insure that total budget outlays for such fiscal year do not exceed total revenues for such fiscal year.

(b) LIMITATION ON REVENUES.—

(1) The recommended level of Federal revenues set forth in a concurrent resolution on the budget for a fiscal year beginning after September 30, 1983, shall not exceed an amount which bears the same ratio to the gross national product for such fiscal year as the average of the ratios of estimated total revenues for each of the five fiscal years preceding such fiscal year to the estimated gross national product for each such fiscal year.

(2) It shall not be in order in the Senate or the House of Representatives to consider any concurrent resolution on the budget for any fiscal year beginning after September 30, 1983, or any amendment thereto or any conference report thereon if—

(A) the adoption of such resolution as reported;

(B) the adoption of such amendment; or

(C) the adoption of the resolution in the form recommended in such conference report;

would cause the recommended level of Federal revenues specified in such concurrent resolution for such fiscal year to exceed the amount prescribed by paragraph (1).

(3)(A) The Committee on the Budget of the Senate or the House of Representatives may report a separate concurrent resolution providing that the recommended level of Federal revenues set forth in a concurrent resolution on the budget for a fiscal year may exceed the amount prescribed by paragraph (1) for such fiscal year if such separate concurrent resolution specifies the amount by which the recommended level of Federal revenues set forth in such concurrent resolution on the budget will exceed such prescribed amount and the purpose for which such excess amount of revenues will be expended.

(B) If, after the Committee on the Budget of the Senate or the House of Representatives reports a concurrent resolution under subparagraph (A), such concurrent resolution is agreed to by a rollcall vote of the Senate and the House of Representatives, paragraphs (1) and (2) shall not apply to the concurrent resolution on the budget with which the the concurrent resolution permitting such excess amount of revenues is concerned.

(c) DETERMINATION OF OUTLAYS, REVENUES, AND GROSS NATIONAL PRODUCT.—

(1) For purposes of subsections (a) and (b), the budget outlays to be made during a fiscal year, the revenues to be received during a fiscal year, and the gross national product for a fiscal year shall be determined on the basis of estimates made by the Director of the Congressional Budget Office.

(2) For purposes of subsection (b), the recommended level of Federal revenues set forth in a concurrent resolution on the budget shall not include any revenues which would be included in such concurrent resolution by operation of subsection (f) (2).

(d) INAPPLICABILITY IN TIME OF WAR.—The provisions of subsections (a) and (b) shall not apply to any concurrent resolution on the budget for a fiscal year in which a declaration of war is in effect or in which the Armed Forces of the United States are engaged in combat.

(e) WAIVER FOR RECESSION.—

(1) By a rollcall vote of the Members of each House of Congress present and voting, Congress may include in a concurrent resolution on the budget for a fiscal year a provision waiving the provisions of subsections (a) and (b) with respect to such fiscal year if the Congress determines, and includes a statement of such determination in such provision, that a national economic emergency, such as a recession, makes compliance with the provisions of such subsections impracticable in such fiscal year. For purposes of the preceding sentence, a recession is a decline in the gross national product during any two consecutive fiscal quarters.

(2) If Congress waives the provisions of subsection (a) with respect to a fiscal year, and outlays are estimated to exceed revenues in such fiscal year, the concurrent resolutions on the budget for the succeeding two fiscal years shall set forth, in the aggregate, a recommended level of Federal revenues which exceeds the appropriate level of total budget outlays set forth in such concurrent resolutions for such fiscal years by an amount at least equal to the sum of—

(A) the amount by which outlays exceeded revenues in such proceding fiscal year; and

(B) the amount of any interest which will be payable on the public debt as a result of the amount described in subparagraph (A).

(f) ELIMINATION OR REPAYMENT OF UNANTICIPATED DEFICIT.—If, after an examination of the Budget transmitted by the President under section 201(a) of the Budget and Accounting Act, 1921, and the report of the Director of the Congressional Budget Office under section 202(f) of this Act, the Committee on the Budget of the Senate or the House of Representatives estimates that outlays will exceed revenues in the fiscal year in progress, such committee shall—

(1) report to the Senate or the House of Representatives, as the case may be, a concurrent resolution under section 304 revising the concurrent resolution on the budget for the fiscal year in progress, and containing deficit reduction instructions described in section 301(b) in an amount sufficient to insure that total outlays for such fiscal year do not exceed total revenues for such fiscal year; or

(2) in any case in which such committee determines that compliance with paragraph (1) is impracticable, include in the concurrent resolution required to be reported under section 301(a) for the succeeding fiscal year deficit reduction instructions to the committees having jurisdiction to determine and recommend changes in the revenue laws, bills, and resolutions which require such committees to report legislation to increase revenues temporarily in order to raise an amount of revenues equal to the sum of—

(A) the amount by which outlays are estimated to exceed revenues during the fiscal year in progress; and

(B) the amount of any interest which will be payable on the public debt as a result of the amount described in subparagraph (B).

INCLUSION OF ALL FEDERAL ACTIVITIES IN CONCURRENT RESOLUTIONS ON THE BUDGET

SEC. 301B. Notwithstanding any other provision of law, the appropriate level of total budget authority and total budget outlays, the recommended level of Federal revenues, the appropriate level of total gross obligations for the principal amount of direct loans, and the appropriate level of total commitments to guarantee loan principal, set forth in any concurrent resolution on the budget shall include the budget authority and outlays for, revenues and receipts from, gross obligations for the principal amount of direct loans by, and commitments to guarantee loan principal by, all activities of all departments, agencies, establishments, and instrumentalities of the Federal Government.

MATTERS TO BE INCLUDED IN JOINT STATEMENT OF MANAGERS; REPORTS BY COMMITTEES

SEC. 302. (a) ALLOCATION OF TOTALS.—The joint explanatory statement accompanying a conference report on a concurrent resolution on the budget shall include an estimated allocation, based upon such concurrent resolution as recommended in such conference report, of the appropriate levels of total budget outlays and total new budget authority and the appropriate levels of total gross obligations for the principal amount of direct loans and total commitments to quarantee loan principal among each committee of the House of Representatives and the Senate which has jurisdiction over bills and resolutions providing such new budget authority or authorizing such obligations and commitments.

(b) REPORTS BY COMMITTEES.—As soon as practicable after a concurrent resolution on the budget is agreed to—

(1) the Committee on Appropriations of each House shall, after consulting with the Committee on Appropriations of the House, (A) subdivide among its subcommittees the allocation of budget outlays and new budget authority allocated to it in the joint explanatory statement accompanying the conference report on such concurrent resolution, (B) further subdivide the amount with respect to each such subcommittee between amounts to be provided in regular appropriation Acts and amounts to be provided in supplemental appropriation Acts, and (C) further subdivide the amount with respect to each such subcommittee between controllable amounts and all other amounts;

(2) the Committee on Appropriations of each House shall also, after consulting with the Committee on Appropriations of the other House, subdivide among its subcommittees the allocation of gross obligation for the principal amount of direct loans and commitments to guarantee loan principal allocated to it in the joint explanatory statement accompanying the conference report on such concurrent resolution; and

(3) every other committee of the House and Senate to which an allocation was made in such joint explanatory statement shall, after consulting with the committee or committees of the other House to which all or part of its allocation was made, (A) subdivide such allocation among its subcommittees or among programs over which it has jurisdiction, and (B) further subdivide the amount with respect to each subcommittee or program between controllable amounts and all other amounts.

Each such committee shall promptly report to its House the subdivision made by it pursuant to this subsection.

(c) SUBSEQUENT CONCURRENT RESOLUTIONS.—In the case of a concurrent resolution on the budget referred to in section 304, the allocation under subsection (a) and the subdivisions under subsection (b) shall be required only to the extent necessary to take into account revisions made in the most recently agreed to concurrent resolution on the budget.

CONCURRENT RESOLUTION ON THE BUDGET MUST BE ADOPTED BEFORE LEGISLATION PROVIDING NEW BUDGET AUTHORITY, NEW SPENDING AUTHORITY, OR CHANGES IN REVENUES OR PUBLIC DEBT LIMIT IS CONSIDERED

SEC. 303. (a) IN GENERAL.—It shall not be in order in either the House of Representa-

tives or the Senate to consider any bill or resolution (or amendment thereto) which provides—

(1) new budget authority for a fiscal year;

(2) an increase or decrease in revenues to become effective during a fiscal year;

(3) an increase or decrease in the public debt limit to become effective during a fiscal year; or

(4) new spending authority described in section 401(c)(2)(C) to become effective during a fiscal year;

until the concurrent resolution on the budget referred to in section 301(a) for such year has been agreed to.

(b) WAIVER IN THE SENATE.—

(1) The committee of the Senate which reports any bill or resolution to which subsection (a) applies may at or after the time it reports such bill or resolution, report a resolution to the Senate (A) providing for the waiver of subsection (a) with respect to such bill or resolution, and (B) stating the reasons why the waiver is necessary. The resolution shall then be referred to the Committee on the Budget of the Senate. That committee shall report the resolution to the Senate within 10 days after the resolution is referred to it (not counting any day on which the Senate is not in session) beginning with the day following the day on which it is so referred, accompanied by that committee's recommendations and reasons for such recommendations with respect to the resolution. If the committee does not report the resolution within such 10-day period, it shall automatically be discharged from further consideration of the resolution and the resolution shall be placed on the calendar.

(2) During the consideration of any such resolution, debate shall be limited to one hour, to be equally divided between, and controlled by, the majority leader and minority leader or their designees, and the time on any debatable motion or appeal shall be limited to twenty minutes, to be equally divided between, and controlled by, the mover and the manager of the resolution. In the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from the time under their control on the passage of such resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal. No amendment to the resolution is in order.

(3) If, after the Committee on the Budget has reported (or been discharged from further consideration of) the resolution, the Senate agrees to the resolution, then subsection (a) of this section shall not apply with respect to the bill or resolution to which the resolution so agreed to applies.

PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS OF THE BUDGET

SEC. 304. At any time after the first concurrent resolution on the budget referred to in section 301(a) for a fiscal year has been agreed to, and before the end of such fiscal year, the two Houses may adopt a concurrent resolution on the budget which revises the concurrent resolution on the budget for such fiscal year most recently agreed to. Such revisions may include changes in the deficit reduction instructions included in such concurrent resolution on the budget pursuant to section 301(b) or the inclusion of such instructions in the concurrent resolution on the budget making such revisions.

PROVISIONS RELATING TO THE CONSIDERATION OF CONCURRENT RESOLUTIONS ON THE BUDGET

SEC. 305. (a) PROCEDURE IN HOUSE OF REPRESENTATIVES AFTER REPORT OF COMMITTEE; DEBATE.—

(1) When the Committee on the Budget of the House has reported any concurrent resolution on the budget, it is in order at any time after the tenth day (excluding Saturdays, Sundays, and legal holidays) following the day on which the report upon such resolution has been available to Members of the House (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion is highly privileged and is not debatable. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(2) General debate on any concurrent resolution on the budget in the House of Representatives shall be limited to not more than 10 hours, which shall be divided equally between the majority and minority parties, plus such additional hours of debate as are consumed pursuant to paragraph (3). A motion further to limit debate is not debatable. A motion to recommit the concurrent resolution is not in order, and it is not in order to move to reconsider the vote by which the concurrent resolution is agreed to or disagreed to.

(3) Following the presentation of opening statements on the concurrent resolution on the budget referred to in section 301(a) for a fiscal year by the chairman and ranking minority member of the Committee on the Budget of the House, there shall be a period of up to four hours for debate on economic goals and policies.

(4) Only if a concurrent resolution on the budget reported by the Committee on the Budget of the House sets forth the economic goals (as described in sections 3(a)(2) and 4(b) of the Full Employment Act of 1946) which the estimates, amounts, and levels (as described in section 301(a)) set forth in such resolution are designed to achieve, shall it be in order to offer to such resolution an amendment relating to such goals, and such amendment shall be in order only if it also proposes to alter such estimates, amounts, and levels in germane fashion in order to be consistent with the goals proposed in such amendment.

(6) Consideration of any concurrent resolution on the budget by the House of Representatives shall be in the Committee of the Whole, and the resolution shall be read for amendment under the five-minute rule in accordance with the applicable provisions of rule XXIII of the Rules of the House of Representatives. After the Committee rises and reports the resolution back to the House, the previous question shall be considered as ordered on the resolution and any amendments thereto to final passage without intervening motion; except that it shall be in order at any time prior to final passage (notwithstanding any other rule or provision of law) to adopt an amendment (or a series of amendments) changing any figure or figures in the resolution as so reported to the extent necessary to achieve mathematical consistency.

(7) Debate in the House of Representatives on the conference report or any concurrent resolution on the budget shall be limited to not more than 5 hours, which shall be divided equally between the majority and minority parties. A motion further to limit debate is not debatable. A motion to recommit the conference report is not in order, and it is not in order to move to reconsider the vote by which the conference report is agreed to or disagreed to.

(8) Motions to postpone, made with respect to the consideration of any concurrent resolution on the budget, and motions to proceed to the consideration of other business, shall be decided without debate.

(9) Appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to any concurrent resolution on the budget shall be decided without debate.

(b) PROCEDURE IN SENATE AFTER REPORT OF COMMITTEE; DEBATE; AMENDMENTS.—

(1) Debate in the Senate on any concurrent resolution on the budget, and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than 50 hours. The time shall be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

(2) Debate in the Senate on any amendment to a concurrent resolution on the budget shall be limited to 2 hours, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution, and debate on any amendment to an amendment, debatable motion, or appeal shall be limited to 1 hour, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution, except that in the event the manager of the concurrent resolution is in favor of any such amendment, motion, or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. No amendment that is not germane to the provisions of such concurrent resolution shall be received. Such leaders, or either of them, may, from the time under their control on the passage of the concurrent resolution, allot additional time to any Senator during the consideration of any amendment, debatable motion, or appeal.

(3) Following the presentation of opening statements on the concurrent resolution on the budget referred to in section 301(a) for a fiscal year by the chairman and ranking minority member of the Committee on the Budget of the Senate, there shall be a period of up to four hours for debate on economic goals and policies.

(4) Only if a concurrent resolution on the budget reported by the Committee on the Budget of the Senate sets forth the economic goals (as described in sections 3(a)(2) and 4(b) of the Employment Act of 1946), which the estimates, amounts, and levels (as described in section 301(a)) set forth in such resolution are designed to achieve, shall it be in order to offer to such resolution an amendment relating to such goals, and such amendment shall be in order only if it also proposes to alter such estimates, amounts, and levels in germane fashion in order to be consistent with the goals proposed in such amendment.

(6) A motion to further limit debate is not debatable. A motion to recommit (except a motion to recommit with instructions to report back within a specificed number of days, not to exceed 3, not counting any day on which the Senate is not in session) is not in order. Debate on any such motion to recommit shall be limited to 1 hour, to be equally divided between, and controlled by, the mover and the manager of the concurrent resolution.

(7) Notwithstanding any other rule, and amendment, or series of amendments, to a

concurrent resolution on the budget proposed in the Senate shall always be in order if such amendment or series of amendments proposes to change any figure or figures then contained in such concurrent resolution so as to make such concurrent resolution mathematically consistent or so as to maintain such consistency.

(c) ACTION ON CONFERENCE REPORTS IN THE SENATE.—

(1) The conference report on any concurrent resolution on the budget shall be in order in the Senate at any time after the third day (excluding Saturdays, Sundays, and legal holidays) following the day on which such a conference report is reported and is available to Members of the Senate. A motion to proceed to the consideration of the conference report may be made even though a previous motion to the same effect has been disagreed to.

(2) During the consideration in the Senate of the conference report on any concurrent resolution on the budget, debate shall be limited to 10 hours, to be equally divided between, and controlled by, the majority leader and minority leader or their designees. Debate on any debatable motion or appeal related to the conference report shall be limited to 1 hour, to be equally divided between, and controlled by, the mover and the manager of the conference report.

(3) Should the conference report be defeated, debate on any request for a new conference and the appointment of conferees shall be limited to 1 hour, to be equally divided between, and controlled by, the manager of the conference report and the minority leader or his designee, and should any motion be made to instruct the conferees before the conferees are named, debate on such motion shall be limited to one-half hour, to be equally divided between, and controlled by, the mover and the manager of the conference report. Debate on any amendment to any such instructions shall be limited to 20 minutes, to be equally divided between and controlled by the mover and the manager of the conference report. In all cases when the manager of the conference report is in favor of any motion, appeal, or amendment, the time in opposition shall be under the control of the minority leader or his designee.

(4) In any case in which there are amendments in disagreement, time on each amendment shall be limited to 30 minutes, to be equally divided between, and controlled by, the manager of the conference report and the minority leader or his designee. No amendment that is not germane to the provisions of such amendments shall be received.

(d) REQUIRED ACTION BY CONFERENCE COMMITTEE.—If, at the end of 7 days (excluding Saturdays, Sundays, and legal holidays) after the conferees of both Houses have been appointed to a committee of conference on a concurrent resolution on the budget, the conferees are unable to reach agreement with respect to all matters in disagreement between the two Houses, then the conferees shall submit to their respective Houses, on the first day thereafter on which their House is in session—

(1) a conference report recommending those matters on which they have agreed and reporting in disagreement those matters on which they have not agreed; or

(2) a conference report in disagreement, if the matter in disagreement is an amendment which strikes out the entire text of the concurrent resolution and inserts a substitute text.

(e) CONCURRENT RESOLUTION MUST BE CONSISTENT IN THE SENATE.—It shall not be in order in the Senate to vote on the question of agreeing to—

(1) a concurrent resolution on the budget unless the figures then contained in such resolution are mathematically consistent; or

(2) a conference report on a concurrent resolution on the budget unless the figures contained in such resolution, as recommended in such conference report, are mathematically consistent.

LEGISLATION DEALING WITH CONGRESSIONAL BUDGET MUST BE HANDLED BY BUDGET COMMITTEES

SEC. 306. No bill or resolution, and no amendment to any bill or resolution, dealing with any matter which is within the jurisdiction of the Committee on the Budget of either House shall be considered in that House unless it is a bill or resolution which has been reported by the Committee on the Budget of that House (or from the consideration of which such committee has been discharged) or unless it is an amendment to such a bill or resolution.

HOUSE COMMITTEE ACTION ON ALL APPROPRIATION BILLS TO BE COMPLETED BEFORE FIRST APPROPRIATION BILL IS REPORTED

SEC. 307. Prior to reporting the first regular appropriation bill for each fiscal year, the Committee on Appropriations of the House of Representatives shall, to the extent practicable, complete subcommittee markup and full committee action on all regular appropriation bills for that year and submit to the House a summary report comparing the committee's recommendations with the appropriate levels of budget outlays and new budget authority, and the appropriate levels of total gross obligations for the principal amount of direct loans and total commitments to guarantee loan principal, as set forth in the most recently agreed to concurrent resolution on the budget for that year.

REPORTS, SUMMARIES, AND PROJECTIONS OF CONGRESSIONAL BUDGET ACTIONS

SEC. 308. (a) REPORTS ON LEGISLATION PROVIDING NEW BUDGET AUTHORITY OR TAX EXPENDITURES.—Whenever a committee of either House reports a bill or resolution to its House providing new budget authority (other than continuing appropriations) or new or increased tax expenditures for a fiscal year, the report accompanying that bill or resolution shall contain a statement, prepared after consultation with the Director of the Congressional Budget Office, detailing—

(1) in the case of a bill or resolution providing new budget authority—

(A) how the new budget authority provided in that bill or resolution compares with the new budget authority set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year and the reports submitted under section 302;

(B) a projection for the period of 5 fiscal years beginning with such fiscal year of budget outlays, associated with the budget authority provided in that bill or resolution, in each fiscal year in such period; and

(C) the new budget authority, and budget outlays resulting therefrom, provided by that bill or resolution for financial assistance to State and local governments;

(2) in the case of a bill or resolution providing new or increased tax expenditures—

(A) how the new or increased tax expenditures provided in that bill or resolution will affect the levels of tax expenditures under existing law as set forth in the report accompanying the concurrent resolution on the budget referred to in section 301(a) for such fiscal year, or, if a report accompanying a subsequently agreed to concurrent resolution for such year sets forth such levels, then as set forth in that report; and

(B) a projection for the period of 5 fiscal years beginning with such fiscal year of the tax expenditures which will result from that bill or resolution in each fiscal year in such period; and

(3) in the case of a bill or resolution specifying the level of gross obligations for the principal amount of direct loans or the level of commitments to guarantee loan principal, how such levels compare with the appropriate level of total gross obligations for the principal amount of direct loans or the appropriate level of total commitments to guarantee loan principal, as the case may be, set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year and the reports submitted under section 302.

No projection shall be required for a fiscal year under paragraph (1)(B) or (2)(B) if the committee determines that a projection for that fiscal year is impracticable and states in its report the reason for such impracticability.

(b) UP-TO-DATE TABULATION OF CONGRESSIONAL BUDGET ACTIONS.—The Director of the Congressional Budget Office shall issue periodic reports detailing and tabulating the progress of congressional action on bills and resolutions providing new budget authority and changing revenues and the public debt limit for a fiscal year. Such reports shall include, but are not limited to—

(1) an up-to-date tabulation comparing the new budget authority for such fiscal year in bills and resolutions on which Congress has completed action and estimated outlays, associated with such new budget authority, during such fiscal year to the new budget authority and estimated outlays set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year and the reports submitted under section 302;

(2) an up-to-date status report on all bills and resolutions providing new budget authority and changing revenues and the public debt limit for such fiscal year in both Houses;

(3) an up-to-date comparison of the appropriate level of revenues contained in the most recently agreed to concurrent resolution on the budget for such fiscal year with the latest estimate of revenues for such year (including new revenues anticipated during such year under bills and resolutions on which the Congress has completed action);

(4) an up-to-date comparsion of the appropriate level of the public debt contained in the most recently agreed to concurrent resolution on the budget for such fiscal year with the latest estimate of the public debt during such fiscal year; and

(5) an up-to-date tabulation comparing the gross obligations for the principal amount of direct loans and the commitments to guarantee loan principal for such fiscal year in bills or resolutions on which the Congress has completed action to the appropriate level of total gross obligations for the principal amount of direct loans and the appropriate level of total commitments to guarantee loan principal set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year and the reports submitted under section 302.

COMPLETION OF ACTION ON BILLS PROVIDING NEW BUDGET AUTHORITY SPECIFYING DIRECT LOANS OR LOAN GUARANTEE COMMITMENTS, OR PROVIDING CERTAIN NEW SPENDING AUTHORITY; CONGRESS MAY NOT ADJOURN UNTIL CERTAIN ACTIONS ARE COMPLETED

SEC. 309. (a) COMPLETION OF ACTION ON CERTAIN BILLS AND RESOLUTIONS.—Except as otherwise provided pursuant to this title, not later than the seventh day after Labor Day of each year, the Congress shall complete action on all bills and resolutions—

(1) providing new budget authority for the fiscal year beginning on October 1 of such year, or specifying the level of gross obligations for the principal amount of direct loans or the level of commitments to guarantee loan principal for such fiscal year, other than supplemental, deficiency, and continuing appropriation bills and resolutions, and other than any deficit reduction bill for such year required pursuant to deficit reduction instructions, or revisions of deficit reduction instructions, included in a concurrent resolution revising a concurrent resolution on the budget under section 304; and

(2) providing new spending authority described in section 401(c)(2)(C) which is to become effective during such fiscal year.

Paragraph (1) shall not apply to any bill or resolution if legislation authorizing the enactment of new budget authority to be provided in such bill or resolution has not been timely enacted.

(b) LIMITS ON ADJOURNMENT.—It shall not be in order in either the House of Representatives or the Senate to consider any resolution providing for the adjournment sine die of either House unless—

(1) action has been completed on the concurrent resolution on the budget required to be reported under section 301(a) for the fiscal year beginning on October 1 of such year, and, if a deficit reduction bill or resolution, or both, is required to be reported under section 301(b) for such fiscal year, unless the Congress has completed action on that bill or resolution or both;

(2) action has been completed on the bills and resolutions to which subsection (a) applies and on all continuing appropriation bills and resolutions; and

(3) the Committees on the Budget of the House of Representatives and the Senate have each reported to their respective Houses a notice certifying that the total amount of new budget authority provided for in each of the bills and resolutions described in paragraph (2), and the total amount of budget outlays associated with such budget authority, comply with the allocations of total budget authority and budget outlays under section 302.

NEW BUDGET AUTHORITY, NEW SPENDING AUTHORITY, LOANS AND LOAN GUARANTEE COMMITMENTS, AND REVENUE LEGISLATION MUST BE WITHIN APPROPRIATE LEVELS

SEC. 310. (a) LEGISLATION SUBJECT TO POINT OF ORDER—After the Congress has completed action on the concurrent resolution on the budget referred to in section 301(a) for a fiscal year, and, if a deficit reduction bill or resolution, or both, for such fiscal year are required to be reported under section 301(b) for such fiscal year, after that bill has been enacted into law or that resolution has been agreed to, it shall not be in order in either the House of Representatives or the Senate to consider any bill, resolution, or amendment providing new budget authority for such fiscal year or any of the four succeeding fiscal years, providing new spending authority described in section 401(c)(2)(C) to become effective during such fiscal year or any of the four succeeding fiscal years, specifying the levels of total gross obligations for the principal amount of direct loans or total commitments to guarantee loan principal for such fiscal year or any of the four succeeding fiscal years, or reducing revenues for such fiscal year or any of the four succeeding fiscal years, or any conference report on any such bill or resolution, if—

(1) the enactment of such bill or resolution as reported;

(2) the adoption and enactment of such amendment; or

(3) the enactment of such bill or resolution in the form recommended in such bill or resolution in the form recommended in such conference report; would—

(A) cause the appropriate level of total new budget authority or total budget outlays set forth for any fiscal year in the most recently agreed to concurrent resolution on the budget for such fiscal year to be exceeded;

(B) cause revenues for any such fiscal year to be less than the recommended level of Federal revenues set forth in such concurrent resolution for such fiscal year;

(C) cause the appropriate level of total gross obligations for the principal amount of direct loans or the appropriate level of total commitments to guarantee loan principal set forth for any such fiscal year in such concurrent resolution to be exceeded;

(D) cause the appropriate level of total new budget authority and budget outlays for any such fiscal year allocated under section 302 to the committee of the Senate or the House of Representatives, as the case may be, and to the subcommittees of the Committee on Appropriations of the Senate and the House of Representatives, as the case may be, having legislative jurisdiction over such bill, resolution, amendment, or conference report, to be exceeded;

(E) in the case of a bill, resolution, amendment, or conference report providing regular or supplemental new budget authority for any such fiscal year, cause the total amount of new budget authority and budget outlays for such fiscal year allocated under section 302 to regular new budget authority or supplemental new budget authority and to the subcommittee of the Committee on Appropriations of the Senate or the House of Representatives, as the case may be, having legislative jurisdiction over such bill, resolution, amendment, or conference report, to be exceeded; or

(F) cause the appropriate level of gross obligations for the principal amount of direct loans or the appropriate level of commitments to guarantee loan principal allocated under section 302 to the subcommittee of the Committee on Appropriations of the Senate or the House of Rpresentatives, as the case may be, having legislative jurisdiction over such bill, resolution, amendment, or conference report to be exceeded.

For purposes of this subsection, the term "regular new budget authority" means new budget authority provided in a regular appropriation Act and the term "supplemental new budget authority" means new budget authority provided in a supplemental appropriation Act.

(b) Determination of Outlays and Revenues.—For purposes of subsection (a), the budget outlays to be made during a fiscal year and revenues to be received during a fiscal year shall be determined on the basis of estimates made by the Committee on the Budget of the House of Representatives or the Senate, as the case may be.

TITLE IV—ADDITIONAL PROVISIONS TO IMPROVE FISCAL PROCEDURES BILLS PROVIDING NEW SPENDING AUTHORITY

SEC. 401. (a) LEGISLATION PROVIDING CONTRACT OR BORROWING AUTHORITY.—It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which provides new spending authority described in subsection (c) (2) (A) or (B) (or any amendment which provides such new spending authority), unless that bill, resolution, or amendment also provides that such new spending authority is to be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

(b) LEGISLATION PROVIDING ENTITLEMENT AUTHORITY.—

(1) It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which provides new spending authority described in subsection (c)(2)(C) (or any amendment which provides such new spending authority) which is to become effective before the first day of the fiscal year which begins during the calendar year in which such bill or resolution is reported.

(2) If any committee of the House of Representatives or the Senate reports any bill or resolution which provides new spending authority described in subsection (c)(2)(C) which is to become effective during a fiscal year and the amount of new budget authority which will be required for such fiscal year if such bill or resolution is enacted as so reported exceeds the appropriate allocation of new budget authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year, such bill or resolution shall then be referred to the Committee on Appropriations of that House with instructions to report it, with the committee's recommendations, within 15 calendar days (not counting any day on which that House is not in session) beginning with the day following the day on which it is so referred. If the Committee on Appropriations of either House fails to report a bill or resolution referred to it under this paragraph within such 15-day period, the committee shall automatically be discharged from further consideration of such bill or resolution and such bill or resolution shall be placed on the appropriate calendar.

(3) The Committee on Appropriations of each House shall have jurisdiction to report any bill or resolution referred to it under paragraph (2) with an amendment which limits the total amount of new spending authority provided in such bill or resolution.

(c) Definitions.—

(1) For purposes of this section, the term "new spending authority" means spending authority not provided by law on the effective date of this section, including any increase in or addition to spending authority provided by law on such date.

(2) For purposes of paragraph (1), the term "spending authority" means authority (whether temporary or permanent)—

(A) to enter into contracts under which the United States is obligated to make outlays, the budget authority for which is not provided in advance by appropriation Acts;

(B) to incur indebtedness (other than indebtedness incurred under the Second Liberty Bond Act) for the repayment of which the United States is liable, the budget au-

thority for which is not provided in advance by appropriation Acts; and

(C) to make payments (including loans and grants), the budget authority for which is not provided for in advance by appropriation Acts, to any person or government if, under the provisions of the law containing such authority, the United States is obligated to make such payments to persons or governments who meet the requirements established by such law.

Such term does not include authority to insure or guarantee the repayment of indebtedness incurred by another person or government.

(d) EXCEPTIONS.—

(1) Subsections (a) and (b) shall not apply to new spending authority if the budget authority for outlays which will result from such new spending authority is derived—

(A) from a trust fund established by the Social Security Act (as in effect on the date of the enactment of this Act); or

(B) from any other trust fund, 90 percent or more of the receipts of which consist or will consist of amounts (transferred from the general fund of the Treasury) equivalent to amounts of taxes (related to the purposes for which such outlays are or will be made) received in the Treasury under specified provisions of the Internal Revenue Code of 1954.

(2) Subsections (a) and (b) shall not apply to new spending authority which is an amendment to or extension of the State and Local Fiscal Assistance Act of 1972, or a continuation of the program of fiscal assistance to State and local governments provided by that Act, to the extent so provided in the bill or resolution providing such authority.

(3) Subsections (a) and (b) shall not apply to new spending authority to the extent that—

(A) the outlays resulting therefrom are made by an organization which is (i) a mixed-ownership Government corporation (as defined in section 201 of the Government Corporation Control Act), or (ii) a wholly owned Government corporation (as defined in section 101 of such Act) which is specifically exempted by law from compliance with any or all of the provisions of that Act; or

(B) the outlays resulting therefrom consist exclusively of the proceeds of gifts or bequests made to the United States for a specific purpose.

REPORTING OF AUTHORIZING LEGISLATION

SEC. 402. (a) REQUIRED REPORTING DATE.—Except as otherwise provided in this section, it shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority for a fiscal year, or which authorizes the guarantee of loan principal for a fiscal year, unless that bill or resolution is reported in the House or the Senate, as the case may be, on or before May 15 preceding the beginning of such fiscal year.

(b) EMERGENCY WAIVER IN THE HOUSE.—If the Committee on Rules of the House of Representatives determines that emergency conditions require a waiver of subsection (a) with respect to any bill or resolution, such committee may report, and the House may consider and adopt, a resolution waiving the application of subsection (a) in the case of such bill or resolution.

(c) WAIVER IN THE SENATE.—

(1) The committee of the Senate which reports any bill or resolution may, at or after the time it reports such bill or resolution, report a resolution to the Senate (A) providing for the waiver of subsection (a) with respect to such bill or resolution, and (B) stating the reasons why the waiver is necessary. The resolution shall then be referred to the Committee on the Budget of the Senate. That committee shall report the resolution to the Senate, within 10 days after the resolution is referred to it (not counting any day on which the Senate is not in session) beginning with the day following the day on which it is so referred accompanied by that committee's recommendations and reasons for such recommendations with respect to the resolution. If the committee does not report the resolution within such 10-day period, it shall automatically be discharged from further consideration of the resolution and the resolution shall be placed on the calendar.

(2) During the consideration of any such resolution, debate shall be limited to one hour, to be equally divided between, and controlled by, the majority leader and the minority leader or their designees, and the time on any debatable motion or appeal shall be limited to 20 minutes, to be equally divided between, and controlled by, the mover and the manager of the resolution. In the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from the time under their control on the passage of such resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal. No amendment to the resolution is in order.

(3) If, after the Committee on the Budget has reported (or been discharged from further consideration of) the resolution, the Senate agrees to the resolution, then subsection (a) of this section shall not apply with respect to that bill or resolution referred to in the resolution.

(d) CERTAIN BILLS AND RESOLUTIONS RECEIVED FROM OTHER HOUSE.—Notwithstanding the provisions of subsection (a), if under that subsection it is in order in the House of Representatives to consider a bill or resolution of the House, then it shall be in order to consider a companion or similar bill or resolution of the Senate: and if under that subsection it is in order in the Senate to consider a bill or resolution of the Senate, then it shall be in order to consider a companion or similar bill of the House of Representatives.

(e) EXCEPTIONS.—

(1) Subsection (a) shall not apply with respect to new spending authority described in section 401(c)(2)(C).

(2) Subsection (a) shall not apply with respect to new budget authority authorized in a bill or resolution for any provision of the Social Security Act if such bill or resolution also provides new spending authority described in section 401(c)(2)(C) which, under section 401(d)(1)(A), is excluded from the application of section 401(b).

(f) Study of Existing Spending Authority and Permanent Appropriations.—The Committees on Appropriations of the House of Representatives and the Senate shall study on a continuing basis those provisions of law, in effect on the effective date of this section, which provide spending authority or permanent budget authority. Each committee shall, from time to time, report to its House its recommendations for terminating or modifying such provisions.

ANALYSIS BY CONGRESSIONAL BUDGET OFFICE

SEC. 403. (a) The Director of the Congressional Budget Office shall, to the extent practicable, prepare for each bill or resolution of a public character reported by any committee of the House of Representatives or the Senate (except the Committee on Appropriations of each House), and submit to such committee—

(1) an estimate of the costs which would be incurred in carrying out such bill or resolution in the fiscal year in which it is to become effective and in each of the 4 fiscal years following such fiscal year, together with the basis for each such estimate;

(2) an estimate of the cost which would be incurred by State and local governments in carrying out or complying with any significant bill or resolution in the fiscal year in which it is to become effective and in each of the four fiscal years following such fiscal year, together with the basis for each such estimate; and

(3) a comparison of the estimate of costs described in paragraphs (1) and (2) with any available estimate of costs made by such committee or by any Federal agency.

The estimate and comparison so submitted shall be included in the report accompanying such bill or resolution if timely submitted to such committee before such report is filed.

(b) For purposes of subsecton (a)(2), the term "local government" has the same meaning as in section 103 of the Intergovernmental Cooperation Act of 1968.

(c) For purposes of subsection (a)(2), the term "significant bill or resolution" is defined as any bill or resolution which in the judgment of the Director of the Congressional Budget Office is likely to result in an annual cost to State and local governments of $200,000,000 or more, or is likely to have exceptional fiscal consequences for a geographic region or a particular level of government.

LEGISLATION PROVIDING AUTHORITY TO MAKE DIRECT LOANS OR TO GUARANTEE LOAN PRINCIPAL

SEC. 405. It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which provides, extends, or enlarges authority to incur obligations for the principal amount of direct loans or obligations for the guarantee of loan principal (or any amendment which provides, extends, or enlarges such authority) unless that bill, resolution, or amendment also provides that such authority is to be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

* * * * *

BUDGET DATA BASED ON CONTINUATION OF EXISTING LEVEL OF SERVICES

SEC. 605. (a) On or before November 10 of each year (beginning with 1983), the President shall submit to the Senate and the House of Representatives a statement containing estimates of current law budget authority, current law outlays, current law spending authority, and current law revenues for the ensuing fiscal year. The estimates of current law budget authority, current law outlays, and current law spending authority submitted pursuant to this section shall be shown by function and subfunctions (in accordance with the classifications in the budget summary table entitled "Budget Authority and Outlays by Function and Agency" used in the Budget submitted pursuant to section 201(a) of the Budget and Accounting Act, 1921), by major pro-

grams within each such function, and by agency. Accompanying these estimates shall be the economic and programmatic assumptions underlying such estimates, such as the rate of inflation, the rate of real economic growth, the unemployment rate, program caseloads, and pay increases.

(b) The Joint Economic Committee shall review the estimates so submitted, and shall submit to the Committees on the Budget of both Houses an economic evaluation thereof on or before December 31 of each year.

YEAR-AHEAD REQUESTS FOR AUTHORIZATION OF NEW BUDGET AUTHORITY

SEC. 606. Notwithstanding any other provision of law, any request for the enactment of legislation authorizing the enactment of new budget authority to continue a program or activity for a fiscal year (beginning with the fiscal year commencing October 1, 1976) shall be submitted to the Congress not later than May 15 of the year preceding the year in which such fiscal year begins. In the case of a request for the enactment of legislation authorizing the enactment of new budget authority for a new program or activity which is to continue for more than one fiscal year, such request shall be submitted for at least the first 2 fiscal years.

* * * * *

EXERCISE OF RULEMAKING POWERS

SEC. 904. (a) The provisions of this title (except section 905) and of titles I, III, and IV and the provisions of sections 606, 701, 703, 1017, 1105, 1106, and 1107 are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

(b) Any provision of title III (except section 301A or 301B) or title IV may be waived or suspended in the Senate by a majority vote of the Members voting, a quorum being present, or by the unanimous consent of the Senate.

(c) Appeals in the Senate from the decisions of the Chair relating to any provision of title III or IV or section 1017 shall, except as otherwise provided therein, be limited to 1 hour, to be equally divided between, and controlled by, the mover and the manger of the resolution, concurrent resolution, reconciliation bill, or rescission bill, as the case may be.

TITLE XI—REGULATORY BUDGET PROCEDURE STATEMENT OF FINDINGS AND PURPOSE

SEC. 1101. (a) The Congress finds that—

(1) Federal rules and regulations often impose excess costs of compliance upon the non-Federal sector;

(2) Federal rules and regulations have grown in number and scope so rapidly that the agencies and the Congress have not had an adequate opportunity to examine the costs of compliance with such rules and regulations; and

(3) it is the responsibility of the Congress to determine the appropriate levels of costs of compliance with the Federal rules and regulations.

(b) It is the purpose of this title to require the Congress to establish, for each fiscal year, a regulatory budget for each major functional category used in the concurrent resolution the budget for such fiscal year which sets the maximum costs of compliance with all rules and regulations promulgated under activities within each such functional category.

DEVELOPMENT OF REGULATORY COSTS ANALYSIS PROCEDURES

SEC. 1102. (a) The President shall—

(1) establish criteria for use in the determination of which rules or regulations are rules or regulations within the meaning of this title and furnish such criteria to the head of each agency; and

(2) develop methods of determining the costs of compliance with rules or regulations and furnish such methods to the head of each agency.

(b) In developing the methods required under subsection (a)(2), the President shall—

(1) take such action as may be necessary to insure that such methods are based upon the most accurate available statistical and accounting knowledge and techniques; and

(2) provide, to the maximum extent feasible, that such methods are uniform for all agencies while taking into account the different functions of each agency.

(c)(1) At least ninety days before the submission of the criteria and methods required under subsection (a) to the head of each agency, the President shall—

(A) publish such criteria and methods in the Federal Register in order to solicit public comments thereon for a period not in excess of forty-five days; and

(B) submit such criteria and methods to the Comptroller General, the Chairman of the Administrative Conference of the United States, and the Director for their review and comments.

(2) The Comptroller General, the Chairman of the Administrative Conference of the United States, and the Director shall submit comments and recommendations concerning the criteria and methods submitted pursuant to paragraph (1)(B) within forty-five days of the receipt of such criteria and methods.

(d) Each year, at a time and in a manner consistent with the provisions of sections 1103 and 1104, the President shall review and update the criteria and methods established under this section in accordance with the procedures established by this section.

(e) The President may delegate his responsibilities under this section to the Director of the Office of Management and Budget.

(f) The head of each agency shall utilize the criteria and methods developed by the President under this section to carry out section 1103.

REGULATORY COST COMPLIANCE REPORTS

SEC. 1103. (a)(1) Each year, the head of each agency shall conduct a study of the costs of compliance with rules and regulations promulgated by that agency. The head of each agency shall utilize the criteria established by the President under section 1102 in conducting the study required under this subsection.

(2) The head of each agency shall submit a report to the Director of the Office of Management and Budget and the Comptroller General by the November 10 preceding the beginning of each fiscal year. The report shall contain the results of the study required under paragraph (1), and shall include—

(A)(i) a statement of the costs of compliance for the fiscal year ending on the September 30 prior to the day on which the report is submitted;

(ii) a comparison of the costs of compliance for such fiscal year with the regulatory budget, if any, established for such fiscal year under section 1105; and

(iii) a full explanation for any costs of compliance which exceeded the regulatory budget for such fiscal year; and

(B) a statement of the estimated costs of compliance for the fiscal year in process when the report is submitted and for the succeeding fiscal year—

(i) with rules and regulations of such agency in effect on the date on which the report is submitted;

(ii) with rules and regulations of such agency which are to be issued, or are expected to be issued, after the date on which the report is submitted; and

(iii) with all rules and regulations of such agency as specified in clauses (i) and (ii).

(3) The report required by this subsection shall contain an allocation of the costs of compliance specified in such report pursuant to paragraph (2) among the major functional categories used in the most recently agreed to concurrent resolution on the budget for the fiscal year in which the report is submitted.

(b) The Director of the Office of Management and Budget shall compile the reports submitted by agencies under subsection (a) and shall submit such reports to the President.

REGULATORY BUDGET RECOMMENDATIONS

SEC. 1104. (a) Except as provided in subsection (b), the Budget transmitted pursuant to section 201(a) of the Budget and Accounting Act, 1921, for each fiscal year shall include a regulatory budget for each agency which shall contain recommendations for the maximum costs of compliance with all rules and regulations of each agency during the fiscal year for which the Budget is submitted. If the proposed regulatory budget for any agency is less than the estimated total costs of compliance determined by the agency head under section 1103(a)(2)(B), the Budget message shall recommend specific actions which may be taken during such fiscal year to reduce the costs of compliance.

(b) The regulatory budget required under subsection (a) for each of the first two fiscal years to which this title applies shall only contain recommendations for the maximum costs of compliance during each such fiscal year with all rules and regulations which each agency expects to issue during each such fiscal year. If the proposed regulatory budget for rules and regulations expected to be issued by any agency in any such fiscal year is less than the estimated costs of compliance determined by the agency head under section 1103(a)(2)(B)(ii), the Budget message shall recommend specific actions which may be taken during such fiscal year to reduce such costs of compliance.

(c) Each regulatory budget for an agency required under subsection (a) for a fiscal year shall contain an allocation of the costs of compliance with the rules or regulations of the agency among—

(1) the major functional categories used in the Budget transmitted for such fiscal year pursuant to section 201(a) of the Budget and Accounting Act, 1921; and

(2) the committees of the Senate and the House of Representatives having legislative jurisdiction over the programs and activities of the agency.

(d) The President shall submit with the regulatory budget required by this section for each agency for each fiscal year a copy of the report submitted by the agency under section 1103(a) by November 10 of the fiscal year preceding such fiscal year.

REGULATORY BUDGET

SEC. 1105. (a)(1) The concurrent resolution on the budget referred to in section 301(a) for a fiscal year shall include a separate section containing a regulatory budget which, except as provided in paragraph (2), establishes the maximum costs of compliance with all rules and regulations of all agencies which will be in effect during such fiscal year. In developing such regulatory budget, the Congress shall utilize the reports submitted by the head of each agency pursuant to section 1103(a) and the recommendations submitted by the President pursuant to section 1104.

(2) The regulatory budget included pursuant to paragraph (1) in the concurrent resolution on the budget referred to in section 301(a) for each of the first two fiscal years to which this title applies shall only set the maximum costs of compliance during each such fiscal year with all rules and regulations which each agency expects to issue during each such fiscal year.

(3) Each regulatory budget required under paragraph (1) for a fiscal year shall contain an allocation of the costs of compliance with all rules or regulations of all agencies which will be in effect during a fiscal year among—

(A) the major functional categories used in the concurrent resolution on the budget in which such regulatory budget is included; and

(B) the committees of the Senate and the House of Representatives having legislative jurisdiction over the programs and activities of the agency.

(b) On or before March 15 of each year, each standing committee of the House of Representatives shall submit to the Committee on the Budget of the House, each standing committee of the Senate (and each other commitee of the Senate which has legislative jurisdiction) shall submit to the Committee on the Budget of the Senate, and the Joint Economic Committee and Joint Committee on Internal Revenue Taxation shall submit to the Committees on the Budget of both Houses its views and estimates with respect to the establishment of the maximum costs of compliance with rules and regulations which relate to matters within the respective jurisdiction or function of such committee or joint committee.

(c) The report accompanying the concurrent resolution on the budget in which a regulatory budget is included shall contain an allocation of the costs of compliance for each major functonal category specified in such regulatory budget among each agency which administers activities within each such category.

REPORTS AND SUMMARIES OF CONGRESSIONAL ACTION

SEC. 1106. (a) Whenever a committee of either House reports a bill or resolution to its House, the report accompanying that bill or resolution shall contain a statement, prepared after consultation with the Director, which contains an estimate, for the fiscal year in which such bill or resolution is to be effective and each of the four succeeding fiscal years, of the costs of compliance with the rules or regulations required to carry out the provisions of such bill or resolution.

(b) The Director shall issue periodic reports detailing and tabulating the progress of congressional action on bills and resolutions which will create costs of compliance as a result of rules or regulations required to carry out the provisions of such bill or resolution. Such report shall include—

(1) an up-to-date tabulation of the costs of compliance with rules or regulations required to carry out the provisions of each such bill or resolution on which Congress has completed action;

(2) an up-to-date status report on all bills and resolutions which would create such costs of compliance; and

(3) an up-to-date comparison of the maximum costs of compliance established pursuant to section 1105 with the costs of compliance—

(A) with rules or regulations in effect on the date of such report; and

(B) with rules or regulations required to carry out the provisions of bills or resolutions on which Congress has completed action.

(c) The estimate of costs of compliance required by subsection (a), the tabulation of the costs of compliance required by paragraph (1) of subsection (b), and the comparison of the costs of compliance required under paragraph (3) of such subsection shall include an allocation of such costs of compliance among—

(1) the agencies who will issue the rules or regulations from which such costs of compliance will result;

(2) the major functional categories used in the concurrent resolution on the budget most recently agreed to under title III; and

(3) in the case of a tabulation required under paragraph (1) of subsection (b) or a comparison required under paragraph (3) of such subsection, the committees of the Senate and the House of Representatives having legislative jurisdiction over the bill or resolution for which such tabulation or comparison, as the case may be, is made.

NEW LEGISLATION MUST BE WITHIN REGULATORY BUDGET

SEC. 1107. (a) After the Congress has completed action on the concurrent resolution on the budget referred to in section 301(a) for a fiscal year, it shall not be in order in either the House of Representatives or the Senate to consider any bill, resolution, or amendment which would result in additional costs of compliance in such fiscal year, or any conference report on such bill or resolution, if—

(1) the enactment of such bill or resolution as reported;

(2) the adoption and enactment of such amendment; or

(3) the enactment of such bill or resolution in the form recommended in such conference report;

would cause the total costs of compliance for such fiscal year to exceed the maximum costs of compliance established in the regulatory budget for such fiscal year included in such concurrent resolution on the budget.

(b) For purposes of subsection (a), the costs of compliance during a fiscal year shall be determined on the basis of estimates made by the Committee on the Budget of the House of Representatives or the Senate, as the case may be.

(c)(1) The committee of the Senate which reports any bill or resolution may, at or after the time it reports such bill or resolution, report a resolution to the Senate (A) providing for the waiver of subsection (a) with respect to such bill or resolution, and (B) stating the reasons why the waiver is necessary. The resolution shall then be referred to the Committee on the Budget of the Senate. The Committee on the Budget shall report the resolution to the Senate, within 10 days after the resolution is referred to it (not counting any day on which the Senate is not in session) beginning with the day following the day on which it is so referred, accompanied by that committee's recommendations and reasons for such recommendations with respect to the resolution. If the committee does not report the resolution within such 10-day period, it shall automatically be discharged from further consideration of the resolution and the resolution shall be placed on the calendar.

(2) During the consideration of any such resolution, debate shall be limited to one hour, to be equally divided between, and controlled by, the majority leader and the minority leader or their designees, and the time on any debatable motion or appeal shall be limited to 20 minutes, to be equally divided between, and controlled by, the mover and the manager of the resolution. In the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from the time under their control on the passage of such resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal. No amendment to the resolution is in order.

(3) If, after the Committee on the budget has reported (or been discharged from further consideration of) the resolution, the Senate agrees to the resolution, then subsection (a) of this section shall not apply with respect to that bill or resolution referred to in the resolution.

DEFINITIONS

SEC. 1108. For purposes of this title—

(1) the term "agency" has the meaning given to it by section 551(1) of title 5, United States Code;

(2) the term "Comptroller General" means the Comptroller General of the United States;

(3) the term "costs of compliance" means, with respect to an agency, the costs imposed upon the non-Federal sector as a result of compliance with rules or regulations promulgated by that agency, including wages, salaries, benefits, capital costs, rents, interests, State and local taxes, and costs due to data collection and recordkeeping, preparation and submission of forms, data, and reports, purchase of necessary equipment, management time, training, and changes in the quality or mixture of raw materials or output, except that such term does not include normal business or recordkeeping costs which would exist in the absence of such rules or regulations;

(4) the term "Director" means the Director of the Congressional Budget Office;

(5) the term "non-Federal sector" means an individual, partnership, association, corporation, business trust or legal representative thereof, organized group of individuals, labor organization, State or territorial government or branch thereof, or political subdivision of a State or territory or a branch thereof; and

(6) the term "rule or regulation" has the meaning given to the term "rule" by section 551(4) of title 5, United States Code.

EFFECTIVE DATE

SEC. 1109. The provisions of this title shall take effect on the date of its enactment, except that the provisions of sections 1103 through 1107 shall apply only with respect to the first fiscal year beginning at least eighteen months after the date of enactment of this title, and succeeding fiscal years.

* * * * *

TITLE 31, UNITED STATES CODE

* * * * *

§ 1105. Budget contents and submission to Congress

(a) During the first 15 days of each regular session of Congress, the President shall submit a budget of the United States Government for the following fiscal year. Each budget shall include a budget message and summary and supporting information. The President shall include in each budget the following:

(1) information on activities and functions of the Government.

(2) when practicable, information on costs and achievements of Government programs.

(3) other desirable classifications of information.

(4) a reconciliation of the summary information on expenditures with proposed appropriations.

(5) except as provided in subsection (b) of this section, estimated expenditures and proposed appropriations the President decides are necessary to support the Government in the fiscal year for which the budget is submitted and the 4 fiscal years after that year.

(6) estimated receipts of the Government in the fiscal year for which the budget is submitted and the 4 fiscal years after that year under—

(A) laws in effect when the budget is submitted; and

(B) proposals in the budget to increase revenues.

(7) appropriations, expenditures, and receipts of the Government in the fiscal year.

(8) estimated expenditures and receipts, and appropriations and proposed appropriations, of the Government for the current fiscal year.

(9) balanced statements of the—

(A) condition of the Treasury at the end of the prior fiscal year;

(B) estimated condition of the Treasury at the end of the current fiscal year; and

(C) estimated condition of the Treasury at the end of the current fiscal year for which the budget is submitted if financial proposals in the budget are adopted.

(10) essential information about the debt of the Government.

(11) other financial information the President decides is desirable to explain in practicable detail the financial condition of the Government.

(12) for each proposal in the budget for legislation that would establish or expand a Government activity or function, a table showing—

(A) the amount proposed in the budget for appropriation and for expenditure because of the proposal in the fiscal year for which budget is submitted; and

(B) the estimated appropriation required because of the proposal for each of the 4 fiscal years after that year that the proposal will be in effect.

(13) an allowance for additional estimated expenditures and proposed appropriations for the fiscal year for which the budget is submitted.

(14) an allowance for unanticipated uncontrollable expenditures for the year.

(15) a separate statement on each of the items referred to in section 301(a)(1)-(7) of the Congressional Budget Act of 1974 (2 U.S.C. 632(a)(1)-(7)).

(16) the level of tax expenditures under existing law in the tax expenditures budget (as defined in section 3(a)(3) of the Congressional Budget Act of 1974 (2 U.S.C. 622(a)(3)) for the fiscal year for which the budget is submitted, considering projected economic factors and changes in the existing levels based on proposals in the budget.

(17) information on estimates of appropriations for the fiscal year following the fiscal year for which the budget is submitted for grants, contracts, and other payments under each program for which there is an authorization of appropriations for that following fiscal year when the appropriations are authorized to be included in an appropriation law for the fiscal year before the fiscal year in which the appropriation is to be available for obligation.

(18) a comparison of the total amount of budget outlays for the prior fiscal year, estimated in the budget submitted for that year, for each major program having relatively uncontrollable outlays with the total amount of outlays for that program in that year.

(19) a comparison of the total amount of receipts for the prior fiscal year, estimated in the budget submitted for that year, with receipts received in that year, and for each major source of receipts, a comparison of the amount of receipts estimated in that budget with the amount of receipts from that source in that year.

(20) an analysis and explanation of the differences between each amount compared under clauses (18) and (19) of this subsection.

(21) a horizontal budget showing—

(A) the programs for meteorology and of the National Climate Program established under section 5 of the National Climate Program Act (15 U.S.C. 2904);

(B) specific aspects of the program of, and appropriations for, each agency; and

(C) estimated goals and financial requirements.

(22) a statement of budget authority, proposed budget authority, budget outlays, and proposed budget outlays, and descriptive information in terms of—

(A) a detailed structure of national needs that refers to the missions and programs of agencies (as defined in section 101 of this title); and

(B) the missions and basic programs.

(23) separate appropriation accounts for appropriations under the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et seq.) and the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 801 et seq.).

(24) recommendations on the return of Government capital to the Treasury by a mixed-ownership corporation (as defined in section 9101(2) of this title) that the President decides are desirable.

(25) all essential facts regarding direct lending by the Government, and guarantees by the Government of the repayment of indebtedness incurred by another person or government.

(b) Estimated expenditures and proposed appropriations for the legislative branch and the judicial branch to be included in each budget under subsection (a)(5) of this section shall be submitted to the President before October 16 of each year and included in the budget by the President without change.

(c) The President shall recommend in the budget appropriate action to meet an estimated deficiency when the estimated receipts for the fiscal year for which the budget is submitted (under laws in effect when the budget is submitted) and the estimated amounts in the Treasury at the end of the current fiscal year available for expenditure in the fiscal year for which the budget is submitted, are less than the estimated expenditures for that year. The President shall make recommendations required by the public interest when the estimated receipts and estimated amounts in the Treasury are more than the estimated expenditures.

(d) When the President submits a budget or supporting information about a budget, the President shall include a statement on all changes about the current fiscal year that were made before the budget or information was submitted.

(e) Notwithstanding any other provision of law, the President shall include in the budget submitted under subsection (a) proposed budget authority, direct loans, and commitments to guarantee loan principal, and estimates of outlays and receipts, for all activities of all departments, agencies, establishments, and instrumentalities of the Federal Government.

* * * * *

§ 1115. Outlays shall not exceed revenues

(a) Notwithstanding any other provision of law, the budget transmitted pursuant to section 1105 of this title, the supplemental summary submitted pursuant to section 1106(a) of this title, or any statement of changes submitted pursuant to section 1106 (b) of this title, shall not—

(1) contain—

(A) any request for budget authority for a fiscal year which will result in an estimate of total outlays which exceeds, or

(B) any estimate of total outlays for a fiscal year which exceeds,

the estimate of total revenues for such fiscal year contained in such budget, summary, or statement; or

(2) set forth an estimate of total revenues for a fiscal year which exceeds an amount which bears the same ratio to the estimated gross national product for such fiscal year as the average of the ratios of estimated total revenues for each of the five fiscal years preceding such fiscal year to the estimated gross national product for each such preceding fiscal year.

(b) The provisions of subsection (a) shall not apply to any such budget, summary, or statement submitted for a fiscal year if a declaration of war is in effect or if the Armed Forces of the United States are engaged in combat at the time such budget, summary, or statement is submitted.

(c) The President may submit such a budget, summary, or statement for a fiscal year which does not comply with subsection (a) if the President determines that a national economic emergency, such as a recession, makes compliance with the provisions of such subsection impracticable in such fiscal year. For purposes of the preceding sentence, a recession is a decline in the gross national product during any two consecutive fiscal quarters. The President shall include in any such budget, summary, or statement, a description of his determination under this subsection and a recommendation that the Congress waive the provisions of subsec-

tion (a) of section 301A of the Congressional Budget Act of 1974 with respect to any concurrent resolution on the budget for such fiscal year, in accordance with subsection (e) of such section.●

ADDITIONAL COSPONSORS

S. 27

At the request of Mr. DOLE, the name of the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 27, a bill to amend the Internal Revenue Code of 1954 to make permanent the allowance of a deduction for eliminating architectural and transportation barriers for the handicapped and to increase the amount of such deduction from $25,000 to $100,000.

S. 1018

At the request of Mr. CHAFEE, the name of the Senator from Ohio (Mr. GLENN) was added as a cosponsor of S. 1018, a bill to protect and conserve fish and wildlife resources, and for other purposes.

S. 2376

At the request of Mr. GRASSLEY, the name of the Senator from Illinois (Mr. PERCY) was added as a cosponsor of S. 2376, a bill to direct the Secretary of the Treasury or his delegate to conduct a study of the advisability of replacing the current Federal income tax system for individuals and corporations.

S. 2419

At the request of Mr. DECONCINI, the name of the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of S. 2419, a bill to amend title 28, United States Code, regarding venue, and for other purposes.

S. 2892

At the request of Mr. JEPSEN, the name of the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 2892, a bill to clarify the definition of abuse in the Natural Gas Policy Act.

S. 2902

At the request of Mr. THURMOND, the names of the Senator from Georgia (Mr. MATTINGLY), the Senator from South Dakota (Mr. ABDNOR), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 2902, a bill to define the affirmative defense of insanity and to provide a procedure for the commitment of offenders suffering from a mental disease or defect, and for other purposes.

SENATE JOINT RESOLUTION 234

At the request of Mr. GOLDWATER, the name of the Senator from Minnesota (Mr. DURENBERGER) was added as a cosponsor of Senate Joint Resolution 234, a joint resolution to provide for the designation of the week commencing with the third Monday in February 1983 as "National Patriotism Week."

SENATE JOINT RESOLUTION 241

At the request of Mr. HUMPHREY, the names of the Senator from New Mexico (Mr. SCHMITT), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of Senate Joint Resolution 241, a joint resolution to provide for the designation of the week of December 12, 1982 through December 18, 1982 as "National Drunk and Drugged Driving Awareness Week."

SENATE JOINT RESOLUTION 242

At the request of Mr. JEPSEN, the names of the Senator from Rhode Island (Mr. CHAFEE), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of Senate Joint Resolution 242, a joint resolution designating September 22, 1982, as "American Businesswomen's Day."

SENATE JOINT RESOLUTION 245

At the request of Mr. KENNEDY, the name of the Senator from Missouri (Mr. EAGLETON) was added as a cosponsor of Senate Joint Resolution 245, a joint resolution making an urgent supplemental appropriation for the Department of Labor for the fiscal year ending September 30, 1982.

SENATE CONCURRENT RESOLUTION 121—CONCURRENT RESOLUTION RELATING TO CHILD NUTRITION PROGRAMS

Mr. DOLE (for himself, Mr. LEAHY, Mr. ANDREWS, Mr. BAUCUS, Mr. BIDEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BURDICK, Mr. CANNON, Mr. CHAFEE, Mr. DANFORTH, Mr. DIXON, Mr. FORD, Mr. GORTON, Mr. HATFIELD, Mr. HEINZ, Mr. HUDDLESTON, Mr. INOUYE, Mr. JACKSON, Mr. JEPSEN, Mr. JOHNSTON, Mr. KENNEDY, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. RIEGLE, Mr. ROTH, Mr. STAFFORD, Mr. TSONGAS, Mr. WEICKER, and Mr. ZORINSKY) submitted the following concurrent resolution; which was referred to the Committee on Agriculture, Nutrition, and Forestry:

SENATE CONCURRENT RESOLUTION 121

Whereas the United States has been committed to assuring adequate nutrition for school children since the enactment of the National School Lunch Act (42 U.S.C. 1751 et seq.) in 1946;

Whereas, shocking conditions of Americans suffering from hunger and malnutrition were once prevalent in this century;

Whereas the Congress has successfully responded by initiating a comprehensive national effort to reduce domestic hunger and malnutrition;

Whereas nutrition was declared to be a Federal responsibility by President Richard M. Nixon in 1969, at the White House Conference on Food, Nutrition, and Health;

Whereas nutrition assistance to mothers and children at critical periods of growth can substantially reduce infant mortality and promote long-term health;

Whereas the child nutrition programs represent a vital investment in our country's future well-being: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that

(1) current national efforts to reduce domestic hunger and malnutrition should continue;

(2) a uniform national commitment to the nutrition of low-income Americans should continue through Federal leadership and support of vital nutrition programs; and

(3) the Federal government should retain primary responsibility for the child nutrition programs.

CHILD NUTRITION RESOLUTION

● Mr. DOLE. Mr. President, as chairman of the nutrition subcommittee, I am submitting a concurrent resolution concerning the child nutrition programs and the implications of New Federalism for this area. The ranking minority member of the subcommittee, Mr. LEAHY, has joined me in this effort, along with many of our colleagues. Mr. PERKINS and Mr. GOODLING have introduced a similar resolution in the House, which has accumulated over 100 cosponsors.

There is strong bipartisan sentiment in the Congress that the Federal Government should retain primary responsibly for the child nutrition programs, which include school lunch, school breakfast, nutrition education and training, summer feeding, the special supplemental food program for women, infants and children (better known as WIC), the commodity supplemental and child care food programs. Although the administration seems to have backed off an earlier proposal to fold the WIC program into the maternal and child health block grant, and WIC is not now included in the programs under discussion for turnback to the States, the fate of the other child nutrition programs remains an area of concern.

DEVELOPMENT OF NUTRITION PROGRAMS

Mr. President, back in 1946, the original child nutrition program, school lunch, was enacted with two primary goals in mind. It was initiated to address the appalling problems of malnutrition that were discovered during World War II among potential draftees for the armed services. In addition, this program began as a constructive outlet for surplus agricultural commodities.

Since the school lunch program began, other child nutrition programs have evolved as offshoots of the original program. These include school breakfast, summer feeding, nutrition education and training, the commodity supplemental feeding program, child care food program, and the WIC program. All of these programs are targeted to specific segments of our population and complement each other in establishing a comprehensive network to address nutrition problems during

crucial periods of growth and development.

Surprisingly enough, malnutrition and bad nutrition habits are not confined to low-income Americans. Inadequate nutrition exists throughout our population, based on incorrect information relating to eating habits. This is why a program such as nutrition education and training serves a valuable purpose in conjunction with programs that actually distribute food benefits—just throwing money at a problem does not mean that it will go away. In the nutrition area, quite often people have to be educated as to what kinds of foods are appropriate for their diets. Ignorance in this area pervades all classes of our society, and a little bit of education goes a long way.

NUTRITION AS A NATIONAL RESPONSIBILITY

Mr. President, although the cost of living may vary from State to State, and area to area within a State, the price of food does not vary significantly. For this reason, it is appropriate that the Federal Government retain primary responsibility for nutrition programs in order to guarantee some standardization of benefits. It was President Nixon who declared at the White House Conference on Food, Nutrition and Health back in 1969, that nutrition was a national responsibility.

Several decades ago, Americans were shocked to learn that there were serious conditions of hunger and malnutrition existing in certain poverty pockets of this land of plenty. These conditions were brought to the awareness of the American public through a television documentary entitled "Hunger in America." Once the focus was established, Americans demanded that Government respond by expanding its nutrition efforts.

The food stamp and child nutrition programs have complemented each other in addressing the needs of our population. Ten years after the White House conference, medical experts testified before the Congress that, as a result of the national nutrition programs, "there are far fewer grossly malnourished people in this country than there were 10 years ago. This is not to say that government alone will ever be able to eradicate domestic conditions of hunger and malnutrition. Although food assistance programs have resulted in great progress, there are still individuals out there who may not even be aware that they can have access to assistance.

APPROPRIATIONS SUBCOMMITTEE ACTION

It has come to the attention of the Senator from Kansas that the Agriculture Appropriations Subcommittee has agreed this week to fully fund all of the child nutrition programs through fiscal year 1983. I would like to commend the distinguished Chairman of the subcommittee, Mr. COCHRAN, and the distinguished ranking minority member, Mr. EAGLETON, for their skillful leadership in this area. The subcommittee has acted responsibly in fulfilling the funding needs according to the best estimates of anticipated expenditures for the child nutrition programs. They have allocated a total of $3.2 billion for child nutrition with an additional $32.6 million for the commodity supplemental food program, $21.1 million for the special milk program and $1.060 billion for the WIC program.

Mr. President, several months ago, when we were debating the first concurrent budget resolution on the Senate floor, this Senator made some strong statements concerning funding of the WIC program. At the time, the Senator from Kansas emphasized that full funding of the program was an appropriations issue and should not be dealt with in the context of the budget resolution. Again, the subcommittee has exercised its proper and responsible authority in deciding to fund the program to the extent of its authorization level of $1.060 billion. Among the child nutrition programs, this program especially has demonstrated its cost effectiveness. As a result, it has generated strong bipartisan support in the Congress, and this support is well-deserved for the way it serves the needs of low-income women, infants and children.

CHILDREN ARE OUR COUNTRY'S FUTURE

Mr. President, our Nation's children deserve to have good nutritional input during the early stages of their growth and development. In many ways, this is what will determine their potential as adults. Hungry children do not concentrate well in the classroom, and whatever educational opportunities are extended to them will not have the intended beneficial effects under these circumstances.

Good nutrition is a cost-effective health policy—it can prevent major expenditures later in life. Nutrition assistance to mothers and children can substantially reduce the incidence of low birth weight and infant mortality, as well as promote health during the basic growth process. A child whose development is impeded during the early years will never have a chance to catch up. Based on this rationale, child nutrition is perhaps one of the most worthwhile investments that our country can make in its future.

This Senator and the others who have joined him believe that child nutrition should remain a national priority. I ask the support of my colleagues for this concurrent resolution, and thank those who have shared in this effort.●

● Mr. LEAHY. Mr. President, today I join Senator DOLE and many other colleagues in cosponsoring a concurrent resolution that states, in effect, that the current array of Federal child nutrition programs should be maintained in its present form. No turnback of these programs to the States should occur, nor should there be any diminution in the levels of support currently provided by these programs.

As part of his New Federalism initiative, President Reagan has proposed that financial responsibility for all child nutrition programs, with the exception of the WIC program, be returned to the States. This is a responsibility that State and local governments have not sought and do not seem to want. In my view, it would be an unwise action. Especially given the precarious condition of so many State budgets, I have little doubt that a turnback of Federal programs would lead to a significant drop in the vital assistance these programs now provide.

The Federal child nutrition and food stamp programs are a major success story. While much work remains, especially in these economic times, the incidence of hunger and malnutrition has been greatly reduced by these programs. They have been effective and the country should take pride in the fact that we have provided well for those who are unable to provide for themselves.

Surely, now is not the time to further reduce Federal efforts in the area of child nutrition. In 1981, reductions of over 30 percent were made in the school lunch, school breakfast, child care food, summer feeding, and special milk programs. In 1981 and 1982, massive reductions in food stamp benefits were enacted. Any further cutbacks in these programs would move us back toward the very conditions that prompted a strong Federal response to hunger 20 years ago. If history is any guide, and I think it is, States will be either unable to or unwilling to pick up the slack if the Federal Government moves out of the picture.

I urge the Senate to adopt this resolution. As I have said before, there is no greater investment we can make than in the health of our Nation's children. These programs make a crucial difference every day for millions of American children. In the long run, these programs lead to a healthier, more productive Nation. Let us not take the awful risk of tampering with success.●

SENATE RESOLUTION 467—BUDGET WAIVER

Mr. MURKOWSKI submitted the following original resolution, which was referred to the Committee on the Budget:

S. RES. 467

Waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1562.

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act

are waived with respect to the consideration of S. 1562. Such waiver is necessary because S. 1562 authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The waiver of section 402(a) is necessary to permit congressional consideration of a bill to provide a comprehensive national science policy with respect to the Arctic.

S. 1562 authorizes an appropriation of $25,000,000.00 per year to support the activities of the Arctic Science Policy Council and the Arctic Research Commisssion.

The Appropriations Committees of the Senate and House have not yet considered legislation which would include appropriations for the Arctic Policy Act, and will therefore have adequate notice of this authorization. Thus, congressional consideration of this authorization will in no way interfere or delay the appropriations process.

AMENDMENTS SUBMITTED FOR PRINTING

DEBT CEILING LEGISLATION

AMENDMENT NO. 3278

(Ordered to be printed and lie on the table.)

Mr. COHEN (for himself, Mr. LEVIN, Mr. HEINZ, Mr. RIEGLE, Mr. DURENBERGER, Mr. BIDEN, Mr. BOREN, Mr. BURDICK, Mr. CANNON, Mr. CHAFEE, Mr. COCHRAN, Mr. LEAHY, Mr. PELL, Mr. SASSER, and Mr. QUAYLE) submitted an amendment intended to be proposed by them to the bill (House Joint Resolution 520) to provide for a temporary increase in the public debt limit.

Mr. COHEN. Mr. President, I ask unanimous consent that the text of an amendment that Senator LEVIN and I, along with several other Senators, intend to offer to House Joint Resolution 520, the debt ceiling legislation, be printed in the RECORD.

Our amendment would provide a short-term solution to the problems plaguing the Social Security Administration's reviews of individuals receiving disability benefits.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

At the end of the resolution add the following new sections:

CONTINUED PAYMENT OF DISABILITY BENEFITS DURING APPEAL

SEC. . (a) Section 223 of the Social Security Act is amended by adding at the end thereof the followng new subsection:

"Continued Payment of Disability Benefits During Appeal

"(g)(1) In any case where—

"(A) an individual is a recipient of disability insurance benefits, or of child's, widow's, or widower's insurance benefits based on disability,

"(B) the physical or mental impairment on the basis of which such benefits are payable is found to have ceased, not to have existed, or to no longer be disabling, and as a consequence such individual is determined not to be entitled to such benefits, and

"(C) a timely request for a hearing with respect to the determination that he is not so entitled is made under section 221(d),

such individual may elect (in such manner and form and within such time as the Secretary shall by regulations prescribe) to have the payment of such benefits, and the payment of any other benefits under this Act based on such individual's wages and self-employment income (including benefits under title XVIII), continued for an additional period beginning with the first month for which (under such determination) such benefits are no longer otherwise payable and ending with the month preceding the month in which a decision is made after opportunity for such a hearing.

"(2) If an individual elects to have the payment of his benefits continued for an additional period under paragraph (1) pending a hearing, and the decision after opportunity for such hearing affirms the determination that he is not entitled to such benefits, any benefits paid under this title pursuant to such election (for months in such additional period) shall be considered overpayments for all purposes of this title.".

(b) The amendment made by subsection (a) shall apply with respect to determinations (that individuals are not entitled to benefits) which—

(1)(A) are made on or after the date of the enactment of this Joint Resolution, or (B) were made prior to such date but with respect to which a timely request for a hearing under section 221(d) of the Social Security Act was made on or prior to, or within 60 days after, the date of the enactment of this Joint Resolution and with respect to which such hearing was not held prior to such date; and

(2) are made prior to January 1, 1984.

PERIODIC REVIEWS OF DISABILITY CASES

SEC. . (a) Section 221(i) of the Social Security Act is amended—

(1) by inserting "(1)" after "(i)";

(2) by inserting ", subject to paragraph (2)" after "at least every 3 years"; and

(3) by adding at the end thereof the following new paragraph:

"(2) The requirement of paragraph (1) that cases be reviewed at least every 3 years shall not apply to the extent that the Secretary determines, on a State by State basis, that such requirement should be waived to insure that only the appropriate number of such cases are reviewed. The Secretary shall determine the appropriate number of cases to be reviewed in each State after consulation with the State agency peforming such reviews, based upon the backlog of pending reviews, the projected number of new applications for disability insurance benefits, and the current and projected staffing levels of the State agency. The Secretary shall report annually to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives with respect to the determinations made by the Secretary under the preceding sentence.".

(b) The amendments made by subsection (a) shall become effective on the date of the enactment of this Joint Resolution.

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public that the oversight hearings regarding America's role in the world coal export market previously scheduled before the Subcommittee on Energy and Mineral Resources for Friday, September 17 and Thursday, September 23, at 9:30 a.m. have been postponed and will be rescheduled at a later date.

For further information regarding these hearings, you may wish to contact Mr. Roger Sindelar of the subcommittee staff at 224-4236.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON SURFACE TRANSPORTATION

Mr. WEICKER. Mr. President, I ask unanimous consent that the Subcommittee on Surface Transportation of the Committee on Commerce, Science and Transportation, be authorized to meet during the session of the Senate on Thursday, September 16, at 9:30 a.m., to hold an oversight hearing on coal slurry pipelines.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. WEICKER. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on Thursday, September 16, at 9:30 a.m., to hold an oversight hearing on the statute of limitations.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. WEICKER. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on Thursday, September 16, at 9:30 a.m., to hold a hearing on tuition tax credits.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON HEALTH

Mr. WEICKER. Mr. President, I ask unanimous consent that the Subcommittee on Health, of the Committee on Finance, be authorized to meet during the session of the Senate on Thursday, September 16, at 9:30 a.m., to hold a hearing to consider hospital reimbursement systems used by private third-party payers.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENT

WOMEN'S RIGHTS PARK

● Mr. MOYNIHAN. Mr. President, on July 17, 1982, 3 days after I joined with 50 of my Senate colleagues in reintroducing the equal rights amendment, the Women's Rights National Historical Park in Seneca Falls, N.Y., was dedicated. Seneca Falls was the

site of the 1848 Women's Rights Convention that marked the beginning of the women's movement in this country. It was also in Seneca Falls that in 1923 Alice Paul wrote the equal rights amendment. To commemorate the long struggle for women's suffrage and equal rights, to honor the early leaders in the women's movement and to recognize the significant role that Seneca Falls played in this movement, Senator Javits and I introduced legislation (S. 2263) to create the Women's Rights Park. On December 28, 1980, that legislation became law as part of Public Law 96-607.

Mr. President, I wish to commend to my colleagues the powerful and instructive remarks made by Mr. Alan Alda at the dedication ceremony for the Women's Rights Park. Not only does Mr. Alda remind us of the accomplishments of the remarkable women who organized and participated in the 1848 convention but he makes us keenly aware of the yet unfinished struggle in this Nation to bar discrimination on the basis of sex. A struggle, I should add, in which Mr. Alda is a tireless and vigorous participant.

As Mr. Alda points out so appropriately in his remarks in Seneca Falls, now is the time to reaffirm our unswerving commitment to securing equal rights for every American. To quote Mr. Alda, as he draws on Lincoln:

It is rather for us to be here dedicated to the great task remaining before us—that from these honored women we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these women shall not have lived and died in vain, that this Nation under God shall have a new birth of freedom and that government of the people, by the people, for the people shall not perish from the earth.

I also take this opportunity to acknowledge Mr. Alda's personal generosity in supporting the development of the park itself. The Women's Rights Park consists of five sites that were associated with the 1848 convention, among them the Elizabeth Cady Stanton House. The purchase of this house was accomplished with the help of a generous gift from Mr. Alda. We thank him.

Mr. President, I ask that Mr. Alda's remarks be printed in full in the RECORD.

The remarks follow:

ALAN ALDA'S REMARKS AT SENECA FALLS—JULY 17, 1982

It is exactly 134 years since Elizabeth Cady Stanton walked in the streets of Seneca Falls with these words sounding in her head: "We hold these truths to be self evident—that all men and women are created equal."

When she presented that Declaration of Sentiments at the Women's Rights Convention on July 20, 1848, she drew not only on the historic words of Thomas Jefferson, but on the cry for freedom that had animated the American Revolution—"No taxation without representation." She asked for something that was, at the time, almost unheard of—the right for women to vote.

The courage of that act is almost unimaginable today. We take it for granted that women should have the right to vote.

But taking freedom for granted is dangerous. And we have met here today to dedicate the Women's Rights National Park in Seneca Falls in the hope that this country will never forget Elizabeth Cady Stanton, Amelia Bloomer, Lucretia Mott, and the other 300 women and men who gathered in the Wesleyan Chapel.

It is appropriate that this park be dedicated with a convening of historians from all over the country. As the artist Judy Chicago has said: "Women have been written right out of history."

The ghosts of powerful and resourceful women haunt the margins of our history books. They swarm in the blank space between the lines of every account of every event we have ever known.

The day is past when the history of women can be written in invisible ink.

The day is past when strong women will act weak and decorative and disappear in a gob of vanishing cream.

The day is past because without those women, we cannot survive.

The women who articulated and lived the feminist idea will give us the energy we need to have the democracy we are sworn to possess.

These modest buildings of Seneca Falls that we dedicate today are as much a part of the soul of our democracy as those revered halls in which white, propertied men granted themselves freedom, liberty and democracy. In these buildings, women called for both the abolition of slavery and equal rights for women. We must never let them fade from our memory.

Because Seneca Falls will keep alive the spirit of these women who went before us, this place will be a source of energy for all of America. It will be a power station and a beacon.

Without the memory of the people who have gone before us, we are constantly forced to start from scratch each time we try to move forward. Over and over we are forced to re-invent the wheel.

America's forefathers had the heroes of antiquity to look back to. Not only Jefferson and Adams, but all the educated people of their time had Greek and Roman philosophers, statesmen and generals to draw strength from.

How many educated people today know much of anything at all about Stanton, Anthony, Wollstonecraft, Fuller, Stone, Mott, Chapman Catt, Victoria Woodhull, Amelia Bloomer, or Sojourner Truth?

We need these women's guidance, their wisdom, their example—we need the power of their lives. By writing strong women out of history, we've left ourselves only with an image of women as inoffensive sweetness.

We are trying to run a car on a tank filled half with fuel and half with sugar.

We need to remember Christine de Pizan whose writings in the year 1405 condemned the stereotyping of women.

And Mary Wollencraft who said in 1792: "If the abstract rights of man will bear discussion and explanation, those of women . . . will not shrink from the same test."

And Abigail Adams who said in 1776 to her husband John: "Whilst you are proclaiming peace and good will to men, emancipating all nations, you insist upon retaining an absolute power over wives."

And Margaret Fuller who in 1845 said: "Inward and outward, freedom for woman as much as for man shall be acknowledged as a right, not yielded as a concession . . . Man cannot, by right, lay even well meant restrictions on woman."

And Lucy Stone, who said in 1881: "The widening of woman's sphere is to improve her lot. Let us do it, and if the world scoff, let it scoff—if it sneer, let it sneer . . . We want rights."

And Susan B. Anthony, who said in 1868: "Men, their rights and nothing more; women, their rights and nothing less."

I hope that this national park at Seneca Falls will be a place where American families can come and stand in the same rooms where courageous and visionary women declared the right for all women to exist as free and equal citizens. And I hope, too, that Seneca Falls will become a center of learning; a place where the knowledge of our past will be deepened and extended to include the half of our nation who have lived so long in silence.

With their strong voices in our ears, America will finally declare one day that "equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex."

With their wisdom in our hearts, this country will understand that an Amendment to our Constitution guaranteeing equality of rights is not a symbolic gesture—not a pat on the back or a valentine to women—but an urgently needed legal instrument.

With the tenacity of our mothers in us, we will not stop until we have the democracy we were promised.

We have been trying for an Equal Rights Amendment for only sixty years. From the day Elizabeth Cady Stanton first asked for the right to vote, feminists struggled 74 years before they achieved it.

They never stopped and neither should we.

We haven't lost.

We just haven't won yet.

I believe we will have the Equal Rights Amendment when we have enough feminists in the legislatures of our states to ratify it. We must elect those women and men who will vote for equality. Especially those women.

Some people have said that in the effort to ratify, so much has changed for the better that we can rejoice over our progress.

I wonder.

The number of women in our state legislatures is an index of our progress. It is a clear measure of the political power of women.

Ten years ago, there were a total of 344 women in all our state legislatures. Today, there are 908 women. Almost triple.

But these women are still only 11.7 percent of the total number of state legislators in our country. We not only have reason to be disappointed, but we have every reason to relish our anger—to nurture it—to gild our banners with it.

We cannot settle for half a measure of freedom.

Too many women have devoted their lives to equality. Too many women have died without seeing it come to pass.

As we consecrate this ground to their memory, let us be guided by Elizabeth Cady Stanton.

Let us use the ringing words of the past to fulfill the promise of the future:

As she drew on Jefferson, let us draw on Lincoln.

"Six score and fourteen years ago, our mothers brought forth on this continent a new Notion—conceived in liberty and dedicated to the proposition that all men and women are created equal.

"Now we are engaged in a great struggle, testing whether that notion or any notion so conceived and so dedicated can long endure. We are met in a town that gave birth to that struggle. We have come to dedicate a portion of this town as a shrine to those who here devoted their lives that this notion might live. It is altogether fitting and proper that we should do this.

"But, in a larger sense, we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave women, living and dead, who struggled here have consecrated it far above our poor power to add or detract.

"The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather to be dedicated here to the unfinished work which they, who fought here, have thus far so nobly advanced.

"It is rather for us to be here dedicated to the great task remaining before us—that from these honored women we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these women shall not have lived and died in vain, that this nation under God shall have a new birth of freedom and that government of the people, by the people, for the people shall not perish from the earth."●

PROGRESSIVE TAX

● Mr. BUMPERS. Mr. President, on the op-ed page of the September 9 Arkansas Gazette, there appeared a persuasive piece by Kermit C. Moss, a certified public accountant from Pine Bluff, Ark., titled "Progressive Tax Is Best Even If It's Complicated." Mr. Moss was the head of the department of business administration at the University of Arkansas at Monticello for 25 years. He makes some cogent points in support of a progressive rather than a flat tax that are worthy of very serious consideration. I commend this piece to my fellow Senators, and I ask that it be printed in the RECORD.

The article follows:

[From the Arkansas Gazette, Sept. 9, 1982]

PROGRESSIVE TAX IS BEST EVEN IF IT'S COMPLICATED

[By Kermit C. Moss]

As a response to the current flurry of interest in a flat-rate income tax, let me make the following comments and observations:

The fairest tax by far is a tax based on ability to pay. Let those who get the most economic benefit from the system provide the most in revenues for its maintenance and upkeep. Many students of taxation—scholars in the field—have arrived at this conclusion. Besides, the idea appeals to just plain, common, ordinary horse sense, which apparently is becoming less and less ordinary these days.

The progressive income tax that we now have is based on this concept and directed toward ability to pay. Many of the deductions now available are likewise based on ability to pay. Examples are medical expenses and casualty losses, such as a residential fire.

If a taxpayer has heavy medical expenses during a tax year, or his house burns, and his insurance does not fully cover the expense or loss, he is less able to pay taxes that year than he otherwise would have been; or less able than a taxpayer in identical circumstances but without the medical expenses or fire loss.

The ability-to-pay idea is and has been under continual assault by those with the greatest ability to pay. They also have ability to make heavy contributions to political campaigns, and thus to influence the course of tax legislation. Over the years, by influencing such legislation, they have, through exclusions, deductions, and credits made considerable progress in lessening the impact of the progressive income tax with respect to ability to pay.

The problem has not been with the idea itself, nor with the effect of its application, but with its implementation. This is often the case. The administration of a law or policy breaks down, then the law or policy is blamed, rather than the administration of it.

But we should not abandon a sound plan of taxation simply because it is difficult to administer fairly and wisely!

Don't underestimate the potential effect of a drastic change in the tax system! Many investment decisions have already been made based on the assumption that the current method of income taxation would continue. The whole American price and value structure has this tax element built into it. An example is a long-term installment sale. All this structure would be undercut by a change to a flat-rate tax and who knows what the result would be!

One of the reasons that the current system seems (and is) complicated results from the continual changes. The tax laws bounce around every year like a rubber ball. The biggest tax cut in history is immediately followed by the biggest increase in history! Leave the tax laws alone for a few years and the people will have a chance to learn what they are.

Some hold that free, unfettered and uncontrolled capitalism tends to choke itself to death from the top. That wealth tends to beget wealth, and that the more one has the easier it is to make money. Thus the wealth tends to gravitate to the top, and pretty soon there is no purchasing power left among the people. If consumers don't buy, then producers don't produce, and the whole system comes to a halt.

The progressive income tax tends to prevent this by taxing away some of the money at the top and recirculating it by putting purchasing power in the hands of those at the bottom of the economic scale. This money is used to buy goods and services, which provide jobs, and a whole new cycle of economic activity is initiated, with the wealth again moving toward the top, where it will ultimately be taxed, and the cycle started again.

Our economic system is a sophisticated, fast-moving machine of many parts. No man, regardless of his intellect, academic or financial attainments, can see it all or understand it all. Millions of transactions are flying in all directions every day.

I would compare it to a fast moving automobile flying down the road at 95 miles an hour. If it heads toward the ditch, the skilled driver does not give the wheel a sudden jerk, but gently, slowly and smoothly guides it back to its proper place on the highway.

Consider the flat-rate tax as a sudden jerk. Does anyone know for sure what its effect would be? The answer, of course, is no!

The effect of the flat-rate tax would be to shift the burden away from those with ability to pay toward those less able to do so. This is not sound tax philosophy, nor is there justice in it.

Take the cases of Mr. R and Mr. D who are both married, under age 65 with two teen-age children. They are exactly alike in every respect except that Mr. R draws down $2 million per year in interest and dividends and does not work, while Mr. D works 60 hours per week for his salary of $35,000.

For year 1981, each family has catastrophic illness expenses of $50,000 and other itemized deductions of $5,000. Under 1981 law, Mr. R would pay a federal income tax of $1,376,782 and would still have $568,218 left for living expenses and investment in interest and/or dividend producing securities. Mr. D has suffered a disaster, but at least he will not have to pay any income tax.

Now let's see how they would fare under a flat-rate of 20 per cent.

Mr. R would pay $400,000 in federal income taxes and would have $1,545,000 left for living expenses and investment. Mr. D would owe $7,000 in income taxes and would have to borrow for that, plus medical bills and living expenses.

What kind of justice is this?●

COAL SLURRY PIPELINES

● Mr. MURKOWSKI. Mr. President, on August 24, the lead editorial in the New York Times was entitled "Give Coal Pipelines a Chance." The thesis of the editorial is that interstate coal pipelines should be given a chance to prove that coal can be hauled by pipeline, at least in some instances, cheaper than it can be hauled by rail. But, as the Times points out, "the only way to find out (if pipelines can haul coal more cheaply) is for Congress to pass 'eminent domain' legislation to clear the way for direct competition."

The Senate Energy and Natural Resources Committee overwhelmingly approved S. 1844, the Coal Distribution and Utilization Act of 1982, on August 5, by a vote of 14 to 6. In August, the House Public Works Committee reported H.R. 4230, the House version of coal pipeline legislation. For the first time ever, legislation that will give the pipelines a chance to prove their worth has been reported by every jurisdictional committee to which the bills have been referred in both Houses of Congress. Despite the lateness of the hour, the Congress has an opportunity to enact this important legislation this year.

Mr. President, I know some of my colleagues have placed holds on S. 1844, and others of my colleagues have scheduled oversight hearings on this legislation. This legislation was the subject of spirited debate and close scrutiny through 4 days of markup by the Energy Committee. The committee has issued an excellent report on the legislation. I would request, Mr. President, that each of my colleagues

examine S. 1844, as reported by the committee; complete promptly any hearings they may have already scheduled; and prepare any amendments they may wish to propose on the floor—so that the Senate may act on this legislation during the short amount of time that is remaining this session.

I ask that the Times editorial be printed in the RECORD.

The editorial follows:

[From the New York Times, Aug. 24, 1982]

GIVE COAL PIPELINES A CHANCE

For a century the only practical way to transport coal from mine to plant or port was by rail. Now the coal industry touts "slurry" pipelines, designed to carry pulverized coal mixed with water or oil. No one knows whether this unproven technology will prove cheaper than rail. But the only way to find out is for Congress to pass "eminent domain" legislation to clear the way for direct competiton.

The 273-mile Black Mesa slurry pipeline has been moving coal from an Arizona mine to a Nevada power plant for a decade. The much longer Energy Transport Systems Inc. line, from Wyoming to Arkanasas and Louisiana, is under construction. If such systems already work, why is Federal legislation needed?

Black Mesa was built before pipelines were considered a serous threat by the railroads. The Energy Transport line managed to beat rail opposition to obtain rights of way across the states. But it took years to do so and the delay added considerably to its projected cost.

Railroads still control critical rights of way in most states, which other slurry lines must cross. They certainly won't sell those rights to potential competitors unless forced. And they probably have the political clout to block efforts to use states' eminent domain powers for the pipelines.

The railroads say eminent domain should be a matter of states' rights. That might make marginal sense if coal pipelines operated within single states. In fact, the whole idea of the pipelines is to facilitate interstate commerce, a matter left by law and logic to the Feds.

The railroads point out that coal pipelines would use water, a scarce commodity in the West. That might persuade Western farmers to oppose the potential competition for water right. But nothing in the proposed Federal legislation would force states to sell water to the pipelines. Nor would it interfere with interstate pacts that divide the use of rivers and underground aquifers.

The railroads argue that coal is their most lucrative traffic. If the pipelines are permitted to skim the cream off their trade, they will not be able to serve less profitable shippers at low cost. Their case might have been persuasive when the Interstate Commerce Commission tightly regulated rail rates. Since deregulation, all forms of freight should cover their costs.

Both the Senate Energy Committee and the House Public Works Committee have approved coal pipeline bills. Both the Senate and House are expected to support the bills once they reach the floor. The railroad's best hope now is to stall in the House Rules Committee. The public's best hope is that the committee won't cooperate.

AMENDING THE NATURAL GAS POLICY ACT—S. 2892

● Mr. GRASSLEY. Mr. President, I am pleased to be a cosponsor of S. 2892, which will clarify the definition of abuse in the Natural Gas Policy Act. I join my distinguished colleague from Iowa, Senator JEPSEN, in supporting changes in the pricing policy of natural gas. It is imperative that Congress examine the issue of high natural gas prices, particularly in view of reports that the cost of natural gas will continue to rise dramatically this winter.

No issue is more important to consumers in my State than the prospect of rapidly rising fuel costs. I am sure my colleagues from other cold-climate States receive correspondence from their constituents relaying present difficulties in meeting their energy costs. The tragedy of high fuel bills is more disturbing when evaluated in conjunction with evidence that the United States is currently experiencing a natural gas surplus.

At the heart of the problem is the long-term contracts entered into by natural gas producers and pipelines. These long-term contracts were agreed to at a time when it appeared that natural gas would always be in short supply; therefore pipelines entered into these contracts in an effort to guarantee their access to this valuable energy source. Natural gas production has increased, but the pipelines are still locked in to contractual agreements negotiated during a far different economic climate.

Iowans have been extremely successful in their conservation efforts, and the State has greatly utilized the low-income weatherization program. Rather than enjoying the benefits of their conservation efforts, the consumer is faced with rising natural gas bills. This experience is not restricted to Iowa.

S. 2892 will focus on specific ways to reduce the passthrough costs on natural gas. It gives the Federal Energy Regulatory Commission legislative authority to more appropriately evaluate these passthrough cost increase requests. The bill would expand the definition of abuse in the Natural Gas Policy Act to include restrictions on increases attributable to take-or-pay provisions, price escalator clauses, and most-favored-nation clauses. Additionally, a rebuttable presumption would be established for contracts which do not include "market-out" clauses.

These changes are vital to provide some measure of relief to consumers, and also to address specific inadequacies of the Natural Gas Policy Act which have become increasingly apparent.●

AMERICAN CONSERVATION CORPS

● Mr. MOYNIHAN. Mr. President, few can make the case for the creation of an American Conservation Corps as persuasively as Mr. Sydney Howe, executive director of the Human Environment Center. Indeed, House passage of companion legislation to S. 2061, a bill Senator MATHIAS and I have sponsored to create such a corps, was due in part to the tireless efforts of Mr. Howe. I am pleased that the Subcommittee on Public Lands and Reserved Water has scheduled a hearing on S. 2061 on September 22, and I look forward to hearing testimony from Mr. Howe and the many other individuals and organizations that have spent considerable time and energy promoting this legislation. I am confident that this Chamber will act quickly on S. 2061 and put thousands of young people to work conserving and rehabilitating our natural and cultural resources.

Mr. President, I ask that a typically eloquent essay by Mr. Howe that appeared in the September 13 Boston Globe be printed in the RECORD.

The essay follows:

[From the Boston Globe, Sept. 13, 1982]

A NEW CCC WOULD PUT YOUTHS TO WORK

(By Sydney Howe)

WASHINGTON.—Half of black youth and a quarter of all youth are unemployed, while significant natural and community resourcees go to waste. The nation is losing human and physical assets. It is time to renew a Depression-era program that worked and won bipartisan support, the Civilian Conservation Corps.

The polarization of economic views within and against the Reagan Administration is reducing the ground for compromise, but such extremes were as great in the 1930s. Then, Franklin Roosevelt's CCC earned conservative respect, including that of the Chicago Tribune and Alf Landon, and it became a source of pride for all Americans.

It is simply incorrect to lump youth conservation work programs among "old liberal nostrums that haven't worked." The modest federal efforts to emulate the CCC in the 1970s have been a bargain for taxpayers, producing for each $1.00 spent work that would have cost $1.20 by the cheapest alternative means. Additional benefits in new confidence and training given to jobless youth have come without charge, and some welfare and crime costs have been avoided.

Unfortunately, those programs are being abandoned. When the belttightening came, both the Carter and Reagan administrations found it easy to ignore the unemployed youth constituency. President Carter's final budget eliminated youth conservation crews, and his 1982 cutoff schedule has been followed almost to the last dollar and day.

Now, House members on both sides of the aisle have recognized this error, Democrats John Seiberling, Toby Moffett and Edward Roybal, with Republicans Silvio Conte and Douglas Bereuter, introduced a bill for an American Conservation Corps last October. With encouragement from 30 national organizations, including the US Conference of

Mayors, National Urban League, AFL-CIO and major conservation groups, the House approved the bill overwhelmingly in June, 291-102. Seventy-four Republicans voted "yea" against the administration's wishes. Republican Rep. Don Young of Alaska, managing the bill for the minority, said, "In both the long and the short run, a program such as this is good for America. It is an investment in both her resources and her people."

Funding authorized for the Corps would be $50 million in fiscal 1983 and $250 million annually thereafter, and it would be funneled through the Interior Department. Priority in recruitment would be given to those classified as disadvantaged. Unemployed young men and women age 15 to 25 would serve in conservation centers set up by federal, state or local governments or by tribal and nonprofit organizations. They would perform an array of labor-intensive urban and rural land protection, maintenance, and rehabilitation tasks. Fee arrangements would allow private-land projects, as in timber-stand improvement and strip-mine reclamation, and non-Corps workers would be protected against displacement. Skills training and post-corps job-location services would be provided to enrollees.

At least 35 percent of federal funds for the Corps would go to the states, where some small-scale youth corps programs have been started. The Illinois Youth Conservation Corps, the Iowa Youth Corps, the Kansas Natural Resources Protection Corps, and the Maryland Conservation Corps have been set up this year. The long-successful California Conservation Corps, which promotes "Hard work, low pay, and miserable conditions" and is vastly over-subscribed, and a comparable Ohio program also are state-funded. Connecticut Gov. William O'Neill launched the Connecticut Conservation Corps last month. A few other states sustain small youth-crew operations and some are designing new ones. The youth population served is small, however, and this is a prime prospect for state-federal partnership

Rep. Young, reflecting the desperation of some in Congress, said, ". . . not much else that is tangible and proven to be workable by a good track record is around to grab hold of." The Republican majority in the Senate, where the bill was introduced by senators Patrick Moynihan and Charles Mathias, would do well to grab hold—as GOP senators Robert Stafford, John Heinz and S. I. Hayakawa recently have. A hearing will be held in Sen. Malcolm Wallop's public lands subcommittee Sept. 22.

The money now contemplated could provide only 20,000 year-round minimun-wage positions and perhaps 40,000 summer ones, after the first year. But it is time for a new start, which just might demonstrate what America's youth and land need, and what they can be together.●

TAIWAN

● Mr. GOLDWATER. Mr. President, one of the sad, but inescapable, facts of life is that government, being made up of people, often reacts like people. While we may make grand and glorious statements about government of laws, not men, the truth is that all too often our Government acts just like any person. With all of the likes, dislikes and prejudices inherent in any individual, we, as a government, often react to our friends and enemies on the whim of the moment. Unfortunately, this is all too true in our relationship with Taiwan.

Not long ago, Sam Lowe, writing in the Arizona Republic, described this situation very aptly. Sam's tale of his and his friends' cruelty toward the neighborhood "RUNT" reminded him very much of the U.S. attitude toward Taiwan.

Mr. President, because this story contains an essential bit of moral wisdom, I ask that it be printed in the RECORD.

The article follows:

A COUNTY OF EUGENES

(By Sam Lowe)

TAIPEI, REPUBLIC OF CHINA.—We had been on the island of Taiwan less than a day when I thought of Eugene.

I don't know where he is now, but will remember forever the sadness in his eyes, probably because I helped put it there.

Eugene was a scrawny kid with big ears and we all picked on him because he was smaller than most of us. If there was ever a time we treated him with respect, I don't remember it.

But despite our cruelties toward him, Eugene was unceasing in his efforts to be our friend. If we made birch tree whistles, he not only made a better one and gave it to us, but offered to show us how to do it. Naturally, we spurned such offers.

And yet, every morning, he'd be there on the front step waiting and hoping, and sometimes he'd say, "Hi, you guys. Can I be pals with you today?" Naturally, we always said he couldn't.

One day, Eugene finally gave up, and never came around again.

Although such memories produce nothing but discomfort, there is a compulsion to recall them because of a similarity here.

It's not quite all that simple, of course. This case of us kids against Eugene has been elevated to billions of people vs. millions of people. But there's still the nagging question over who has the right to do what to whom.

The 18 million Chinese who populate the 14,000 square miles of Taiwan are as industrious as any population in the world. Through hard work and skillful use of international markets, they have elevated their standard of living from an average of about $80 per year to $2,500 annually and have become such aggressive merchants that some nations including the United States, have put restraints on them.

On the surface, the Chinese take such setbacks in stride. They handled the diplomatic break-off of 1979 and last week's announcement about limitations on arms sales from the United States in similar fashion.

That news could have created an extremely embarrassing situation for our 14-member party of American journalists who toured Taiwan last week had it not been for continual reassurances that the decision was expected and would change nothing.

"We understand," James Soong, director of the Government Information Office, said. "Your government must do what it feels is best. You must deal with the reality of Communist China."

But he also offered some firsthand advice.

"Remember that we are also a reality," he said during a press conference. "It is true that Communist China controls a vast area of land, but it is also a fact that there is an island operating a system that works and you (the U.S.) may be sacrificing that system without knowing it."

Despite such rejections, the Republic of China continues to list the United States as an ally and hails next month's major shopping spree in the U.S. as a show of good faith.

Government representatives will travel to 14 states, willing to spend up to $1 billion on the Seventh Special Procurement Mission.

The group will be in Arizona in early October to pick up about 130,000 bales of cotton and an unspecified amount of orange juice concentrate. The previous six missions have netted contracts totaling $5.4 billion for the United States.

But the mission has a purpose other than spending money. Dr. Soong summed it up:

"We treasure the way of life we have here; we want you to know about it because we hope you will give us the chance to keep free China free. Please keep us as your friend."

And the next day, at a luncheon, he reiterated:

"We live by the words of Confucious, who once said, 'Virtue does not stand alone; it attracts neighbors.' We hope our friends will eventually be convinced and that they will reciprocate our friendship."

A typical Chamber of Commerce pitch?

Understandably so.

But I cannot help but think of the day Eugene wasn't sitting on the front step.●

CHEMICAL AND TOXIN WEAPONS

● Mr. QUAYLE. Mr. President, the evidence of Soviet use of chemical and toxin weapons in Southeast Asia and Afghanistan is incontrovertible. Unfortunately, recognition of the evidence by the international community has been almost nonexistent. One can only speculate on the political considerations which have gone into the reluctance to condemn the human tragedy which has been and continues to be perpetrated by the Soviet Union.

It is my hope that the State Department will continue to keep this issue very public in its dealings with other nations directly and through the United Nations. The world must be told the facts—and facts they are. The Soviet Union has been shameless in its use of chemical warfare and it must be called to account.

Mr. President, I ask that an article by Sterling Seagrave, "Yellow Rain's Year: 'Like Laughing at Guernica,'" from the Wall Street Journal of September 16, 1982, be printed in the RECORD, along with a Heritage Foundation Backgrounder, "Moscow's Poison War—Update," by James A. Phillips.

The material follows:

[From the Wall Street Journal, Sept. 16, 1982]

YELLOW RAIN'S YEAR: "LIKE LAUGHING AT GUERNICA"

(By Sterling Seagrave)

In Bangkok, Thailand, this summer, one often heard a favorite joke among the for-

eign embassy crowd, and it was on the Americans.

It seemed that a U.S. diplomat collecting evidence in Thailand of "yellow rain" poison attacks had located a Hmong villager from Laos who was suffering nightmarish medical symptoms. The American had to transport the Hmong to a medical center in Bangkok quickly. He fought through the necessary red tape, eventually arranging air tickets for the Hmong, and a message to the big refugee camp at Ban Vinai asked that the man be put on the plane. Doctors and U.S. embassy staff in Bangkok waited eagerly. The plane was met, and the Hmong rushed to Siriraj Hospital for an awesome battery of tests—which established that he was in excellent health.

Night after night at diplomatic receptions, storytellers paused before delivering the punch line: "The Americans, you see, had got the wrong Hmong."

This embarrassing foul-up probably could have been avoided if they had simply put the Hmong survivor on the embassy attache's plane for a quick flight to Bangkok. The plane at the time was on routine milk runs. But that wasn't done, U.S. embassy staffers explained, because the Pentagon has never told the attache's office that the yellow rain investigation is to be rated and handled as a "priority."

The U.S. investigation of yellow rain has been plagued from the beginning with just this sort of petty mixup. The result is that one year after Secretary of State Haig announced the first "preliminary" evidence that poisons were being used as weapons against people in Indochina and Afghanistan, the yellow-rain case remains "preliminary."

Certainly, more than enough scientific evidence has accumulated to convince even the most stubborn skeptics that some grotesque poison is being used over there. This spring, a previously skeptical Washington Post editorially praised what it called the first "hard evidence"—blood and urine samples from casualties of a poison attack in Cambodia. Science magazine drew the same conclusion this June.

Nonetheless, the investigation has been hampered by bickering between the State Department and its critics, and in recent weeks seems to have run out of steam.

AFRAID OF REPERCUSSIONS?

This is all the more puzzling since a dozen other countries are now said to have arrived at their own independent verifications of the poison charges. Among them only Canada conducted its investigation in the open and publicly announced its confirmation in June.

U.S. officials say the other investigating countries include France, West Germany, Britain, Norway, Sweden, Denmark, Israel, South Africa, Australia, New Zealand, China and an unidentified Latin American nation. The officials say these countries have discussed their findings privately with Washington but have not gone public partly because their investigations were carried out clandestinely by intelligence services and they don't want to disclose the circumstances or methods. A more important reason, the officials add, is that governments such as France think that a "premature" announcement of findings might provoke severe political repercussions from the domestic left wing.

The reverse applies in Bonn. There the conservative Christian Democrats have been attempting to use the yellow-rain issue against Chancellor Helmut Schmidt's coalition. The CDU has charged in parliament that Mr. Schmidt has for many months had evidence of the use of biotoxins by the Soviets—a point conceded in parliament last December by a government spokesman—but that Mr. Schmidt has avoided discussing the issue in the interest of Ostpolitik.

This attitude apparently prevails in some international agencies as well. Scientists at the Ebenhausen think-tank outside Munich claim that Germans on the staff of the International Red Cross in Geneva speak privately of hard evidence which they say the Red Cross refuses to disclose "for political reasons."

Red Cross doctors are known to have performed autopsies on purported gas victims in Cambodia, but have always denied finding evidence that communist forces were using poisons. But doctors of the International Rescue Committee, working in the same locations, provided the blood and urine specimens regarded as the most persuasive evidence to date.

While the West temporizes, the gas attacks reportedly continue undiminished. In Laos, according to the U.S. embassy in Bangkok, yellow-rain assaults have persisted through this spring and summer. The attacks are usually interrupted each year by the monsoon rains between June and September. This year the rains were late, and the attacks continued to be reported to the end of June.

U.S. scientists involved in the Afghanistan investigation say they believe the Afghan compounds will eventually prove similar to toxins used in Indochina, but more advanced. They say hundreds of tests are needed to identify various toxins, each requiring separate samples, and only a tedious process of elimination might find the right test for the right poison. This was the case for the initial yellow-rain compound, which was correctly identified in August 1981 only after hundreds of samples had been tested for five years for the wrong poisons.

The assumption that the poisons in Afghanistan may prove more sophisticated than the yellow rain of Laos and Cambodia apparently rests on the fact, according to U.S. officials, that they are being used by crack Soviet military units, armed with the latest equipment.

In Bangkok, Thai military sources say the only explanation for the continued use of the poisons is that both Hanoi and Moscow regard the present investigations with contempt.

"Obviously, they believe that politics will prevent the Western nations from uniting on this issue," a Thai general, who requested anonymity, said in an interview. "So far even the Americans can't agree, which we find very strange. First they argue over whether the reports are true. When they concede that the reports are probably trustworthy, they argue over the nature of the poisons. As soon as the approximate nature of the poisons is established, they argue over the proportions of one toxin to another, about every stray inconsistency, though it must be clear to everyone by now that more than one poison is being used. What is lost in all of this argument is that many people are being systematically murdered with biological poisons for the first time in modern history."

"What difference does it make," he asked, "whether six million Jews were murdered with Zyklon-B or with carbon monoxide? Now, as then, everybody knows that gassings are taking place, and everybody knows full well who is behind it, so the bickering makes a mockery of human tragedy. It is grotesque, like laughing at Guernica."

Despite U.S. pronouncements on the issue, only two American officials in Southeast Asia have been actively investigating it. The two men, Army Lt. Col. Charles D. Lane and Southeast Asian specialist Edward McWilliams, have had to conduct their investigation and collection of evidence on weekends, after hours, and often at their own expense. They were not relieved of their normal duties at the embassy when they were assigned to handle field work in the yellow-rain inquiry. Because the subject lacks official "priority," the two borrow cars, beg rides in the countryside and use jungle buses and oxcarts.

When a gas attack occurs, sometimes in sight of Thai border police, specially equipped Thai chemical troops hurry to the scene in full protective gear and collect samples of soil, water and leaves. Thai medical corpsmen perform quick field autopsies on the victims. When they return to the Thai border, to send their samples to Bangkok, Mr. McWillians or Col. Lane will try to obtain a portion of what the Thais have collected. For more than a year they sent hundreds of samples to Washington before the discovery was made of the yellow-rain toxins.

Mr. McWilliams and Col. Lane currently work through refugees, persuading them to go back to the sites of gas attacks to scrape powder from rocks, or to collect charcoal from village firepits or hair from corpses, because these may best retain traces.

Each of the men has color photographs of Soviet aircraft taken while they were actually spraying yellow rain. The aircraft are clearly visible but only about the size of a fingernail. "Unfortunately," Col. Lane says, "you can't tell a thing from the pictures."

Both men have been decorated quietly by the U.S. for their achievements in obtaining the so-called "smoking gun" evidence. Mr. McWilliams has been promoted back to Washington to prepare for assignment to Moscow, leaving Col. Lane to continue the U.S. field work in Southeast Asia. He will continue to do so without a "priority" rating from the Pentagon, because, according to a member of the U.S. interagency group running the investigations, the decision to assign a priority to the inquiry was "decided but not carried out."

The lack of coordination stems in part from competition between the Pentagon and the State Department over which agency would direct the investigation—a dispute that was complicated by strong differences between the Secretaries of State and Defense.

The initiative was originally seized by Mr. Haig. Insiders at State say he was convinced that the poison gas issue would cause an international uproar. He believed it would arouse Europeans against Moscow and counterbalance the protest over the U.S.'s neutron weapons.

JEALOUSY AMONG AGENCIES

"Haig was right in principle," says a career diplomat in Washington. "What difference is there really between radioactive poison and biological poison? They both kill indiscriminately. But the real difference, as Haig saw, was that the Soviets were actually using the toxins, while we were not using the neutron bomb. Somehow that distinction got lost."

Warned off by Mr. Haig, the CIA and the Pentagon's Defense Intelligence Agency kept a low profile during the investigation.

The Pentagon's role was generally limited to Col. Lane's efforts in the field, and to laboratory support at Fort Detrick, where Dr. Sharon Watson accomplished a number of breakthroughs in identifying the poisons and deducing Soviet logic in compounding them. The CIA's role initially was held to supervising the scientific and medical aspects of the investigation. Territorial jealousies kept the CIA from becoming directly involved in field work in Thailand, but this was not so in Afghanistan. There the State Department and Pentagon kept hands off while the CIA handled the investigation. This included running agents over the border from Pakistan, and tapping sources inside Kabul.

Hampered by those interagency rivalries, the yellow-rain investigation never seriously got off the ground, and the State Department was never able to arouse much domestic or international outrage. And with Mr. Haig waging conflict with Defense Secretary Weinberger throughout, there was little chance of formulating effective strategy or policy at the highest levels.

Mr. Haig also kept the White House at a distance from the yellow-rain issue for a long time, according to a State Department source, "because it was decided that Ronnie couldn't handle the (technical) questions" from the press.

"Just as the skeptics were finally coming around this summer," says another official, "Haig suddenly quit. It may take months for the new management to get the restaurant running properly again."

While the new team at State gets up to speed, the Pentagon and CIA seem to be asserting themselves and noises are being made about "a renewed effort." Whether this will lead at last to a coordinated U.S. investigation and to overcoming apathy in the West on the spraying of Asians with poison remains to be seen.

[From the Heritage Foundation Backgrounder, Sept. 3, 1982]

MOSCOW'S POISON WAR—UPDATE

INTRODUCTION

(By James A. Phillips)

Compelling evidence keeps mounting that the Soviet Union and its proxies continue to use illegal chemical and toxin weapons in Southeast Asia and Afghanistan. Noted then Secretary of State Alexander Haig in a television interview on February 14, 1982: "every passing day . . . we get more incontrovertible evidence of the use of mycotoxins in Afghanistan, Laos and Kampuchea. We now even have specific evidence of casualties of noncombatants which are in the range of scores of thousands in all three target areas. There is no question in our mind that such weapons have been and are continuing to be used." [1] Max Kampelman, chief U.S. delegate to the European Security Conference in Madrid, charged on February 16 that the Soviets were operating twenty chemical and biological weapons facilities in violation of international law.

In late March, the State Department released a special report, Chemical Warfare in Southeast Asia and Afghanistan, documenting reports of 397 communist chemical attacks which killed over ten thousand people—6,300 in Laos, 980 in Kampuchea (Cambodia) and over 3,000 in Afghanistan. These are minimum figures, based on eyewitness accounts. Other estimates of chemical warfare deaths range as high as 50,000.

[1] ABC "This Week," February 14, 1982.

The evidence presented in the report comes from a wide variety of sources—refugees, freedom fighters, communist defectors, doctors in refugee camps, Western journalists and Western intelligence agencies. These human intelligence data were buttressed by photographic and electronic intelligence data, as well as by scientific evidence based on the analysis of physical samples taken from the sites of chemical attacks. According to the State Department:

"Taken together, this evidence has led the U.S. Government to conclude that Lao and Vietnamese forces, operating under Soviet supervision, have, since 1975, employed lethal chemical and toxin weapons in Laos; that Vietnamese forces have since 1978, used lethal chemical and toxin agents in Kampuchea; and that Soviet forces have used a variety of lethal chemical warfare agents, including nerve gases, in Afghanistan since the Soviet invasion of that country in 1979".[2]

NEW EVIDENCE

The report unveiled two new developments. First, it revealed that dead Afghan freedom fighters had been found lying in firing positions with their hands frozen on their rifles, indicating that they were victims of an extremely fast-acting lethal chemical or toxin not detectable by human senses. It apparently causes no outward physiological responses before death. This new weapon is grimly nicknamed "silent death." As a second new development, the State Department report confirmed charges made by the Committee for a Free Afghanistan that Moscow was using a chemical or toxin weapon that induced the flesh of its victims to decay extremely rapidly after death. When the bodies of such victims are touched or moved, the skin often peels off in large sheets.

The U.S. government continues to collect and analyze scores of samples of lethal chemical and toxin agents used on Asian battlefields. On May 13, the Department of State released conclusive evidence that tricothecene mycotoxins comprise at least some of the poisonous active ingredients of the mysterious "Yellow Rain" terror weapon. Blood and urine samples from four victims of a Vietnamese chemical attack in Kampuchea contained T-2 toxin. Blood samples from control individuals of closely matched age and background who had not been exposed to the "Yellow Rain" showed no trace of T-2 or other tricothecenes. Environmental contol samples of vegetation, soil, water, rice and corn in the region also contained no tricothecenes. It is therefore highly unlikely that the victims of tricothecene poisoning were contaminated by substances found in their natural environment, as had been suggested by some of those who ignored earlier reports of communist poisoned earth tactics.

U.S. charges of Soviet chemical warfare activities have been officially supported by an independent team of Canadian investigators that visited Thailand in February 1982 to conduct on-site inspections, interview victims and analyze the pattern of mycotoxin poisoning in the area. According to the Canadians:

"The events that are reported to take place at the time of alleged chemical warfare attacks cannot be explained on the basis of naturally occurring diseases. Neither mycotoxicoses nor other diseases occur in Southeast Asia which might be able to cause the rapid onset of symptoms or the effects on all sorts of forms of life (human, animal and plant life) that is reported to occur. Judging on the basis of eyewitness reports it appears that three different types of agents have been employed as warfare agents, one of them being 'Yellow Rain.'" [3]

[2] United States Department of State, Special Report No. 98, Chemical Warfare in Southeast Asia and Afghanistan, March 22, 1982, p. 6.

THE SOVIET REACTION

The initial Soviet strategy for dealing with allegations of illegal chemical warfare activities was to play down the issue or confuse the argument by hollering—incorrectly—about American "biological warfare attacks" and the use of Agent Orange in Vietnam. As these attempts to distract Western public opinion failed, however, Moscow mounted a new propaganda offensive. On May 21, the Soviet mission to the United Nations issued a nineteen-page critique, "Chemical and Bacteriological Weapons," designed to refute Western accounts of Soviet and Vietnamese chemical warfare operations. The Soviet tract conceded that the deadly tricothecene mycotoxins have been found in Southeast Asia, but maintained that these toxins were produced by the fusarium fungus which supposedly thrives in elephant grass that was artificially seeded from the air by American military aircraft during the Vietnam war.

This explanation is dismissed as "science fiction" by Paul Nelson, one of the world's foremost authorities on the fusarium fungus. Nelson is a plant pathologist at Pennsylvania State University who has catalogued more than 6,000 isolates of fusarium, 300 of them toxin-producers. In all his extensive studies, he never has encountered any references to a toxin-producing fusarium fungus in Southeast Asia. Although the fusarium fungus grows naturally in nearly every part of the world. Nelson noted that it produces strong toxins only in cold and temperate climates.[4] And even if the Soviet arguments concerning the origin of poisonous mycotoxins in Southeast Asia were plausible (which they are not), what explains the presence of these same mycotoxins in Afghanistan, thousands of miles away from "American-sown" elephant grass? In summary, Moscow has yet to offer a reasonable explanation to counter the charges that it has been waging poison warfare.

THE UNITED NATIONS INVESTIGATES

The U.N. investigation of communist biochemical warfare activities continues to dismay those concerned with getting at the truth of the matter. The investigation this year is proceeding at the same lethargic pace the U.N. set for itself in 1981. The group of experts chosen by the U.N. to investigate these alleged violations of international law is headed by General Esmat Ezz of Egypt. He is believed to have played a prominent role in his country's chemical weapons program during the 1960s when the Egyptians were associated closely with Soviet military advisers. The staff of the investigative group is drawn from Poland, Bulgaria, Kenya, Peru and the Philippines. As fine as these investigators may be, they have been thwarted in their work. They

[3] H.B. Schiefer Toxicology Group, University of Saskatchewan, "Study of the Possible Use of Chemical Warfare Agents in Southeast Asia," A Report to the Department of External Affairs, Canada, 1982, p. i.

[4] For an excellent analysis of the faulty reasoning behind the Soviet "elephant grass theory" see: "Yellow Rain: Filling in the Gaps," Science, July 2, 1982.

have been forbidden, for example, to visit the alleged scenes of poison attacks by the pro-Soviet regimes of Afghanistan, Laos, Kampuchea and Vietnam. If these governments are truly innocent of biochemical warfare charges, as they profess to be, why do they not welcome U.N. experts? Instead, these nations and the U.S.S.R. have used every opportunity to block the investigation.

President Reagan appealed to the Soviet, Laotian, and Vietnamese governments to cooperate with the U.N. effort when he addressed the U.N. Special Session on Disarmament on June 17: "We call upon them now to grant full and free access to their countries or to territories they control so that U.N. experts can conduct an effective, independent investigation to verify cessation of these horrors." So far there has been no response.

Although denied access to the attack sites, the U.N.'s real problem is less lack of evidence than lack of political will to do anything about the evidence. This is hardly surprising since the U.N. investigation is overseen by U.N. Undersecretary General Viacheslav Ustinov, a Soviet official who has used bureaucratic inertia and delaying tactics to stall and smother the investigation. At one point, Ustinov even tried to pressure the team to use a laboratory of his own choosing to analyze samples of chemical agents. Despite the fact that the U.N. had had in its possession chemical warfare agents from Southeast Asia for many months, it has yet to complete the laboratory analysis of these samples. Indeed, this crucial evidence has been stashed in an unguarded U.N. freezer for months.

In February 1982, the U.N. group of experts visited Afghan refugee camps in Pakistan where it obtained eyewitness testimony, medical findings and physical evidence of biological warfare. This information has been quietly shelved (some say suppressed), presumably because Ustinov predictably preferred not to embarrass the Soviet Union at the U.N. Special Session on Disarmament in June. Eventually the evidence was made public when it was leaked to the Wall Street Journal, which published excerpts from the group's 36-page transcript of interviews with victims and eyewitnesses of Soviet biochemical attacks in Afghanistan.

According to these interviews, the Soviets were using more than just "Yellow Rain." Afghan freedom fighters told of poisoned "dumdum" bullets and flechettes (steel darts) which caused blistering, swelling and sometimes death from relatively minor wounds. They told of "black smoke" that rendered victims unconscious or paralyzed. They gave the U.N. team samples of contaminated wheat grains, poisoned bullets, a flechette, a gas mask, part of a parachute from a chemical bomb and a fuse from a chemical hand bomb.[5]

To date, the U.N. has done little to analyze the evidence of chemical munitions that Afghans and Southeast Asians have risked their lives to retrieve from remote battlefields. By engaging in what appears to be a coverup of Soviet chemical warfare attacks, the U.N. is jeopardizing its own credibility and integrity as an international institution.

CONCLUSION

The challenge is now to the U.N. The evidence, long persuasive, is now undeniable. Even Moscow has been forced to admit the presence of some poison substance on the battlefields where its weapons are being used. For the United Nations, in the face of all of this, to do nothing would be tantamount to legitimizing chemical warfare. It would also be tantamount to confirming that the U.N., which misses few opportunities to condemn the U.S. and other Western democracies, fears to point an accusatory finger at Moscow. And all the while, Moscow's poison weapons continue to rain upon Afghans and Southeast Asians.

THE U.S. AIR FORCE

● Mr. GOLDWATER. Mr. President, on Wednesday, September 15, Secretary of the Air Force Verne Orr, speaking before the Air Force Association convention, gave an excellent talk about the present status of the U.S. Air Force. In his speech, Secretary Orr not only reminded his audience of the past history of the Air Force but also provided a realistic look at where we are today and where we hope to be tomorow. In recounting the past achievements of the Air Force, Secretary Orr warned that "we must not let the glories of our past lull us into a state of complacency with respect to the present. Need I remind you," he said, "that the Roman Empire had a rich tradition and history as well; but what of it today."

Secretary Orr then proceeded to give the audience a breakdown of the numerical advantage that the Soviet Union has over the United States. Notwithstanding the numerical disadvantage, what worries the Secretary, as well as a lot of other people, is the qualitative advancements that the Soviet Union is incorporating in its weapons systems.

Secretary Orr then went on to detail the various programs and initiatives being undertaken by the Air Force. In this area, he discussed the MX; the B-1B; multiyear contracting for the F-16, the F-15 and the KC-10. In outlining these steps, Secretary Orr assured his audience that not only would it give the United States a credible strategic and tactical defense but that it would be done in the context of getting the most for the taxpayers' dollars. As he said, "These steps are critical if we are to demonstrate to the American people that not only can we provide for their defense, but we can do so without adversely affecting the economy. In short, we must be good stewards."

Mr. President, because of the important nature of the subject, I ask that Secretary's Orr's speech be printed in the RECORD in its entirety.

The speech follows:

ADDRESS BY SECRETARY OF THE AIR FORCE VERNE ORR TO THE 1982 AIR FORCE ASSOCIATION NATIONAL CONVENTION

REPORT TO THE SHAREHOLDERS OF DEFENSE—A PROSPECTUS ON THE AIR FORCE AT 35

Good afternoon, ladies and gentlemen. It is certainly well known that this year is the 35th anniversary of the founding of the United States Air Force. It may not be as well known that I am the fourteenth Secretary of the Air Force. Now you don't have to reach for your pocket computers to divide 14 into 35 and learn that the average term of a Secretary of the Air Force is exactly 2½ years. Since this is the second opportunity that I have had to speak to this group, you may wonder a little, and I wonder a great deal, whether the cards will deal me an opportunity to come back and talk with you again.

In the time I have been with the Air Force, I have had the unusual opportunity to work with two outstanding Chiefs of Staff. First, of course, kindly, patient, brilliant Lew Allen. Lew—who had to wean me from my Navy days, who had to explain that the newly commissioned officers in the Air Force were not called Ensigns and who also had to explain that there is a considerable difference in the seniority and prestige of a Captain in the Air Force and a Captain in the Navy. Can you imagine how Lew felt when he learned that the new Secretary of the Air Force was going to be a used car salesman from Pasadena—the city of the little old ladies in tennis shoes? But, now in all honesty, we've got to admit the man upstairs has a sense of humor because Lew Allen is now going back to Pasadena to head the Jet Propulsion Laboratory there. He will now have the opportunity to rub shoulders with my good friends, the little old ladies in tennis shoes. Lew has been an exceptional Chief of Staff, and it was my great pleasure to come into this organization under his tutelage. He will long be remembered for his firmness, his fairness, his objectivity and, most recently, for establishing the Air Force Space Command that will charter new directions for the Air Force in space. I am also privileged to be associated with another great Air Force leader. This time I feel a special sense of pride because I participated in the selection of Charles Gabriel as Chief of Staff. As the Vice President said at the swearing-in ceremony, America is lucky to have a man of this caliber to head their Air Force.

Today I would like to give you a report on the status of the Air Force because you, the members of the Air Force Association, and, in fact, all Americans are the stockholders, the shareholders in this Service and in the nation's defense. I would like to talk to you in very simple terms about the past, the present and the future. Put another way, where we have been, where we are and where we are going or; in even a third way; I would like to discuss with you the three H's—our Heritage, our Headaches and our Hopes. Our heritage, in part of course, determines how we handle today's headaches and, in an even greater way, how we handle today's headaches determines our hopes and our aspirations for the future. So let's talk about both the good and the bad, the successes, and the problems still ahead.

As our minds drift over the heritage of our past, we go back to the days before there was an independent Air Force; days, for instance, in World War I of the Lafayette Escadrille; of early aviators such as Raoul Lufbery, Eddie Rickenbacher, Frank

Luke—American men fighting in machines that were not American made; such aircraft as Newports and Spads. Then we recall the lean years of the Thirties when a fledgling air transport industry accepted the challenge of carrying the mail. But we can also recollect people like Billy Mitchell, Benny Foulois, Pete Quesada and Ira Eaker—men who pioneered the uses of this new medium. Then there are the famous names of World War II and the courage of our flyers, many of whom went off with the realization that possibly one in three would not return—Doolittle, Chennault, and so many other names that made great history for us. Then came that day in 1947—September 18th—when the Air Force came of age. We became the newest of the independent military services and Stuart Symington became the very first Secretary of the Air Force. Eight days later, Carl Tooey Spaatz became the first Chief of Staff.

Our memory next takes us over the tragic path to Korea, the first conflict where America was content to settle for a tie and where the Armistice talks still go on year after year in the demilitarized zone. We think of Edwards Air Force Base where men have given their lives pushing the frontiers of science so that we could fly ever faster. We recall Vietnam with anguish, a sacrifice in which America was unsure of what it should do or could do. When we think of the present, we come, of course, to space and the Shuttle. This is the high ground—the last frontier. Before us lies a challenge as big as space itself. However, we must not let the glories of our past lull us into a state of complacency with respect to the present. Need I remind you that the Roman Empire had a rich tradition and history as well; but what of it today. I do now want people to ever read of the rise and fall of the United States. The point is that history and heritage are not enough.

As we live today and dream of tomorrow, we should not only be grateful for the courage and the wisdom of those who went ahead of us, but also careful not to drop the baton that they have passed to us. This brings me to the second point. Where are we now? What have we done with the traditions that have been left to us? Before we address this question, however, let me briefly discuss the threat which is as real today as it was when our Service was created 35 years ago.

Beginning in 1946, despite significant economic problems, the Soviets began a major rearmament program that in thirty-five years has given them a margin of military superiority in some conventional and nuclear areas. By the 1970s, the Soviet Union dedicated 12-14 percent of its Gross National Product to defense, with the largest portion of their expenditures going toward the acquisition of modern armaments. In fact, over the past ten years, the Soviets have outspent the United States in real terms by almost two to one.

You know, of course, that the Soviets are building some 1300 fighters and fighter bombers every year compared to half that many for the allies. They also have over 200 backfire bombers and a brand new bomber called the Blackjack, similar to our B-1. This is at a time when we are still flying B-52s. You know that they have clear superiority in a number of their land-based missiles, their ICBMs. They have an outstanding air defense system, 5000 early-warning and air defense radars, 2500 interceptors and 10,000 SAM launchers. In submarines they outnumber us some 377 to 126, and their superiority in numbers of tanks, armored personnel carriers and artillery is almost too great to mention. Unfortunately the Soviets have made not only quantitative improvements, but are taking the lead from the United States in qualitative advancements as well. They are learning that numbers are not everything.

As we look at the lessons of Lebanon, I hope that we have, once and for all, put aside the notion that somehow America can put its pilots up in flimsy, inexpensive, poorly kept flying machines and expect them to win. It was only a year ago that I told you America under this Administration would never sacrifice its youth in that kind of machine and we never will. Now I think that even the doubters have learned that the more complicated and, yes, more expensive machines are necessary not only to accomplish the mission but most importantly to protect our pilot's lives. I am proud to report that in the past year we have made major advances in ensuring that the U.S. Air Force lives up to its heritage as the preeminent air power in the world today. That airpower has ensured the peace.

In his commencement speech at Eureka College last May, President Reagan noted that: "Peace is not the absence of conflict, but the ability to cope with conflict by peaceful means."

Our ability to cope, to maintain the peace, has been possible because we have been able to maintain a credible deterrent, both in nuclear and conventional weaponry. When I addressed this convention last year we were well on our way to losing this capability. The nuclear superiority that the United States had achieved in the 1950s and 1960s is now gone and as Secretary Weinberger points out, the Soviets have gained, in certain areas, a margin of superiority. However, in the last year we have turned the corner with programs to modernize the nuclear triad. Last October, the President announced the Strategic Modernization Plan which will, within the next four to eight years, redress the most serious weaknesses in our current posture and, thus, restore the strategic balance. The specific elements of this program are known and were touched on in earlier addresses before this group. Let me add that in those areas for which the Air Force has prime responsibility, the program is progressing well.

As General Gabriel mentioned yesterday, the MX has received Congressional approval and a Presidential decision on a basing mode is to be made by December.

With respect to the B-1B, you know the story. When the B-1 went to Farnborough it was the highlight of the show. We have been criticized that the money spent to send the B-1 to England was excessive. That criticism is without foundation. The B-1's presence at Farnborough renewed, in the eyes of both our allies and enemies alike, the technological superiority upon which the heritage of the Air Force and the history of American defense have been based. It renewed American prestige and demonstrated our resolve to keep the peace. As such, the expenditure of this money did as much for the well-being of our people as if it has been expended on some type of "hand-out" program.

It is a matter of pride that at this particular point, the B-1B is either on or ahead of schedule, and it is either on or under budget. Let me assure you that it's going to stay that way, and the aircraft will rollout in October of 1984—on schedule and on budget and the doubters be damned. The four companies that are involved in the development of this plane and their subcontractors are certainly to be complimented. I must also say that one of the major contributing factors of this success story is that we are building that plane almost without change orders. Now those of you in the manufacturing business know what it means to be able to build a product without constantly retrofitting, changing, altering; and the schedule slippages and cost overruns caused by such instability. The B-1B is a perfect example of what the Air Force and industry can do together to ensure the defense of this nation. As such, it certainly is in the best traditions of both.

The F-16 is another success story where the civilian-military partnership that I spoke about last year has worked to keep our nation strong. I am proud to say that in the past year we have signed a multi-year contract on the F-16. For once a manufacturer will know that for the next four years we plan to buy a minimum of 120 aircraft per year. As a result, he can make his production plans and buy accordingly. This effort is saving us nearly a quarter of a billion dollars. We have made similar commitments in the purchase of 30 millimeter ammunition, and we look forward to developing multi-year contracts for the F-15 and the KC-10. These steps are critical if we are to demonstrate to the American people that not only can we provide for their defense, but we can do so without adversely affecting the economy. In short, we must be good stewards.

We have selected the next generation trainer from among three excellent designs and will soon begin production. As General Gabriel pointed out yesterday, we believe that we have solved the airlift problem for the immediate future. If all goes well in Congress, we can start to get some very badly needed airlift so that the equipment the Army and the Marines need will not be left sitting on our shores should an emergency arise overseas. Likewise, we are working much closer than has been the case in the past with both the Army and the Navy to ensure compatibility of equipment with lift capability. America cannot afford the luxury of Army equipment which is too wide to fit into Air Force planes or design Air Force planes that do not take into account the size of Army equipment.

But, it's in people programs that we are doing our best. We are doing so very well that you will be hearing about it in meetings you have this week. Out of the many studies examining the recent conflicts in the Falkland Islands and Lebanon, a common lesson being drawn is that people matter more than machines. This conclusion should not be surprising, particularly to this group. Recognition of the need for good people has always been at the forefront of Air Force and AFA concerns. President Lyndon B. Johnson, in a letter to the AFA in 1964, wrote:

". . . The welfare of our citizens in uniform, which is of great and continuing concern to us all, is not merely a matter of justice or equity, but of hard commonsense. The nation needs now, perhaps as never before, professional career servicemen with talent, training, imagination and versatility."

During this past year, we have made major gains in recruiting and retaining this kind of professional. We are running 93 percent high school graduates, and we probably could run even higher. There are a certain number of highly skilled, motivated people

who simply drop out of high school, sometimes because the pace is too slow for them. For this reason, we are not anxious to go to 100 percent high school graduates.

In today's competitive environment, the single most important factor in the recruiting and retention equation is pay. When I spoke to you last year, I identified two major challenges to adequate compensation for the man or woman in uniform. Today I am happy to report these challenges have been met. Last October's cost of living raise restored, for the first time since 1972, pay comparability for the military. Similarly, the pay cap which had deterred our general officers from remaining on active duty was raised. Both of these actions, as well as a supportive and more appreciative public and a weakened economy, enabled us to achieve our recruiting and retention goals.

Our recruiting needs were met long before the end of the current fiscal year. Counting both the numbers of enlistees and those who have job reservations, we achieved our FY 82 non-prior service male goal in May 1982 and the female goal in July 1982. We currently have a waiting list of nearly 27,600 for the next fiscal year. This year pilot retention is up from 54% to 66%. First term reenlistments are up from 43% to 58%. Second term reenlistments are up 72% to 81%. I could go down the whole line and every one of them shows a much, much improved trend. We are doing better than the other Services and doing very well indeed with regard to women in the Air Force. Representing more than 11 percent of the force, they make a tremendous contribution to the Air Force mission. The number of women has nearly doubled in the last 10 years and they are taking ever greater responsibilities. Only a few months ago, I authorized women on the AWACS aircraft, both as members of the flight and mission crews.

But since this is an objective report to stockholders, I don't want to paint everything in terms of rosy red. It would be unrealistic of me not to recognize that Charles Gabriel and I have problems that warrant our attention, and you should know what some of them are. The first one concerns our most vital resource—people. If you think that the current reenlistment success and retention of pilots is going to continue when the economy bounds back, then you and I are living in a fool's paradise. We will again see our pilots resigning to go to the airlines, and we will again see our highly trained enlisted personnel leaving for industry. Again, we will be struggling to fill our quotas with high-quality personnel. One of the ways we can prevent the drift of our people away from the military is to maintain pay comparability. But we have already started to lose the pay comparability gained in FY 82, and it's discouraging to think how short-sighted we can really be. How short a time ago it was that we recognized you can't maintain a quality volunteer military force if you are not willing to pay what its members can earn on the outside! Yet now, we are providing a cost-of-living raise of only 4% for the coming year which is well under even the lowered inflation rates.

So we have started down the slippery slope. It's been my pleasure to serve about 25 years in business and some 11 years in government, and it has always been my prime tenet that you have to pay people what they are worth. Your first obligation is to the people who work with you. I would rather have one thousand people well paid, satisfied and happy doing a job than two thousand who think they are underpaid and are grumbling. Somehow, we have got to recognize that there is no other way to maintain a credible deterrent force than to maintain pay comparability. Otherwise, we must accept a smaller force with inadequate capability.

A second problem concerns our women in uniform and, while we are doing well, Americans in general are having trouble utilizing women's full potential. The military is not the only place you will see that problem. We have made wonderful strides in seeing that women can enter many different fields. It is now our challenge to see that they progress up the ladder as their skills and abilities make it possible. In academia, for instance, and I am familiar with that, you see large numbers of women in the Assistant Professorships and some in the Associate Professorships but only a relatively few in the full Professorships. In the Air Force, while more than 11 percent of the people are women, there are no four-stars and no three-stars. In fact, only three women are general officers.

Now the reason for this imbalance is very easy to understand. It takes about 25 years of outstanding service to become a general officer of the United States Air Force, and 25 years ago, when the most recent brigadier general selectees entered, there were relatively few women as second lieutenants. But the challenge to us is to make sure that 20 years from now we are not still caught in the same predicament. We must ensure that as a year group moves from Major to Lt Colonel and Lt Colonel to Colonel, women are given the same opportunity as men.

Along these lines, I was disappointed that there are fewer women in the Air Force Academy Class of 1986 than there were in the Class of 1985. We are simply not getting as many qualified female applicants as we would like. Let's talk to our daughters and our friends and their friends about the outstanding opportunities for women in the Air Force.

A similar challege faces us in addressing the disparity between rated and non-rated officers. You know, there is a saying the mission of the Air Force is "to fly and fight and don't you forget it." That has a salty tang, and I would like to have it up on my wall. But I also want to remind you that 55 percent of our officers today are not rated. When you look at the very senior uniformed leadership—the four stars—only one out of twelve is non-rated. When you look at three-stars, we have three out of thirty-five, or something under 10 percent, who are non-rated. The reason is that twenty-five years ago when the current new general officers first entered commissioned service, the proportion of rated officers was far higher than it is today. Consequently, the percentage of rated officers making general is much greater than the percentage of rated officers on active duty today. The non-rated officers are a vital part of the flying Air Force, and so it's Charlie Gabriel's responsibility and mine to see that the same promotion opportunities are there for both rated and non-rated officers alike.

Finally, in the past year, I have visited dozens of bases in the United States, Europe and the Pacific. While impressed by the quality, dedication and morale of our people, I was appalled at some of their living and working conditions, particularly overseas. This should come as no surprise, I suppose, when you realize that 50 percent of our facilities are more than 25 years old and 13 percent of the facilities we now use predate the establishment of the Air Force.

I can tell you that in the past year, we have begun actions to alter this situation. This year in an effort to modernize our physical plant, we obtained a 60 percent increase in the military construction program with a 100 percent increase in funding for quality of life and workplace improvements. Additionally, some modest gains have been made in military family housing construction and renovation. For the coming year, this area will remain one of my principal concerns.

In a 1947 issue of the AFA magazine, its first president, General Jimmy Doolittle encouraged former members of the Army Air Force to invest three dollars and join the organization. The General emphasized the need for an active Air Force Association. The General's call was answered, and at the National Convention later in the year he reported that AFA had become the largest veterans organization to come out of World War II. Membership had reached over 120,000.

Many things have changed in the intervening 35 years. The Army Air Force has become the independent United States Air Force, the finest air force in the world today; and the AFA has long since become more than a veterans organization, with membership approaching 200,000.

Some fundamental things do not change, however, and the significance of air power is one of these. During a program at the 1952 AFA Convention, the master of ceremonies, General Jimmy Stewart, asked the first Air Force Chief to comment on the importance of air power. General Spaatz's answer was eloquent in its simplicity: "We must control the sky above the earth" he said, "or join the worms below."

That hasn't changed, and the need for a strong, active Air Force Association continues to be vital. The citizens of this nation must stay informed on the vital national security issues of the day, and as citizens they must speak out on those issues. The Air Force Association serves as a vital forum which serves both those purposes. We are, as I mentioned at the beginning of my address, common shareholders in our nation's defense.

In his 1978 Convention speech Secretary John Stetson said: "There is no question that our national defense is a joint effort between citizens in and out of uniform. That has always been true—and always will be. Military manpower, the jets, the guns, the tanks are the most visible elements. But national will, natural resources, industrial capacity, technological skill, and a host of other factors combine to make and keep a nation strong."

For 35 years, the Air Force and the Air Force Association, in partnership, have been at the forefront of this effort. If the relative peace of the last 35 years is to continue and the Soviet challenge is to be met, this joint effort must be sustained. Tomorrow's Air Force and the nation's security depend on it.●

WILLIAM F. ALLEN, JR. PROVIDES ADDED INSIGHT ON NUCLEAR POWER, NEED FOR ENERGY INDEPENDENCE

● Mr. SASSER. Mr. President, Mr. William F. Allen, Jr., chairman and chief executive officer of Stone & Webster Engineering Corp., an internationally known company, was the

author of an informed and incisive article which recently appeared in Public Utilities Fortnightly.

Mr. Allen in this article relates nuclear power to the overall energy picture and warns that there may be a new surge of power demand when economic recovery finally occurs.

Mr. Allen reminds us of the importance of achieving energy independence and the ultimate consequences of failure to achieve this objective.

Because of the widespread interest in the issues discussed by Mr. Allen and becaue of the reputation for excellence enjoyed by him and his firm, I am pleased to place the article in the RECORD to make it available to my colleagues and others interested in the complex issues relating to energy.

The article follows:

[From Public Utilities Fortnightly]

(By William F. Allen, Jr.)

It is disturbingly clear that the nation is drifting on a dangerous course with respect to the production of energy. The public generally seems apathetic, perhaps due largely to the temporary oil surplus and a resulting softening of prices. Further, there are large electrical generating reserves in many parts of the nation at present. But this, too, is temporary and hence misleading. When we do see the economic recovery everyone desires, rising employment could rapidly increase power demand, and one senior analyst recently predicted that strong economic recovery could boost electrical demand by as much as 12 percent in a single year.

More knowledgeable people must speak out. I was pleased to read recently that Senator James A. McClure of Idaho, chairman of the Senate Committee on Energy and Natural Resources, has warned that the nation's energy problem will reappear.

Martin J. Ward, general president of the United Association, wrote compellingly of the problem in the *UA Journal* in March, 1982:

"Far too many Americans seem to have developed a sense of false security about the world's energy picture. As a result, our national resolve for achieving energy independence has deteriorated . . .

"World energy experts have repeatedly warned that we must face up to the fact that conventional energy supplies—particularly oil—are finite and will, in the future, become increasingly scarce . . . remaining supplies will continue to be subject to political manipulation and economic blackmail."

Our company is in the business of designing, engineering, and constructing large, technologically complex projects, including all types of facilities required by utilities for the generation of electric power. Our energy work ranges from solar, hydroelectric, and geothermal projects—renewable resources—to fossil and nuclear plants. So, although we have no special interest in promoting a specific fuel, we feel a strong responsibility to point out some salient, albeit obvious, facts which will affect the nation's future wellbeing:

"1. We must become more self-sufficient in energy.

"2. While we must continue to pursue advanced technology—and the use of renewables to the extent feasible—we nevertheless know that increasingly the nation's future energy needs will be met by electrical power produced in large central stations.

"3. To generate that power, we must rely on two basic, abundant *domestic* fuels, coal and uranium."

Because the nation's generating facilities must be expanded in the years ahead, and because coal alone cannot handle that increase, it is clear that nuclear power becomes an essential component of our energy mix. Thus every effort must be made to alert the public to the sobering facts—and to make the necessary institutional adjustments—to revitalize the nuclear industry.

Our company is trying to do its part. We shall continue to maintain a first-class capability for constructing nuclear power stations; and, in addition, we are working, along with others in the industry, in support of those activities which we hope will restore nuclear power to a state of robust health.

In that connection, one specific effort we have undertaken within Stone and Webster is the consolidation and analysis of recent data pertaining to the amount of radiation which possibly could be released to the environment in the event of an accident in a nuclear power plant. These data are most important, because they should form the basis for regulatory requirements, and based on information our people have assembled it now is becoming clear to the scientific and engineering communities that criteria established many years ago, but still in use today, are incredibly and needlessly conservative.

It is clear that major adjustments can be made, and should be made, and that there would be no sacrifice of safety. In the early days of nuclear power development, the former Atomic Energy Commission established intentionally conservative criteria, covering all technical areas, as the bases for designing and siting power plants. Among the most significant of these criteria was the establishment of a "source term" for analyzing the radiological consequences of possible accidents.

The source term defines the quantity of radioactivity postulated to be available for leakage from the reactor containment into the environment, and it is this particular set of postulates that we have been looking into at Stone and Webster, and which we strongly believe should be changed. The subject is so important, it warrants discussion in some detail.

There have been few questions raised about the source term over the years, but recently analyses and experimental efforts—and data available from Three Mile Island—show rather conclusively that portions of the source term are grossly exaggerated and, thus so are the calculated consequences.

There are three basic components in this source term:

"The first deals with the inert noble gases; e.g., xenon and krypton. It was assumed that all of the available noble gas inventory in the reactor core may escape to the containment during and following a major accident involving substantial damage to the reactor core. This was a reasonable assumption when originally made and has stood the test of time and continues to be a reasonable asumption. (Approximately 60 per cent of the noble gases in the reactor core escaped into the containment building during and after the accident at Three Mile Island unit 2.)

The second basic component in this source term is radioactive iodine. It was assumed that half of the core inventory of iodine would escape from the core and the primary coolant system. It was further assumed that half of this iodine would remain airborne in the containment and the other half would be deposited on surfaces in the containment and be entrained in the sump water at the base of the containment. These assumptions are discussed below.

"The third component is made up of the heavier metal materials which are not assumed to be released in large quantities to the containment building area. This has been shown to be a fairly reasonable assumption, with the exception of the element cesium. Up to 50 per cent of the cesium inventory is now postulated to escape from the fuel elements. However, it is almost certainly expected to be in the form of cesium iodide. Due to the chemistry involved, it would not reasonably be expected to be available for airborne leakage from the reactor containment building."

The noble gas component is well understood, and overestimates of consequence are due to conservatisms in the dose modeling and biological effects of radiation assumptions. Even with these conservatisms, this component contributes only a small per cent of the total dose and is greatly reduced within a matter of hours after the reactor is scrammed.

The nonvolatile metal portion of the source term is less well understood because of its possible dispersal in the form of aerosols—fine particles that may stay suspended in air. Although more study is planned to determine possible aerosol behavior, it is generally agreed that it is very unlikely that large amounts of aerosols can be distributed beyond the immediate plant area. It is significant to note that it is this portion of the source term which contributes to long-term contamination of water and soil but does not cause significant radiation dose to individuals.

Radioiodine thus became the dominant contributor to dose to individuals during and following postulated accidents. Although this component of the source term was well intentioned, it is grossly overstated. The net effect of this gross overstatement, among other things, has been predictions of off-site effects which simply are not plausible. This situation has recently been further exacerbated by the promulgation of emergency planning requirements by the Nuclear Regulatory Commission and the Federal Emergency Management Agency which are founded on the hypothetical existence of enough airborne radioiodine to require prompt notification systems and evacuation plans. A fair amount of scientific evidence is now available which indicates the radioiodine source term has been greatly overstated and that it is not so serious a threat to public health as has been thought.

The fallacy of using an erroneous source term in conservative calculations of consequences to arrive at protective action plans is evident in the proposed use of potassium iodide.

Since it was believed that radioiodine was the dominant contributor to risk, some individuals have chosen to ignore the facts. They have contended that it would be safer, or more conservative, to assume that radioiodine would be released in large quantities and that the health effects would warrant some type of action. They have proposed that potassium iodide be distributed for use internally by the general public in the event of an accident, to block the effects of radioiodine.

A careful review of the facts, however, suggests that the risks from the nonradioactive potassium iodide are greater than the

risks if the protective dose were not taken. In fact, if the potential consequences of potassium iodide are calculated based on existing medical studies and compared with even an existing conservative calculation of radioiodine consequence, the potassium iodide is over ten times more likely to cause adverse effects.

I do not wish to understate the problems associated with release of radioactive material from a nuclear power plant. The barriers of defense should be maintained and strengthened where needed. However, the worst case and conservative estimates of risk which may be applied to siting and design concerns should not be embraced as factual. This leads to confusion and a misconception of the potential effects caused by nuclear technology.

During the three years since the accident at Three Mile Island, much work has been published in the scientific literature and presented at professional meetings on the source term. The vast preponderance of this work supports the position that the radioiodine source term has been grossly exaggerated. Extensive government-funded research efforts have been undertaken to quantify the source term in detail. Unfortunately, this research will take years to complete.

The NRC should move now to establish an interim source term which is based on the best information available. This interim source term could then be updated when research now underway is completed. The alternative of doing nothing now, pending completion of this research, has the practical effect of leaving the nuclear community (and the general public) with planning and policies based on totally unfounded premises. There was no scientific basis for the present source term. The effects of natural phenomena which act to reduce greatly the amount of radioiodine in the containment atmosphere, have been ignored. These phenomena do not rely on any system working properly or any operator action to mitigate the consequences of an accident. In fact, when the effects of the plant safety systems are added to the natual phenomena, *the airborne radioiodine is virtually eliminated.*

The TMI experience is consistent with the observations at all other reactor accidents and experiments involving light water reactors. The U.S. reactors are light water reactors—and all reasonably postulated accidents involve large quantities of water and steam, both of which react readily with iodine in such a way that it is not available as an airborne source term to any significant degree.

A realistic estimate of the potential dose received by members of the general public under the most severe accident conditions would indicate that no fatalities would result—provided realistic source terms are used in the estimate. To employ totally unrealistic source terms in such estimates is not scientifically correct and is a direct cause of anxiety—such as was experienced at TMI.

This is the reality of the situation. The question then arises: What should be done?

Earlier I commented that knowledgeable people must speak out on energy matters, and I perceive this to be an obligation, a responsibility to the public and to our political leaders. In the particular case of the radioiodine component of the nuclear source term, the evidence is clear and those of us who are aware of this evidence must do our utmost to make it known.

Summarizing the evidence, all of which indicates that our conclusions to date have been too conservative, there is only a very small risk of leakage of radioiodine to the environment from a nuclear accident and that risk pales into further insignificance when compared to the potential for adverse effects, both physical and psychological, of large-scale evacuations, or to the hazards of widespread use of potassium iodide pills.

Getting this message to the public and its representatives in the halls of government would do much to relieve the needless widespread anxiety about nuclear power that now pervades the nation.●

PRESIDENT REAGAN AND CHINA

● Mr. GOLDWATER. Mr. President, not too long ago, we witnessed the President of the United States doing something that many of us feel was directly opposite to his own personal feelings. We all realize that when a man campaigns for the Presidency, he takes positions that are dictated from his heart and from a longstanding conviction on this point or that one. President Reagan has, many, many times, expressed his deep consideration, affection, and respect for Taiwan, saying time and again that he would do nothing to harm that small country. However, prodded by constant and never-ending agitation from the State Department officials, he signed a communique that, in effect, has withdrawn the support of the United States from Taiwan, something I am convinced the President did not want to do and does not want to do.

In the August 30 issue of U.S. News & World Report, there is an excellent article by Marvin Stone on the President's action, and because it is aimed at the ultimate hope of many of us that the President will change his mind on his actions, I ask that the article be printed at this point in the RECORD.

The article referred to follows:

REAGAN AND CHINA

(By Marvin Stone)

With his new agreement limiting U.S. arms sales to Taiwan, President Reagan has gone as far as he should go in appeasing the Communist regime that runs mainland China.

It should be apparent by now that the concessions the U.S. has made to Peking have gained little in return.

Instead of reciprocating by modifying its Taiwan policy and improving relations with the U.S., Peking has hardened its line. Anti-American slander still spews from China's press, films and radio broadcasts.

Even before the agreement was announced August 17, the Chinese had gotten more than they had any right to expect from a man who had campaigned for the Presidency as a sturdy friend of the Taiwan Nationalists. The President had liberalized U.S. policy on exports to the Communists and lifted the ban on sales of munitions as well.

Last January, Reagan turned down Taiwan's bid to buy the advanced FX aircraft the Nationalists feel they need to defend their island. Instead, he offered to continue supplying the less sophisticated F-5E jet fighters that Taiwan has been using.

Now, by the new agreement, Reagan promises Peking that the U.S. will gradually reduce its arms sales to Taiwan—"leading over a period of time to a final resolution."

Does this mean that the U.S. will someday cut off such sales entirely? The Chinese government seems to think so. It called the agreement only a first step and said: "The final resolution referred to here certainly implies that the U.S. arms sales to Taiwan must be completely terminated over a period of time." If such sales don't stop, the Chinese threatened, relations between the U.S. and China "will certainly face another grave crisis."

For Reagan to yield to such a threat would be not only morally wrong but also dangerous.

It would be morally wrong because: When Washington three years ago formally recognized Peking—and abrogated its defense treaty with Taiwan—the U.S. Congress pledged to supply Taiwan with the arms necessary for its defense.

It would be dangerous because: A weak Taiwan would be an open invitation to Peking to use force to achieve its aim of reuniting that island with mainland China.

Although Peking repeated in the new agreement its intention to seek a peaceful reunification, it has never renounced the use of force if necessary. And the prospering Taiwanese have made clear they don't want to be absorbed—peacefully or otherwise.

Of course, Reagan cannot be blamed for wanting to maintain good relations with China. That huge nation of 1 billion inhabitants is potentially useful to this country as a counterweight to Russia.

One must not dismiss the possibility that, given the proper incentives, China might patch up its longstanding feud with Russia. As Communists, the Chinese have more in common with their Soviet neighbors than with the United States, which Peking propaganda regularly flogs as an exploitive, capitalistic, greedy society.

But it should be obvious to Reagan—as it apparently is to Peking—that the Chinese have more to gain from the U.S. than from the Soviet Union. China needs American technology and American grain. It is not likely to sacrifice these just because the United States sells a few weapons to Taiwan.

From the American point of view, Taiwan is important in ways that China is not.

Taiwan is not only a capitalist bastion in the Far East. Taiwan is also a valuable trading partner. Although it has only 17 million people, Taiwan's trade with the U.S. is about three times as large as China's. All those sales that American business had hoped to make in China's vast market have not materialized.

All such considerations aside, however, there still remains one compelling reason for the U.S. to continue providing arms for Taiwan's defense: The U.S. promised to help Taiwan defend itself. That promise should be kept.●

MAKE AMERICAN INDUSTRY GREATER AND STRONGER

● Mr. GOLDWATER. Mr. President, before the B-1 bomber flew to the Farnborough Air Show in England, one of our colleagues objected to this being done because, as he said, it would waste $700,000 in tax funds to accomplish the mission. He also stated

that it ran the risk of compromising our military secrets.

Now, to look at the second charge first, the airplane was the hit of the flying exhibits at the air show, even though the B-1 never left the ground. As far as gaining any military secret, this was impossible, even though I am sure it was thoroughly photographed from every angle by the Russians and other countries. In fact, they could have gone to any newsstand and bought a more complete and better set of pictures.

What I would like my colleagues to know is that when the Congress stopped construction of the supersonic transport, my friends in the aviation business in Europe told me that they never thought they would see the United States quit anything, and quickly said, "Now we are going to catch you." As I attend air show after air show representing our President, I see time after time the dangerous indications that are growing and growing that we are being caught; in fact, we are being passed in many areas and I would suggest that our colleagues begin to realize that the United States no longer is preeminent in the field of aviation, whether it is the complete aircraft or its component parts, and that if we do not quit criticizing in an unknowledgeable way, we may see, in our lifetime, the demise of an industry that helped make America the great industrial power that it has been.

I would suggest that all of us put our shoulders to the wheel to make American industry greater and stronger and quit criticizing, in a nitpicking way, each and every move that we make to try to show the rest of the world what we are up to.●

SALE OF SHOCK BATONS TO SOUTH KOREA

● Mr. KENNEDY. Mr. President, the Department of Commerce has taken action to approve the sale to South Korea of electric shock batons for crowd control, which can also be used for interrogation and torture. This step is being taken despite the Department of State's 1981 Country Reports on Human Rights Practices submitted to the House Committee on Foreign Affairs and the Senate Committee on Foreign Relations, which acknowledged that "there were numerous allegations of torture in 1981" in the Republic of Korea. The State Department report noted that confirmation or dismissal of allegations of torture in specific cases is made difficult due to the South Korean Government's routine practice of requiring detainees about to be released to sign statements that they were not tortured during their imprisonment.

On September 14, Senators ROBERT DOLE and ALAN CRANSTON joined me in writing Secretary of Commerce Baldrige to express our strong concern over the serious risk that riot control equipment sold to South Korea would be used in persecution and torture. We have asked Secretary Baldrige to reconsider this action personally before it is carried out.

Mr. President, I request that the text of our letter to Secretary Baldrige be inserted in the RECORD at the conclusion of my remarks, together with the September 12 Washington Post article reporting the Department of Commerce decision on this matter.

The material follows:

U.S. SENATE,
Washington, D.C., September 14, 1982.

Hon. MALCOLM BALDRIGE:
Secretary of Commerce,
Washington.

DEAR SECRETARY BALDRIGE: We are writing to you in reference to the recent decision by the Department of Commerce to authorize sale to South Korea of electric shock batons for crowd control, which can also be used for interrogation and torture. We would like to register our strongest concern over this action, and to request that you personally reconsider it before it is carried out.

The well-documented history of human rights violations in the Republic of Korea raises the serious risk that riot control equipment of this kind would be used in the persecution and torture of Koreans pursuing the expression of their political views in ways we would regard as legitimate.

We take this issue very seriously, and would accordingly appreciate learning the results of your review as well as the criteria upon which it was based, including the views of the Department of State and other agencies.

Thank you for your attention to this matter.

Sincerely,

ROBERT DOLE.
EDWARD M. KENNEDY.
ALAN CRANSTON.

[From the Washington Post, Sept. 12, 1982]

SOUTH KOREA TO GET 500 SHOCK BATONS, OVER STATE PROTEST

Over strong objections from the State Department, the Reagan administration has approved selling South Korea 500 electric shock batons for crowd control, administration officials say.

Commerce Department spokesman Bonnie Whyte said Friday that the license for $12,000 worth of "riot-control" equipment was issued Wednesday.

The batons, similar to cattle prods, give a high-voltage but nonlethal shock. There have been allegations that they have been used not only for crowd control but for torture and interrogation.

Martial law in South Korea was lifted in January, 1981, but regulations prohibiting political activity or dissent remain.

The most recent State Department report on human rights in South Korea says that "there were numerous allegations of torture," including mistreatment of two newspaper editors jailed after printing articles critical of the South Korean leadership.

According to administration officials, the license was issued after the State Department issued a strong protest to Secretary of Commerce Malcolm Baldrige, who responded that the issuing of export licenses was his department's business.

The administration officials said Secretary of State George P. Shultz had argued that the sale, though nominally a commercial deal, involved an important principle of U.S. foreign policy.

The administration officials said that if the items were not yet shipped the State Department would continue to fight the sale. But Whyte said, "It is pretty much done."

Baldrige was unavailable for comment.●

PAPERING OVER THE CRACKS

● Mr. GOLDWATER. Mr. President, in publication after publication in this country and in others around the world, the ambiguous language of our latest letter to the Red Chinese Government is criticized and commented on. Newsweek of August 30, contained such a comment appearing over the signature of Mark Whitaker and Joyce Barnathan, and also Larry Rohter.

I suggest that my colleagues read this because it is becoming increasingly evident that the Red Chinese not only do not feel strongly about our association with them, but are even to the point of thumbing their noses at us relative to the complete switch that our President made relative to the small community of Taiwan. Many of us are hopeful that in his wisdom the President will see that none of us is going to live to see the day that an association with Red China will mean anything to the United States, whether it be in the field of economics or the field of international politics. I ask that this article be printed at this point in my remarks.

The article follows:

[From Newsweek, Aug. 30, 1982]

PAPERING OVER THE CRACKS

When Richard Nixon flew to China and laid the groundwork for the Shanghai communiqué in 1972, glasses of mao-tai were raised to a great moment in history. When Jimmy Carter approved the normalization of U.S.-Chinese relations in 1978, enthusiasts talked about a whirlwind romance. But last week, when Ronald Reagan announced his own joint communiqué with Peking, the rhetoric was far more subdued. Although the agreement found a way around the biggest obstacle in relations between Washington and Peking—U.S. arms sales to Taiwan—the U.S.-Chinese courtship seemed unlikely to regain its old ardor. "For now it's going to be a low-keyed affair," predicted one U.S. China watcher.

For the moment, Peking and Washington seemed to have papered over their differences with some calculated diplomatic ambiguity. The latest communiqué, dubbed "Shanghai II," "is a gem," said one Western diplomat in Peking. "The wording is vague enough for both sides to interpret things whatever way they like." On the Taiwan issue, Peking renewed its pledge to pursue reunification with the Chinese Nationalists by peaceful means; in exchange, the United States agreed to reduce the quantity and quality of its arms sales to Taipei over time. Reagan took that to mean that the arms flow could continue for now—and he officially notified Congress of his decision to supply Taiwan with 60 new coproduced F-

5E and F-5F fighter jets. But Deng Xiaoping seemed sure to interpret Shanghai II differently. In an apparent preview of Deng's line, the Chinese Foreign Ministry said last week that Shanghai II "clearly implies that the U.S. arms sales to Taiwan must be completely terminated over a period of time."

For his part, the president was at pains to deny that he had sold out Taiwan. After watching a CBS News broadcast that characterize Shanghai II as a retreat from the U.S. commitment to Taiwan, Reagan phoned in an unusual complaint to CBS anchorman Dan Rather. In a later broadcast the same night. Rather told, viewers what Reagan had told him: America "will continue to arm Taiwan." At the White House, Reagan held a special briefing on Taiwan for 30 congressmen. Most of them grudgingly accepted Reagan's reasoning, but Sen. Barry Goldwater, the dean of the Taiwan lobby, denounced Shanghai II as "a bad agreement." Last month the administration reassured Taipei that it would not compromise on six key points; included was a pledge not to set a fixed cutoff date for U.S. arms sales to Taiwan. So far, Taiwanese officials seemed reasonably mollified.

At best, most U.S. China experts now expect to see only a slow reapprochement in Sino-American relations. Educational exchanges, business deals and trade agreements will probably continue apace. But Washington and Peking are far from agreement on a much larger issue—military cooperation. Only last year Gen. Liu Huaqing, a deputy chief of staff, was invited to Washington for an arms-shopping expedition. Liu canceled his visit when the dispute over Taiwan arms sales flared up. Now State Department officials say only that the United States will weigh Peking's requests for arms on "a case-by-case basis."

HEGEMONISM

Substantial roadblocks still stand in the way of a more intimate U.S.-Chinese friendship. Until now a mutual antagonism toward the Soviet Union has nurtured the relationship, but China's leaders may be reassessing their line toward Moscow. Shanghai II includes no mention of "hegemonism," the Chinese code work for Soviet expansionism that Peking has inserted in previous Sino-U.S. agreements. While most China watchers don't expect the Sino-Soviet rift to close anytime soon, Stanford University Prof. Harry Harding suspects that Peking may be trying to find "its natural center of gravity" between the two superpowers. There is an even more immediate danger: that Shanghai II could fall apart if Peking isn't satisfied with Washington's efforts to close down the arms pipeline to Taiwan. "If this issue is not properly resolved," the People's Daily warned ominously, a "retrogression [in Sino-American relations] is highly probable."●

THE CHILD PROTECTION CENTER—SPECIAL UNIT

● Mr. HEINZ. Mr. President, earlier this week, the Senate unanimously approved the Omnibus Victims Protection Act of 1982 introduced by Senator LAXALT and myself just last spring. Recently, I received a letter from the director of the Child Protection Center Special Unit in Washington, D.C., which expresses support for this bill, describes the work of the center and, most importantly, emphasizes the need to protect children who are victims of crime. I would like to share this letter with you and ask that it be printed in the RECORD.

The letter follows:

STATEMENT OF THE CHILD PROTECTION CENTER-SPECIAL UNIT IN SUPPORT OF SENATE BILL 2420

The Child Protection Center-Special Unit of Children's Hospital National Medical Center would like to commend Senators HEINZ and LAXALT and the cosponsoring senators for their work in preparing this important piece of legislation.

The Child Protection Center-Special Unit was created in 1977 as the Child Sexual Abuse Victim Assistance Project under funding from the Victim-Witness and Domestic Violence programs of the Law Enforcement Assistance Administration. We have provided comprehensive medical, mental health, and social services assistance to more than 1,530 children in the Washington, D.C. Metropolitan area who have been sexually victimized by parents, custodians, siblings, relatives, neighbors, family aquaintences, and a relatively small number of strangers.

We have found that the children and their families do suffer injury from the acts of sexual assault, incest, and molestation. Fortunately, the number of injuries requiring medical treatment is low, although we are concerned by the number of pre-pubertal children who have contracted a sexually transmitted disease such as gonorrhea from molestation.

However, the psychological costs, anxiety, phobias, lack of concentration, loss of self-esteem, and behavioral adjustments to the stress of the crime and the resulting criminal justice system procedures are high and must be addressed promptly and intensively to avoid long-term chronic psychological problems of great severity. For adolescents, like adult rape victims, the fear of pregnancy is especially traumatic, and we are concerned that current legislative efforts to prohibit abortion do not fully consider the potential for double-victimization; first, by the sexual offender, and second, by the government which would force her to carry an undesired infant through full gestation to birth.

We are especially concerned about boy victims, which average 25 percent to 30 percent of our caseload. We know from current research conducted on adult sex offenders that there is great potential for such boy victims to become sex offenders in their adolescence and adulthood. Intervention to help them overcome their victimization is a necessity.

Finally, we know the financial cost of being a child victim. The cost of the initial medical examination, laboratory work for identification of spermatazon and other evidence, and laboratory work for identification of a sexually transmitted disease can be over is $300. It is recommended a cut at least to where one follow-up medical visit which could an additional $60 per visit. Most children are seen at least 3 to 4 times. Thus the total cost of an average case approaches over $500. These figures could be greater depending on the medical and psychological needs of the victim and his or her family. In 28 percent of our cases, there is a criminal or delinquency prosecution that provides the potential for limited reimbursement through witness fees at $20 a day.

In the District of Columbia, criminal prosecutions against adults for violations of D.C. laws are prosecuted in the name of the United States by the United States Attorney for the District of Columbia; juvenile delinquency prosecutions against minors are prosecuted by the Corporation Counsel for the District of Columbia. Both presecutors and the chief of police are appointed officials. Judges in D.C. Superior Court are nominated by a commission and appointed by the President for 15 year terms. Thus crime victims in the District of Columbia do not have the arena of the reelection process to hold the prosecutors, chief of police, and judges accountable for their failure to treat victims with decency.

A few examples of the status of child victims in the courts of the District of Columbia:

1. In four years of monitoring hundreds of court proceedings on behalf of the children and their families, David W. Lloyd, an attorney who is our criminal Justice Specialist, states that he has never heard a judge inquire whether a victim or witness who failed to appear for trial had been intimidated by the defendant, or whether the victim needed assistance in transportation.

2. He has never heard a judge inquire about, or a prosecutor volunteer, the victim's opinion of a dismissal of the case or the victim's opinion of a plea bargain.

3. He has never heard a judge ask about the impact of the crime upon the victim unless the prosecutor mentioned it. It is not required to be mentioned in the pre-sentence report. Defendants occasionally apologize to the court, but never directly to the victim.

4. He has never heard a judge ask whether a continuance (postponement) is agreeable to the victim.

5. Only rarely does the prosecutor request, or the judge require, direct restitution to the victim.

6. The children and their families are frequently not notified of the disposition of the case by the police or the prosecutor, nor are they notified of the defendant's pre-trial release status.

7. Victims and witnesses are routinely commanded to appear in court at 9:00 a.m., even though the proceeding is frequently not scheduled until the afternoon or the prosecutor knows that the proceeding cannot be held until the afternoon, if at all. This causes a child victim to miss an entire day of school and his/her parent to miss a full day of employment.

8. Child victims and witnesses are routinely requested to wait in the prosecutor's office or in waiting room adjoining the courtroom—both of which lack furnishings or toys suitable for a child even though a fully equipped playroom with an adult caretaker is located in the courthouse.

9. Property of the child taken as evidence, such as clothing and toys, is not necessarily promply returned after it has been photographed or forensic tests have been performed upon it.

10. The information pamphlets to victims and witnesses published by the U.S. Attorney's Office require a 12th grade reading level.

11. The U.S. Attorney's Office has a victim-witness unit whose function is primarily to locate witnesses, not to assist them in securing services. The Corporation Counsel, which prosecutes thousands of delinquency cases per year, does not even have a person identified as victim-witness coordinator.

Many of these criticisms have been cited by the District of Columbia Bar Court System Study Committee.

Fortunately, the District of Columbia recently enacted the "Victims of Violent Crime Compensation Act of 1981" (Codified as D.C. code Title 3, Chapter 4), but it excludes compensation for victims of non-violent crimes, and limits compensation to $25,000.

Although Senate Bill 2420 (as amended by Senate Bill 2433) has only limited application to the D.C. Superior Court, it is certainly a long-overdue model statute that may stimulate the state legislatures and the D.C. City Counsel to conduct hearings, make similar findings and enact similar legislation. We regret that it does not authorize the expeditures of federal funds for grants to states to create victim-witness units and improve court management of victims and witnesses, but it is a vitally needed first step.

JOYCE N. THOMAS, *Director,*
Child Protection Center-Special Unit.●

HUMAN RIGHTS VIOLATIONS IN THE PHILIPPINES

● Mr. KENNEDY. Mr. President, on September 13 four other Senators joined me in writing to President Reagan to express our concern that this week's state visit by President Marcos of the Philippines could be misinterpreted as a sign that the United States condones the violation of human rights in that country. The full text of our letter was printed in the September 14 edition of the RECORD.

With President Marcos' visit now underway, I believe it imperative that we do all we can to reverse the impression of U.S. indifference to repression in the Philippines. We should carefully examine the findings now being released by Amnesty International of its official delegation which visited the Philippines from November 11 to 28, 1981, under the leadership of A. Whitney Ellsworth, publisher of "The New York Review of Books." The full, 130-page report of that mission—the most comprehensive and detailed document Amnesty International has published on human rights violations in the Philippines—is scheduled for release on September 21, 1982. But an advance summary of that study published by Amnesty International demands our sober consideration amid the pomp and ceremony of the current state visit.

In spite of Government denials, Amnesty International concludes that, in view of the persistent pattern of "disappearances" and extrajudicial executions, the Philippines government must ultimately be held responsible for their occurrence. Amnesty International points out that the Government's failure to take effective action in investigating such cases and disciplining the culprits strongly indicated that the Government tolerates, if not condones, such abuses, making repetition of such human rights violations more likely.

The Amnesty International report makes clear that illegal arrests are all too frequent in the Philippines. Commonly, the authorities refuse to acknowledge a detention or grant access to families and legal counsel. Frequent reports of ill-treatment of detainees indicate that torture is still used systematically during interrogation following arrest. Detainees are regularly released without any charge being made.

Amesty International also expresses concern over the trial of civilian prisoners by military tribunals which do not conform to internationally recognized legal standards, and over the wide range of offenses in the Philippines for which the death penalty is imposed. The report is convincingly supported by individual case studies of the major areas of human rights violations addressed by the mission.

Mr. President, it is clear that enhancement of respect for human rights in the Philippines requires the mobilization of public opinion through the widest possible discussion of the findings of detailed firsthand investigations such as that carried out by Amnesty International. I commend to all my colleagues Amnesty International's important report on "Human Rights Violations in the Phillippines," and I request that the full text of the report's summary be printed in the RECORD.

The text follows:

HUMAN RIGHTS VIOLATIONS IN THE PHILIPPINES

BACKGROUND TO PRESENT SITUATION

In September 1972 President Ferdinand E. Marcos had declared martial law in The Philippines, citing the activities of "lawless elements," comprising principally the Communist Party of The Philippines (CPP), its armed wing, the New People's Army (NPA), and various mass organizations said to be aligned with the CPP, who were alleged to be "waging an armed insurrection and rebellion against the Government of the Republic of The Phillipines in order to forcibly seize political and state power." [1] Other elements said to be contributing to the climate of lawlessness were Muslim secessionists active in the western provinces of Mindanao and in the Sulu archipelago; members of the parliamentary opposition officially described as "rightists alleged to be acting in consort with the CPP; and syndicates engaged in criminal activities often of a violent nature.

With the proclamation of martial law, President Marcos assumed all governmental powers. He used these powers to issue decrees curtailing the rights of assembly, association and expression. He suspended the privilege of the writ of *habeas corpus* and ordered members of the Armed Forces of The Philippines (AFP) to arrest and detain people suspected of offenses affecting national security and public order. Military tribunals accountable to the executive were created to try people charged with these offenses.

In the first three years of martial law, over 50,000 people were arrested under the emergency regulations, almost all of whom were detained without charge or trial. The Amnesty International mission which visited The Philippines in November to December 1975 was officially informed that 6,000 people were still detained as of May 1975. The 1975 mission found that 71 of the 107 prisoners interviewed alleged that they had been tortured. The 1975 mission also found that torture occurred most often during interrogation after arrest when detainees were commonly held incommunicado, often in secret holding centers known as "safehouses."

The AFP underwent a substantial expansion in size after the proclamation of martial law. From approximately 60,000 in 1972, AFP strenght more than tripled to reach an estimated strength of 200,000 by 1979. An estimated two-thirds of its combat strength was deployed against the Muslim secessionist movement, the Moro National Liberation Front (MNLF), concentrated in the southwest of the country. The armed forces were also engaged in armed combat with the NPA, which expanded its activities from its original bases in Central and Northern Luzon to establish a presence in provinces throughout the archipelago. In addition to its combat role, the armed forces assumed extensive intelligence and law enforcement functions in connection with their powers to arrest and detain suspected "public order violators."

While the pattern of violations noted by the 1975 mission delegates persisted, subsequent reports have given rise to new concerns. Although the number of people believed to be detained for political reasons fell from about 6,000 in 1975 to fewer than 1,000 by the end of 1980, reports in the same period indicated that more people were becoming victims of human rights violations of unusual brutality, including "disappearance" and extrajudicial execution.

The Philippines Government's Human Rights Commitment

The Government of The Philippines has taken a prominent role in sponsoring resolutions in the United Nations calling on governments to take specific measures for the protection of human rights. The Republic of The Philippines was a sponsor of the Declaration Against Torture adopted by the General Assembly in 1975. Subsequently, it was among the few governments to make a Unilateral Declaration whereby, in Proclamation 1914 signed by President Marcos in October 1979, it stated its intention to comply with the Declaration and implement its provisions through national legislation and other effective measures. During the 35th session of the UN General Assembly in 1980, the Republic of The Philippines was a sponsor of Resolution 35/178 on Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment and of Resolution 35/170 on a Code of Conduct for Law Enforcement Officials, which calls on states to consider favorably the use of the code within the framework of national legislation and practice. The Philippine Government has also stated its intention to promote regional mechanisms for the protection of human rights.

Many of the principles for the protection of human rights set forth in these international instruments, already embodied in the

[1] Proclamation No. 1081 Proclaiming a State of Martial Law in The Philippines, September 21, 1972.

Bill of Rights contained in The Philippines Constitution of 1935, were reaffirmed in the new constitution ratified in 1973 after the imposition of martial law.

The Government of The Philippines consistently affirmed during martial law that "the operation of laws and constitutional provisions not directly related [to] or affecting the state of emergency" should continue.[2] It introduced extensive formal safeguards intended to insure that those laws and constitutional provisions were not violated by agents entrusted with law enforcement and security functions.

Beginning in late 1976 the government announced steps towards "normalization" of the political situation. On January 17, 1981, President Marcos lifted the state of martial law. In doing so, he stated that the government had "significantly defused the dangers of subversion, sedition, and rebellion."

Despite these measures and the constantly stated commitment of the government to the protection of human rights, Amnesty International continued to receive reports of gross violations of human rights.

A number of people outside the government told Amnesty International that members of the armed forces and other government personnel regarded the practices summarized in this document as justified by the "subversive" activities of government opponents or by overriding interests of national security. In this regard it is worth noting that legal standards relating to human rights and humanitarian law explicitly prohibit practices like arbitrary execution and torture in all circumstances, including situations of emergency and armed conflicts.[3]

In addition, it should be noted that Amnesty International has been presented with convincing evidence that in many cases victims of military abuses who were alleged to be "subversives" were either selected at random or arbitrarily because they were engaged in non-violent activities such as organizing unions, participation in the movement to boycott the presidential elections, or membership of church-sponsored social action groups.

Finally, The Philippines Government has constantly affirmed its commitment to the rule of law and has introduced exensive measures intended to uphold principles for the protection of the rights of people in the custody of its agents. In practice, there is overwhelming evidence that the principles enunciated by the government on the treatment of people suspected of crimes of a political nature are systematically disregarded.

AMNESTY INTERNATIONAL'S CONCERNS

Amnesty International is aware that arrests of persons for political reasons continue throughout the country. Despite the lifting of martial law, President Ferdinand E. Marcos retains wide-ranging emergency powers, particularly regarding arrest and detention.

An official Amnesty International delegation visited The Philippines from November 11–28, 1981, over 10 months after the lifting of martial law. The report of the mission is scheduled for release on September 22, 1982. It provides many additional case histories, arrest and detention procedures, lack of redress procedures, and a detailed legal background.

Amnesty International is gravely concerned at persistent and increasingly frequent reports of other extralegal practices committed by security forces. Of particular concern are reports of "disappearances" and extrajudicial executions, known in The Philippines as "salvaging," which are commonly accompanied by torture of the victim.

"Disappearances" occurred in The Philippines on a relatively small scale before 1972, but Amnesty International believes that they became more widespread in the later years of martial law and that they have continued to occur since the lifting of martial law in January 1981. During martial law, for example, Amnesty International received reports of more than 230 documented cases of "disappearance" occurring between 1975 and April 1980.

The concerns detailed in this document are:

Persistent reports of extralegal practices by government agents, which, in addition to torture, include the "disappearance" and extrajudicial execution of real or perceived opponents of the government; the absence, or inadequacy, of investigations when complaints of such human rights violations are made;

Arbitrary arrest and detention, including largely short-term detention of persons for the non-violent exercise of their human rights, and the use of torture;

The detention of political prisoners without trial within a reasonable time, or trial according to procedures in violation of recognized norms;

Imposition and execution of the death penalty.

The role of the Armed Forces of The Philippines (AFP) is also examined in this document.

"Disappearances" and extrajudicial executions

A "disappearance" occurs when a person is taken into custody by the authorities who subsequently deny responsibility for the arrest or abduction and claim to know nothing of the victim's fate or whereabouts. "Extrajudicial executions" are unlawful killings perpetrated for political reasons by order of a government or with its complicity. The United Nations has expressed its concern in recent years at reports of "disappearance" and killings of political opponents by governments as human rights violations of the most serious kind.

Abductions and extrajudicial executions are clearly outside the law of The Philippines. Procedures exist for investigating allegations of such violations and for disciplining those found responsible for them. The government has repeatedly stated its intention to investigate and take prompt action in cases involving abuses by military personnel. However, Amnesty International has received numerous reports of such illegal actions by government agents.

The circumstances in which these extralegal practices take place vary. Although by no means exclusively confined to such areas, "disappearances" and political killings are most prevalent in areas of armed conflict, where the New People's Army (NPA) or Moro National Liberation Front (MNLF) is reported to have an established presence. There are also areas from which Amnesty International receives reports of abuses of human rights by military forces not falling within the terms of Amnesty International's mandate—allegations of robbery, sexual assault, and arbitrary killings of an apparently non-political nature, resulting from private disputes and altercations with government agents or with persons who had the backing of government agents.

The Philippines Government refutes allegations that it has ordered or condoned "disappearances" and extrajudicial executions by referring to the presence of armed groups committed to the government's overthrow. However, during 1980, the Working Group on Enforced or Involuntary Disappearances of the UN Commission on Human Rights sent information to The Philippines Government on more than 200 cases of "disappearances" which had been reported to it.

The Philippines Government also answers complaints regarding extrajudicial executions by stating that the killing occurred during encounters between government forces and the armed opposition. However, many "disappearances" and extrajudicial executions are reported not to have taken place in circumstances of armed conflict. Some victims are reported to have had no involvement whatsoever with violence. Some were reportedly in detention when they were killed. In several instances of killings reported to Amnesty International, in which it had been claimed by government officials that the victim had been killed in an encounter with members of the armed forces, Amnesty International found positive evidence that this was not the case.

The growth in the armed forces and proliferation of special armed forces' security and intelligence units has led to a multiplicity of government law enforcement agents operating on the local level: regular units of The Philippines Constabulary (PC); other field units of the armed forces; intelligence and security units which, through part of the regional and provincial command structure, operate according to less well-defined procedures; intelligence and security units operating outside local control, accountable, for example, directly to the President or a commander in Manila; special elite units, again operating outside local control; local police and civilian militia; finally, irregular paramilitary units of various kinds, which have no recognized place in the security structure but which operate with official sanction. All these military and paramilitary units have been reported to be responsible for human rights violations of concern to Amnesty International. (See the section on the Role of the Armed Forces)

In spite of government denials, Amnesty International concludes that in view of the persistent pattern of "disappearances" and extrajudicial executions, The Philippines Government must ultimately be held responsible for their occurrence. In those cases that Amnesty International has been able to investigate, there appears to be strong prima facie evidence of involvement of government agents. While it does not appear that particular "disappearances" and extrajudicial executions were authorized by the government prior to their being committed, failure of the government to take effective action in implementing investigations, making known the findings and disciplining the culprits strongly indicates that the government tolerates, if not condones, such abuses. This also makes repetition of such human rights violations more likely.

In the light of its investigations, Amnesty International is making a series of recommendations to The Philippines Government with respect to these extralegal practices,

---

[3] See in particular Article 4 of the International Covenant on Civil and Political Rights, common Article 3 of the Geneva Conventions of August 12, 1949, and Protocol II additional to the Geneva Conventions of August 12, 1949. The Republic of The Philippines has signed the International Covenant on Civil and Political Rights and has ratified the Geneva Conventions. It has neither signed nor ratified Protocol II to the 1949 Geneva Conventions.

which will center on the necessity for clear accountability and control of government law enforcement agents and for rigorous investigations and subsequent follow-up action.

"Disappearances" in The Philippines may be defined as falling within one of two categories:

Persons presumed dead, since their body is not found, or confirmed to be dead, when the body is discovered some time after the arrest: persons whose arrest was without witnesses or without positive identification of the arresting agents; further, persons whose detention was acknowledged by the authorities, but who were subsequently officially stated to have been released, or to have escaped from detention, but whose whereabouts following their alleged release/escape are never ascertained. The case of Jose Alto falls within this category.

Persons, usually arrested without an appropriate warrant, held in complete isolation for weeks or months, while their families cannot discover their whereabouts and the military authorities deny having them in custody, until they eventually reappear in one detention center or another. (The case of Sampatu Maulana falls within this category.)

The "Disappearance" of Jose Alto

At about 6 pm on November 27, 1980, Jose Alto was returning home from work. As he approached his home on San Jose Street, Barrio Magsaysay, Tondo (Metro Manila), two men are reported to have accosted him, forcing him into a car which was parked in front of Alto's house, and drove away. The incident was witnessed by Alto's sister, Erlinda Alto Aristorenas, who lives in a house next to Alto's.

On December 1, 1980, a group of military men in civilian clothes came to the house of Jose Alto and Erlinda Alto Aristorenas, and conducted searches. Nothing was taken from the houses. Jose Alto's mother, Priscilla Alto, who lives in the same house as Jose Alto, was asked to sign a statement to the effect that nothing had been taken from her house, which she did.

Jose Alto's family have been unable to trace him since his abduction. Between December 5 and 10, 1980, Priscilla Alto visited police stations and the headquarters of The Philippines Constabulary at Camp Crame, where she made contact with officials of the Military Intelligence and Security Group (MISG) and the Criminal Investigation Service (CIS), and Camp Bagong Diwa (the Bicutan Rehabilitation Center), in search of her son. The authorities whom she approached denied all knowledge of Jose Alto's whereabouts.

On March 18, 1981, a neighbor informed Priscilla Alto that he had seen Jose Alto accompanied by two men in civilian clothes sitting in a stationary brown Volkswagen with a number plate the last three numbers of which he was able to identify as being 372. The car had sped away when the neighbors had approached it and greeted Jose Alto.

After leaving school in 1973, Jose Alto had taken a course in carpentry. He then began to work as a construction worker. In 1974, he became actively involved in the Fathers' Club of Don Bosco School, a civic action project involved in housing and resettlement projects in the Tondo. (The Tondo is a slum district of Manila with a high squatter population in which a number of non-government groups have been engaged in social action and community organizing projects in recent years.)

Jose Alto had been arrested on two occasions prior to his abduction in November 1980. In August 1974, he was one of 20 persons arrested in a raid by a unit of the Metro Manila District Command of the PC on the Sacred Heart Novitiate in Novaliches, Quezon County. Following his arrest, Jose Alto was held for one month incommunicado in the Military Security Unit (MSU), Fort Bonifacio. He was released in early 1975. He was accused of being an NPA commander, but was not formally charged. He was arrested again in May 1978 by two policemen who presented an Arrest, Search, and Seizure Order (ASSO). He was delivered to the Military Intelligence and Security Group (MISG) of The Philippines Constabulary at Camp Crame, where he was held incommunicado for approximately one month. He was then transferred to Bicutan Rehabilitation Center where he was held for a further six months. After his release in early 1979, he returned to work at the Fathers' Club of Don Bosco School.

The case of the "Disappearance" of Sampatu Maulana

Sampatu Maulana, a 30-year old civil servant, was one of approximately 40 Muslim Filipinos arrested in Manila in June 1981. There is a small community of Muslims in the capital city. Sampatu Maulana was taken from his home in the early hours of the morning of June 21, 1981, by approximately 30 men in civilian dress who identified themselves as members of METROCOM, the Metro Manila Command of the PC. No warrant of arrest, nor search warrant, was presented. Sampatu Maulana was accused of being a member of the Muslim group conspiring to assassinate the President. The arresting party refused to tell Sampatu Maulana's wife where they were taking her husband.

Later that morning, Estrella Maulana, Sampatu's wife, tried to establish her husband's whereabouts. She began by visiting the office of Muslim Affairs. In the following days, she visited various military authorities, including those at Fort Bonifacio, and also sought assistance from officials at the President's Office. Throughout her inquiries, she met with denials of knowledge of her husband's whereabouts.

In September 1981, Estrella Maulana learned from a Muslim recently released from the Military Security Unit (MSU), Fort Bonifacio, that her husband was held there. This information was subsequently confirmed by an officer of the Presidential Security Command. On September 24, 1981, Estrella Maulana was permitted to visit her husband at the MSU.

Like other detainees in the MSU, Sampatu Maulana was held in isolation in a small cell, which he was allowed to leave for only one hour once a week. He told his wife that he had been held for three to four days in a "safehouse" immediately after his arrest. During this period, he alleged that he had been tortured. He reported that he had been repeatedly punched during interrogation and electric shocks had been given to his genitals.

Extrajudicial executions

For several years, Amnesty International has publicized instances of political killings in The Philippines by law enforcement agents. However, reports of killings are believed to have increased in recent years, particularly in remote parts of the country. Reports of killings of individuals, as well as of groups of persons, have been received. Many of those affected are peasants and rural workers, accused by the military of being NPA members. Additionally, Amnesty International has received substantial information on the killing of more well-known figures: for example, Macli-ing Dulag, the Kalinga tribal chief killed in March 1980 in northern Luzon; Father Godfredo Alingal, a Jesuit priest killed in Bukidnon province, southern Philippines; and, most recently, Dr. Remberto de la Paz, killed in April 1982 in Catbalogan, Western Samar. While the killing of groups or of prominent members of the community may attract media attention in the Philippines and, more rarely, outside the country, the killing of the majority of persons is little known outside their immediate community. Although, in the case cited below, publicity for the victims was generated initially, there has been no subsequent investigation into the incidents.

Margarito and Evilio Osorio

On April 19, 1981, Easter Sunday, two bombs exploded in San Pedro Cathedral, Davao City, during evening mass. Following the explosions, soldiers fired indiscriminately into the crowds gathered outside: 19 persons died and approximately 150 were wounded in the incident.

At about 4 am on April 21, nine uniformed men are reported to have surrounded the house of Avelina Osorio in Mudiang, Ilang, Bunawan, Davao City, and demanded entrance. On entering, they identified themselves as members of the PC. They stated their purpose as the arrest of Avelina's son, Margarito, whom they accused of NPA membership and involvement in the San Pedro bombings. Margarito's brother, Evilio, and Evilio's wife, Felicissima, wakened by the commotion coming from the direction of Avelina's house, went to see what was happening. As they approached the house, members of the PC unit pointed guns at them and asked them to identify themselves. Soon after, the *barangay* captain (village head) and nine other PC members are reported to have arrived. The *barangay* captain vouched for the good character of Margarito and Evilio. The soldiers replied that both brothers were members of the NPA and were to be taken for investigation in connection with the San Pedro Cathedral bombing. At about 6 am, the soldiers left with Margarito and Evilio Osorio, in the direction of Tibungco cemetery. The soldiers refused to allow Avenia and Felcissima Osorio to accompany them.

Approximately one hour later, the women heard gunfire coming from the direction of the cemetery. Felicissima went to the cemetery, but was forbidden by the soldiers from entering. She waited outside the cemetery until about 10:30 am, when she saw the dead bodies of her husband and brother-in-law being carried away on wooden planks. Avelina Osorio had meanwhile visited the Tibungco Police Station and the PC Headquarters in Davao City, looking for her sons. She returned to the Tibungco Police Station at about 11 am, and there saw the bodies of Margarito and Evilio.

After the killings, the military authorities asserted that Margarito and Evilio were members of the NPA who had been killed in an encounter. In early May 1981, the Davao City chapter of the Integrated Bar of The Philippines (IBP) set up a fact-finding committee to investigate the San Pedro Cathedral Bombing and related incidents, including the killing of the Osorio brothers. The committee held public hearings, took statements from Avelina and Felicissima Osorio,

and visited the site of the killing, where they interviewed witnesses. On June 3, the committee announced that it had concluded that the brothers had not been killed in an encounter and that they would be filing a murder complaint against 18 men of the 56th PC Battalion, the unit involved in the incident. Following the announcement, General Ramos, commander of the Philippines Constabulary, and Brigadier General Olano, commander of PC Region XI, were reported to have ordered an investigation. The IBP's complaint was filed at the city fiscal's office on June 9. No further action on the case is reported to have taken place.

The Medico-Legal Necropsy reports of the Cith Health Office, Davao City, recorded among their findings that the body of Evilio Osorio had sustained eight gunshot wounds, his brother's 22. Both bodies also showed contusions.

Illegal arrest and detention and the use of torture

Illegal arrests are common. Frequently no warrant or Presidential Order of Arrest (POA, warrants issued by the president under the emergency powers retained since martial law was lifted) is presented to the person taken into custody. Prisoners are often held incommunicado, in secret places of detention known in The Philippines as "safehouses." Commonly, the authorities refuse to acknowledge their detention or grant access to families and legal counsel. Delay frequently occurs in the delivery of the detainee to the proper judicial authority. Detainees held incommunicado have no protection against ill-treatment or the use of torture. Frequent reports of ill-treatment of detainees indicate that it is still used systematically during the period of "tactical interrogation" immediately following arrest.

Detainees held for short periods, lasting from some days only to several weeks, are generally released without any charge having been made. Representative of cases reported to Amnesty International of short-term detention accompanied by torture is the case of Pastor Romeo Buenavidez.

Pastor Romeo O. Buenavidez

Romero Buenavidez, a pastor of the United Church of Christ of The Philippines in Santiago, Agusan del Norte, Mindanao, in the southern Philippines, was arrested without warrant around 5 pm on August 2, 1981, by the barrio captain (village head) of Bangonay, in Agusan del Norte. He was taken to the barrio captain's house, where they were joined by members of the 57th Philippines Constabulary Company. He was accused of being an NPA sympathizer and, during interrogation, was beaten with a rifle butt and kicked in his chest and stomach.

After approximately 30 minutes, Romeo Buenavidez was taken from the house to a PC checkpoint. He was again beaten and also made to sit cross-legged while soldiers put their full weight on his thighs. He was kicked in the chest and struck with a wet towel. The Chief of Jabonga Police arrived, together with some policemen. They also took part in the beatings.

Around 9:30 pm, Romeo Buenavidez was taken to Jabonga Municipal Jail. There he was interrogated by a Military Intelligence Group (MIG) officer and other unidentified men in plain clothes. (MIG is the operational branch of the Intelligence Service of the Armed Forces of The Philippines.) Romeo Buenavidez was then taken blindfolded to a "safehouse" Agusan Pequeno, near Butuan City. He was held in the "safehouse" for three days, during which time he suffered further beatings and threats to his life were made.

On August 6, Romeo Buenavidez was taken to Camp Evangelista, Cagayan de Oro City. He was further interrogated and told to sign a waiver stating that he had been treated well during his detention. The previous day, relatives and friends of Romeo Buenavidez had filed a motion for the writ of habeas corpus. This was heard by the Butuan City Court on August 6, which ordered the military authorities to produce Romeo Buenavidez who was delivered to the court and subsequently released.

Romeo Buenavidez was examined at the Butuan City General Hospital and subsequently by two private physicians. These examinations showed findings consistent with the torture alleged by Romeo Buenavidez.

The Arrest of Seven Persons in Tagum Davao del Norte, January 1982

The case of seven persons arrested in Tagum, Davao del Norte province in January 1982 is also illustrative of illegal arrest, detention, and torture.

Davao del Norte is a province in Mindanao, in the southern Philippines, where units of the NPA are reported to operate. Reports of human rights violations in this area have persisted throughout 1981 and early 1982. In particular, widespread international media attention was focused on the policy apparently adopted unilaterally by the local military authorities of attempting to control the population by relocating villagers into what are known as "protected villages" or "strategic hamlets." Local church and civil rights activists have been instrumental in highlighting and protesting against these policies, which in February 1982, were publicly disowned by the central government when the Minister of National Defense ordered the dismantling of the "protected villages." As of mid-March 1982, there were reported to be at least 40 political prisoners held in the main jail in Tagum, including students and civil rights workers, as well as others held in other prisons.

Among these were seven persons arrested on January 16, 1982. The arrests took place on the evening of January 16, when the seven were meeting at the house of Rolieto Trinidad, an agricultural consultant and worker for the Justice and Peace Ecumenical Group in Tagum, and his wife, Purificacion, a Justice and Peace researcher. Until a few years ago, Rolieto Trinidad had been the director of the church-sponsored Social Action Center in Tagum. Others at the house were Tarcinita Bizar, a lay church worker engaged in relief and rehabilitation of the villagers displaced by the military authorities; Elias Casilac, a local farmer; Herminigildo Florida, also an agricultural consultant; Lourdes Samson, an assistant bookkeeper who also worked voluntarily for the local unit of Task Force Detainees, a human rights group; and Leonor Sevilla, another church worker. The purpose of their meeting is reported to have been to prepare for a human rights seminar the following day on the issue of "strategic hamlets." At approximately 10 pm, the house was raided by 30 or so armed intelligence personnel of The Philippines Constabulary in civilian dress. A thorough search of the house was undertaken and documents and papers taken away. No Presidential Order of Arrest (POA) was presented. The Presidential Commitment Order empowering the military authorities to hold those arrested in detention was issued only several days later.

Rolieto Trinidad and Herminigildo Florida were separated from the other prisoners and taken to an unknown place of detention for interrogation. They have since recounted the treatment to which they were subjected, which included being blindfolded, beaten in the stomach, and having pepper put on eyes and genitals. The four women and Elias Casilac were detained in the PC barracks in Tagum.

On January 18, all seven prisoners were tranferred to Camp Catitipan, Davao City. Permission for relatives and friends to visit the detainees was withheld until January 22, almost one week after their arrest. In view of this, and the reports of the ill-treatment of the detainees, relatives engaged legal counsel to file a petition for a writ of habeas corpus before the Supreme Court on January 20.

The hearing before the Supreme Court subsequently took place on Feburary 9, at which the prisoners' legal counsel presented information on the illegality of these arrests. Although the Supreme Court requested both plaintiffs and respondents to submit all additional material within a 10-day period, following which a decision would be made on the case, as of mid-May no final ruling had been made public. The seven prisoners remain detained, in the Metropolitan District Command PC barracks, in Davao City.

In late April 1982, four political detainees escaped from this jail. Following this, visiting rights for other prisoners were withdrawn. Moreover, Amnesty International has received information that Herminigildo Florida was again subjected to beatings during interrogation about the escape of the four prisoners.

Amnesty International has been informed that the seven prisoners were charged on January 21, 1982, before the Municipal Court of Tagum with violations of the Anti-Subversion Law, but the substance of these charges has not been specified. According to the information available to Amnesty International, documents removed from the Trinidads' house at the time of their arrest consisted largely of legally published human rights journals and notes of other meetings.

Amnesty International considers these seven persons to be prisoners of conscience and is urging their immediate release.

POLITICAL PRISONERS UNDERGOING TRIAL

Well before the decision to lift martial law was taken, President Marcos announced in November 1977 his intention to phase out the use of military tribunals "as soon as possible." Following this announcement, several defendants currently being tried before military tribunals attempted to have their cases transferred to civil courts, by petitioning the Supreme Court, but all were unsuccessful.

Although political prisoners arraigned and brought to trial after the lifting of martial law in January 1981 may now be tried by civil courts, some civilian prisoners whose trials were in process as of January 1981 before military tribunals have not had their cases transferred to civil courts. Civilian prisoners still undergoing trial by military tribunals include those who have been held for the longest periods in detention, one for over eight years. The authorities have given as grounds for continuation of military jurisdiction over these cases that transfer to a civil court could cause "irreparable prejudice to the state in view of the rules on double jeopardy, or other circumstances which render further prosecution of the cases difficult, if not impossible." However, Amnesty International believes that the

transfer of trials to civil courts has been determined on a discretionary and arbitrary basis, without reference to legal considerations.

Amnesty International is further concerned that trials before military tribunals do not conform to internationally recognized legal standards. Under martial law, military tribunals were constituted not as part of the judiciary but as agencies of the executive; their members are career officers with little, or in many instances no, legal training, responsible to the President in his capacity as commander-in-chief of the armed forces. The proceedings of military tribunals have been exceedingly protracted: delays have occurred during pretrial investigations (known as Summary Preliminary Investigations—SPI) and cases have been suspended for long periods awaiting decisions from the Supreme Court on defendants' petitions.

In addition to civilian prisoners still being tried by military tribunals, many political prisoners are still held in military detention centers, contrary to the order given by President Marcos following the lifting of martial law. This provided for their transfer to civilian municipala and provincial jails. For some prisoners, non-implementation of this instruction does not have serious consequences, since conditions in some military detention centers are better than in civilian jails. However, in the case of prisoners who remain at military detention centers such as the Military Security Unit (MSU) at Fort Bonifacio, Manila, where conditions are extremely harsh, the implications are severe. Amnesty International has received reports of prisoners being held at MSU for long periods in isolation. Further, prisoners arrested since the lifting of martial law are still taken to MSU, including at least six Muslim residents of Manila arrested in June 1981, who, as of May 1982, remain held without formal charge.

One of the major trials still held before military tribunals which illustrates Amnesty International's concerns relating to the use of military tribunals (lack of judicial independence, protracted proceedings, and denial of other constitutional rights) are the following:

People of The Philippines v. Jose Stison et al—the "Karagatan-Andrea" case

In this case, there are 92 respondents, six of whom remain in detention: Jose Stison, Fidel Agcaoili, Jose Luneta, Saturnino Ocampo, Victor Corpuz, and Bernabe Buscayno. The other respondents were released during the years 1975-1979. Respondents are charged with violation of Article 134, in relation to Article 135, of the Revised Penal Code: rebellion and conspiracy to commit rebellion. The case takes its name from two ships in which it is alleged by the prosecution that firearms were smuggled into The Philippines, from the People's Republic of China, for use by members of the New People's Army, during the period 1972-1974. The Summary Preliminary Investigation (SPI) lasted from October 1975 until February 1977, when it was established, in the view of the authorities, the *prima facie* grounds existed for prosecution. Trial proceedings were initiated in July 1977, but were suspended from November 1977 until November 1978. In November 1977, defense counsel had filed motions for dismissal of the case. These motions were based upon the defendants having been denied their constitutional rights: many of the accused were tortured following arrest, and the constitution provides that statements made under duress are inadmissible as evidence before a court. Further provisions of the Bill of Rights contained in Article IV of the 1973 Constitution had been violated: the right to a speedy trial and equal protection before the law. Finally, the defense counsel argued that since the accused were charged with rebellion, which is not a capital offense, they should be eligible for bail. In November 1978, the motions were rejected, and the defense counsel immediately appealed to the Supreme Court. In December, the Supreme Court ordered 20 of the accused to appear before a hearing in January 1979. The following month, the Supreme Court ordered that the military tribunal's hearings be suspended, pending consideration of the defendant's appeal to the Supreme Court. The day before the lifting of martial law, on January 16, 1981, the Supreme Court dismissed the appeal, although the defendants immediately asked for reconsideration of this decision once the lifting of martial law was announced. In response, the Supreme Court issued another restraining order. However, the military tribunal reconvened in July 1981, asserting that further hearings in the case were not in violation of the Supreme Court's ruling since they were to "perpetuate testimonies," a procedure said to be justified by the consideration that further delay would affect the administration of justice and national security.

Amnesty International has so far received no information which indicates the involvement of any of those persons still in detention with regard to this case in the alleged offenses.

THE DEATH PENALTY

Amnesty International is concerned that the death penalty continues to be retained for a wide range of offenses in The Philippines, for some of which it is mandatory. For example, under the Revised Penal Code (RPC)—Public Order Act No. 3815, 1932)—the death penalty exists as an optional punishment for crimes against national security, including treason (Article 114), espionage (Article 120), and aggravated piracy (Article 123). Courts may, however, impose terms of imprisonment of from 12 years to life as an alternative punishment for these offenses. Other articles of the RPC provide for the death penalty for various offenses, including premeditated murder or murder by arson, poison or explosion, and robbery with violence. In certain instances, persons convicted of rape may be sentenced to death.

The provisions of the RPC relating to offenses which carry the death penalty have been reinforced by a number of other legislative measures. The Anti-Subversion Act 1957 (Republic Act 1700) and its amended version, Presidential Decree No. 885 of April 12, 1976, outlawing the Communist Party of The Philippines (CPP), provides for the death penalty for any officer or ranking member of the CPP or its military wing, or for any CPP members who took up arms against the government. Three persons were sentenced to death under this Act in November 1977, one of whom, Benigno Aquino, was a leading figure in The Philippines opposition to President Marcos.

The crime of hijacking was made subject to the death penalty under an act passed in 1971.

By Presidential Decree No. 1110-A of March 29, 1977, the death penalty was made mandatory for persons convicted of making an attempt on, or conspiring against, the life of the president, of any member of the president's family, or any member of the president's cabinet or any member of their respective families. Subsequently, by Presidential Decree 1811 of January 17, 1982, this was extended to provide a mandatory death penalty for all persons committing an attempt on the life of high government officials or on their families. The decree does not define who is to be regarded as belonging to the family. Presidential Decree 1811 also included a mandatory death penalty for all persons using a deadly weapon "in committing terroristic activities."

Finally, a series of martial law decrees introduced in early 1980 extended the number of offenses liable to the death penalty to include certain drug offenses, and for some fraud and misappropriation of public funds offenses.

There are more than 800 persons held under sentence of death, most of whom have been on death row, four specially segregated units, for long periods awaiting review of their sentences by the Supreme Court. Out of this total, 160 prisoners were sentenced to death by military tribunals. Of 547 prisoners known to be awaiting Supreme Court Review of their sentence as of February 1982, one-third had been on death row for the past 10 to 25 years, including several prisoners sentenced during the 1950's. The accumulation of cases under review by the Supreme Court is reported to be the largest in number ever reached. Executions have been carried out infrequently in recent years, although it is common for dates of execution to be set and subsequently postponed on numerous occasions. One prisoner, Alfredo Celestino, had a date for his execution set six times between September 1980 and August 1981.

The majority of prisoners under sentence of death are held in the National Penitentiary, at Muntinlupa, where conditions are harsh. A number of these prisoners were convicted for offenses allegedly committed while they were members of the NPA or its predecessor the Hukbong Mapagalaya ng Bayan, People's Liberation Army (popularly known as the Huks). On October 31, 1981, Justice Minister Ricardo Puno announced that an investigation into complaints of alleged irregularities, including possible exploitation of the prisoners by their guards, was being established at the National Penitentiary. Only shortly prior to that announcement, the Supreme Court had condemned the "wretched and deplorable conditions of prison life" at Muntinlupa.

Execution in The Philippines is either by electrocution or, since the imposition of martial law in 1972, by firing squad.

When formulating a new constitution for The Philippines which came into effect in 1973, the drafting committee proposed the abolition of the death penalty. This provision was, however, not accepted by the Constitutional Convention.

Six years later, in May 1979, the then Minister of Information, Francisco Tatad, was one of the cosponsors of a bill introduced into the Interim National Assembly, the provisions of which were to abolish the death penalty and replace it by life imprisonment. During debate, other co-sponsors argued that the state should set the example and be the first to respect human life. The bill won support from other government leaders, a leading representative of the Roman Catholic Church, and the United Methodist Church. However, spokesmen for the Ministry of Justice opposed the bill. Further, Solicitor General Estelito P. Mendoza also spoke out against abolition. In a statement urging execution of persons sentenced to death within one year of sen-

tencing, he defended the death penalty, principally on grounds that it would deter crime.

In a statement before the United Nations Third Committee (dealing with Social, Humanitarian, and Cultural Affairs) in October 1981, The Philippines' representative stated that the country's National Assembly was preparing the abolition of the death penalty, but legislation was still pending. To date, there has been no news of further developments on the progress of the pending bill.

THE ROLE OF THE ARMED FORCES: MARTIAL LAW AND AFTER

The proclamation of martial law gave the Armed Forces of The Philippines (AFP) extensive new powers. Proclamation No. 1081 reads:

"Now, therefore, I, Ferdinand E. Marcos, President of The Philippines, by virtue of the powers vested upon me by Article VII, Section 10, paragraph (2) of the Constitution do hereby command the Armed Forces of The Philippines to maintain law and order throughout The Philippines, prevent or suppress all forms of lawless violence as well as any act of insurrection or rebellion and to enforce obedience to all laws and decrees, orders and regulations promulgated by me personally or upon my direction."

Subsequent General Orders issued by the President authorized the Armed Forces to arrest people suspected of specified offenses including those related to public order. The Chief of Staff of the AFP was empowered to establish special military tribunals to try cases of people charged with these offenses. Their detention under the terms of the orders was to be administered by the AFP. During the period of martial law the size of the AFP more than tripled, its membership growing from 60,000 to 200,000.

As already noted, the lifting of martial law has led to a reduction of the role of the armed forces only insofar as new cases were removed from the jurisdiction of military tribunals. Proclamation No. 2045, lifting martial law, provided that "the call to the Armed Forces of The Philippines to prevent or suppress lawless violence, insurrection, rebellion, and subversion, shall continue to be in force and effect." Earlier on Armed Forces Day, President Marcos told the troops that when martial law had been lifted the armed forces should "stay in place, continue with your operations and attain your objectives."

The phenomenon of "militarization" in the country has been noted and its consequences deplored by influential Filipinos, including senior members of the church, the judiciary, and the legal profession. Cardinal Jaime Sin has observed:

"Daily we experience the increasing militarization of our lives: the pervasive surveillance of citizens who express dissent democratically by military intelligence; the lack of mercy and prudence shown by special military units against suspected criminals; the use of torture to extract information; the unexpected wealth of many military officers."[4]

Of specific concern to Amnesty International have been persistent reports of torture, "disappearances," and extrajudicial executions allegedly perpetrated by members of the AFP. Reports of "disappearances" and extrajudicial executions have been received with increasing frequency in recent years.

The prevalence of arbitrary killings by people with law enforcement functions has been particularly widely noted in The Philippines, where the practice is commonly referred to as "salvaging." Protests from senior members of the church and the legal profession have not resulted in any evident decline in "salvaging." The Associate Chief Justice of the Supreme Court, Justice Teehankee, stated shortly after the lifting of martial law that "the propensity for violence of undesirable elements of the military and police and others authorized to bear firearms has apparently not abated."[5] In an earlier speech he had noted that "there appear to be no official investigation and verification of the incidents and confirmation of the justification for the killings—at least the same have not been made public or published."[6]

The targets of such killings have been various. Justice Teehankee cites a number of reported cases: indiscriminate firing at crowds by policemen and security guards; the shooting to death of union officers by unidentified gunmen during an industrial dispute; the killing of a Jesuit priest, Father Godofredo Alingal, in Kibawe, Bukidnon; the murder in Numancia, Aklan, of one Celso Rembulat, allegedly by members of The Philippines Constabulary "not lawfully ordered nor in hot pursuit"; the killing of the Kalinga tribal chief, Macli-ing Dulag, allegedly by uniformed Philippines Constabulary men; the killing of nine people in Kabankalan, Negros Occidental, in March-April 1980. Nineteen people, including the Mayor of Kabankalan and members of a special Philippines Constabulary unit were later charged with the murder of seven of the victims. Justice Teehankee described in some detail the killing of Leumin Minguito, a Councillor of Busilac, La Libertad, Negros Oriental, in August 1980:

"Leumin Minguito was found by village residents dumped dead in a hole located at a nearby hamlet of Mabolho on August 28 last year. His body, with three bullet wounds, was autopsied by the Municipal Health Officer three days later.

"Interviewed by the Concerned Citizens' Committee on Social Justice, Mrs. Minguito recalled The Philippines Constabulary men took her husband from their house to the hamlet at about 5 am on August 28. A few hours later, at about 7:30 am., Mrs. Minguito heard three gunshots coming from the hamlet.

"Believing it was the same laymen who killed her husband, she reported the incident to Mayor Napoleon Camero, who instead endorsed her to a certain Captain Malasa, chief of all Philippines Constabulary men assigned in the municipality. She met the captain twice and was informed that her husband was guilty because he was an NPA [New People's Army]."

In a number of cases reported to Amnesty International, it was alleged that people in the custody of government agents had been threatened with "salvaging" if they refused to confess involvement in subversive activities. It appears that the fear of being killed after being taken into custody of law enforcement officials is widespread and has been deliberately fostered by government agents to intimidate detainees into making confessions, waiving their constitutional rights, disclosing information or signing statements that they had not been ill-treated while in detention. Such threats assume their force because of the widespread belief that there is a policy of eliminating political opponents. Evidence uncovered by or reported to Amnesty International was inconclusive insofar as proving that there was a general policy of eliminating political opponents. What emerged more clearly was a pattern of denial and condementation of such military abuse without effective control being exerted to stop them.

Although it does not appear that particular "disappearances" and extrajudicial executions were authorized by the government before being carried out, failure by the government to take effective action in implementing investigations, making known the findings and disciplining the culprits strongly indicates that the government tolerates, if not condones such abuses. This makes repetition of such human rights violations more likely. Amnesty International recognizes that government officials have on several occasions expressed their condemnation of military abuses including arbitrary killings. For example, the Minister of National Defense, Juan Ponce Enrile, approved the recommendation of the Barbero Commission after its hearing in Davao City in August 1979 requiring the Chief of Staff of the AFP and the Chief of The Philippines Constabulary:

"To remind all subordinate military/police units to observe at all times the human rights of individuals in the conduct of their operations even as against enemies of the state; that persons who are arrested/captured in operations must be treated with dignity and in accordance with the traditions of the noble profession of arms for summary dismissal from the service of the offending personnel without prejudice to their criminal prosecution as the evidence may warrant."

Despite official guidelines and directives, Amnesty International has continued to receive reports of summary executions, massacres and "disappearances" where the victims are believed to be dead, all allegedly carried out by government agents. In addition, allegations of torture and ill-treatment, which the Amnesty International mission of November to December 1975 found to be widespread, have continued to be received, including allegations of people dying as a result of torture.

Amnesty International recognizes that allegations of abuses of such a serious nature require careful evaluation. The cases Amnesty International examined establish strong grounds for believing that such abuses are common, particularly in areas where the New People's Army (NPA) is reported to have established a presence.[7] Victims were most commonly people accused of being "subversives," often of being associated with the NPA. According to most reports, active armed opposition was generally regarded as being small-scale even in areas where the NPA was well-established.[8]

[5] Address at the Induction of Officers and Governors of The Philippines Ambassadors Association, May 19, 1981, p. 2.

[6] Address at the First Annual Convention of the 5th House of Delegates of the Integrated Bar of The Philippines, April 12, 1981.

[7] Amnesty International has also received frequent reports of such types of abuse in areas of Mindanao where the MNLF is active, but has been unable to investigate these allegations.

[8] In late 1981, an NPA spokesman asserted that the NPA was active in more than 400 municipalities in 47 of The Philippines' 72 provinces.

A large number of cases of military abuses reported to Amnesty International occurred in the Cagayan Valley of Northern Luzon, the Bicol region of Southeast Luzon, Negros Occidental, and Samar in the Visayas and several provinces of Mindanao. These were predominantly remote areas where the NPA has established a presence and may be considered as a representative but not exhaustive list of provinces from which reports of military abuses have been received. In addition, such reports have also emanated from more inhabited and accessible areas, including Manila, Davao City, and provincial capitals.

Amnesty International received evidence that in a high proportion of cases killing occurred after interrogation and torture or after the victim had been taken to a place of detention, indicating that death occurred after the victim had been taken into some form of custody. No evidence was found in any of the cases investigated that the victims were killed in encounters with military or police personnel as the authorities have sometimes alleged. In most of the cases the authorities also alleged that the victims of torture, "disappearance," and killing were in some way associated with the NPA, but there was considerable evidence that the violations reported were in fact arbitrary or due to the victim's engagement in non-violent activities such as union organizing, participation in the movement to boycott the presidential elections of June 1981 or membership of church-sponsored social and pastoral organizations. Most important, as has been offically recognized, such practices by government agents would not be justified even if the victims were active NPA members.

STRUCTURE OF THE SECURITY FORCES

The Philippines military establishment consists of four services: the army, navy, air force, and The Philippines Constabulary (PC). Of these, the PC has been regarded as the senior service in terms of both age and prestige. While the role of the armed forces in what had traditionally been civilian matters was expanded with the proclamation of martial law, historically the separation between military and police functions in The Philippines has not been clearcut, especially with regard to the duties of the PC.

The PC, originally named the insular Police Force, was founded by the United States colonial authorities in 1901 to maintain peace and order throughout The Philippines. As such, it, rather than the local police, over which the PC then had supervisory powers, undertook all but routine law enforcement duties, including the suppression of dissident movements. Although charged with civilian responsibilities and under the control of the Department of the Interior, it was organized along military lines and its members subject to military discipline.

The duties of the PC under martial law have been officially described as comprising "general police duties"; "miscellaneous police duties" as assigned by explicit provision of law, by direction of the President, by deputation and by request which include enforcement of the Anti-Subversion Law; "special duties," including general supervision of the police forces; "national defense duties," including providing "rear entry security and damage control during war" and "building up its Reserve Force during peacetime"; and "martial law duties," consisting of the "enforcement and implementation of Presidential Decress, General Orders and Letters of Instruction."[9]

Since the proclamation of martial law, the PC's duties have in practice included: intelligence and security duties; combat duties in suppressing movements aiming at the armed overthrow of the government; the administration of detainees arrested by members of the armed forces, the police, and officials designated to make arrests under the martial law provisions; supervision of the Integrated Civilian Home Defense (ICHDF), the civilian militia which has greatly expanded since 1972 to assist the AFP in its law enforcement role; and the integration of municipal and local police forces. The wide-ranging powers of the PC since the proclamation of martial law have therefore spanned military, intelligence, and policing roles ostensibly directed at suppressing the insurrection which occasioned martial law.

In areas where the armed forces were engaged in relatively high levels of combat with the NPA or the Moro National Liberation Front (MNLF), they were organized into special military commands: Northern Command in Northern Luzon; Eastern Command in Samar; Southern and Central Command in Mindanao. However, in addition, special units were active which, although sometimes acting in cooperation with regular provincial commands, were directly accountable to regional rather than provincial commanders or directly to central authorities in Manila. These units were: intelligence units; special combat units, such as the Long Range Patrol of the PC and Airborne units of the army; and Task Forces comprising PC and army personnel.

INTELLIGENCE UNITS

Since September 1972, there has been a proliferation of intelligence and security units empowered to arrest and detain people suspected of offenses relating to national security. Their chief coordinating body is the National Intelligence and Security Authority (NISA), whose Director-General, General Fabian Ver, is concurrently head of the Presidential Security Command and Chief of Staff of the AFP.[10] NISA is "the focal point for direction, coordination, and integration of government activities involving national intelligence and security."[11] Although described as a coordinating agency, NISA has agents of its own in the field who arrest, detain and interrogate alleged political offenders. Amnesty International learned that NISA agents undertaking arrests were subject to the COMCAD procedures for reporting arrests. Formally, NISA is also responsible to the National Security Council (NSC) and hence the President, its chairman, for preparation of "intelligence estimates of local and foreign situations for the formulation of national policies by the President."[12]

The Presidential Security Command (PSC) is closely allied to NISA in both functions and personnel. Also headed by General Fabian Ver, the PSC, which has an estimated strength of 15,000, has reportedly assumed an extensive intelligence role since 1972.

The intelligence services coordinated by NISA, which have been most frequently reported to have arrested, detained and interrogated suspects engaged in political activities are:

The Intelligence Service of the AFP, whose operating units are known as Military Intelligence Groups;

The PC's intelligence service, C2, whose operating arms are Regional Security Units, also referred to as R2s, including the intelligence branch of the PC Metro Manila Command, the Metrocom Intelligence and Security Groups;

Other PC units, with less clearly defined intelligence roles, including the Criminal Investigation Service, the Constabulary Anti-Narcotics Units and Special Operations Group;

Army intelligence, G2, whose operating units are known as Military Security Units.

Amnesty International has found that in practice intelligence units commonly disregard established procedures, particularly during the period of "tactical interrogation" immediately after arrest. Moreover, statements from officials of the Ministry of National Defense, members of the AFP and members of the judiciary suggest implicit acceptance by these officials that intelligence units are not in fact subject to these procedures. Deputy Minister of Defense, Carmelo Z. Barbero, commenting on the incomunicado detention in PC provincial headquarters, Laguna, of a suspected member of the April 6 movement, Rolando Montiel, was quoted as justifying the denial to the detainees of access to family and legal counsel on the grounds that he was undergoing "intelligent interrogation" which "could not be interrupted for anybody."[13]

Benjamin de Vera, arrested on June 10, 1981, in Davao City, was missing for more than 50 days after having been removed from a regular place of detention on July 13, 1981. In response to a letter from his father requesting information on the son's whereabouts, Brigadier General Alfredo Olano, regional commander of Region XI stated that "Benjamin has been borrowed by the intelligence family of a higher authority for further interrogation on a matter of national strategic intelligence value."

It is reportedly the view of some members of the AFP that disregard for the rules governing treatment of persons suspected of national security offenses is justified when the latter are undergoing "tactical interrogation" as distinguished from "custodial investigation." The Joint Circular of the Ministers of Justice and National Defense on Implementation of Article IV, Section 20 of the 1973 Constitution dated July 11, 1974, covers people under custodial investigation, which is defined as occurring when "the investigation ceases to be a general investigation of unsolved crimes and begins to focus on the guilt of the suspect and the suspect is taken into custody or otherwise deprived of his freedom of action in any substantial manner." The circular explicitly does not cover "general on-the-scene questioning of citizens in the fact-finding process." However, Amnesty International finds no authority in Philippines law or in international law for such an interpretation, and government officials have asserted unequivocally that the respect for human rights required of members of the AFP and law enforcement personnel is absolute.

As already noted, detainees were commonly tortured during periods of incommunicado detention while undergoing "tactical in-

terrogation" in non-recognized places of detention such as "safehouses."

SPECIAL COMBAT UNITS

The delegation learned of the existence of a number of special combat units only loosely incorporated into the regular chain of command whose activities have given ground for concern. These included The Philippines Constabulary (PC), The Philippines Army (PA) and composite task forces assigned to provincial, regional or special commands, whose units often appear to be accountable only to their own commanders. Among the task forces brought to Amnesty International's attention, against which allegations of concern were made to Amnesty International, were:

Task Force Kanlaon, operating in Negros Occidental under the command of the Deputy Regional Commander, Region VI, Colonel Rafael Jotie;

Task Force Lorro, based in Libertad, Butuan City, and operating in Agusan del Norte and Agusan del Sur, under the command of Colonel Ricardo Viajar;

The Philippines Army Task Force Agusan, based in Butuan City and operating along the Agusan River, under the command of Colonel Rogelio Villanueva;

First Composite Infantry Battalion, comprising PC, PA, navy and air force personnel and based in Trento Agusan del Sur; it is commanded by Colonel Roberto Manlongat and is accountable to Brigadier General Jose F. Magno, head of Central Command covering Regions X and XI.

Amnesty International has also received reports of particular PC and PA battalions which had gained notoriety for their allegedly persistent misconduct. (These included the 60th PC Battalion, assigned to Kalinga-Apayao in 1978 and then transferred to Northern Samar; the 44th PA Battalion assigned in Kalinga-Apayo from October 1979 until June 1980; and the 51st PC Ranger Battalion, formerly based in Bukidnon.)

In addition, Amnesty International has received disturbing reports about the activities of special combat units assigned to particular areas to combat armed dissidents and criminal groups. The Long Range Patrol Group (LRP) of The Philippines Constabulary is one such special force. It is based at Camp Bagong Diwa, Bicutan, Metromanila, but its units are assigned throughout the country. Amnesty International has received reports of LRP units active in Samar, the Bicol region, the Cagayan Valley, Abra, and Negros Occidental.

In one case an LRP unit is reported to have abducted seven men from a wedding party in March 1980; their bodies were found six months later on a hacienda. An LRP unit of about 50 men under Captain Florendo Baliscao was assigned to Kabankalan, Negros Occidental, in March 1980, reportedly at the request of local planters who were concerned at rising violence in the area. According to evidence presented in court, "the place was a haven of lawless elements such as subversives, bandits, fanatic groups, etc. . . . for which reason . . . Captain Baliscao and his troop were dispatched to that place. This is because his troop of the PC was trained . . . to effect counter-offensive moves [against] all these conditions inimical to the goals of the New Society." The order to send the LRP to Kabankalan was given by the Chief of Constabulary, General Ramos, and a subsequent decision that the unit should remain in the area despite requests to move them, was made by President Marcos who, in a note addressed to General Ramos, said:

"Let us keep the special task force you sent to Southern Negros Occidental based in Kabankalan. And let us train the local ICHDF and arm them before we withdraw the task force. This is necessary as there are reports of subversive activity there again." [14]

The LRP were reported to have been assigned to track down members of a quasi-religious armed band, the Salvatores, and members of the NPA in the area. The Unit did not wear uniforms, but were often distinguished by T-shirts bearing the words "Walane Patawat" ("No Mercy"). They were reportedly not accountable to the provincial commander but to their commanding officer, Lt. Col. Bernardo Ocampo, based at Camp Bagong Diwa, Bicutan Taguig, Rizal, Metromanila.

The bodies of the seven men were found on September 16, 1980, on the hacienda of the father of Pablo Sola, Mayor of Kabankalan. The victims were allegedly abducted on March 29, 1982, by members of the LRP accompanied by guides. After the discovery of the bodies murder charges were brought against five named people, including Pablo Sola and Captain Baliscao, and 14 John Does identified only as members of the LRP. A warrant of arrest was served on Captain Baliscao on October 25, 1980. His commanding officer, Lt. Col. Ocampo, had already requested the municipal court of Kabankalan on October 14 to grant him custody of Captain Baliscao, citing Executive Order No. 106 of 1937, which authorizes a commanding officer to take custody of a subordinate charged before court. A motion was granted by the municipal court judge on October 28, "in the interest of state security." While under his commanding officer's custody, Captain Baliscao was assigned to active duty in Northern Luzon.

Captain Baliscao appeared in April 1981 for bail hearings and arraignment before the court of First Instance, Bacolod City, to which the case had been transferred. On May 21, 1981, a lawyer of the Judge Advocate General's Office presented a motion to the court of First Instance opposing an earlier prosecution motion for the transfer of Captain Baliscao to detention in Bacolod City. The motion argued on the basis of a memorandum from President Marcos to Supreme Court Justice Ericta that Captain Baliscao should be tried by court martial. Moreover, it was argued that evidence of Captain Baliscao's guilt was not strong:

". . . the police records show widespread killing, banditry, subversive [activity], etc. [in the area]. It is our belief . . . that there is more reason to believe that it was the insurgents, the bandits and/or outlaws who have committed the alleged offense, unless of course the decreased persons were the outlaws themselves for whom the Government [had] dispatched the LRP. [emphasis in original] if they are, then I pray time to this Honourable Court to submit evidence showing that the Government have awarded unto the LRP, particularly to Captain Baliscao, for work well done."

On July 14, 1981, the Court of First Instance was informed through the PC provincial command that Captain Baliscao had gone absent without leave. He did not reappear at subsequent hearings of the murder case.

THE INTEGRATED CIVILIAN HOME DEFENSE FORCE (ICHDF)

The ICHDF is under the supervision of the Office of the Integrated Civilian Home Defense Force of The Philippines Constabulary and is under the command of The Philippines Constabulary. It operates as a civilian militia throughout the country and in January 1979 was reported to be approximately 75,000 strong. Amnesty International has received persistent reports of abuses committed by members of the ICHDF both acting alone and in conjunction with armed forces personnel.

In some areas recruits are reported to include criminals and the personal bodyguards of locally powerful figures. Another source of recruitment is reported to be members of irregular quasi-military political, religious, or criminal units. For example, Rodrigo Labajo was arrested in Laac, Davao del Norte, on August 10, 1981, by members of the Caballeros de Rizal for Agricultural Endeavor, an armed quasi-religious organization, some of whom had been recruited into the ICHDF: Epifanio Puebla was last seen on the South Davao Development Corporation (SODACO) far in Toril, Davao City, on April 22, 1981, in the custody of men described by different informants as company security guards, members of the ICHDF, and "reformists" (members of the Rural Reformist Movement).

Although members of the ICHDF are strictly accountable to the PC, Amnesty International has received reports that non-PC units had also recruited and armed civilian personnel who had thereafter been designated as ICHDF members. After its assignment to the border region of Zamboanga del Sur and Misamis Occidental in May 1980, the Airborne unit of The Phippines Army recruited members of the quasi-religious organization Rock Christ into the ICHDF and supplied them with arms.

All the units described above are part of the structure of the AFP and fall within its chain of command, even if some of them appear to operate more or less independently.

Amnesty International has also received reports of human rights violations by irregular paramilitary groups allegedly acting with official approval. These groups were reported to be religious, political, or criminal in character and in some cases to exhibit a combination of these characteristics. Amnesty International has received allegations that in Mindanao alone the following paramilitary groups operated with government sanction in 1981: Rock Christ, the Lost Command, the Rural Reformist Movement, the Charismatic Movement of The Philippines, the Ilagas and the 4Ks: Kasal-anan, Kaluwasan Kinabuki, Kabus (sin, salvation, life, povety).[15]

PARAMILITARY GROUPS

Amnesty International has received testimony on the activities of two non-governmental paramilitary groups, Rock Christ and the Lost Command. The testimony indicated strongly that these two groups were operating with official sanction.

[15] This is not a comprehensive list of groups reported to be active in the area. A survey of quasi-religious groups covering only the provinces of Zamboanga del Norte, Zamboanga del Sur, and Misamis Occidental recorded 14 other groups, some of which were alleged to have been armed (Tribal Forum, February-March 1982, pp. 2-5.)

Rock Christ

Between the first week of July and the end of October 1981, an outbreak of violence, involving the killing of at least 16 people and the beating, abduction, and "disappearance" of others, occurred in Barrios (villages) around the towns of Josefina, Zamboanga del Sur, and Osmena, Zamboanga del Norte. Most of these incidents (detailed below) were reported to be the work of the quasi-religious Rock Christ group based in San Jose, Osmena, Zamboanga del Norte.[16]

First week of July: a 13-year-old girl, Anicia Thrukan, from Lalud, Tudela, Misamis Occidental, "disappeared" while on an errand for her parents. A Rock Christ member reportedly confessed in September 1981 that the group had stabbed her to death and cut her body into pieces.

Mid-July: Boy Umpad, Rosalio Gumate, and nine unarmed people were reportedly accosted and robbed by members of Rock Christ who tied them up and beat them.

August 4: Segundino Tuastumban was stabbed to death by Rock Christ members in Napangan, Sinacaban, Misamis Occidental.

August 8: Jaime Maghanoy was stabbed to death by Rock Christ members while harvesting corn in Napangan.

August 10: Three local politicians were abducted from their houses and stabbed to death by members of Rock Christ between 7 pm and midnight. The victims were: Carlito Luminding and Alipio Culalho, both of Tuno, Tudela, Misamis Occidental; and Placido Pepito of Sitio Egos, Tudela, Misamis Occidental.

August 24: 10 people—Chiquito Macan, his wife and four children, and Tranquilino Gumalay, his wife and two children, all of Tuno, Tudela—were abducted on their way home from their farms by Rock Christ members and held captive for five days in the house of a Rock Christ member, Segundo Sumanduran. They were accused of boycotting the presidential elections and of supporting the New People's Army. While being interrogated, Chiquito Macan had a knife held against his head. He and Tranquilino Gumalay were reportedly invited on August 25 to join the Rock Christ group in the killing of Tingol Gumapon and his relatives (detailed below).

August 25: At approximately 9 pm, Rock Christ members strafed and burned the house of Tingol Gumapon in Gitason, Tudela. Three families, comprising 14 of Tingol Gumapon's relatives, were staying in the house. Later 10 bodies with gunshot and stab wounds were found in a shallow mass grave nearby. Four of those staying in the house survived the incident.

October 2: Lucio Adapon, an elected member of the Josefina People's Council, his wife, their five children (aged from nine months to 10 years), and a nephew were shot dead in their house in Napolan just after midnight. It is reported that Lucio Adapon may have been suspected of being a New People's Army sympathizer because, unlike most of the population of the area, he did not evacuate his home when the violence started. There is no evidence of Rock Christ involvement in this incident. Witnesses saw members of the 125th Airborne Company, the ICHDF, and police in the vicinity of the house at the time of the killings.

October 28: Ulpiano Antipolo of Sebucang, Josefina, was dragged from his house and shot dead by five ICHDF members.

The violence attributed primarily to Rock Christ and ICHDF members during this period is alleged to have been instigated and encouraged by a unit of the 125th Airborne Company based in Pagadian City. The unit, under a lieutenant, was assigned to the area shortly before the presidential election of June 16, 1981. The movement to boycott the presidential election gained considerable support in the area. Attendance at rallies organized by the movement was reportedly high and on June 16 a majority of the people reportedly abstained from voting. In the barrios of Tuno, Lalud, and Lampasan, fewer than 100 of the more than 1,000 eligible voters cast a ballot. The abductions and killings of August 10 and 24 were reportedly connected with the victims having organized or participated in the boycott.

When the Airborne unit arrived in the area, they began recruiting members of Rock Christ into the ICHDF. Amnesty International has a signed receipt for a rifle and ammunition issued by the 125th Airborne Company to Ireneo (Jessie) Sumagang, a known member of Rock Christ and an ICHDF recruit. The receipt is dated July 16, 1981, by which time Rock Christ had already committed its first alleged killing. Members of the Airborne unit were alleged to have been directly involved in one of the reported incidents, the abductions, and detention of 10 people on August 24. Government complicity is also suggested by the reported participation in Rock Christ of a number of people holding official positions, including the founder of Rock Christ, Ayoy Balase, a reservist colonel, and Maximo Laure, a barrio captain. Before the Airborne unit was assigned to the area, no incidents of violence by the Rock Christ group had been reported.

Amnesty International believes that there is considerable circumstantial evidence linking Rock Christ to the 125th Airborne Company and that further investigation of the incidents between July and October 1981 should be undertaken, particularly with a view to establishing whether or not the Airborne unit was guilty of complicity in the violence.

Amnesty International understands that, in response to representatives by lawyers of the Free Legal Assistance Group, the Minister of National Defense, Juan Ponce Enrile, on October 28, 1981, ordered an investigation into the incidents to be carried out by Brigadier General Delfin Castro, Commander of the 4th Brigade, The Philippines Army. The results of this investigation have not been made public. Ayoy Balase, the founder of Rock Christ, was reported to have been killed by a New People's Army unit during October 1981. In May 1982 Amnesty International was informed that one Rock Chist member suspected of involvement in the murder of Tingol Gumapon and his relatives was being detained in Oroquieta City Jail. Other Rock Christ members were reported to be still armed, despite assurances by the Minister of National Defense on October 29 that they would be disarmed. They had recently threatened to raid the Franciscan Missionaries Mission Convent, a center for people who had evacuated their *barrios* out of fear of the sect.

The Lost Command

Amnesty International has received extensive allegations about the activities of the Lost Command, a paramilitary group whose Commander, Colonel Carlos Lademora, has publicly stated that he is an active officer of The Philippines Constabulary and that his unit is a Special Unit of the Armed Forces of The Philippines engaged in counter-insurgency operations.[17]

The Lost Command is based in Tambia in the Dimata mountain range in Agusan del Sur, Mindanao, near the town of San Francisco. According to information received by Amnesty International, its strength is about 250: about 15 are regular PC officers and men and the remainder are convicted military and civilian criminals and deserters. The Lost Command is reported among other things to run protection rackets in the San Francisco area, to act as security guards to agricultural corporations, and, by Colonel Lademora's own claim, to undertake counter-insurgency missions on the order of the government. In one incident in September 1981, some of its members are alleged to have massacred 45 men, women, and children in Barrio Sag-od, Las Navas, northern Samar.

Numerous complaints about the activities of the Lost Command are reported to have been made to President Marcos and senior military officers by the provincial administration. The Bishop of Butuan, the Most Reverend Carmelo D. F. Morelos, in whose diocese the Lost Command is based, wrote a pastoral letter in July 1981 to "share . . . the griefs and anxieties of our brethren in Christ in the communities along the Agusan River." Among the concerns raised in this letter were the activities of "the dreadful Lost Command." Despite the known location of the Lost Command base, no action has been taken to disband the unit. It is reported that the Lost Command was expanded in size after being constituted as a Special Unit of the Armed Forces of The Philippines (SUAFP) and that its recruits received training from, among others, a PC battalion based in Bicutan, Rizal. Funds for this training program were reportedly channeled through the Chief of Intelligence for Region X.

Amnesty International has received allegations of other official links to the Lost Command. It was reportedly operating in and around Cotabato City in southern Mindanao during the Moro National Liberation Front offensive of 1974 to 1975. According to one account, the unit was already composed of criminals and military personnel under arrest or in disgrace and was under the command of PC officers, including Lieutenant Colonel Lademora. In 1975 he was made provincial commander of Agusan del Sur. After this appointment his son, Carlos Jr., and remnants of the Lost Command reportedly perpetrated numerous abuses in the province. Complaints about these abuses led to Lieutenant Colonel Lademora's resignation as provincial commander in 1979.

In January 1980, Carlos Jr. and two of his men were killed in a gun battle with a PC officer. Lieutenant Colonel Lademora then took over operational command of the Lost Command and began to build up its strength. The group secured control of a

[16] Rock Christ, like several other such groups active in Mindanao, is affiliated to The Philippines Benevolent Missionary Association whose leader is Ruben Ecleo, a resident of Dinagat Island northeast of Surigao del Norte, Mindanao. Its members wear amulets which they believe render them invulnerable. Their high priests are said to have healing powers.

[17] See Sheilah Ocampo, "Angels of Death," Far Eastern Economic Review, March 19, 1982, pp. 21-22; and "Charlie's Deadly Angels," Newsweek, March 15, 1982, p. 42.

number of economic activities in the locality, including gold panning, illegal gambling and fish and meat supply. Members of the Lost Command have also reportedly acted as the security force for an 8,000-hectare palm oil plantation in Agusan del Sur, owned by a corporation, NGPI, jointly controlled by the government-owned Natinal Development Corporation and the originally British-owned, now Malaysian-owned Guthrie Plantations Inc. According to the British manager of the plantation, the Lost Command "facilitated" the purchase of land from indigenous Manobo tribesmen and settlers from the Visayas, and the recruitment of labor.[18] Chruch sources have said that more than 80 people were killed in and around San Francisco in 1980 and 1981.

In the early morning of September 15, 1981, 45 people were massacred in Barrio Sag-od, Las Navas, northern Samar. Survivors of the attack have stated that about 18 armed men entered the barrio and separated the inhabitants into two groups: men and older children, and women and young children. As they were being led away, the women and young children heard gunfire in the barrio. The commander of the armed men then questioned the women on the whereabouts of the New People's Army, which he accused the villagers of supporting. After the group denied all knowledge of the New People's Army, the men opened fire, killing all but 14 of the assembled women and children. A few hours later a unit of the 14th Infantry Battalion arrived and burned some of the houses with bodies in them. Some of the survivors, who worked for the nearby San Jose Timber Corporation, which has large logging concessions in the provinces of northern and eastern Samar, claimed that the armed men were part of a special security force hired to guard the timber company against the New People's Army. Two guides accompanied the armed men and were recognized by villagers as belonging to the ICHDF based at a camp at "Kilometer 7" within the timber company's logging area. One of the men involved in the massacre was identified by a survivor as a member of the special security unit.

The massacre was not reported in The Philippines national press until September 24, when the Manila newspaper Bulletin Today reported that 35 men, women and children had been killed by "still unidentified armed mer." It erroneously located the barrio of Sag-od in the province of eastern Samar. Camp Aguinaldo in Metro Manila, the headquarters of the military command and the Ministry of National Defense, was named as the source of the report. According to Bulletin Today, "some survivors said the armed men said they were army troops." The next day it reported that the Minister of National Defense, Juan Ponce Enrile, had ordered a thorough investigation into the reported massacre. The article again located Sag-od and Las Navas in the province of eastern Samar. The minister was quoted as saying that he had directed General Fabian Ver, AFP Chief of Staff and head of the Presidential Security Forces, and Lieutenant Colonel Fidel V. Ramos, Vice-Chief of Staff and Chief of the PC, to undertake the investigation immediately. On September 29 Bulletin Today reported:

"Authorities here identified today the armed group responsible for the massacre . . . as the security forces of a big logging company. The commander of the group [meaning the whole security force], said to number about 80 men armed with Armalite rifles, M-203 grenade launchers, and other high-powered guns, was identified as a "Lieutenant Colonel," known in some areas as "Tatang" [an honorific meaning "uncle"].

"Officials who supplied these details requested anonymity, saying that the group was vicious and had shown no mercy to people who had antagonized them in the past. They atrributed some unsolved killings to the group. . . .

"Eastern Command authorities [the military command responsible for Samar] have vehemently denied that the group was a unit attached to the command.

"Sources disclosed the big logging concessionaire in Las Navas had influential connections. The firm had reportedly been repeatedly harassed by Communist dissidents active in the place.

"Provincial authorities, meanwhile asked President Marcos to act on the killings and rid Samar of the vicious armed group. . . .

"The Lieutenant Colonel was described as between 50 and 55 years old and sporting a long beard and moustache. He was further described as a very well-informed man."

On October 2, "Bulletin Today" quoted the Minister of the National Defense as warning against "speculations" and reported that 16 people had survived the massacre, six of them children. The newspaper said that the management of the logging company in Las Navas had denied involvement in the massacre, claiming that "the firm's security forces have strict orders not to operate outside the firm's premises." The newspaper added that "sources said that the suspected killers are members of the 'Lost Command' in Mindanao."

On September 29, 1981, Lieutenant Colonel Lademora and invited friends celebrated his birthday at his house in San Francisco. One of the guests showed him the report in Bulletin Today, datelined Samar, which identified the armed group responsible for the Sag-od massacre as the security force of the timber company and mentioned that the commander was a lieutenant colonel known as "Tatang." According to information received by Amnesty International Lieutenant Colonel Lademora left for Manila the next morning after instructing his son, "Boy" Lademora, to assassinate the political leaders associated with the Agusan del Sur provincial governor, Valentina C. Plaza, if he had not returned in seven days. On September 30 he flew to Manila. It has been reported that while there he had his hair cut short and bought two or three wigs. He then reportedly went to Samar and returned to San Francisco with the bodies of two members of the unit based at the timber company. According to one theory, the Sag-od villagers had been massacred to avenge killings of these two members of the Lost Command. Lieutenant Colonel Lademora was reported to have contacted several people in San Francisco just before September 15 with a view to establishing that he was in the town on September 15.

The investigations of the massacre ordered by the Minister of National Defense was headed by Brigadier General Salvador Mison, Commander of Eastern Command. Other members of the panel included three colonels: Romeo Tarayo, Commander of the 14th Infantry Battalion; Bayani Fabic, PC brigade Task Force Commander; and Vicente Garcia, Chief of Staff of the PC/INP Region VIII. In October 1981 Brigadier General Mison told a meeting of the provincial council in Laoang that the Sag-od matter was closed and that the investigation had determined that the New People's Army was responsible for the massacre.[19]

Despite these findings the Lost Command security force at the San Jose Timber Corporation was withdrawn in mid-October and reportedly shipped back to Mindanao. In San Francisco Lieutenant Colonel Lademora was reported to have said that he had been investigated by the regional commander, who had later insisted that the unit leave Samar.

THE NEXT STEP

The first step in trying to ensure the protection of human rights in any country is to get information about how people are being treated by the authorities there, taking care that the information is accurate and complete and that it is not politically biased or distorted.

The next step is to act on the information available by mobilizing international public opinion in defense of the victims. Most of the Filipino victims are unknown outside their own country—many are unknown outside their own village or hamlet. The persecution they face may be little understood by the outside world, although international publicity may well be their only help of protection. In some cases world attention has saved lives. The single most important need, therefore, is to make people aware of what is happening.

WHAT YOU CAN DO

1. Write to the President of The Philippines: President Ferdinand E. Marcos, Malacanang Palace, Manila, The Philippines. Express your concern about continuing human rights violations like those detailed in this report.

2. Try to help mobilize public opinion in your country. Send letters to newspaper editors asking them to publicize what is happening in The Philippines; if possible, send them a copy of this publication.

3. Share this report with other people you feel ought to know about the facts in it. Discuss it with your family and friends; encourage them to express their concern by writing appeals.

4. For other information about Amnesty International's work on The Philippines and other countries where human rights are violated, contact any of the following Amnesty International USA offices.

National Office, 304 West 58th Street, New York, NY 10019, (212) 582-4440.

Washington Office, 705 G Street, SE, Washington, DC 20003, (202) 544-0200.

New England Regional Office, 12 Parker Street, Cambridge, MA 02138, (617) 492-8781.

ADDITIONAL MATERIALS FOR THE CAMPAIGN

A 130-page report of the November 1981 mission to the Philippines is the most comprehensive and detailed document Amnesty International has published on human rights violations in that country. Price: $5.95 plus $1.00 postage.

A poster, in two sizes, has been created especially for the campaign. The larger size (18x24) is suitable for library displays, large bulletin boards, etc. The smaller size (9x12) is especially designed for massive distribution and display. The poster depicts a pastoral fishing scene with Mount Mayon, the most nearly perfect cone-shaped volcano in the world, in the foreground. In the background is the distinct image of a prisoner behind wire bars. The hard-hitting text describes several human rights violations. Price: Large poster $5; small poster (used as part of campaign), free.

Two pamphlets, one on church workers and the other on peasants and trade unionists, describe the abductions, arrests, torture, and political killings suffered by these two groups. Price: One copy free; nominal charge for bulk orders.●

DEFENSE REPORT—AUSA

● Mr. GOLDWATER. Mr. President, one of the most helpful organizations in Washington is the Association of the United States Army in that it prepares a constant stream of short articles relative to the problems of our Army. As we all know, these problems are many and, as we also know, some of them are not easily solved.

To indicate to my colleagues the type of report that I am talking about, I ask that three current ones be placed at this point in the RECORD.

The reports follow:

LIVING AND WORKING CONDITIONS FOR OUR TROOPS IN EUROPE—TESTIMONY TO MISGUIDED PARSIMONY

No secret has been made of the fact that living and working conditions for our soldiers in Europe and for their families leave a lot to be desired. Nevertheless, when the commander of U.S. Army, Europe, prepared two books of photographs illustrating the actual conditions he induced a reaction of genuine shock.

The pictures of places where soldiers are expected to work include offices set up in condemned trailers, motor pools in which soldiers are attempting to maintain tracked vehicles while standing in mud up to their shins, other soldiers working on helicopters in a gymnasium that had been coverted to a hanger because it was the only dry, heated space available and data processing offices in cramped, damp basements.

The pictures illustrating the living conditions for troops serving in Germany without their families showed examples of four or more men crowded into tiny rooms, leaking roofs, falling plaster, inoperative or missing plumbing, boilers rusted out and disintegrating floors.

As depicted in the photographs, conditions in family quarters were no better. They showed water damage to floors, walls and electrical wiring, inefficient, hand-fired boilers serving large apartment buildings and hot water heaters so corroded that they will not function properly.

The illustrations do not show isolated, worst cases. These conditions predominate throughout the command. Some barracks, motor pools, offices and family quarters have been refurbished and some new ones have been built; but they are the exceptions. Soldiers being assigned to duty in Germany for three or more years know they have a better-than-even chance to spend that time living under conditions they would expect to find only in the most rundown areas of a U.S. city.

The answer, of course, is money—enough money to begin catching up with many years of misguided parsimony by a Congress that wants an outstanding fighting force in Europe but hasn't wanted to pay for it. Our soldiers and their families should not be expected to live and work under these conditions.

CHEMICAL WARFARE—A REALITY WE MUST BE PREPARED TO FACE

Chemical warfare is morally and philosophically repugnant; it is a reality upon which we would like to turn our backs. And yet we face the certain knowledge that the Soviet Union is, at the very least, experimenting with a new chemical agents in Afghanistan and Southeast Asia and considers chemicals to be standard weapons available to its field commanders for use without special permission from national authority.

Although the United States has disavowed the first use of chemical weapons, in order to deter their use by the USSR we must present a real ability to retaliate in kind, just as we seek to deter the use of nuclear weapons by the sureness of our counterstrikes. Unfortunately, the effectiveness of our existing retaliatory capability is questionable. The existing stocks of chemical weapons were all produced before 1969, when President Nixon halted all production, and each passing year reveals more "leakers" or other defects that force their destruction as unsafe.

The Army, which acts for all the services in this area, has developed a new kind of chemical agent called a "binary" munition, that is safe to store and transport. It has been trying for several years to get the funds to produce binaries so the old, deteriorating retaliatory stockpile can be gradually replaced. The fiscal 1983 defense budget submitted by President Reagan would support initial binary production and the Senate, by a very narrow margin, approved it. The House, after a highly emotional debate, rejected it. The issue had to be decided by a joint conference.

One would like to believe the conferees were guided by fact, not emotion. Even if binary production began immediately, it would be years before the stockpile could be completely replaced. To deny our forces in the field the ability to retaliate in kind only encourages the USSR to initiate the use of chemicals and increases the likelihood that we would have to resort to nuclear weapons.

In short, it is time for us to suppress our emotional reaction to chemical weapons and recognize that they are a necessary, if distasteful, part of being prepared for an entirely unpleasant undertaking—war.

A NATIONAL GUARD BRIGADE GETS NEW EQUIPMENT—A HOPEFUL SIGN

When an Army National Guard unit gets some new equipment it is a red letter day. It is so special, in fact, that a full-scale military ceremony was held recently at Ft. Stewart, Ga., to mark the arrival of new M60A3 tanks and TOW antitank missile launchers for the Georgia Guard's 48th Infantry Brigade. A high-priority unit, the 48th is getting the new equipment before some active-duty elements.

But, while it was a happy day for the men and women of the 48th, the fact that the arrival of a first increment of 16 tanks and 51 missile launchers deserved such an observance is a sad commentary on the ability of the Army National Guard and the Army Reserve to play their full role in what has expectantly been called the "Total Army." The 48th, for example, is a "round out" unit for the active-Army's 24th Infantry Division and, at the ceremony to welcome the new equipment, the division commander reminded everyone that wherever the 24th Division went the 48th Brigade had to be ready to go along. Unfortunately, the largest for the 48th Brigade is just a very small drop in a huge bucket of equipment shortages in the Army's reserve components.

The shortage of tanks runs into the hundreds in the National Guard alone, as does the need for aircraft. The combined shortage of armored personnel carriers for the Guard and Reserve is over 5,000. Together they need almost 10,000 trucks of all sizes and close to 1,000 artillery pieces.

The Total Army is an excellent concept designed to get the greatest possible combat power from a relatively small active force by having well-trained, fully manned and fully equipped Guard and Reserve units integrated into the required combat and support structure.

Other active-Army commanders at all levels would like to celebrate the arrival of new equipment for a veritable host of reserve units—from tiny detachments to major combat units—that are needed to make the Total Army work. Unfortunately, there has never been full budgetary support for the concept and the prospects for an early reversal are not very good.●

MENTAL HEALTH

● Mr. INOUYE. Mr. President, for some time, I have been concerned that, as a Nation, we have not been giving high enough priority to our Nation's mental health research programs. During our Appropriations Subcommittee's hearings this year, we learned that for the National Institutes of Health (NIH), 25 percent of those grants that have been approved were unfortunately not funded during the last fiscal year. A number of representatives from our Nation's biomedical community and the public at large spoke out quite strongly about the resulting significant morale problems within our Nation's biomedical research community as a result of this lack of available funding.

However, during our subsequent hearings on the National Institute of Mental Health (NIMH) it was reported that the figures were just the reverese; that is out of every 100 grants approved for funding, only 25 were in fact funded. In my judgment, this is most unfortunate and very shortsighted. Accordingly, today, I am submitting for the RECORD, a copy of an article which recently appeared in the New York Times entitled "The Biology of Fear and Anxiety: Evidence

Points to Chemical Triggers". This most informative article, written by Mr. Harold M. Schmeck, Jr., highlights a number of important new research initiatives that are being conducted by the National Institutes of Health.

In my judgment, we must increase our efforts in this area during the next fiscal year.

Mr. President, I ask that the text of this article be printed in the RECORD.

The article follows:

[From the New York Times, Sept. 17, 1982]

THE BIOLOGY OF FEAR AND ANXIETY: EVIDENCE POINTS TO CHEMICAL TRIGGERS

(By Harold M. Schmeck, Jr.)

Injections of a synthetic substance made for studies of the chemistry of human emotion have produced severe anxiety in monkeys within seconds. The animals became agitated, their hair rose, they squirmed and they displayed other outward signs of extreme alarm. These effects could be quickly halted by other chemicals.

Scientists have known for years that drugs such as the benzodiazepines Librium and Valium can lessen anxiety. But the ability to create such a pure state almost instantly with a drug alone is new and unexpected, according to scientists at the National Institute of Mental Health in Bethesda, Md.

"For the first time we may have a reasonable understanding of the biochemistry of anxiety," Dr. Steven M. Paul of the institute said recently. He referred not only to his own work, but a whole body of new research at many scientific centers.

The excitement of recent research, according to Dr. Paul and others, is that the chemistries of anxiety and other related emotions such as depression are now being brought to light and manipulated successfully in experiments. At the same time, scientists are gaining new insights into the chemistry of sleep and wakefulness and othe vital functions of the brain's control over the body.

Researchers have discovered the binding sites, called receptors, at which important features of this chemistry act, and their multiple functions have been separated, at least in concept. For example, one recently developed artificial chemical acts on such receptors to produce a strange state of quiet but intense wakefulness hitherto unobserved.

Receptors serve as receiving stations for the brain's nerve cells. They are analogous to locks to which the appropriate chemicals fit as keys. Experiments within the past few years have shown that some chemicals open the locks; others simply block the "keyhole" so that nothing else can get in, while still others seem to unlock different, but related processes. Accordingly, a whole spectrum of drugs has been developed, some of which act as tranquilizers while others block that action and still others produce the opposite effect, anxiety.

Even when an animal's behavior appears similar to a human's, no one can be certain that it experiences anxiety in the same way. But the animals in these recent experments also showed the same physical and hormonal effects as those of human anxiety. Blood pressure, heart rate and pulse rose abruptly. The concentration of stress hormones in the blood such as cortisol, epinephrine, which used to be called adrenaline, and norepinephrine, rose sharply. The epinephrine level rose to 10 times that of the animals' pre-experiment level, for example.

It has never before been possible to mimic human anxiety so thoroughly in animals through the use of drugs alone, Dr. Paul and a colleague, Dr. Phil Skolnick, said in a recent interview. They said the chemical appeared to give the first reliable animal model of human anxiety. As such, they believe it will prove valuable to understanding some of the important complexities of the chemistry of human emotion and behavior. In fact, Dr. Paul said, the anxiety-producer, usually called beta-CCE, which he and his colleagues gave to monkeys was also given to four humans in experiments in Europe. It produced such severe anxiety that two of the volunteers had to be injected with an antidote.

In chemical terms, the substance is the ethyl ester of beta carboline-3-carboxylic acid. It is chemically related to a large class of plant substances called alkaloids, some of which are known to have powerful effects on the nervous system.

Anxiety is a sensation familiar to all normal humans. In some respects it is necessary and beneficial and probably has been important to the evolution and survival of the species.

"Without it we would all probably be asleep at our desks," said Dr. Paul.

But when anxiety occurs too often, too easily or under abnormal circumstances, it can be a disabling illness. It has been estimated that, at one time or another, roughly one of every 20 Americans suffer anxiety severe enough to make them seek medical help. The social causes of anxiety are widespread, including danger, frustration and all manner of stressful situations. But all of these social effects are translated ultimately into chemical reactions in the brain.

In addition, some experts have long believed there are connections between abnormal expressions of anxiety and such physical illnesses as high blood pressure, heart disease, ulcers and other digestive ailments.

The main modern drugs that seem to act most directly against anxiety are the class called the benzodiazepines. The first of these to come into wide use was Librium, in 1960, followed by Valium and, a decade later, Dalmane, which became the most widely used prescription sleep aid.

Evidence that such drugs work by some means other than simple sedation was a strong hint that anxiety has an underlying chemical basis, but it has only recently become possible to study the chemistry of anxiety in any fruitful way.

A key development in opening up this field of research was the discovery in 1977 of the brain's receptors to which the benzodiazepines become attached in order to act. Such receptors were found by Dr. Richard F. Squires, who was then working for an American drug company, and Dr. Claus Braestrup in Denmark, among others. These binding sites for antianxiety drugs were first found in the brains of rats, then in cows, monkeys, humans and many other species. But the evolutionary line seems to have been drawn just above sharks. They lack such receptors, a fact that suggests sharks may be wholly free of anxiety.

The discovery of the receptors set off a widespread scientific search for other details of the brain system to which they were a key. Clearly, the receptors for benzodiazepines did not arise in evolution just to become targets for drugs that humans would invest millions of years later. The thinking of many specialists is that these binding sites are a key to a natural anxiety system and that antianxiety drugs act in the same way as natural body substances, perhaps still undiscovered, that keep anxiety in proper balance. The receptors appear to have multiple functions and to occur in more than one variety.

Those whose anxiety becomes so severe as to be a medical problem, rather than a useful alerting mechanism for self-defense, may have too many of the receptors, or too few, or an excess of some of the chemicals that bind to them, or any other imaginable derangements of the system.

Although the benzodiazepines are most used and best known for their antianxiety effects, they have other effects on the human body. They relax muscles, tend to prevent convulsions and seem also to have some sedative effects. Recent studies suggest that all of these effects are mediated by the same complex clusters of receptors or receptor types in different parts of the central nervous system.

Much study, at the N.I.M.H. and elsewhere, has been devoted to separating these effects to determine how each component is caused and how each can be altered or modulated.

In some cases, the receptor complex seems to have at least three functional parts, according to Dr. John F. Tallman of the mental health institute. One is the binding site that fits the benzodiazepine drugs and some other compounds. A second is a binding site for gamma aminobutyric acid, an important brain substance known as GABA.

The brain functions in large measure by the "firing" of individual nerve cells to send a message from one cell to the next among the brain's complex circuitry of billions of cells. This signaling process involves electricity and chemistry. In the complex orchestration of events in the brain in which nerve cells are either excited to fire or inhibited from doing so, GABA is one of the main agents of inhibition. It seems to facilitate the binding of benzodiazepines to the receptors.

A third recently discovered feature of benzodiazepine receptors is a chemical "channel" that, when open, allows important anions—electrically charged negative ions, such as chloride—to enter cells, Dr. Tallman said. This kind of complexity gives the receptors a large repertory of possible actions in controlling the activity of nerve cells in the brain.

A chemical can bind to the benzodiazepine receptor and turn on a cell function like a key turning in a lock. Other chemicals can bind to the receptor without turning on any such action. They seem to act only by occupying the site so that "active" chemicals cannot get there. Still other chemicals can occupy the binding site and have other effects as well.

Dr. Erminio Costa of the N.I.M.H., a specialist in the study of the GABA system, said there were many different ways in which the functions of the receptors can be deranged to produce illness. These include shortages or excesses of some of the chemicals that normally act on the receptors and abnormal function of the receptors themselves. In the long run, he said, functions related to the receptors may prove important not only in understanding anxiety, but also depression, another large category of human illness rooted partly in disorders of brain function.

One of the strangest yet most provocative recent findings related to the brain's use of

the so-called benzodiazepine receptors concerned the sleep-inducing properties of some of the drugs. These recent studies have focused on a laboratory-made chemical, 3-hydroxymethyl-beta-carboline, usually called 3-HMC. It was synthesized in the laboratory by Dr. James M. Cook of the University of Wisconsin, a collaborator of the scientists in Bethesda. It was designed specifically to bind to the receptor in a manner that might make it block the sleep-inducing action of flurazepam, the generic name for Dalmane. Studies of this compound by Dr. Wallace B. Mendelson, Michael Cain of the National Institutes of Health, and Drs. Paul and Skolnick showed that it did far more than that.

In small doses it did block the sedative effects of flurazepam. But when given alone in a somewhat heavier dose, it actually kept laboratory rats awake, a qualitatively different effect from simply blocking the action of the sedative, Dr. Mendelson said in a recent interview. Furthermore, the substance achieved its sleep-preventing effect without producing any of the agitation that often accompanies known stimulants such as amphetamine and caffeine. The scientist described the state as one of remarkably quiet but intense wakefulness. He and his colleagues coined the word "somnolytic" to describe drugs of this hitherto unknown kind, and suggested that it might be a forerunner of drugs that would help scientists better understand sleep and treat its disorders.

The benzodiazepine receptors were discovered only five years ago as the sites of action in the brain of one class of drugs. Since then, studies at many research centers have shown these brain cell binding sites to be involved in many different functions, including sleep, anxiety, muscle tension, protection against convulsions and perhaps others. A major focus of research here and abroad is to separate each of those functions for the better design of drugs as well as more detailed understanding of the complexities of emotion, one of the most human attributes of the human brain.●

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have a number of items that I believe can be dealt with by unanimous consent. I invite the attention of the minority leader first to S. 2852 Calendar Order No. 777. I ask if he is in a position to clear that item at this time.

Mr. ROBERT C. BYRD. Mr. President, that item has been cleared on this side.

Mr. BAKER. I thank the minority leader.

SALLIE MAE TECHNICAL AMENDMENTS ACT OF 1982

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate S. 2852.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 2852) to amend section 439 of the Higher Education Act of 1965 to make a technical amendment relating to priority of indebtedness, to provide for the family contribution schedule for student financial assistance for academic years 1983-1984, and 1984-1985, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill which had been reported from the Committee on Labor and Human Resources with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Sallie Mae Technical Amendments Act of 1982".

STUDENT LOAN MARKETING ASSOCIATION

SEC. 2. The last sentence of section 439(l) of the Higher Education Act of 1965 is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1984".

MAXIMUM PELL GRANT

SEC. 3. Notwithstanding section 411(a)(2) of the Higher Education Act of 1965, the maximum Pell Grant a student may receive for academic year 1983-1984 under such Act shall be $1,800 or 50 percent of the cost of attendance (as defined under section 7 of this Act for academic year 1982-1983) at the institution at which the student is in attendance.

DECOUPLING PELL GRANT FAMILY CONTRIBUTION SCHEDULE FROM CAMPUS-BASED PROGRAMS

SEC. 4. The Secretary of Education shall establish or approve separate systems of need analysis for academic year 1983-1984 and for academic year 1984-1985 for the programs authorized under subpart 2 of part A, part C, and part E, of title IV of the Higher Education Act of 1965.

PELL GRANT FAMILY CONTRIBUTION SCHEDULE FOR ACADEMIC YEAR 1983-1984

SEC. 5. (a) Except as provided in subsections (b) and (c), the family contribution schedule for academic year 1982-1983 for Pell Grants under subpart 1 of part A of title IV of the Higher Education Act of 1965 shall be the family contribution schedule for such grants for the academic year 1983-1984.

(b) Each of the amounts allowed as an offset for family size for dependent and independent students in the family contribution schedule for academic year 1983-1984 shall be computed by increasing the comparable amount (for the same family size) in the family contribution schedule for academic year 1982-1983 by 7.3 percent, and rounding the result to the nearest $100.

(c) For purposes of subsection (a), the family contribution schedule for academic year 1982-1983 shall be modified by the Secretary of Education for use for academic year 1983-1984—

(1) to reflect the most recent and relevant data, and

(2) to comply with section 482(b)(3) of the Higher Education Act of 1965 with respect to the treatment of payments under title 38 of the United States Code.

(d) The modified family contribution schedule under this section shall be submitted not later than 15 days after the date of enactment of this Act.

PELL GRANT FAMILY CONTRIBUTION SCHEDULE FOR ACADEMIC YEAR 1984-1985

SEC. 6. (a)(1) The family contribution schedule for academic year 1984-1985 for Pell Grants under subpart 1 of part A of title VI of the Higher Education Act of 1965 shall be established by the Secretary of Education, if the Secretary publishes a proposed schedule in the Federal Register by March 1, 1983, and submits it to the President of the Senate and the Speaker of the House of Representatives not later than the time such schedule is so published.

(2) The proposed schedule shall be subject to public comment for 30 days. The Secretary shall publish and submit to the President of the Senate and the Speaker of the House of Representatives a final family contribution schedule not later than April 15, 1983, for the academic year 1984-1985.

(3) If the Secretary does not so publish and submit such schedule as required by paragraphs (1) and (2), the family contribution schedule in effect for academic year 1983-1984 shall be the family contribution for academic year 1984-1985, except as provided in subsections (c) and (d) of this section.

(b) If the Secretary publishes and submits the final family contribution schedule as required by subsection (a) such schedule shall take effect unless, on or before June 1, 1983, either House of Congress adopts a resolution of disapproval of such schedule. In such event, the Secretary shall publish a new proposed family contribution schedule in the Federal Register and submit it to the President of the Senate and the Speaker of the House of Representatives not later than 15 days after the date of the adoption of such resolution of disapproval. Such new schedule shall take into consideration such recommendations as may be made in either House of Congress in connection with such resolution. Such new schedule shall be effective (for academic year 1984-1985) on July 1, 1983, unless, prior to that date, either House of Congress adopts a resolution of disapproval of such new schedule. If the new schedule is also disapproved, the family contribution schedule in effect for academic year 1983-1984 shall be the family contribution for academic year 1984-1985, except as provided in subsections (c) and (d) of this section.

(c)(1) Each of the amounts allowed as an offset for family size for dependent and independent students in the family contribution schedule for academic year 1984-1985 shall be computed by increasing (or decreasing) the comparable amount (for the same family size) in the family contribution schedule for academic year 1983-1984 (as set by section 5(b) of this Act) by a percentage equal to the percentage increase (or decrease) in the Consumer Price Index published by the Department of Labor, and rounding the result to the nearest $100.

(2) For purposes of paragraph (1) of this subsection, the percentage increase (or decrease) in the Consumer Price Index is the change, expressed as a percent, between the arithmetic mean of the Consumer Price Index for April, May, and June of 1982 and the arithmetic mean of such Index for April, May, and June of 1983.

(d) If, under subsection (a) or (b), the family contribution schedule for academic year 1983-1984 is required to be the family contribution schedule for academic year 1984-1985, the family contribution schedule for academic year 1983-1984 shall be modified by the Secretary of Education for use for academic year 1984-1985 to reflect the most recent and relevant data.

(e) The modified family contribution schedule under this section shall be published in the Federal Register not later than July 15, 1983.

COST OF ATTENDANCE

SEC. 7. Notwithstanding any other provision of law, the cost of attendance criteria used for calculating eligibility for and the amount of Pell Grants for academic years

1983-1984 and 1984-1985 shall be the same as those criteria in effect for academic year 1982-1983.

INFORMATION CONCERNING FAMILY SIZE OFFSET

SEC. 8. The Secretary of Education shall publish in the Federal Register the changes in amounts allowed as an offset for family size as a consequence of the requirements of section 6(c) of this Act immediately after publication by the Secretary of Labor of the Consumer Price Index for June 1983.

GUARANTEED STUDENT LOAN FAMILY CONTRIBUTION SCHEDULE FOR THE PERIOD JULY 1, 1983 THROUGH JUNE 30, 1984

SEC. 9. (a) Except as provided in subsections (b) and (c) the family contribution schedule for the period of instruction from July 1, 1983 through June 30, 1984 for loans made, insured, or guaranteed under part B of title IV of the Higher Education Act of 1965 shall be the family contribution schedule for such loans for the period of instruction from July 1, 1982 through June 30, 1983.

(b) For purposes of subsection (a), the family contribution schedule for the period of instruction from July 1, 1982 through June 30, 1983 shall be modified by the Secretary of Education for use for the period of instruction from July 1, 1983 through June 30, 1984 to reflect the most recent and relevant data.

(c) The modified family contribution schedule under this section shall be submitted not later than March 1, 1983, and shall otherwise be subject to the provisions of section 482(a) of the Higher Education Act of 1965.

SUPPLEMENTAL EDUCATION OPPORTUNITY GRANT APPORTIONMENT FOR FISCAL YEARS 1983 AND 1984

SEC. 10. (a) Notwithstanding section 413D of the Higher Education Act of 1965, the Secretary shall apportion the sums appropriated pursuant to section 413A(b) of the Higher Education Act of 1965 for each of the fiscal years 1983 and 1984 among the States so that each State's apportionment bears the same ratio to the total amount appropriated as that State's apportionment in fiscal year 1981 bears to the total amount appropriated pursuant to section 413A(b) for the fiscal year 1981.

(b) The Secretary shall allocate sums appropriated pursuant to section 413A(b) of the Higher Education Act of 1965 for each of the fiscal years 1983 and 1984 to institutions in each State without regard to section 413D(b)(1)(B)(ii)(I) of that Act.

COLLEGE WORK-STUDY ALLOTMENT FOR FISCAL YEARS 1983 AND 1984

SEC. 11. Notwithstanding section 442 of the Higher Education Act of 1965, the Secretary shall allot the sums appropriated pursuant to section 441(b) of the Higher Education Act of 1965 for each of the fiscal years 1983 and 1984, among the States so that each State's allotment bears the same ratio to the total amount appropriated as that State's allotment in fiscal year 1981 bears to the total amount appropriated pursuant to section 441(b) for the fiscal year 1981.

NATIONAL DIRECT STUDENT LOAN APPORTIONMENT FOR FISCAL YEARS 1983 AND 1984

SEC. 12. Notwithstanding section 462 of the Higher Education Act of 1965, the Secretary shall apportion the sums appropriated pursuant to section 461(b)(1) of the Higher Education Act of 1965 for each of the fiscal years 1983 and 1984, among the States so that each State's apportionment bears the same ratio to the total amount appropriated as that State's apportionment in fiscal year 1981 bears to the total amount appropriated pursuant to section 461(b)(1) for the fiscal year 1981.

LOAN REPAYMENT DISCLOSURE

SEC. 13. (a)(1) Section 433A of the Higher Education Act of 1965 is amended by inserting "(a)" after the section designation and by adding at the end thereof of the following new subsection:

"(b) Each eligible lender shall enter into an agreement with the Secretary under which the eligible lender will, prior to the start of the repayment period of the student borrower on loans made, insured, or guaranteed under this part, disclose to the student borrower, clearly and conspicuously in writing, and in a form that the student may keep, the information required under this subsection. The disclosures required by this subsection shall include—

"(1) the itemization of and the total of amounts financed, calculated by adding all amounts borrowed by the student borrower under this part, and subtracting all charges, including any origination fee or insurance premium, paid by the student borrower;

"(2) the dollar cost to the student borrower of the amount borrowed;

"(3) the dollar amount of total scheduled payments, calculated by adding the amounts in clauses (1) and (2); and

"(4) the repayment schedule of the student borrower, including the number, amounts, and frequency of payments.".

(2) The second sentence of such section is amended by striking out "section" and inserting in lieu thereof "subsection".

(b)(1) Section 463A of the Higher Education Act of 1965 is amended by inserting "(a)" after the section designation and by adding at the end thereof the following new subsection:

"(b) Each institution of higher education, in order to carry out the provisions of section 463(a)(8), shall, prior to the start of the repayment period of the student borrower on loans made under this part, disclose to the student borrower, clearly and conspicuously in writing, and in a form that the student may keep, the information required under this subsection. The disclosures required by this subsection shall include—

"(1) the itemization of and the total of amounts financed, calculated by adding all amounts borrowed by the student borrower under this part, and subtracting all charges, including any origination fee or insurance premium, paid by the student borrower;

"(2) the dollar cost to the student borrower of the amount borrowed;

"(3) the dollar amount of total scheduled payments, calculated by adding the amounts in clauses (1) and (2); and

"(4) the repayment schedule of the student borrower, including the number, amounts, and frequency of payments.".

(2)(A) The first sentence of such section is amended by striking out "section 463(a)(7)" and inserting in lieu thereof "section 463(a)(8)".

(B) The second sentence of such section is amended by striking out "section" and inserting in lieu thereof "subsection".

CONSOLIDATION OF LOANS BY STATE GUARANTY AGENCIES

SEC. 14. Section 428 of the Higher Education Act of 1965 is amended by adding at the end thereof the following new subsection:

"(j)(1) Each—

"(A) State agency and nonprofit private institution or organization with which the Secretary has an agreement under subsection (b) of this section, and

"(B) eligible lender in a State described in section 435(g)(1) (D) or (F) of this Act,

or its designated agent may, upon the request of a borrower who has received loans under this title from two or more programs or lenders, or has received any other federally insured or guaranteed student loan make, notwithstanding any other provision of this part limiting the maximum insured principal amount for all insured loans made to a borrower, a new loan to the borrower in an amount equal to the unpaid principal and accrued unpaid interest on the old loans. The proceeds of the new loan shall be used to discharge the liability on such old loans.

"(2) Loans made pursuant to this subsection shall be insurable by the State or nonprofit private institution or organization with which the Secretary has an agreement under section 428(b). The terms of loans made under this subsection shall be such terms as may be agreed upon by the borrower and the State agency and nonprofit private institution or organization, or eligible lender in a State described in section 435(g)(1) (D) or (F), and meet the requirements of section 427, except that (A) the ten-year maximum period referred to in section 427(a)(2)(B) may be extended to no more than twenty years, and (B) clause (ii) of section 427(a)(2)(B) shall not be applicable.

"(3)(A) Notwithstanding any other provision of this part, the State agency and nonprofit private institution or organization, or eligible lender in a State described in section 435(g)(1) (D) or (F), with the agreement of the borrower, may establish such repayment terms as it determines will promote the objectives of this subsection including, but not limited to, the establishment of graduated, income sensitive repayment schedules.

"(B) For any borrower who has received two or more loans under this part bearing interest at the rate of 9 per centum per annum on the unpaid principal balance of the loan and who requests a new loan under this subsection for the purpose of consolidation on a date after the date on which the Secretary has made a determination under section 427A(b), the rate of interest on such new loan shall not exceed 8 per centum per annum on the unpaid principal balance of such new loan.

"(4) The State agency and nonprofit private institution or organization, and eligible lender in a State described in section 435(g)(1) (D) or (F), shall develop a program to ensure the dissemination of information to students, lenders, and institutions of higher education regarding the loans authorized by this subsection.".

LINEAR REDUCTION OF PELL GRANTS

SEC. 15. Section 411(b)(3)(B) of the Higher Education Act of 1965 is amended to read as follows:

"(B)(i) If, for any period of any fiscal year, the funds appropriated for payments under this subpart are insufficient to satisfy fully all entitlements, as calculated under subsection (a)(2)(B)(i), the amount paid with respect to each entitlement shall be—

"(I) the full amount for any student whose expected family contribution is $200 or less, or

"(II) a percentage of that entitlement, as determined in accordance with a schedule of reductions established by the Secretary for

this purpose, for any student whose expected family contribution is more than $200.

"(ii) Any schedule established by the Secretary for the purpose of division (i) of this subparagraph shall contain a single linear reduction formula in which the percentage reduction increases uniformly as the entitlement decreases, and shall provide that if an entitlement is reduced to less than $100, no payment shall be made.".

HIGHER EDUCATION SURVEY DATA

SEC. 16. The National Center for Education Statistics shall collect and publish for academic years 1982 through 1985, tuition and fees data, and room and board charges for institutions of higher education included in the Higher Education General Information Survey. The surveys required by this section shall be consistent with prior surveys of data described in this section.

Mr. BAKER. Mr. President, I yield to the distinguished Senator from Vermont to manage this measure.

Mr. STAFFORD. Mr. President, I appreciate the majority leader calling this matter up and yielding to me.

Mr. President, I am pleased that the Senate is considering today S. 2852, which I introduced with Senators HATCH, PELL, and RANDOLPH. S. 2852 is emergency legislation which will remove a serious impediment to the availability of student loans.

This legislation would extend, for 2 years, a provision of law enacted last year which would give all creditors an equal claim on the assets of the student loan marketing association (Sallie Mae) if Sallie Mae were to enter into an involuntary liquidation or reorganization under the Bankruptcy Act. Prior to the adoption of this provision, which expires on September 30, of this year, the Federal Government had first priority access to Sallie Mae's assets in the event of the involuntary liquidation or reorganization. This provision establishes that the Federal Government would have equal access as a creditor to Sallie Mae's assets in this event.

In 1974 to 1981, Sallie Mae, which is a federally established private warehouse facility and secondary market for guaranteed student loans and which holds approximately $6 billion in student loan assets, was able to finance its operations through borrowing from the Federal Financing Bank (FFB), an arm of the U.S. Treasury. In 1981, as part of a general policy to limit off-budget borrowing by Government-sponsored private corporations such as Sallie Mae, the Treasury and Sallie Mae reached an agreement that Sallie Mae's draw on the FFB would end on September 30, 1982, or after Sallie Mae has borrowed $5 billion, whichever came first. Sallie Mae reached the $5 billion limit in January of this year, and must now borrow on the open market to finance its operations and provide liquidity to lenders in the GSL program.

If the equal priority provision, which expires on September 30, is not extended, it is highly doubtful that Sallie Mae will be able to market its bond issues, as prospective bondholders would stand behind the Federal Government in the unlikely event of a Sallie Mae bankruptcy, and would thus not buy Sallie Mae issues. The inability of Sallie Mae to finance its activities in the public capital markets would have serious repercussions for the student loan programs. The legislation which we are introducing today would allow Sallie Mae to enter these markets for the next 2 years while the Congress continues to provide oversight of its activities.

Mr. President, this bill will also provide certain technical corrections in the higher education programs, consistent with policies adopted in the continuing resolution on appropriations for fiscal year 1982. Principally, it would provide that if the Secretary of Education does not comply with the procedures in the Higher Education Act requiring him to submit a family contribution schedule for Pell grants to Congress by April 1, the previous year's schedule would remain in place. This year, the administration failed to conform with the law in submitting on time to Congress a family contribution schedule for the 1983-84 academic year, and this has resulted in extreme disruption and uncertainty for families trying to plan the financing of higher education for their children. It is therefore necessary to fix the terms and content of the family contribution schedule for the 1983-84 academic year, if the Department of Education again fails to prescribe a schedule in a timely and lawful manner, for academic year 1984-85.

S. 2852 will also correct a serious inequity which affects the ability of veterans who have received benefits under the GI bill to receive Pell grants. Many of us have received reports from veterans in our States that they are no longer eligible for Pell grants, because last year's Reconciliation Act and continuing resolution contained provisions which count GI bill benefits against Pell grant awards. Thus, many veterans with great financial need have been precluded from receiving Pell grant awards. S. 2852 will return us to the provisions of law which were in effect prior to reconciliation—in other words, will count one-half of GI bill education benefits as income, rather than directly against the Pell grant entitlement.

Mr. President, I urge the adoption of S. 2852, so that the student aid programs can proceed smoothly, and so that students and their families—and those who provide student aid—can plan their financing for the coming academic years.

Mr. President, I ask unanimous consent that a letter from the director, National Legislative Commission of the American Legion supporting this legislation be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE AMERICAN LEGION,
Washington, D.C. September 14, 1982.

DEAR SENATOR: The American Legion takes this opportunity to urge you in the strongest possible terms to approve S. 2852 when it comes up for consideration on the floor of the Senate. That measure contains a provision which would correct a problem that is currently denying veterans an opportunity to utilize their GI Bill educational readjustment benefits.

Prior to enactment of last year's Omnibus Reconsiliation Act, P.L. 97-35, only half of a veteran's GI Bill benefits were counted as income by the Department of Education in determining eligibility for Pell Grants. Now, all of a veteran's readjustment benefits are counted depriving many an opportunity to complete their education. Passage of S. 2852 would simply restore veteran Pell Grant eligibility to the pre Reconciliation status quo.

Unfortunately, many veterans are only just discovering that the Grants they relied upon to attend school this year are unavailable. Apart from this, the change in formula used by the Department of Education to evaluate an applicant's neediness acts to characterize the veteran as a double dipper. This is most inappropriate since the purely objective mathematical formula used to assess need fails to recognize the nation's obligation to veterans having served in the military as against non veteran peers who have not served.

Importantly, The American Legion does not begrudge needy non veterans seeking to better themselves through education. However, it is critically important to recognize that veterans having served in the military, particularly Vietnam veterans, were placed at a competitive educational disadvantage with non veteran peers. This is because many of the federal educational programs now available to any applicant were non existent when the veteran served. To say now that the veteran must compete with non veterans on the same basis betrays the value of his service as well as the nature of veterans readjustment benefits.

As always, your consideration of The American Legion's views is greatly appreciated.

Sincerely,

E. PHILIP RIGGIN,
Director, National Legislative Commission.

● Mr. HATCH. Mr. President, I am gratified that the Senate is considering today S. 2852, the Sallie Mae Technical Amendments Act of 1982. This bill, addressing a number of pressing higher education problems in the Federal student aid programs, is vital in preserving to millions of our Nation's students the benefits of tried and tested programs already in place. Since I introduced the bill on August 18, 1982, it has gained widespread support not only in the higher education community but beyond, as witness the letter from the American Legion made a part of the record by Senator STAFFORD this afternoon in his perceptive remarks. As he points out, S. 2852 includes a provision which would in

effect restore to a large number of veterans the ability make use of the Pell grant program in educating themselves for the transition to productive civilian lives.

Further, because of the urgency imposed by the September 30, deadline for extending the bankruptcy waiver for Sallie Mae, we have worked very hard in the month since the bill was introduced, to move it through committee on an abbreviated schedule and to a vote. We have succeeded, despite the time lost to the August recess, and I wish to thank the majority leader for the role he too has played in facilitating a vote at this time on a very crowded calendar.

I will not take the time to repeat the beneficial effects of this body for a measure whose merit has produced bipartisan backing in committee and which I am sure will appeal as strongly to all the Members of the Senate.●

Mr. STAFFORD. Mr. President, I move adoption of the committee amendment in the nature of a substitute.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment. The committee amendment in the nature of a substitute was agreed to.

Mr. STAFFORD. Mr. President, I move the passage of the bill.

The PRESIDING OFFICER. If there is no further debate, the question is on engrossment and the third reading of the bill.

The bill S. 2852 was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I thank the Senator from Vermont and I thank the minority leader for permitting us to deal with this measure at this time.

EXPRESSION OF DEEP GRATITUDE OF CONGRESS TO SPECIAL ENVOY PHILIP HABIB

Mr. BAKER. Mr. President, I believe this has been cleared. I ask unanimous consent that the Committee on Foreign Relations be discharged from further consideration of House Concurrent Resolution 397. I ask for its immediate consideration.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the resolution by title.

The legislative clerk read as follows:

A House Concurrent Resolution (H. Con. Res. 397) expressing the deep gratitude of Congress to Special Envoy Philip Habib.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

● Mr. DOLE. Mr. President, the resolution sent to the desk is nearly identical to one which the Senator from Kansas offered a week ago and which was passed by this body at that time. Just so we do not confuse anybody, let me point out that Congressman BROOMFIELD, my friend and the ranking minority member on the Foreign Relations Committee in the other House, is the author of this concurrent resolution. If you do not see a rush to the podiums so that everyone can sing the praises of Philip Habib, it is not because we do not think as highly of him as we did last week; we are merely passing the House version of a resolution similar to one we passed earlier. Given Mr. Habib's accomplishments, it is not surprising to find that each body has simultaneously acted to pass resolutions. Now we need to pass this one so that one of them will have passed both Houses.

We praise Philip Habib not only for his role in winning agreement to terms for an orderly departure of Palestinian forces from Beirut, but for the great progress he has made toward a settlement of the wider differences that still afflict the region of the Middle East. Mr. President, all Members of Congress express our highest praise and our most heartfelt gratitude for the noble contribution Philip Habib has made toward peace in the Middle East and throughout the world.●

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 397) was agreed to.

The preamble was agreed to.

Mr. BAKER. I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILL PLACED ON CALENDAR—H.R. 6168

Mr. BAKER. Mr. President, in connection with H.R. 6168, I state now for the consideration of the minority leader and other Members, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H.R. 6168, and that the bill be placed on the Legislative Calendar.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

BILLS HELD AT DESK

H.R. 6813

Mr. BAKER. Mr. President, I ask unanimous consent that once the Senate receives from the House of Representatives H.R. 6813, the Boat Safety Act amendments, it be held at the desk pending further disposition.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

H.R. 6804

Mr. BAKER. Mr. President, I ask unanimous consent that, once the Senate receives from the House of Representatives H.R. 6804, a bill dealing with the Coast Guard officer candidate program, it be held at the desk pending further disposition.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

H.R. 6580

Mr. BAKER. Mr. President, I ask unanimous consent that, once the Senate receives from the House of Representatives H.R. 6580, the Sailing School Vessels Act of 1982, it be held at the desk pending further disposition.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

BILL REFERRED TO COMMITTEE—H.R. 6956

Mr. BAKER. Mr. President, I ask unanimous consent that once the Senate receives H.R. 6956 from the House of Representatives, it be referred to the Committee on Appropriations.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR H.R. 6946 TO BE PLACED ON THE CALENDAR

Mr. BAKER. Mr. President, I ask unanimous consent that once the Senate receives from the House of Representatives H.R. 6946, it be placed on the calendar.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

ORDER FOR H.R. 5658 TO BE PLACED ON THE CALENDAR

Mr. BAKER. Similarly, Mr. President, I ask unanimous consent that once the Senate receives H.R. 5658 from the House of Representatives, it be placed on the Legislative Calendar.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I will not object. My senior colleague, Mr. RANDOLPH, has expressed a strong interest in this action, and therefore I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER EXTENDING TIME FOR BUDGET COMMITTEE TO REPORT SENATE RESOLUTION 447

Mr. BAKER. Finally, Mr. President, I believe this request has been cleared as well. I ask unanimous consent that the Budget Committee have until the close of business tomorrow to report Senate Resolution 447.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the minority leader.

Mr. President, that completes my list of routine business to be transacted today.

VISIT TO THE SENATE BY MEMBERS OF THE BRITISH PARLIAMENT

Mr. BAKER. Mr. President, I see the distinguished Senator from Delaware is on the floor, and I yield so that he may seek recognition for a very special purpose.

Mr. BIDEN. Mr. President, I thank the majority leader.

Mr. President, I have the distinct pleasure today of introducing to the Senate a group of distinguished British parliamentarians who are here in American-British parliamentary meetings. The chairman is the Right Honorable Frederick Willey, who is standing in the back of the Chamber. If my colleagues from the British House will please stand so we all know who I am talking about.

I am not going to run the risk, since we lost some of the members after the coffee, of introducing each individual person at this moment.

Mr. BAKER. Will the Senator yield?

Mr. BIDEN. Yes, I am delighted to.

Mr. BAKER. I wonder how we lost them?

Mr. BIDEN. We lost them to administration officials. I believe they had other appointments.

Mr. BAKER. Not to your coffee?

Mr. BIDEN. Not to the coffee.

I have checked, Mr. Leader, with each of them to determine who I would like to have vote on the issues the remainder of the day and those who I would wish not to vote on the issues; they have all been instructed. I am not going to ask unanimous consent at this moment that they be able to cast votes on the issues, although the way I have been going, I need help right now.

However, it is my pleasure to introduce them to the Senate and ask, if it is appropriate, if the Senate could recess just for a few minutes so my colleagues on the floor may have a chance to meet them and show them around.

Mr. BAKER. Yes. Mr. President, first of all, let me congratulate the Senator from Delaware for permitting us to do this and to welcome our friends from the British Parliament to the Chamber of the Senate. We are pleased to have them.

I yield to the minority leader.

Mr. ROBERT C. BYRD. Mr. President, before the distinguished majority leader moves to recess, I wish to associate myself with the remarks of the distinguished majority leader and the distinguished Senator from Delaware. I, too, welcome on behalf of the Members on my side of the aisle the visitation from these distinguished people.

[Applause.]

RECESS UNTIL 5:32 P.M.

Mr. BAKER. Mr. President, I now ask unanimous consent that the Senate stand in recess for 2 minutes so that we may have the opportunity to meet our distinguished guests.

There being no objection, the Senate, at 5:30 p.m., recessed until 5:32 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. COHEN).

POSTELECTION SESSION OF CONGRESS

Mr. BAKER. Mr. President, before I move to recess the Senate, I ask unanimous consent that a letter from the President of the United States to me, dated today, in respect to the remainder of this session and the appropriations process, be printed in the RECORD.

Even though the letter will be printed in the RECORD, I invite the attention of all Senators to it, and I will summarize it. First of all, may I say that the letter was addressed, as I understand it, to the Speaker and the minority leader of the House, to the majority leader and the minority leader of the Senate, and to the chairmen and the ranking minority members of the Appropriations Committees of both Houses.

The letter indicates that the President feels that we should pass as many appropriation bills as possible and do so as promptly as possible; that in the event that is not done before our recess in October for the campaign season before the election and it is necessary to have a continuing resolution, that resolution should be "for the shortest possible time. The duration should be the minimum necessary to allow this Congress to resume and complete its work following the elections."

Mr. President, I think the practical effect of that is this: If we could finish the appropriations process, or at least the major parts of it, I suppose we would not return or would not require a continuing resolution. However, I think it is unlikely that we are going to do that; and, for the sake of scheduling, Members should assume that the net effect of this letter is a request by the President that we complete the appropriations process after the election, if necessary. I believe that strongly indicates the possibility of a postelection session.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, September 16, 1982.

Hon. HOWARD H. BAKER, Jr.,
Majority Leader, U.S. Senate, Washington, D.C.

DEAR HOWARD: As we approach the start of a new fiscal year, I wish to underline the importance I attach to the Congress' passing responsible regular appropriations bills in a timely manner. I have said before, and I feel even more strongly now, that attempting to run the Federal Government without a proper budget—with a series of temporary continuing resolutions and the associated overall budgetary uncertainty—amounts to both bad economics and bad management.

I recognize that there have been delays in the development of appropriations bills for the coming fiscal year. And I understand of course that, with the November elections ahead, the Congress is anxious to recess in early October. If it therefore becomes necessary to resort again to the continuing resolution approach, I would urge most strongly that any continuing resolution be for the shortest possible time. The duration should be the minimum necessary to allow this Congress to resume and complete its work following the elections—in a manner that fulfills the obligations of the Budget Resolution that this Congress has passed.

I continue to hope that we may receive the regular appropriations bills on time. But if this proves infeasible, I trust you will give careful consideration to these views as you consider the possibility of a continuing resolution.

Sincerely,

RON.

Mr. ROBERT C. BYRD. Mr. President, could the majority leader state at this time when he thinks the Senate will return for such a session?

Mr. BAKER. Yes.

Mr. President, it would be my strong preference that if we have to come back, and I believe we will have to come back under these circumstances, that we do so on Monday following Thanksgiving Day and that, if my memory is correct, would be on November 29.

I must say for my friend, the minority leader, and any of those who are listening, that date is not now being set, but this would be my preference, and I will, of course, consult with the minority leader, with the Speaker, and with the minority leader of the House of

Representatives before we make any effort to complete that decision.

Mr. ROBERT C. BYRD. Mr. President, in view of the likelihood that there will be a postelection session, may I ask the distinguished majority leader—and he and I have discussed this already—for the record and for the edification of our colleagues would it not be his disposition that Senators might prepare to leave to do their work in their home States during the election, that they could plan on leaving as of around October 1 or October 2 since the Senate will be having to come back in any event?

Mr. BAKER. Mr. President, I would wish for that. As the minority leader correctly states, he and I have talked about that at some length and as recently as an hour or so ago. Before I make any further statement on that, however, once again I would wish to consult with him and with the Speaker because when I met with the Speaker yesterday he had a strong preference for October 8 as the break date.

This letter may change his mind on that subject. But before I make a final commitment in that respect I wish to talk to him further.

Mr. ROBERT C. BYRD. I would hope as for my part that the Senate will proceed with its own schedule and, of course, I do not presume to tell the majority leader what to do, but if the other body wishes to stay in until October 8, that is fine with me. But inasmuch as the Senate will have to come back after the election, I would hope that the distinguished majority leader would strongly consider adhering to the schedule which both of us have told our colleagues we expect to follow, that being that the Senate will go out on October 1 or October 2.

I recognize the fact that the majority leader is not in a position to say at this moment. He has many considerations that have to be studied, and he will have to converse with his colleagues on his side of the aisle, but for the record I wish to state that wish.

Mr. BAKER. Mr. President, I join in that wish, and I will do my best to accomplish that purpose.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. BAKER. Does the minority leader have any further business to transact?

Mr. ROBERT C. BYRD. I have none.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I see no other Senator seeking recognition.

If there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 9:30 a.m. tomorrow.

The motion was agreed to; and at 5:37 p.m., the Senate recessed until tomorrow, Friday, September 17, 1982, at 9:30 a.m.

HOUSE OF REPRESENTATIVES—*Thursday, September 16, 1982*

The House met at 10 a.m.

Dr. Harold J. Purdy, Boyce Bible School, the Southern Baptist Theological Seminary, Louisville, Ky., offered the following prayer:

Eternal God, our Father, we come to thee as the giver of life and all its blessings. We are especially grateful this day for this great Nation which is our heritage.

In these days of mounting problems and tensions around the world may we be used as a nation to help bring peace and justice to all people.

Bless these who have been charged with directing the affairs of government. Grant them wisdom and guidance to continue to lead us toward lasting peace and freedom.

We pray that we may have thankful hearts in the day of prosperity and a deeper trust in the time of adversity. In the name of the Prince of Peace we ask it. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. BLILEY. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BLILEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members. The vote was taken by electronic device, and there were—yeas 334, nays 29, answered "present" 2, not voting 67, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed bills, joint and concurrent resolutions of the following titles, in which the concurrence of the House is requested:

S. 349. An act to amend title 38, United States Code, to establish certain procedures for the adjudication of claims for benefits under laws administered by the Veterans' Administration; to apply the provisions of section 553 of title 5, United States Code, to rulemaking procedures of the Veterans' Administration; to provide for judicial review of certain final decisions of the Administrator of Veterans' Affairs; to provide for the

payment of reasonable fees to attorneys for rendering legal representation to individuals claiming benefits under laws administered by the Veterans' Administration; and for other purposes;

S. 2420. An act to protect victims of crime;

S.J. Res. 241. Joint resolution to provide for the designation of the week of December 12, 1982, through December 18, 1982, as "National Drunk and Drugged Driving Awareness Week";

S.J. Res. 243. Joint resolution authorizing and requesting the President to designate October 15, 1982, as "National Poetry Day"; and

S. Con. Res. 120. Concurrent resolution to commemorate the 75th anniversary of the Washington Cathedral.

DR. HAROLD J. PURDY

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, my deceased father, Dr. Carroll Hubbard, Sr., had the privilege of giving the prayer in the House of Representatives three times.

Shortly prior to his death last year, my father requested of me that I ask his close friend, Dr. Harold J. Purdy of Louisville, Ky., to be the guest Chaplain some time in the House of Representatives.

Today, it is a pleasure to have Dr. Purdy to give our opening prayer and serve as our guest Chaplain.

Dr. Purdy, now assistant director of and professor of theology at Boyce Bible School at Southern Baptist Theological Seminary in Louisville, was pastor of seven churches in Kentucky, Tennessee, and West Virginia during his 47 years in the active ministry. Two of the churches where Dr. Purdy was pastor—First Baptist Church at both Bowling Green and Madisonville—are among Kentucky's largest congregations.

Dr. Purdy was a member of the executive committee of the Southern Baptist Convention for 6 years, a member of the Baptist Sunday School Board for 12 years and served as president of the Tennessee Baptist Convention in 1963 while pastor of Nashville's Belmont Heights Baptist Church.

I am pleased to have as my guests today Dr. Purdy, his lovely and talented wife, Virginia—my mother's close friend—his brother-in-law, William P. Burdette, of St. Albans, W. Va., and his niece, Mrs. Joe (Jane) Coyner of Chantilly, Va.

CELEBRATING THE 172D ANNIVERSARY OF MEXICO'S INDEPENDENCE

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, today is the 16th of September, the day on which our neighboring Republic of Mexico celebrates its independence.

On September 16 in the year 1810, just 34 years after our own Declaration of Independence, a parish priest named Father Miguel Hidalgo pulled the rope that rang the bell in the village church of Dolores until the oppressed countrymen from the nearby farms filled the courtyard to overflowing, and then he called upon them to free their native land from the tyrannies of the Spanish crown.

Not quite 3 months later, Father Hidalgo and his followers proclaimed the abolition of slavery from Mexican soil—some 53 years before our own Emancipation Proclamation—and wrote the Western Hemisphere's first land reform statute.

In the New World the names of Hidalgo and Morelos will rank forever alongside those of Washington and Jefferson, Bolivar, and O'Higgins, and San Martin in the annals of human freedom.

In a later age, Abraham Lincoln and Benito Juarez dreamed the same dreams and fought the same foes, as Francisco Madero and Woodrow Wilson, Lazaro Cardenas and Franklin Roosevelt were destined to do in the continuing struggle for social justice and human dignity.

On this day when our good neighbors in Mexico strive to triumph over the severe economic dislocations which presently beset that land of such painful beauty and yet unrealized potential, let us join in honoring their national pride, in saluting their national future and in celebrating their day with the ancient cry of Miguel Hidalgo: "Via la Independencia."

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to my distinguished friend, the gentleman from Arizona.

Mr. RHODES. I thank my good friend, the majority leader.

I ask for this time merely to emphasize the fact that what the distinguished majority leader has said rings in the hearts of all of the House of Representatives on both sides of the aisle.

I wish to associate myself with his remarks and join with him in saluting our sister republic to the south on this most important day.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to my friend from Texas, the distinguished chairman of the Agriculture Committee.

Mr. DE LA GARZA. Mr. Speaker, I am happy to join my distinguished colleague, the majority leader, Mr. WRIGHT, in behalf of my constitutents I am sure, and personally, to extend to the people of Mexico, to its Government and our colleagues in Mexico's House and Senate our best wishes and congratulations on the anniversary of their independence. Our neighbors to the south are having very difficult times. I extend to them my personal pledge of cooperation, and I know my colleagues in the House will share my wish for Mexico and its people of a return to normal times soon. I know that the Mexican spirit which prompted that initial endeavor still exists and will allow the people of Mexico to persevere in their efforts to retain the hopes and aspirations of those great men and women that have since the beginning in 1810 made it the great country that it has become through many difficult and trying years.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from New York, who has accompanied me to that beautiful country to attend interparliamentary meetings.

Mr. GILMAN. Mr. Speaker, I am pleased to join the majority leader in noting that this week throughout our Nation we are celebrating National Hispanic Heritage Week, commemorating the 172d anniversary of Mexico's independence from Spain on September 16, 1810, I take advantage of this opportunity to honor the contributions Hispanic Americans have made to our Nation and also to emphasize our Nation's need to address the many social and economic problems faced by these Americans.

There are now over 12 million Hispanic Americans in our country, including over 20,000 in my own congressional district in New York. The Hispanic population in the United States is comprised of Chicanos, Puerto Ricans, Cubans, Dominicans, Central and South Americans, and those descended from Spain. Although there are differences among these various communities, all are united by their rich culture, their love for the Spanish language, and their strong regard for family. Hispanic Americans have added diversity and creativity to our Nation in the arts, music, literature, and architecture. They have also distinguished themselves in the fields of economics, education, government, and science, and technology.

As we honor their accomplishments, let us not forget the many social and economic problems which confront Hispanic Americans. Poverty, lack of education, and linguistic, and cultural barriers are ever-present for the majority of Hispanics. Nearly 27 percent of Hispanic families in the United States earn under $7,000 a year, compared to 16.6 percent of non-Hispanic families. Only 40 percent of Hispanic Americans have completed high school, compared to 46 percent of U.S. blacks and 67 percent of white Americans. This is so despite the Hispanic belief in the maxim "saber es poder" (knowledge is power). Also drug abuse has robbed the Hispanic community, as it has throughout our Nation, of

contributions that many of its members, especially its young people, might otherwise have made to our society.

Let us mark National Hispanic Heritage Week by applauding the achievements of our Hispanic population and recognizing the rich contributions they have made to our Nation. But let us also use this occasion to dedicate ourselves to insuring that Hispanic Americans receive all the rights and opportunities that are available in our Nation, so that the pervasive problems that plague the Hispanic community may begin to be eradicated.

□ 1030

THE MOST CRUCIAL ISSUE—UNEMPLOYMENT

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, today we are going to be given an opportunity in the House of Representatives to take up legislation that deals with one of the most crucial issues facing our country today, that is unemployment.

This bill that we are going to have a chance to vote on will put back nearly 230,000 people to work, 140,000 of them adults and 90,000 young people between the ages of 16 and 21.

Mr. Speaker, I just hope that my Republican colleagues will once again vote for the people, as they did a week ago in overriding the President.

I would like simply to remind everybody that with the election 5 weeks away and with unemployment rising, it seems to me here is another chance for my colleagues to show their courage in voting once more for the people and turning around, at least in a little way, some of the major problems of this country. If we do this we might even give senior citizens and students a break next year.

NATIONAL DRUNK AND DRUGGED DRIVING AWARENESS WEEK

(Mr. BARNES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARNES. Mr. Speaker, highway crashes cause more violent deaths every year than any other cause, and the majority of these violent deaths are due to drunk driving. Last year alone, drunk driving killed over 25,000 Americans and maimed 650,000 others. Also, drunk driving has high economic costs at about $24 billion a year. Of increasing concern is the combination of alcohol and drugs and its impact on the incidence of fatal crashes. Largely due to citizen groups like MADD and RID, most States have taken first steps to bring this nationwide epidemic under control.

Since 1980, the drunk driving tragedy has moved from the back page obituaries to the front pages of major newspapers and magazines. We can help assure that the momentum that is building around this issue will not fade away as society turns its attention to other pressing problems. Today, I am introducing a resolution, along with JIM HANSEN of Utah, proclaiming the week of December 12, 1982, as "National Drunk and Drugged Driving Awareness Week" to trigger massive attention and activities alerting the public to the dangers of combining alcohol, drugs, and driving. The Senate yesterday approved identical legislation, and, today, I seek your cosponsorship of this important legislation.

AN URGENTLY NEEDED PROGRAM OF PUBLIC SERVICE EMPLOYMENT

(Mr. WOLPE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLPE. Mr. Speaker, I hope that when this body takes up the jobs legislation that will shortly be before us that we will respond to that legislation with an overwhelming vote of approval.

Given the disaster that has befallen literally millions of jobless Americans, this bill is an extraordinarily modest undertaking, but it is a beginning.

There is no State that is suffering more from unemployment and from economic distress than my State of Michigan. While the national unemployment rate has fluctuated in the 9-percent range throughout this year, joblessness in my State of Michigan has surged to depression levels, ranging from 14 to 17 percent.

There are communities within my own congressional district with unemployment rates in excess of 20 percent. Throughout the State, hope has given way to despair, and the call for quick and decisive action to stimulate the State's economy and to put Michigan back to work has become more urgent every day.

Mr. Speaker, Michigan can no longer wait for the miraculous recovery promised by the President. The pain has simply become too great.

This resolution that will be before us today takes immediate and affirmative steps to create jobs for the long-term unemployed. It prescribes a course of action which this Congress, conscious of the devastation that unemployment has created for millions of American households, must endorse.

I urge my colleagues to join me in support of this critical legislation.

THREE CATEGORIES OF UNEMPLOYED

(Mr. MITCHELL of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL of Maryland. Mr. Speaker, in my opinion, those who are unemployed sort out into about three different categories. There is one category that is angry and frustrated and we see evidence of that anger and frustration growing in the cities.

There is another category that is determined to try to find something to do. I see people in my city picking up bottles and cans and selling them to make some money.

There is a third category that is characterized by absolute hopelessness—absolute; that is the category that is asking me and you and other Members of this House, "When is someone going to help us? When is someone going to do something to attempt to restore my sense of manhood and fatherhood that goes along with being an employed person?"

We have a resolution coming before us today and that resolution is not going to solve the problem of joblessness. It will affect only maybe 230,000 people; but what it will do, it will give some sense of hope to those who are unemployed and have been unemployed, that maybe at long last this Government is going to be responsive.

I hope we overwhelmingly pass the resolution.

ANOTHER CHAPTER IN THE GRAPES OF WRATH

(Mr. WATKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WATKINS. Mr. Speaker, the head of the household at 1600 Pennsylvania Avenue in Washington, D.,C., stated that if people want to work, they should use their feet and move to where the jobs are.

Mr. Speaker, as a youngster, I was a part of the "Okie-Arkie" movement where thousands upon thousands and millions of people, the largest movement of human beings ever recorded in the history of our country moved in the search for jobs.

The head of my household, my father, did not experience such a pleasure as maybe our President who moved to California about the same time and became a Hollywood actor and probably experienced great joy; but my father led our family through Arizona into California where we picked cotton, cut grapes, picked up potatoes, worked in shipyards in an effort to find a job to hold our family together.

That was a tragic moment, Mr. Speaker, at a time when the heads of

households found their homes broken up because they had to leave and try to find with their feet a job.

In my area of the State, as high as 68 percent of the people have outmigrated in the last 50 years in the search for a job, and today we have 18 percent of the people unemployed in one of my areas.

Mr. Speaker, in this tragic exodus in the thirties, there was a book written and that book was entitled the "Grapes of Wrath," by John Steinbeck. I cannot believe that this President wants to write another chapter to to that book or another book on the exodus of people in a search for jobs in America called the "Grapes of Wrath of the 1980's" by Ronald Reagan.

THE ADMINISTRATION'S GRAND PROMISES

(Mr. KILDEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KILDEE. Mr. Speaker, as the Representative of the congressional district which has consistently had the highest unemployment rate in the Nation over the last 2 years, I must express my dismay over the fact that the administration has done nothing to address this very serious problem. For 2 years, we have had promises that a grand economic plan would improve our economy. In those 2 years, conditions have deteriorated. How long is it going to be until this plan takes hold and people go back to work—another 2 years, another 4 years, or when? This administration seems determined to prove the validity of its rather questionable economic strategy at the expense of the workers in Flint, Mich., and around the country.

Mr. Speaker, having a general economic strategy does not mean that you do not address specific problems as they arise. The administration has not been doing its job. The President has made no specific recommendation to reduce the highest unemployment rate since the Great Depression. Instead, they say eventually it will go away. Workers in my area cannot wait any longer. Thousands have exhausted all unemployment benefits. Many have lost their homes. It also indicates a cynical callousness when they ask a worker who has been unemployed for 2 years to wait another 4 years before the economy becomes totally healthy. Promises are fine. They indicate our goals, but promises do not have a high nutritional value and promises do not pay the mortgage.

Mr. Speaker, we have a responsibility to address this problem even if the administration chooses to ignore it. We cannot afford to pursue a political ideology to the extreme if it has no relationship to reality. Later today, we will consider the urgent supplemental appropriations bill, House Joint Resolution 562, which is a first step in addressing the problem of unemployment. It is truly an urgent bill, and I appeal to my colleagues to support it.

ANOTHER CHAPTER IN U.S. HISTORY

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, another chapter has been written in the history of the United States, according to President Reagan.

Yesterday, in an address to a group of black Americans, the President stated that the Great Society had hurt black people, that all the spending for social programs occurring during the sixties ended the boom of the fifties.

Many of us, particularly those of us who were of draftable age during the Great Society remember that the Federal budget was bled far more by the Vietnam war than by the Great Society.

To my knowledge, President Reagan has never condemned that war effort for draining the country of Federal dollars and ruining those great 1950 days of prosperity.

Another chapter in "Alice in Wonderland" history, brought to you by our President.

□ 1040

LET US PUT AMERICANS BACK TO WORK

(Mr. RUSSO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUSSO. Mr. Speaker, I rise today in support of the jobs bill. Our country is currently suffering from a 9.8-percent unemployment rate—in Illinois it hovers around 12 percent. This is the highest rate our country has had since the Great Depression and the citizens in this country have had enough. When I ask people what they feel the highest priority their Government faces at the moment, they say jobs. It is our duty to help alleviate some of the suffering that these people are going through by passing this legislation which will put hundreds of thousands of unemployed back to work. Not only will they feel more worthwhile and productive, but it will also help our communities. Work will be done on bridges, streets, and parks—all those areas which have been neglected due to dwindling budgets.

I am tired of this old Republican rhetoric—the trickle-down theory—that jobs for the middle class and the poor will magically be created if we only give the rich more money to play with—to buy more Rolls Royces and yachts. This has not worked in the past and it will not work in the future. This is not helping the construction worker who has been laid off and his rent is due and his savings are all used up. He does not want luxuries; he wants food for his family and a roof over their heads. He wants to work; he wants a purpose. Let us give him a job today. Let us join together to pass this legislation and put Americans back to work.

Mr. Speaker, today the American people will find out which Members of Congress have cold, insensitive, and uncaring hearts and those who have warm, compassionate, and understanding ones.

WE HAVE A BETTER WAY TO ALLEVIATE UNEMPLOYMENT

(Mr. DICKS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DICKS. Mr. Speaker, I rise today in favor of the jobs bill. Unemployment in the State of Washington is 13 percent, and I must say that I recognize that some do not feel that this bill adequately addresses the problem that faces our country. But I must say to you as someone from the Pacific Northwest, we might not be here today trying to pass this legislation had the President not chosen to veto a housing bill that would have put back to work 30 percent of the people who are unemployed in the forest products and housing industry, if the administration, led by Mr. Stockman, had not demanded cutbacks in the Export-Import Bank which helped to sell airplanes internationally, attempted to close down salmon hatcheries in times of crisis in the salmon industry; if they had not chosen to gut the Youth Conservation Corps and the Young Adult Conservation Corps.

Clearly, this is a last resort, but today all of us recognize that America's roads need work, America's bridges need repair, our dams have been called unsafe, our parks desperately need work and repair. There are constructive things for the American people to do.

I say: Why not now? Why not get started on this important endeavor?

AMERICANS ROBBED OF CHANCE TO BE PRODUCTIVE

(Mr. MATSUI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MATSUI. Mr. Speaker, in the middle of this summer, 47,000 of the residents of Sacramento County were

out of work—a staggering 11.8 percent of our work force.

In this same California county, 1 in every 10 bridges is in need of repair or rehabilitation. There ought to be a way we can put these two problems together, for the benefit of the jobless and for the betterment of the whole community.

The jobs bill we are considering today takes a step in that direction. It should really be called a crime victims compensation bill, because it is an effort to spend $1 billion on thousands of Americans who have been robbed of their chance to be productive.

We cannot compensate all those who suffer from this outrageous social crime, but we have an obligation to take this one small step against despair.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 6529

Mr. EDGAR. Mr. Speaker, I ask unanimous consent to have my name removed as a cosponsor of the bill H.R. 6529, the Jobs and Business Opportunities for the Handicapped Act of 1982.

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

LET US FORGE A NEW FOREIGN POLICY TOWARD THE PHILIPPINES

(Mr. EDGAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDGAR. Mr. Speaker, 2 weeks ago, I, together with seven other colleagues, asked President Reagan to cancel the state visit of Philippine President Ferdinand Marcos. Our request was prompted by Mr. Marcos' declaration of emergency rule on August 31.

We are distressed by the fact that our Government is officially entertaining a person whom Amnesty International has ranked as one of the world's worst violators of human rights. Just yesterday, September 15, the Washington Post carried an article on the most recent Amnesty International mission to the Philippines. According to the report, "frequent torture cases, disappearances and killings have continued in the Philippines following the lifting of martial law more than a year and a half ago."

The Amnesty report confirms the assertion of the confidential report of the U.S. Embassy in Manila that "human rights abuses have increased in many areas." This report, dated April 13, 1982, also asserted that the Philippine military is responsible for many instances of kidnaping, murder, and holdups.

We do not believe that U.S. aid should continue to flow to arm a military government that represses its people. And we are deeply ashamed of the support which administrations since that of Richard Nixon have delivered to such a brutal dictatorship. It is time for us as legislators to take the lead in forging a new foreign policy toward the Philippines—one based on justice, equality, and peace not on domination and support for repression.

Let us support the jobs bill, not human rights violators.

THE JOBS BILL WILL WORK TO PUT OUR AMERICAN PEOPLE TO WORK

(Mr. HERTEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HERTEL. Mr. Speaker, the unemployment rate in Michigan is over 14 percent. The State budget has now been cut 25 percent in these 2 years. In 1980, President Reagan campaigned on Labor Day in Detroit and he promised to create 13 million jobs. Instead, there are 13 million people out of work. His theories have failed.

Today we can do something for jobs. Mr. Speaker, C. S. Lewis wrote "The road to hell is a gradual one." Now even that road is filled with potholes. Potholes are caused when the support structure of the road or bridge is eaten away. There is too much decay, and the overlying pavement buckles and collapses.

Potholes are a metaphor for our Nation's economic ills. The supporting structure of our economy, our workers, the industrial base have been undermined by high interest rates, recession, and unemployment.

Just as we cannot allow our roads to collapse, we cannot allow our workers to wallow in the hell of unemployment. Today's jobs bill will address the deterioration of our vital roads, bridges, and waterways and most importantly, it will create new jobs particularly for the most devastated, those who have exhausted their unemployment benefits.

LET US NOT WASTE OUR MOST PRECIOUS NATIONAL RESOURCE—OUR PEOPLE

(Mr. ALBOSTA asked and was given permission to address the House for 1 minute and to revise and extend this remarks.)

Mr. ALBOSTA. Mr. Speaker, the unemployment line today would reach all the way from New York City to Los Angeles and then from Los Angeles up to Seattle, Wash.

That is the biggest waste of human resources that this country has today. No country in this world should allow that kind of a waste.

We are spending billions of dollars on the State level and on the Federal level to support unemployment and welfare programs that are another waste of human resources, those people who are not working, and using up taxpayers' funds.

Would it not make more sense if we put our people back to work?

Mr. Speaker, today I am talking about a jobs bill that we will be discussing later today. I think it is time that we make the decision here in the Congress to get some of these people back to work.

Mr. Speaker, I urge the people who may be wobbly on this particular bill to support it, and stop that waste of human resources.

□ 1050

SPEAKER LAUNCHES ATTACK AGAINST PRESIDENT REAGAN

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, I was shocked this morning to hear the Speaker of this House launch a vicious attack against the President of the United States on national television. That attack went far beyond the bounds of usual partisan politics, and was directed personally toward the character of President Reagan.

I think most Americans would agree that the President is, at the very least, owed an apology.

In addition, I heard the Speaker directly attack the American people. Despite the fact that the vast majority of the American people want voluntary school prayer and a balanced budget, he said that this House would ignore those issues. In fact, he referred to Americans who want to see some financial discipline at the Federal level through a balanced budget amendment as "cowardly."

This comes at the same time that the Speaker is bringing to this floor under a hurry-up procedure a bill to revive the discredited policies of the Carter administration; namely, fighting a major national problem with big, new deficit spending.

By abandoning all pretense of fiscal responsibility, he is telling the millions of Americans who voted for a change in 1980 that he does not care what they think. If this is what this political season is going to be all about, I must say that I am discouraged and I am disgusted. It is the politics of a party devoid of ideas and apparently devoid of principle and even common decency.

This country deserves much better from those who lead it or who aspire to lead it.

NATIONAL DRUNK AND DRUGGED DRIVING AWARENESS WEEK

(Mr. HANSEN of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANSEN of Utah. Mr. Speaker, today, along with Congressmen BARNES, HOWARD, and CLAUSEN, I am pleased to introduce a resolution to declare the week of December 12 to 18, 1982, "National Drunk and Drugged Driving Awareness Week."

Many of us are personally aware of tragic incidents of children and parents being killed, or seriously injured.

I have known personally of a child being killed while innocently walking on a sidewalk, entire families dying, and countless other cases of death and destruction on the highways.

Last January the whole Nation was shocked at the airplane crash on the 14th Street Bridge where over 70 people died. However, every 24 hours more than 70 people are killed on our Nation's highways by drunk drivers. We must stop this needless carnage.

People are finally starting to act. Many States have formed drunk driving task forces. Most States have adopted or are considering stronger drunk driving laws.

Other nations have cut the drunk driving incidents by 50 percent by taking positive actions. I am confident that if we can enact more efficient laws and increase public awareness we will also be able to cut the number of deaths and injuries on our highways in half.

By declaring a National Drunk and Drugged Driver Awareness Week, we will be able to focus public attention on the serious drunk driving problem that can and must be solved.

NATIONAL DRUNK AND DRUGGED DRIVING AWARENESS WEEK

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, we have heard a lot of passionate rhetoric about job creation this morning, some of it very partisan, some comments were moving, others silly if not demogogic. However, there are few moments more saddening to a family than a pink slip of job termination for the main provider. There is certainly one nightmare beyond all others: The manslaughter of a family member by a drunk driver. Drunk driving and the fatality rate that it brings to the innocent in our country has become a national scandal beyond comprehension. I am joining the gentleman from Maryland (Mr. BARNES) in his resolution to declare at least a week, this December as a week set aside to awaken the consciousness of our Nation to this curse of drunk driving.

This is the No. 1 killer, including all diseases, of our young people who die between the ages of 16 and 24. And the deaths are violent in the extreme; 52,600 Americans have died in the last 2 years, far beyond the number killed in action in Vietnam over a period of 11 years; 5,000 more killings as a matter of fact. This is a national tragedy that just absolutely staggers the imagination. We in Congress simply must do something about it. Raise even more taxes on liquor, awareness programs, Federal tracking of drunks who drive and move from State to State.

That we have lost a quarter of a million of the flower of our Nation's youth and working force of all ages over the past 10 years is insanity. Imagine, a quarter of a million Americans violently killed in bloody crashes on our highways because Americans still get behind the wheel of a several-ton piece of transportation equipment and drive it at high speeds while their brain is addled with liquor and/or with marihuana. Remember, 15 percent of the fatalities on our highways are caused by voluntarily putting the substance TCP into the brains of drivers by those drivers smoking marihuana.

I repeat this is a national problem because these drunks cross State lines. Liquor crosses State lines. We simply have to stop this horror, the greatest loss of American lives since World War II. Please, my colleagues, read the Newsweek cover story of their September 13 issue. For your convenience, I put that frightening but excellent piece of investigative journalism in yesterday's CONGRESSIONAL RECORD.

NATIONAL FARM SAFETY WEEK

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SMITH of Nebraska. Mr. Speaker, this week of September 19 to 25 has been officially designated as "National Farm Safety Week." "Make It a Safe Harvest" is the appropriate theme for this year's observance.

Because agriculture still remains among the high accident rate industries, it is important that we continue to stress the value of greater safety measures, particularly at harvest time.

Farm work accidents kill or maim far too many people each year. We saw a 5-percent reduction in such accidents last year, but further progress is needed.

Nebraska's own record in reducing farm fatalities is much better. Tractor-related accidents in particular have been cut almost in half over the past 20 years. This gain can be attributed to the excellent farm safety program we have. It is one of the oldest in the Nation, dating back to 1948 when a farm safety committee was set up. Just a few years later, in 1954, a full-time farm safety specialist was appointed.

More than 25 different programs are conducted on all phases of farm safety with special emphasis upon tractor safety. Nebraska's "Tractor Power and Safety" is a one-of-a-kind observance in the whole United States, and was more successful than ever this year.

It is obvious that Nebraska takes farm safety seriously and the results speak for themselves. As we observe National Farm Safety Week in this and succeeding years Nebraska will join with other farm States in saving lives and in preventing disabling injuries.

CONGRESS MUST HELP THE MOST UNEMPLOYED PEOPLE AT THE LEAST COST

(Mrs. MARTIN of Illinois asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MARTIN of Illinois. Mr. Speaker, rightfully, Members are concerned about those people suffering from lack of employment. There are those who have suggested that there is a cynicism, that the bill is being introduced for political reasons. I suspect later we can find out if that is true, and I hope it is not.

I will be offering the only amendment to the bill, an amendment that will offer three times as many jobs for half the cost, and I look for the support of all those who quite rightfully feel that this Congress must be filled with compassion, must show that we have a heart, and must indeed indicate that it is not the cynicism near election time, but the desire to help the most people at the least cost.

63D ANNIVERSARY OF AMERICAN LEGION

(Mr. MYERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MYERS. Mr. Speaker, on this date in 1919 the U.S. Congress chartered the American Legion as a corporation. With national headquarters in Indianapolis, Ind., I am pleased to recognize their 63d anniversary.

With over 2.6 million members, including 700,000 Vietnam veterans, the American Legion has over 16,000 local posts in the United States and 28 foreign countries. The American Legion donates millions of dollars to projects not only helping veterans but also lending assistance to children and

youth as well as millions of hours in volunteer community service.

The American Legion has: 700,000 Vietnam-era vets as members; 1 million members of their women's auxiliary; donated over 1 million hours as volunteers in veterans hospitals; donated over $21 million to children and youth programs; and donated 2 million hours as volunteers to help counsel veterans.

PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 562, URGENT SUPPLEMENTAL APPROPRIATION FOR THE DEPARTMENT OF LABOR, 1982

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 582 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 582

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 562) making an urgent supplemental appropriation for the Department of Labor for the fiscal year ending September 30, 1982, and the first reading of the joint resolution shall be dispensed with. After general debate, which shall be confined to the joint resolution and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations, the joint resolution shall be considered as having been read for amendment under the five-minute rule. No amendment to the joint resolution shall be in order except one amendment offered by Representative Michel of Illinois or his designee, said amendment shall not be subject to amendment but shall be debatable for not to exceed one hour, equally divided and controlled by Representative Michel of Illinois or his designee and the chairman of the Committee on Appropriations. At the conclusion of the consideration of the joint resolution for amendment, the Committee shall rise and report the joint resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the joint resolution and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. BONIOR) is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Arizona (Mr. RHODES), pending which I yield myself such time as I may consume.

Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 582 and ask for its immediate consideration.

Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Arizona, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 582 provides for the consideration of House Joint Resolution 562, making an urgent supplemental appropriation for the Labor Department for the fiscal year ending September 30, 1982.

The rule provides for 2 hours of general debate to be equally divided between the chairman and ranking minority member of the Appropriations Committee in the Committee of the Whole and will be considered as having been read for amendment under the 5-minute rule.

It further makes in order one amendment to be offered by the minority leader, Mr. MICHEL, or his designee. That amendment is not amendable but is debatable for 1 hour, equally divided between Mr. MICHEL and the chairman of the Appropriations Committee.

One motion to recommit is in order before the vote on final passage.

Mr. Speaker, we have before us a situation in which the Congress must act expeditiously in a number of ways. First, there are numerous pieces of important legislation which the Congress must consider before adjourning for the November elections. We also must realize that certain legislation to address the economic distress of the country must be dealt with posthaste for the welfare of our citizens regardless of any congressional deadlines.

In situations such as this, those time constraints can be manipulated to thwart the will of an elected majority. This body, unlike the other, operates under the principle that a determined majority should be allowed to work its will while protecting the rights of the minority to be heard. This rule protects that principle.

It makes in order one amendment to be offered by the minority to change or shape this legislation in any way they choose. A motion to recommit with instructions would still be in order even if an amendment is adopted or if an unsuccessful substitute is offered. This, in essence, allows the minority two opportunities to amend.

Hence, the House would not be denied the opportunity to vote on an important bill because of dilatory amendments in the waning days of session. Neither would the minority be deprived of its right to influence legislation.

Mr. Speaker, House Joint Resolution 562 seeks to establish an emergency jobs program for eligible unemployed in jobs of tangible benefit to their communities. These include the repair, maintenance, and rehabilitation of public facilities and projects essential to the health, safety, and welfare of the public. The committee envisions such activities as road and bridge repair, flood control, rehabilitation of water systems, and energy conservation as eligible for funding under this bill.

The program is authorized no specific amount of money. Rather, a level equal to 5 percent of the "latest official estimate of unemployment compensation for the current fiscal year is authorized to be appropriated." That level is estimated by the executive to be $20.7 billion for fiscal year 1982. Hence, the appropriated level would be slightly over $1 billion. Of that, 85 percent will be allocated for jobs for the unemployed and 15 percent for youth employment and training.

Within those categories, 83 percent will go to entities with unemployment above the national average, 15 percent to those areas below the national average and 2 percent for native American tribes, bands, and groups for employment and training. Allocation to eligible entities will be made by the Secretary under a formula of relative unemployment which will be explained later in the debate.

Individual eligibility for jobs will be based upon duration of unemployment but priority will be given to those unable to, or no longer eligible to, receive unemployment compensation. All applicants must be certified as unemployed for a minimum of 2 weeks.

Jobs will last a maximum of 6 months with wages not to exceed a total of $5,000. Workers under this program are prohibited from displacing currently employed workers.

I listened to criticism of this bill from some of my colleagues during the Rules Committee deliberations. "It comes at the wrong time," they said. "We are already beginning the recovery." Mr. Speaker, I am not about to tell my constituents that I opposed a jobs program because recovery is on the way when they cannot put food on the table now.

Look at the list of State unemployment rates on page 4 of the committee report. Last year 30 percent of all States had unemployment rates of over 8 percent. Today, 1 year later, 60 percent of our States find themselves in that position. More than 30 percent of our industrial capacity stands idle, every 5 minutes another business ceases its operations. Steel production is at its lowest point in 35 years. Automobile production is at its lowest in 20 years. The FDIC spent more money in 1981 rescuing banks than it had in its entire 47-year history. The Department of Commerce has reported that businesses will cut production and cut investment this year. If that is recovery, it must be measured by the standards of Reaganomics and not by any recognized economic standard.

Opponents say these funds to rebuild infrastructure will come "online" just as cold weather is setting in in the areas hardest hit by unemployment. I have spoken with hundreds of

my constituents who are out of work and not one of them has asked me to wait until spring to come up with a solution. Even assuming some activities are technically precluded by cold weather, other activities, such as energy conservation, are not.

Mr. Speaker, I deeply regret that it is my State that is cited in the resolution as having the highest incidence of unemployment in the country. I think it is instructive of the accelerating difficulty that we find ourselves in that during the short time between the committee's research and the resolution's printing, Michigan's unemployment went from the 14.3 percent listed in the resolution to 14.7 percent.

A short time ago, a discount department store in Romeo, Mich., in my district listed openings for 80 jobs and received 800 applications the first day.

A few months ago the Detroit Free Press, in a wonderful spirit of community, offered to run "jobs wanted" ads at their own expense. The response was six pages of "jobs wanted" ads while the "help wanted" ads were listed on a single page.

Macomb County Community College in my district has had an enormous increase in student enrollment because of people seeking retraining. My people want to work.

Many bridges in my district are in terrible condition; 89 have already been closed to track and schoolbus traffic, 20 closed altogether. Streets and roads have likewise deteriorated because unemployment has diminished revenues while increasing the need for public services. With this program, people can be put to work as contributing productive members of their communities and the price of the dignity that we restore to each of them is a mere $833 per month. We lose more than that in taxes, compensation, and services by keeping them on the unemployment rolls where they are unable to perform offsetting services.

This program rests upon two intersecting needs: The need to do something about unemployment and the need to rejuvenate America's deteriorating infrastructure.

The specter of at least 12 million people in this country remaining unemployed, many having depleted compensation benefits with no prospects for work, while the President tells them that market forces will solve their problems is unconscienable.

To allow our infrastructure to continue to decay would be ruinous. Our water systems, roads and highways, bridges and waterways are the arteries of our economic system. If they are not healthy, the entire economic system atrophies. But consider the following:

One-fifth of the Nation's bridges have deteriorated to the point where they are either restricted or closed;

One-half of Conrail's roadbeds and rails are seriously decayed (DOT);

One-fourth of the Interstate Highway System is worn out and needs rebuilding (DOT);

Three thousand dams in populated areas are unsafe, 130 in a state of collapse (Corps of Engineers); and

Cities like Boston are losing a significant amount of their water supply through leaky pipes each day (20 percent).

In fact, it is estimated that $2.5 to $3 trillion will be needed this decade simply to maintain our infrastructure. Current expenditures are far below that.

This program exploits those two needs together for the benefit of the country. It is not much. The estimated $1 billion cost is within the limits of the budget resolution. It may produce 200,000 jobs and none of those workers will become wealthy with the $5,000 we provide them. But we show them that we appreciate the dignity and importance that they attach to their labor and the talents they offer in service.

Most of all, we show them that we care about their difficulties and that we are doing what we can with the limited means currently available to solve them.

I hope that Members will support this rule as fair and reasonable, and move expeditiously to the passage of this bill.

□ 1110

Mr. LIVINGSTON. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to the gentleman from Louisiana.

Mr. LIVINGSTON. I thank the gentleman for yielding.

I will make my point very briefly.

The gentleman has correctly pointed to a number of areas of infrastructure in this country which are deficient and which need corrective action. I just wonder if the gentleman really even remotely believes that this small, little $1 billion package is going to begin to cover those desperate problems; or does the gentleman believe that such problems are going to take not only months but perhaps years of thought and planning to adequately address?

Mr. BONIOR of Michigan. The gentleman is correct, it will take months and years, probably decades.

But to answer the other part of the gentleman's question, it certainly is a beginning. You have to start somewhere.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore (Mr. DOWNEY). The gentleman from Michigan (Mr. BONIOR) has consumed 12 minutes.

Mr. RHODES. Mr. Speaker, I yield myself 10 minutes.

Mr. Speaker, this is a bill which is designed to do something to help the unemployment situation in this country and I say "something" advisedly because it certainly is not going to do very much.

The facts are that there are some 12 million people unemployed in this country. The idea of a $1 billion bill which at best would produce 200,000 make-work, no-future jobs affects the massiveness of the unemployment problem like spitting in the ocean.

This bill is not hope, it is a hoax. It will lead the unemployed of the country to believe that this Congress has done something for them when in reality this Congress will not have done anything for them.

As a matter of fact, there are a lot of weird things about this bill. In my opinion the rule ought to be defeated.

In the first place, it is not an appropriation bill; it is a joint resolution. The reason it is a joint resolution is because it does some rather strange and weird things.

It not only appropriates money, it authorizes a program. It does not have the detail which you usually expect from an authorization. Instead, it refers to a law which is already on the books, the discredited CETA law, and takes from that law the formula for direction of the funds which would be authorized and appropriated under this bill.

Also the charge has been made, and I made it myself and I might as well do it again, that this bill mainly is aimed at helping people who are running in the election in November.

I think it is a political bill. I do not think there is any doubt about that.

One of the hallmarks of the political side of this bill is the fact that anybody who has been unemployed for 2 weeks, 2 weeks, is eligible to receive benefits under this bill. If it were really intended to take care of the hard-core unemployed, the people who have been unemployed for a long period of time, certainly you would have done something other than make people who have been unemployed for 2 weeks eligible under the bill.

The bill is full of faults. It is not well planned. It is not well thought out. It was put together, apparently, with chewing gum and baling wire. It is not likely to hold together for very long.

So I guess the bottom line is that I am opposed to the adoption of this rule.

Another reason I am opposed is that I have consistently, and I think most Republicans have, opposed rules which have unnecessarily foreclosed full debate and amendment by the House membership. I believe considering this bill before us under a closed rule is completely unnecessary.

There are a lot of Members who would like to offer amendments to this

bill and I think some of them have a great deal of merit. But instead of that, we get a rule which does something that I do not recall ever having seen before. The majority side of the Rules Committee, all of them good friends of mine, have shown great innovative powers in various rules in the past but they have literally outdone themselves with this rule.

This provides for one amendment to be in order, an amendment to be offered either by the gentleman from Illinois (Mr. MICHEL) my colleague and the minority leader, or his designee.

The interesting part about that is that nobody ever discussed the matter with Mr. MICHEL. The first that any of the Republicans knew about this proposal was when the chairman came from his office into the hearing room and told me that this was what he intended to do and then walked over to the chair and proceeded to do it.

So there was no consultation with the minority on this.

As a result, there will be an amendment offered and the amendment will be offered by the gentlewoman from Illinois (Mrs. MARTIN). She has an amendment which she will discuss later in more detail. But it is an amendment which will have some effect on the unemployment of this country because, unlike the bill which is sponsored by the majority, it will provide more jobs than the bill which we will have before us if this rule is adopted.

So I am very much in hopes that if indeed this rule is adopted—I hope it will not be—that the amendment offered by the gentlewoman from Illinois (Mrs. MARTIN) might become the final bill which finally passes instead of the one which was brought out by the committee.

I want everybody to understand that I am as concerned as any Member of this body about our unemployment situation. I think we all are. But this appropriation bill would at best put less than 2 percent of the unemployed back to work.

Such an ineffectual effort does not seem to find its origin in a concern for jobs but, as I said, in political motivation. There is more symbolism than there is substance in this bill.

Finally I am reliably informed, and I firmly believe, that the leadership of the other body has absolutely no intention of bringing this bill up during this session. The chances that this bill has of becoming a law are nil.

Too many times in my 30 years in this House I have seen the leadership bring up a bill, cause the Members of the House to vote on it, and subsequently expose all Members equally to the barbs and derision of their constituents. These bills have absolutely no chance of becoming law because the other body has no intention of taking them up so late in the session.

I suggest that this is another one of those bills that should not be brought to the floor of the House because, as I say, it is a hoax and it is causing people who are out of work to take hope, hope which will not be justified by the results of this bill, even if it should, under some stretch of the imagination, become law, which it will not.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman.

Mr. PARRIS. I was particularly struck by my colleague's comments on this bill as being no more helpful than spitting in the ocean.

I have characterized this bill in the past very much as my colleague has. That to take $1 billion of deficit spending and throw it at the serious problem of unemployment of our Nation, which has been caused by our liberal friends who have supported irresponsible deficit spending for many years, is very much like General Custer at the Battle of the Little Bighorn calling the Army and asking them to send more Indians.

That clearly would not be a solution to the problem.

Mr. RHODES. The gentleman is absolutely correct.

I am sure the gentleman will agree with me that this type of panacea, Band-Aid, has been tried before. It did not work before. As a matter of fact, usually a program like this takes so long in implementation that the economy is on the way back up before it is implemented and all it ends up in doing is exacerbating another spiral of inflation.

This bill is not big enough to do that. It is not big enough to do anything. It is not going to cause any more inflation. It is not going to help the unemployment. It should not be here and I hope we will defeat the rule and put it out of its misery.

I yield back the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, before yielding to my colleagues I yield myself 2 minutes.

Mr. Speaker, several charges have been made here. No. 1, that this is deficit spending or lends itself to deficit spending.

□ 1120

I would point out of to my colleagues on the other side that this figure that we are talking about falls within the 302 allocations of the Appropriations Committee and is not over budget.

Second, the charge has been made that this is spitting in the wind or a drop in the bucket, or whatever you want to call it, and I would suggest that for 200,000 people who do want to have jobs, who do not have hope, who have been deprived of their dignity, this is not a hoax, this is not a drop in the bucket. This is dignity, this is putting food on their tables, as small as it may be in terms of the larger picture that we face.

And, finally, the argument has been raised by the other side, and we are going to hear this all afternoon, that this does not have a chance to happen, this does not have a chance to get passed.

I would suggest to my colleagues that if we pass this bill in this House, it does indeed have a chance to get passed. The propensity of the other body for tacking on various amendments to bills that happen to come before us in the final days and hours of any legislative session cannot be measured by any imagination or any standards that we are used to around here. And I would think that if we pass this bill today, there will be strong pressure on the other body to take care of 200,000 people, when the national unemployment rate is at the 10-percent level. Especially on the continuing resolution, there is no telling what is going to come back on that particular piece of legislation.

Mr. Speaker, I yield 3 minutes, for debate purposes only, to the gentleman from Kentucky (Mr. NATCHER).

CALL OF THE HOUSE

Mr. WHITTEN. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names.

□ 1140

The SPEAKER pro tempore. On this rollcall 366 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call are dispensed with.

PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 562, URGENT SUPPLEMENTAL APPROPRIATION FOR THE DEPARTMENT OF LABOR, 1982

The SPEAKER pro tempore. The gentleman from Kentucky (Mr. NATCHER) is recognized for 3 minutes.

Mr. NATCHER. Mr. Speaker, the emergency employment supplemental jobs bill was introduced by the gentleman from Kentucky (Mr. PERKINS), the chairman of the Committee on Education and Labor.

This bill was cosponsored by the majority leader, the distinguished gentleman from Texas (Mr. WRIGHT); also cosponsored by the gentleman from California (Mr. HAWKINS) and the gentleman from Minnesota (Mr. OBERSTAR).

The bill was referred to the Committee on Appropriations under the chairmanship of my friend, the distinguished gentleman from Mississippi (Mr. WHITTEN).

The bill then was sent to the subcommittee that makes recommendations for the Departments of Labor, Health and Human Services, and Education.

On Tuesday, June 22, we held hearings on this bill. The bill was reported on August 18. The author of the bill appeared, the cosponsors appeared and other witnesses, including a witness from the Department of Labor. We thought in all fairness that the Department should be notified, since this was an emergency jobs bill. The Department was notified and the witness appeared.

Mr. Speaker, the fact remains that we have in this country today over 11 million people unemployed, people that are walking the streets trying to find jobs. There are 9.8 percent unemployed.

The bill that we have before us today, if the rule is adopted, provides for $1,035 million.

In addition to appropriating the money, the bill in effect authorizes and creates the programs to be funded. The amount provided in the bill will be equal to 5 percent of the country's unemployment compensation, which now stands at $20,700 million.

There is room in the appropriation, in the Committee on Appropriations, under section 302 allocations as provided for under the third budget resolution for the amount authorized in this bill.

We still will have, Mr. Speaker, $2.1 billion remaining in our section 302 allocation for the Committee on Appropriations for fiscal year 1982, after this bill is enacted.

Now, if this bill is adopted and enacted into law, this bill will not be a budget buster. This bill does not exceed the budget. This bill is under section 302 funding.

The SPEAKER pro tempore. The time of the gentleman from Kentucky has expired.

Mr. BONIOR of Michigan. Mr. Speaker, I yield the gentleman 30 additional seconds.

Mr. NATCHER. In addition, Mr. Speaker, the appropriation was clearly contemplated when the budget resolution was revised by both sides in the Budget Committee. These funds will remain available for obligation by the Department of Labor until December 31, 1982, and money would actually be expended at the local level throughout the early part of the calendar year of 1983.

Mr. Speaker, this rule should be adopted. This bill should be debated. The bill should pass.

Mr. RHODES. Mr. Speaker, I yield 5 minutes to the distinguished Republican whip, the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, this rule makes in order what might be called the billion dollar ballot box bailout bill, for surely there are enough potential political patronage plums packed in here to mix up a mighty big batch of incumbency plum preserves.

And the 11th-hour emergence of this bill on the eve of an election and out of a secretive partisan task force can only further contribute to the political cynicism which surrounds this legislation.

Mr. Speaker, not only did this legislation not receive, in my opinion, sufficient scrutiny and development—because there are a lot of obvious glaring loopholes and problems with the bill—but it is being rushed through, using every parliamentary trick imaginable. In the first place, this bill was not originally scheduled for floor action this week. That is so Members would have, I guess, minimal notice of what is going on or opportunity to study the bill, or maybe it was just that it became politically a good time to try to move this bill.

Second, while the chairman of the Appropriations Committee quite properly requested a 2-hour open rule for this bill where every Member on both sides of the aisle could come in and offer his or her amendment, one or a group, and that is what we had before us in the Rules Committee when we met on Tuesday. We had a printed rule that would have been an open 2-hour rule. We went into the meeting on Thursday and, zap, it was gone. When it came time to vote, what we had mysteriously was a modified closed rule, which means only one amendment will be in order.

Somehow this rule just popped up and it said that the minority leader,

the gentleman from Illinois (Mr. MICHEL) would have an opportunity to offer this one amendment, or his designee, and for some reason, even though the gentleman's name was mentioned, he was never contacted or consulted or asked if he was interested in that opportunity to offer a substitute; but we do have a substitute amendment that we put together that will be offered by the gentlewoman from Illinois (Mrs. MARTIN). It is a better alternative.

The Democrat leadership have given this opportunity to us to offer a substitute. I certainly hope they would not try to rule us out on a technicality. I am sure that will not happen, though.

Mr. Speaker, other majority and minority Members might have individual amendments they would like to offer, and I know many do. They thought about it and they would like to have had an open rule; but when this closed rule comes up now, 434 Members are out of the process. We do not have enough sense to try to amend a bill like this, I guess. We are left with a "gag rule" that is enough to make any fair-minded Member gag.

Mr. Speaker, if I could coin an axiom from this whole experience, it would be this: "By your procedural ploys ye shall be known." The procedures used to develop and consider this so-called legislation have been partisan and secretive. That hardly inspires any confidence in the motives and wisdom underlying this legislation.

While I do not for a minute question the motives of the supporters of the bill—I am sure they are genuinely concerned about unemployment, we all are, we all want more jobs—I do not think the answer to the problems is some so-called ill-conceived "son-of-CETA" bill.

Now, maybe some will say this is not CETA, but you have to acknowledge, in fact, the formula that is used is the CETA formula and that has been repudiated by Republicans and Democrats in the House this year. That is what it really is.

To cite just one of the major deficiencies of the bill: While it is being presented as an alternative to unemployment compensation, the fact is that once the participants in this program have completed their 6-month jobs, they will requalify for a new round of jobless benefits, and in the interim they will have deferred their search for more productive, permanent jobs in the private sector.

Mr. Speaker, I am at least pleased to report to my colleagues that there is a safe passage out of this partisan mess, a way to nip this quick-fix-without-proper-consideration-trickery in the bud without worrying about a later vote that might somehow be misconstrued as antijobs. The way to do that is to simply vote down this gag rule that is an insult to the intelligence of all the Members, just as the bill it would make in order is also a travesty on our democratic and deliberative legislative process.

Let us tell the Democratic leadership here that gave us this rule and the American people that we will not play games with this type of issue in an election year by offering a short-term, dead-end jobs bill to buy their own reelections. The American people will not buy it and we cannot buy it.

Let us vote down this rule.

□ 1150

Mr. BONIOR of Michigan. Mr. Speaker, I yield 2 minutes, for purposes of debate only, to the gentleman from Oklahoma (Mr. WATKINS).

Mr. WATKINS. Mr. Speaker, I rise in support of the rule and also House Joint Resolution 562.

Mr. Speaker, I would like to point out, as many of my colleagues know, before coming to this Congress I was in the construction business. I was in the construction business—homebuilding and land development business.

I was very close to many of my employees, to some of their problems, to some of their concerns, to some of their dreams and hopes.

But, Mr. Speaker, I might mention on several of those occasions, as I was in business, I made the statement publicly that I could not stop if I wanted to in my business unless I was willing to accept bankruptcy. I had invested in the future as a young businessman.

Mr. Speaker, that is where we are today in this Nation and in this Government. This administration says we are going to stop. We are going to discontinue anything in any shape, fashion, or form that might resemble jobs. This is unbelievable when we have passed more dollars backed by the President for unemployment insurance than the amount of this job creation bill.

Mr. Speaker, I would like to point out that in rural America, in rural depressed America, we do not have Fortune 500 companies who are willing to pick up and to build the jobs. This jobs bill is a piece of legislation for the purpose of providing some of the public jobs in our area and jobs that the Fortune 500's will not participate.

Mr. Speaker, I would like to give a perfect example of what it means for the people to have their hopes increased, and maybe this is what some of the people do not want to happen with this bill. I have a county in my district—in fact I have 10 counties out of the 20 that are above the national average in unemployment. One of those counties, Coal County, has over 18 percent of the people unemployed. Mr. Speaker, that percentage jumped 6 percentage points in 1 month, not because of massive layoffs but because the citizens had heard about a water project starting up. The unemployed and underemployed signed up in the hope for a job. It is this hope for a job but not being able to find jobs that created this legislation. I ask for your support.

Mr. RHODES. Mr. Speaker, I now yield 5 minutes to the distinguished Republican leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. I thank the gentleman for yielding this time to me.

Mr. Speaker, I certainly will not take the time in consideration of the rule to debate the merits or demerits of the legislation that the rule provides for, but I have to rise in opposition to this rule.

I must say that I was very surprised to learn that the Rules Committee generously decided that I or my designee would offer a substitute amendment to the jobs bill. As the gentleman from Mississippi said a few moments ago, I was never contacted, indirectly or directly, for my views.

There have been times when I have petitioned the committee for an opportunity to offer an amendment or offer a substitute, even pleaded with them, but have been denied. Here comes an occasion when, making no intercession whatsoever with the committee, I am bestowed with something that I did not seek.

One has to suspect that there is a great deal of politics involved in this whole darned business here today. Let us face it: The Rules Committee was originally considering an open rule, one of those rare opportunities we have to clear up some of the misguided monstrosities that somehow find their way to this floor. When talk of an open rule first surfaced, there were a number of Members on our side of the aisle who said, "We have amendments we would like to offer to this legislation if it ever gets to the point of reaching the floor."

I suspect, in its collective wisdom, that the Rules Committee realized this bill was so darned bad that we would be here through Christmas trying to clean it up. So instead of an open rule, we get one of a semiclosed nature, providing for just one amendment, either in my name or my designee, and frankly, I just do not think that fulfills the debate process on the floor of the House.

Now, we argued with the Speaker earlier in the year on that 2-to-1-plus-1 ratio on the Rules Committee. We knew that the minority was being put at a distinct disadvantage and that we would have to scrap for every little crumb we could get. But to say you are having a free, open debate and have the majority tell the minority exactly what the form of one's amendment has got to be and the procedures, that is not free, open debate. That is debate in a straitjacket.

This closed rule is not enough. It is as wrong, frankly, as the legislation it governs. Ideally, I would like to see this bill pulled from consideration and buried in the graveyard next to CETA and all those other discredited shams of past Congresses.

But that is not going to happen. We know that, The next best alternative would be to have an open rule, a truly open rule where the Members of this body can have at it, hammer and tongs, and try to do the best we can with what I consider to be a very, very bad piece of legislation as it comes to us.

We ought to send this rule back to the committee and demand an open rule, but barring that, I have offered my option to amend the bill to the distinguished gentlewoman from Illinois (Mrs. MARTIN). She, incidentally, had the city with the highest unemployment in the country, and of course, I have several cities that are near that level.

I think some of the arguments that we will make here today, this afternoon, will indicate and prove to the majority that what they are proposing here is very ill-founded and does not really address itself to long-term structural unemployment problem, and particularly in the areas that need jobs the most, as distinguished from just spreading around the country again a little bit of largesse all in the name of politics.

Well, I will tell my colleagues, the gentlewoman from Illinois and the gentleman from Connecticut (Mr. DENARDIS), the gentleman from Illinois (Mr. CORCORAN), and a number of others have worked together to fashion at least some degree of a substitute in the 24-hour period allocated to us, which will eliminate some of the preposterous provisions of this committee-reported bill, redirected its intent to the most critical areas of the country and the people in the most critical need.

Make no mistake about it: If we were here to do what is right, we would either stop this charade here and now or send this rule back to the Rules Committee.

That is what I have to say. If my dear friend from New Jersey would like me to yield, I would be happy to yield under my time allocation.

Mrs. FENWICK. I thank my colleague for yielding.

Mr. Speaker, I would really like to speak to the House. We are now, in my opinion, with this rule and this way of treating the minority, degrading this House.

Yes, it is not funny; there is no joke here. We are trying to conduct the people's business and we are degrading this House by playing politics with the rights of those of us in the minority, on this side, and of the people we represent.

It is not funny; it is not a joke. It is a pity to see the Congress of the United States operating in this way.

Mr. MICHEL. I thank the gentlewoman from New Jersey for her contribution.

Mr. RHODES. Mr. Speaker, may I inquire as to the status of the time?

The SPEAKER pro tempore. The gentleman from Arizona (Mr. RHODES) has 12 minutes remaining, and the gentleman from Michigan (Mr. BONIOR) has 10½ minutes remaining.

Mr. RHODES. Mr. Speaker, I yield 5 minutes to the gentlewoman from Illinois (Mrs. MARTIN).

Mrs. MARTIN of Illinois. Mr. Speaker, I will not take the entire time that has been so kindly given to me by the gentleman from Arizona, but I think Members should be aware that there will be offered a substitute. This substitute, under the rule that we are now discussing, should not be the only one being offered. Indeed, all of us on both sides of the aisle who have worked very diligently trying to fashion some kind of a bill that can help the people of this Nation are being, as has already been described, denied our opportunity.

□ 1200

Everyone is quite aware that the bill as it now stands has enough holes to drive trucks through it. We know that all it is, is very little money being spread very thinly in what some are suggesting is a callous election year gimmick. Well, I think most Democrats and most Republicans would prefer fashioning a more adequate piece of legislation.

The substitute that I will be offering if this rule does pass will provide twice as many jobs at half the cost. It will limit the job availability to the areas that desperately need it. If you believe in helping people, if you believe that people want to work, I believe the substitute, regardless of your party, will satisfy you.

I will add that we retain much of the bill. We retain the administrative aspects of the bill. We retain the public works aspects of the bill. But, we correct what are indeed faults that make the bill as it now stands an almost ludicrous ploy which the public, those who are truly unemployed, will not appreciate.

My district has the highest unemployment in the United States. The gentlewoman from New Jersey talked about the rule not being a joke. It is appropriate that both parties try to win elections, but you cannot do it when you are directly affecting the lives of those people who are powerless, who find themselves in a situation when they want to work and cannot. Now, we can do the demagoguery on whose fault is what, but if we are looking at a jobs bill we should craft a bill that helps the most people. We should craft a bill that does not raise the deficit, that would even further affect the job markets in the Michigans and the Ohios and the New Yorks and in the Illinois. We should be listening to the substitute that will be offered.

Therefore, when the time comes this substitute will be given to the House. I would hope you would look at it openly. I would hope you would look at the realities of your political philosophy or party, and I would hope that because this rule forbids the kind of interplay that should be given, at least we can correct in the bill the blatant errors that diminish its chance for passage ultimately and for signing by the President of the United States.

I yield back the balance of my time with the hope that there will be a floor discussion of this bill at the appropriate moment.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 2 minutes to the distinguished Speaker, the gentleman from Massachusetts (Mr. O'NEILL).

Mr. O'NEILL. Mr. Speaker, I truly had not expected to get into this debate, but I am sure that the Republican Party recognizes and realizes the fact that sometime in March, the Democratic Party had an open press conference where we said we were putting together an ad hoc committee to work on a job program and on other programs.

Well, I do not know how many ad hoc committees we have had working out there. From those committees, we brought forth the housing bill, which the President vetoed. We now have this jobs bill. We have a Reindustrialization Finance Corporation bill, on which we are holding hearings at the present time.

Now, this present bill came out of our ad hoc committees. It was filed in the Appropriations Committee. It was discussed in the appropriations subcommittee, Mr. NATCHER's subcommittee, and in the full committee. it was then reported out. There was no secret about this whatsoever. The bill followed the normal routine and the normal process. From there, it went to the Rules Committee.

For 4 months, you have known the Democrats were going to come out with this type of program, but when it reached the Rules Committee you offered nothing—you offered nothing.

Sure, it sailed through the Rules Committee on a partisan vote, but you had your opportunity. You had at least 3 months of knowledge that this was going to come before us.

Now, at the last minute, you are saying it is unfair. That is not true.

Now I have great respect for the minority leader, but I have to say he lives in Peoria.

The President says his economic program is doing well in Peoria. Well, let

us look at Peoria. It has 16 percent unemployed.

The minority leader says we do not need a jobs bill. Well, my office took the liberty this morning of contacting the National Association of Counties and did some checking this morning with the county engineer in Peoria. Four bridges in Peoria are in such disrepair that they fail to qualify as safe to the State of Illinois.

I am glad the minority leader is here. The Grange Hall Road Bridge, the Lancaster Road Bridge, the Cedar Hills Bridge Drive, and the Smithville Road Bridge. So even in Peoria, where people are looking for work, with 16 percent unemployed, apparently there are some bridges in that area that need repair and need repair now.

I yield back the balance of my time.

Mr. RHODES. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I am amazed at the tone that the Speaker of the House has just taken. It was personal, and I have never seen this Speaker do anything quite like this, and I had not thought that I ever would, especially directed to such a distinguished Member as the minority leader.

I just point out the fact that he himself has made a terrible indictment of the Democratic Party. He said, and I guess it is certainly the situation, that the Democratic Party has been working on some kind of a jobs bill. He said, I believe, that the best brains of the Democratic party had been enlisted in this effort.

Is this the result of the efforts of the combined wisdom of the Democratic Party?

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I will yield to the Speaker.

Mr. O'NEILL. I just want the gentleman to know that we will have an economic program, and a further program in the making. You will have every opportunity to vote for it.

Mr. RHODES. You are not going to see this program enacted, and it should not be.

Mr. Speaker, you know perfectly well that this bill is so pusillanimous that it is not even dangerous. It will accomplish absolutely nothing. All it is is a hoax it try to get the people who are unemployed to think you are trying to do something for them.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. RHODES. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. I just want to sum up, Mr. Speaker. In my home community of Peoria I can assure you that Reaganomics is going to play much better than "Tiponomics."

Mr. BONIOR of Michigan. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. OBERSTAR) for debate only.

Mr. OBERSTAR. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I just never cease to be amazed by our colleagues on the other side of the aisle who refuse to do anything to help the unemployed but complain about those who try.

"Wait for the recovery to happen," they tell us. An unemployed auto worker testified before the Committee on Banking and Housing following the testimony of an administration economist who said the recovery will be 4 years down the line.

□ 1210

The committee members asked, "Can you wait 4 years?"

"No," he said. "My family needs to eat today, not 4 years from now."

Is this bill political? They complain from the other side of the aisle that it is political. Yes, political in the highest sense of the Greek word, "polis," concern for the city, concern for the welfare and the well-being of people across this land.

But beware, I say to my colleagues on this side of the aisle, beware of the Republican mirage in the substitute they are offering. There is no money in this synfuels proposition which they would lead us to believe will create jobs. There are no outlays provided for it in the budget; the synfuel funds are loan guarantees. We do not put people to work with loan guarantees.

Our Republican colleagues complain that this is not a long-range infrastructure development bill. Yet when we come to this floor with a long-range program, they say it costs too much. Now they say the funding we propose is too little. Maybe we should spend $5 or $10 billion on jobs, and then they would come and say, "well, it's too much. You are busting the budget."

I have had it with the nitpicking. The people in northeastern Minnesota are out of work. Ninety percent of the iron ore miners on the Mesabi Range are out of jobs. They do not want pious promises and pious incantations from the left or right side of this aisle. What they want is an honest-to-god decent job.

Mr. Speaker, this bill will give it to them. Let us pass this bill and defeat the Republican substitute.

Mr. RHODES. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, this rule makes in order a very bad bill. Just how bad a bill this is has been demonstrated here this morning when even the Speaker of the House would not yield to a Member whom he had talked about in his speech to debate him on the bill. This bill is being debated under a closed rule so that we not only cannot amend the bill but we cannot even take a substantial amount of time to debate the bill.

Why? Because it is a terrible bill. It has problems with the formulas, it has problems with who gets what. We did not even have the kind of substantive hearings on this bill that it would seem to deserve.

To bring a bill out here in this way, one would think that it is a perfect bill, that everything has been worked out on it. It is hardly that. It did not even have substantive hearings in the Appropriations Committee which brings this bill to us. The hearings that were held there were basically with the cosponsors of the bill coming in and saying how great it was. We have no idea of the impact of this bill. We are acting blindly here in the House.

The Speaker told us about the developmental work on this bill. He told us that it was done in the smoke-filled rooms of the Democratic Party. That is hardly a recommendation for it.

It seems to me that the leaders who are bringing this bill to the floor should be somewhat embarrassed, and, frankly, I am surprised that they would be associated with it.

We have constantly been told of their dedication to eliminating waste, fraud, and abuse in the Federal Government, and yet this bill is, if anything, a breeding ground for waste, fraud, and abuse. That is about the only thing it will accomplish.

It is a bad bill. They know it is a bad bill. And, the worst part of this bad bill is that it is playing to the fears and the discouragement of millions of Americans who are on the jobless rolls.

Mr. Speaker, to use those Americans for callously playing politics is a very dreary chapter in the history of the Democratic Party.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 1½ minutes, for the purpose of debate only, to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Speaker, I just heard the gentleman from Arizona say that he was sort of surprised at the Speaker. I, too, was surprised at the Speaker, because I thought the Speaker was being so kind and gentle in the treatment of what are the most outrageous statements I have heard on the floor of the House in years.

I just heard the Republican leadership ask, "how could we have a rule that is a gag rule? We can't even offer amendments. We don't know what is in the bill," even though it has been available for several days. Last year the most important budget bill this country has ever seen came up when the Republican side forced that bill on the floor. Nobody had even seen it, not even the Republicans, there were no amendments, and we are all suffering today on account of that Republican budget.

The need for this job program is because we have to do something to counter that outrageous action of the Republicans a year ago.

Mr. Speaker, let us recognize the facts the Republican leadership just said, "well, it only addresses 2 percent of the unemployed."

I would like to say to my colleagues that, because of this Republican administration, 2 percent is one hell of a large figure today in unemployment. We have got to recognize that anything we do is going to help hundreds of thousands of people who are absolutely desperate today.

Let us support the rule, let us stop any kind of amendments that are trying to take money from somebody else or someplace else, and let us go on and pass this bill and take some action to help people and stop hurting them.

Mr. RHODES. Mr. Speaker, I yield 1 minute to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I have seen election years come and go, but rarely have I seen the kind of electoral cynicism displayed in this House as is displayed with the content and timing of House Joint Resolution 562.

This bill, which would increase an already staggering deficit by over $1.25 billion, is exactly the kind of wasteful, throwaway legislation that has put our economy in the shape it is in today.

Regardless of our party affiliation, we are very concerned about the high levels of unemployment that exist today. But this legislation is not the way to address the problem.

This is a make-work bill that will injure taxpayers, and the economy.

This bill would create a temporary public service employment program, which would give 6 month jobs at pay at the $10,000 per-year rate. Qualification for this make-work jobs program is vague, and almost open ended. One need only have been unemployed for 2 weeks to qualify, and in fact one may quit a previous job and qualify, under this bill, for 6 months of government-paid make work, and well as an additional 6 months of unemployment benefits.

We all know that unemployment is very high. Even if this program were to be adopted, it would only aid between 160,000 and 200,000 out of the almost 11 million unemployed. That is less than 350 people for each congressional district. That is less than a drop in the proverbial bucket.

While this bills effect on unemployment is negligible, it is significant in the signal we send to this country and to the markets. This Congress bit the bullet a month ago and passed a previously unheard of tax increase in an election year. That caused interest rates to drop dramatically, and the financial markets to soar. Turning around now, at this critical juncture, could destroy what little faith many people have in the commitment this Congress is supposed to have to gain control over the Federal budget.

No, Mr. Speaker, this bill is not designed to cure our economic woes, nor is it seriously designed to substantially, or meaningfully reduce unemployment: It is nothing but a paltry table scrap held out to our desparate unemployed, who seek real work, in a cynical attempt to boost one party's standing in the polls.

If the originators and supporters of this bill really want to reduce unemployment, then join me in reducing the size of the Federal deficit, which is crowding out all business and employment opportunities:

If the originators and supporters of this bill really want to reduce unemployment, then they should reduce budgets and appropriations bills that have more than tripled the Federal budget since 1974; more than tripled taxes payed by all working Americans since 1974; and more than tripled our national debt since 1974:

If the originators and supporters of this bill really want to reduce unemployment: Then we should stop playing politics with lives of our constituents, stop playing politics with the future of this country and get down to the business of putting the Federal budget on a strict diet and allow our great economy to use its immense abilities to make a better life for us all.

I urge my colleagues to reject the cynicism encapsuled in this bill and vote against House Joint Resolution 562.

Mr. RHODES. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. Mr. Speaker, I think we have to ask ourselves the question, "What is this $1 billion program going to do for those areas where there is high unemployment?"

The gentleman from Minnesota talked about his ironworkers going back to work. How many ironworkers are going to be put back to work with this bill?

I have unemployed steelworkers in my district. How many steelworkers are going to be put back to work with this bill?

I have unemployed autoworkers in my district. How many autoworkers are going to be put back to work with this bill?

We have a series of heavy manufacturing industries in this country which are facing deep unemployment problems, and those problems will not be addressed one iota by this bill. As a matter of fact, with this bill, spending an additional $1 billion of money that this country does not have simply adds to the sea of red ink and will put further pressure on the financial markets to keep interest rates high.

It will show the financial markets that Congress is back to business as usual as it pulls money out of the private sector and puts it into another new public sector program.

In sum, it will put upward pressure on interest rates and actually harm the prospects of putting people back to work.

Mr. RHODES. Mr. Speaker, may I inquire as to the status of the time?

The SPEAKER pro tempore. The gentleman from Arizona (Mr. RHODES) has 2 minutes remaining, and the majority side has 4 minutes remaining. The Chair's understanding is that the majority has one final speaker.

Mr. RHODES. Then, Mr. Speaker, I yield myself the balance of my time.

The SPEAKER pro tempore. The gentleman from Arizona (Mr. RHODES) is recognized for 2 minutes.

Mr. RHODES. Mr. Speaker, it is true that the Republicans probably should have known that there would be some sort of a jobs bill coming along, and guess I confess that we did know it. But I have got to say that we did not expect a bill in this form, because this bill is exactly the same formula that has been adopted by the Democratic Party for years when they have been confronted with situations like this. It is the old spend and spend and elect and elect philosophy of the 1930's. We expected better from the massed brains of the Democratic Party, to which the Speaker referred.

I can understand the reason that my good Democratic colleagues revere the great Franklin D. Roosevelt. I revere him, too. In many ways, he was a great President. But I do not revere him for the same reason they do. They revere him because he is the person who gave their party its last new idea. There has not been a new idea in the Democratic Party as to what to do about the economy of this country since the days of the great Franklin D. Roosevelt. I suggest that even in the 1930's that did not work too well. It certainly will not work today.

Mr. Speaker, this bill is not going to be beneficial. It will not do anything for the unemployed. I suggest that we bury it very deeply and get on with the job of trying to make some real sense out of the economy of this country so that the people of our country can at last have jobs which are meaningful in an economy which is growing, and practicing the economic concepts.

I hope very strongly, Mr. Speaker, that when the vote comes—and we will have a vote on this rule—we vote no and send it back from whence it came.

The SPEAKER pro tempore. The time of the gentleman from Arizona (Mr. RHODES) has expired.

The gentleman from Michigan (Mr. BONIOR) is recognized for 4 minutes.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 4 minutes, for the purpose of debate only, to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

□ 1220

Mr. WRIGHT. Mr. Speaker, we learned in this morning's paper that during the past month industrial production in this country fell for the 11th month in the past 13. It fell by an additional half of a percentage point, to reach its lowest ebb in recent times.

We find that the steel industry in the United States for the first time is operating at less than 40 percent of its capacity.

In yesterday's newspaper we learned that during the first 10 days of September new car sales had plunged by 29 percent. Retail sales were off again last month. Jobless claims, those newly coming onto the market seeking unemployment benefits, rose again by more than 600,000. The total number has increased of those newly coming on the market by more than 100,000 in the past 4 weeks above those seeking assistance in the previous 4 weeks.

We have 12 million people out of work. Do not tell me they do not want work.

No one is arguing that. I do not hear anybody arguing against the fact that we ought to do something to try to give these people jobs, to get them off the unemployment rolls and to put them back on productive payrolls. I have not heard anybody say that we should not be trying to do that.

Republicans today are quarreling about how to do it—and yet they have not given us any other idea about how to do it in all of these months.

I do not hear anybody on the Republican side say we do not need to rebuild our decaying structure of roads and bridges and other public facilities. Forty percent of the bridges in the United States are structurally deficient and obsolete and over 40 years old. This is not new.

Newsweek magazine features a piece "The Decaying of America." In U.S. News we have "The Great American Transportation Mess." "Time To Repair and Restore Our Nation's Infrastructures," says Time magazine.

The Department of Transportation says the same thing in a very lengthy study, as does the Congressional Budget Office.

I do not hear anybody saying that we have no need for this work to be done.

There is an old axiom that if you cannot mount a reasonable argument against the legislation, argue against the rule. So they have sought to obfuscate the purpose of what we are trying to do by saying "Well, it is an unfair rule." Some have called it a gag rule or a closed rule. It is not that at all.

We have given the Republican leadership anything they want to put in a sustitute. You may put all of the amendments you want to, whatever you want, in the substitute. That's what the rule permits.

The distinguished minority leader, my very good friend from Illinois (Mr. MICHEL) says what a pity, he only learned of this 24 hours ago, he only learned then that he was given the privilege to write a substitute and put anything in it he wanted to.

Listen, this problem has been coming on us for 16 months. Unemployment has been growing and raging every month for the past year. It has grown by 2.4 additional percentage points in 1 year, 3 million more Americans out of work.

You have had plenty of time. We have waited vainly in hopes that the administration or somebody on the Republican side might come forward with some initiative to put these people back to work, put them on productive payrolls. Nothing has come forward.

So we offer this today and my dear friend from Arizona (Mr. RHODES) says that it is too little. He calls it pusillanimous. I agree with him that it is too little.

But then the very distinguished gentlewoman from Illinois (Mrs. MARTIN) in whose district there is very high unemployment, says that "We have a way to do it that will spend more but cost less."

Boy, if she can show us that, I think we ought to vote for this rule and find out how. Maybe we can spend five times as much more and cost nothing. That would be wonderful.

But it is a remarkable thing to me that nobody on that side of the aisle came forward with any such suggestion until first we had perfected and offered this bill.

So do not let anybody deceive you. There is nothing wrong with the rule. The rule is not a closed rule. It is a perfectly open rule. Offer whatever you will, but vote for the rule, and I implore you to vote for the bill if you do want to do something to put Americans back to work doing things that need to be done.

The SPEAKER pro tempore. All time has expired.

Mr. BONIOR of Michigan. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. RHODES. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 221, nays 176, not voting 35, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO HAVE UNTIL 4 P.M. FRIDAY, SEPTEMBER 17, 1982, TO FILE REPORTS ON MISCELLANEOUS BILLS

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means have until 4 p.m. tomorrow, September 17, to file reports on the following bills: H.R. 1524, H.R. 6867, H.R. 6055, H.R. 3191, H.R. 3581, H.R. 4577, H.R. 4948, H.R. 5470, H.R. 7094, H.R. 7093, H.R. 7092, and H.R. 5573.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. LOTT. Reserving the right to object, Mr. Speaker, I do so just to inquire whether or not this has been cleared with our ranking member on the committee? Since there were a long list of bills, I just wanted to be assured that Members on both sides of the aisle do know what is in this list of numbered bills and that everybody is aware of what is going on.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. These are bills that were reported yesterday by the House Ways and Means Committee. The minority has agreed and recognizes these bills have to be filed. Rather than have all the reports filed by midnight tonight, because we will probably not be in session tomorrow, I am asking permission that those bills not filed tonight they be eligible for filing by 4 o'clock tomorrow.

Mr. LOTT. Further reserving the right to object, these bills are only the ones approved by the committee yesterday; is that correct?

Mr. ROSTENKOWSKI. Just those approved yesterday by the Ways and Means Committee.

Mr. LOTT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Joint Resolution 562, making an urgent supplemental appropriation for the Department of Labor for the fiscal year ending September 30, 1982, and that I may include extraneous and tabular material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

URGENT SUPPLEMENTAL APPROPRIATION FOR THE DEPARTMENT OF LABOR, 1982

Mr. WHITTEN. Mr. Speaker, pursuant to the provisions of House Resolution 582, just adopted, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 562) making an urgent supplemental appropriation for the Department of Labor for the fiscal year ending September 30, 1982.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 295, nays 82, answered "present" 1, not voting 54, as follows:

□ 1300

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution, House Joint Resolution 562, with Mr. MINETTA in the chair.

The Clerk read the title of the joint resolution.

The CHAIRMAN. Pursuant to the rule, the first reading of the joint resolution is dispensed with.

Under the rule, the gentleman from Mississippi (Mr. WHITTEN) will be recognized for 1 hour, and the gentleman from Massachusetts (Mr. CONTE) will be recognized for 1 hour.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN), the chairman of the Committee on Appropriations.

Mr. WHITTEN. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman and colleagues, may I say that the chief value of this bill is not how many individual jobs it may cover, but it is the direction in which we attempt to turn our Government.

There is no question about the unemployment problem which is now affecting over 10.8 million people. There is no question about the direction in which it is headed at this time, although we all hope for better. There is also no question that all we have done up until now is to pay unemployment compensation; and no matter how much it may be needed by those who receive it, it does not get any valuable work or any additions made to our country.

There is no question that many people have a serious need for employment in this country. May I say again, as I did in my testimony before the Rules Committee, that more and more people are getting dollars mixed up with wealth.

I would like to remind my colleagues that we on the committee and I as an individual have asked the GAO to look at one of the biggest problems we have today—interest rates, and tell us what the Federal Reserve is doing. Let me say here that the Federal Reserve System, taking the view that they are totally independent, is getting to the point where they are acting that way. So on April 26 as chairman of the House Committee on Appropriations, I asked the General Accounting Office to look into their operations and report to the Congress not later than August 31.

The GAO has made their final report as well as three oral reports to me. During this period, we had three reductions in interest rates. I have asked the GAO to keep up its review and advise the Congress. We must work to lower interest rates and keep them at a reasonable level. Balancing the budget is absolutely essential to the proper recovery of this country but this must be at a high level. Too many people are overlooking the fact that our wealth is not in our dollars, but in all of our resources and our people.

I might mention again that I was one who, along with my colleague from Arizona (Mr. RHODES), promoted the Budget Committee because 58 percent of our expenditures were going around the annual review process. We cooperated with the President in rescinding $14.3 billion last year; we went along with a 10-percent cut in the next budget; and then went along with the 7-percent reduction.

Our committee, despite the fact that the Budget Committee has directed its attention primarily to the controllables, where we did not need any help because as I have said many times has been under the budget 37 out of 39 years, and ignored the entitlements and backdoor spending through contracts where help was needed.

But here we come today with a bill that was referred to our committee under unusual circumstances in that the authors of the bill: Mr. PERKINS of Kentucky, Mr. HAWKINS of California, Mr. OBERSTAR of Minnesota, and the majority leader, Mr. WRIGHT asked us to consider this bill.

In discussions prior to that, there were two things that we insisted upon, that work be performed prior to any payment and that the work be of real value to the country. As to the mechanics it was thought that we had better use the Department of Labor because of its experience.

If we can get our Government to look to productive jobs of real benefit—it would be far better than the existing practice of paying out more money for no work. I repeat again that under this bill there will be no payment unless the specific job has been done. Mr. Speaker, we have been neglecting our real wealth—our country—we have not had a public works bill authorizing new projects since 1976.

I have before me an article called "The Decaying of America," which is a story that appeared in Newsweek some time ago reporting "aging and neglecting the Nation's network of roads, sewers, and bridges is nearing collapse."

I have another report here to the Congress by the Comptroller General, "deteriorating highways and lagging revenues," and we need to reassess the Federal highway program.

I have many other statements from magazines all over the country. Here is another one, to Senator SASSER, by GAO, "better targeting of Federal funds needed to eliminate unsafe bridges."

All of this we read about, and we know about, and certainly we cannot question the need and the absolute necessity that we protect our real wealth. The situation is getting acute.

The types of work permitted under this bill are:

First, road and street repair;

Second, bridge painting and repair;

Third, repair and rehabilitation of public buildings;

Fourth, repair and rehabilitation of water systems;

Fifth, erosion, flood, drought, and storm damage assistance and control;

Sixth, removal of refuse from drainage ditches, illegal dumping sites, and other public areas;

Seventh, park and playground rehabilitation;

Eighth, installation and repair of drainage pipes and catch basins in areas subject to flooding;

Ninth, stream, lake, and waterfront harbor and port improvement and pollution control;

Tenth, forestry, nursery, and silvicultural operations;

Eleventh, fish culture and habitat maintenance and improvement;

Twelfth, rangeland conservation, rehabilitation, and improvement;

Thirteenth, installation of graded ramps for the handicapped; and

Fourteenth, energy conservation.

Do my colleagues know that as we stand here in the midst of a depression: that every major city in this country, or most all of them face a water shortage where they will need water worse than they need oil in only a few years?

□ 1310

Knowing that we have not even had the foresight to have new public works programs to develop and protect our country since 1976, when the sponsors first talked to me about this, I said, "Let us look after some of these things where there will be something of value to show for our expenditures."

And the next question we looked at was, "Aren't we going to spend the money anyway?" I did not hear a single complaint here a few weeks ago when we added unemployment compensation for 10 more weeks, which will cost $2.2 billion. That is twice as much as is invested here, so it could not be that Members object to spending money, because there they spent twice as much as we are proposing here and they will have nothing to show for it.

So, in handling this bill, after talking to the authors, the bill was introduced providing pay for worthwhile work done, and we reported it out. The mechanism to produce these productive jobs was designed by those sponsors reaching back to the mechanics of handling that which had been tried and which could be set up within a reasonable length of time. We went along and reported it out because—and I say here the greatest benefit of this bill is that for once we are looking for some value received for the money we spend in connection with unemployment.

I say that this in itself is well worth what we are doing here, to start on a policy of doing things that are needed, doing things that are valuable, doing things that must be done somewhere, somehow, that we look to the program of unemployment as a means of productive employment when a man runs out of unemployment compensation or where he has no unemployment compensation at all.

I repeat again, there will be no payment until there is a certificate by the supervisor that the job has been done. What is wrong with that? I think it is sound.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding. What I would like to get is an understanding a little bit, though, of how this program works. If I read the figures correctly, the average number of jobs that would be created in each congressional district in the country would be something less than 500 if the bill works perfectly; is that correct?

Mr. WHITTEN. I could not tell the gentleman exactly, but I would answer it this way; the greatest value of this is not the number of jobs in each and every location that we get, but it is a shift in philosophy from giving them money for nothing, for which we get no benefit, and reversing our approach and enabling them to get productive, useful jobs. It used to be that many folks did not mind getting unemployment compensation while they changed models or the plant was closed down, knowing that they could go back to work, but now when it runs out there are not any other jobs, there is no place to turn. So I say that the chief value here is not the numbers here and there, but the reversal of our approach where now we have a fellow to work on programs for the benefit of the country and we have something to show for it. That is better than supporting the tax increase which included 10 more weeks of unemployment compensation.

I just say it is a whole lot better to enable a man to work, he is better fitted to work for something and leave something to show for the benefit of the country as a result than it is to give him money with no return, which is what we are doing now. So, I say the value of this is not how many, but whether we can get the gentleman and others to reverse the course.

Mr. WALKER. If the gentleman will yield further, I am trying to understand the formula, and I might say to the gentleman that I did not vote for the tax increase bill.

Mr. WHITTEN. May I say that the gentleman and I are in thorough agreement on that.

Mr. WALKER. If the gentleman would yield further, I understand that any district in the country that is not at the national average or above for unemployment would not be eligible for these funds. Is that correct?

Mr. WHITTEN. I can say this that if the gentleman defeats the bill none of them will be eligible.

Mr. WALKER. Is that not what the bill says?

Mr. WHITTEN. May I say again what I stated earlier, I am no expert in all the mechanics of this bill. This bill was drafted by others and our committee was asked to act on it. I did see this bill as a chance to consider a little bit toward getting the country to move in the other direction and let the man work where he feels better because he is producing something, where the country will benefit from it, where we are headed in the right direction. Production of benefits to the Nation is what we should insist on.

Mr. WALKER. If the gentleman will yield further, the gentleman is bringing this bill to the floor, a very serious bill. Certainly the gentleman has looked into it and found out what the impact will be in his own district.

Mr. WHITTEN. I do not know if it will have any benefit on my district except that the Government will be looking in the direction of improving and protecting what we have and getting value received for what we spend. I do not know how it applies to my individual district or the 400 others, I care about our country as a whole.

Mr. WALKER. If the gentleman would yield further, can he tell me what the unemployment rate is in his district?

Mr. WHITTEN. I could not hear the gentleman.

Mr. WALKER. Can the gentleman tell me what the unemployment rate in his district is?

Mr. WHITTEN. Unemployment is high in my area, but I tell the gentleman that most of them would rather be doing something beneficial than collecting unemployment compensation.

Mr. WALKER. If the gentleman would yield further, is the unemployment in his district above the national average or below the national average?

Mr. WHITTEN. I say again this is both a national problem and one for my district. I was home recently, and I live in a county seat town. I saw five second cousins who thought that they had lifetime jobs. I read of many other folks all over the country, so it is prevalent. But involved here is the principle that are we going to get something beneficial to help the country, or are we going, as we did in this other bill, to give more and more money for a long period?

Mr. WALKER. The point I am trying to understand and trying to find out is whether the unemployed

people in the gentleman's district are going to get any money out of this bill.

Mr. WHITTEN. I have not matched this against my district. My district has a need, but that is not it. The Nation has a need to correct these things that we have for years and years of bridges not getting built, streams filling up, harbors not being dredged. I say we had better start looking toward those things every chance we have, or else we are going to waste our wealth while we are trying to balance the budget.

Mr. WALKER. What I do not understand, though, is how these things are going to get done if some of this money——

Mr. WHITTEN. It is not going to get done without the gentleman's help or a majority of the Congress. That is what I am begging for, the support of the Congress to head in the right direction. Of course, if the gentleman does not see that I do not know what I can do to point it out to him. If we get value received for this expenditure, it would be a great improvement.

Mr. WALKER. If the gentleman will yield further, I am trying to understand the formula under which we are going to allocate this money, and I am not getting very much of an explanation as to how the money is going to get out there and who is going to get it, how this money is going to be paid, how all these good things the gentleman talks about are going to get down there. It seems to me we are not hearing any of that. I would like to know what the formula is.

Mr. WHITTEN. I do not mean to be facetious, but I do not know how I could make the gentleman understand any more plainly than what I have. I just cannot explain it to his satisfaction.

Mr. WALKER. The gentleman has not yet told me whether or not his district is going to get anything, any of the jobs in his district. He has not yet told me the formula by which we are going to allocate these jobs, whether or not it means 500 jobs per district or 75 per district. I am trying to understand and the gentleman is not explaining this.

Mr. WHITTEN. May I say again, that if we can contribute something toward the Nation's recovery my district will go along with it, and may I say that the principle is sound, it is clear, and how it applies to my district is beside the point. My district is going down like the rest of the Nation, if the country recovers, my district will recover along with it.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, I think the people watching this debate ought to understand what is really happening here. We have a certain number of Members of the House who would not vote for any jobs under any circumstances whatsoever, so if you do not target the funding under this bill to areas which have the most serious problems and say, "Oh my God, you are going to give jobs to areas that do not have the serious unemployment problem, and you ought to target them."

If you do target them, then they say, "Oh my God, you are not putting them into my district or your district."

The fact is, no matter where you put these jobs, this money, you have got a certain percentage of the Members of this House who would not support you under any circumstances at any time under any formula, and I suspect that includes the gentleman now questioning the Chairman.

□ 1320

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I do not yield further.

Mr. WALKER. That is a shame.

Mr. WHITTEN. Mr. Chairman, may I say that I have some advantage of some benefits or some help from my recollection in this matter. The Members have heard me say it before. I went to the Mississippi Legislature when I was 21, and you could not buy a sack of flour on the credit of the State of Mississippi. That was true of New York State and every State in the Union.

I was there when we created the WPA, where we had "make work" and where we got some benefits. I know what it has been like in the past.

Let me say this to all the Members. From reading history and looking at the situation we face today, despite the insistence of my friend, the gentleman from Pennsylvania, and others, we are doing exactly what preceded the last depression—counting on industry to bail us out. The worse it got, the more we looked to them. We are facing the high interest rates that prevailed at that time.

Read Manchester's book "The Glory and the Dream," and you will see that the situation is so serious today because it looks just like what preceded that Great Depression.

In the last 3 or 4 years I introduced a bill to restore the old Reconstruction Finance Corporation where debtors and creditors could go in and work things out and get back on the track and get going.

There are so many things similar today so as to be frightening, and I ask the Members, as we do here, to provide productive work, jobs that leave something to show for it in the way of improvement and protection of our country is a move in the right direction.

I have to see some of my friends question that because I have a chance to see how it would affect my district. I want to say, whether you are a banker, a lawyer, a farmer, or a Congressman, if this country goes down, yours will go with it. I am broadminded enough to believe that if we can get this country straightened out and headed in the right direction, my district will go with it. I am not parochial, but I am interested in my district, and we will be in there with all the rest. I do not care what your business is, if it goes down, it will pull others down with it.

I say again that we brought out a bill which did not originate with our committee. It originated with those who have knowledge of the problem areas and I have some knowledge of my own.

I started to tell you that I lived in a little county seat community. I saw five relatives who had good jobs, but they were unemployed when I last went home. I look around me, and I see the farmers are getting too little money to break even, and when they go back to the bank to try to borrow in the spring, they are going to find their security has gone down 50 percent and they are liable to face bankruptcies there.

So I say that the chief benefit is not how many but how or what kind. We are directing the attention of the Government and using this money that we are going to spend anyway toward getting something of value for that money. We do not get it unless the work is done in advance and we have got a certificate to prove it.

I just hope that the Members will go with us. Everybody is in accord with the idea that something needs to get done, we need to turn things around and save our country. Support this legislation.

Mr. CONTE. Mr. Chairman, I yield 8 minutes to my good friend, the gentleman from Louisiana (Mr. LIVINGSTON).

Mr. LIVINGSTON. Mr. Chairman, this bill should be defeated. I realize that this bill ostensibly bears a good purpose. We do indeed have high unemployment in this country; the economy is not healthy, but we should not treat any illness with bad medicine.

This bill is loosely drafted, and a poorly drafted, loosely enforced, last-minute jobs bill is worse than no bill at all

This bill risks abuse, fraud, and waste. It costs $1 billion, but it could run much more. We really do not know about that. Statutory provisions which require estimates of costs to be compared with the budget resolution, with a 5-year projection of outlays and with financial assistance to State and local governments, are all listed in the report as being "indefinite."

The Department of Labor under this bill, if it is enacted, only has 30 days to spend this $1 billion. That is 30 short

days. All of the money has to be obligated or possibly even spent by the end of this year. That is only 3 or 4 months.

Nothing in this bill limits the bill to low-income people. As a matter of fact, Mr. Chairman, you can earn as much as you want—$25,000, $50,000—even $100,000 in a year—and still be unemployed for 2 weeks and qualify for benefits under this bill. It just does not matter how much a person has earned.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. LIVINGSTON. I yield briefly to the Committee chairman.

Mr. WHITTEN. Mr. Chairman, personally as far as I am concerned, I believe that on this side we should change that 2 weeks to 10 weeks, and I think that would be an improvement.

Mr. LIVINGSTON. Mr. Chairman, if the gentleman will allow me to point this out, the last time I saw the bill, that change had not been implemented, and I did not know the rule allowed that change.

Mr. WHITTEN. The gentleman is correct that the rule prohibits such a change, but I call attention to the fact that I recognized the error there, and if such a change were possible at the proper time I would try to change it.

Mr. LIVINGSTON. Mr. Chairman, I appreciate the gentleman's pointing that out. I did not know the rule permitted a change like that.

Nothing prevents a recipient under this bill from using this bill to retrigger his unemployment benefits. As a matter of fact, under that particular provision, if he were on unemployment benefits, if he then exhausted his entitlement to unemployment benefits, and if he qualified for this bill, he could then retrigger his unemployment benefits, and it would cost local and Federal governments another $220 million per year.

Here is another provision in this bill. The gentleman has indicated his intention to change the bill, but nothing in the bill, as I see it right now, prevents a person from leaving his existing job, remaining unemployed for 2 weeks, and taking a job under this program for 6 months. In fact, this bill gives priority to those ineligible for unemployment benefits, regardless of why they are ineligible.

Now think about that. That means that this bill will be good for some good people. Some good folks will qualify under this. But perhaps, because someone has quit his job, because he has been dismissed because of thievery or what have you, a lot of ne'er-do-wells would also qualify for benefits under this bill.

I do not understand the logic of this bill. I do not think the drafters or the sponsors of the bill understand the logic of it. It is written to recreate the very law that this entire body, through a majority of the House and the Senate, threw out as being ineffective, and that is the public CETA program. That is the costly public sector program which the Congress agreed to terminate at the end of this month. On September 30, 1982, public sector CETA will be no more, and yet this bill will recreate it, even though $26 billion was totally wasted over the years without any substantial achievement which can be shown for that $26 billion.

This jobs bill will not do anything for the hard pressed construction industry. Twenty percent of the people in the construction industry are unemployed today. This bill will not help any of those people. It fails to create permanent skilled jobs of any sort. It is more likely to be manipulated by politically astute wheeler-dealers than help the chronically unemployed.

This bill was originally and primarily drawn last July to help youth find summer jobs. That was again a good purpose, but when it became obvious that the late date made it totally ineffective, and that the only way they could give away $1 billion in the short span of the summer remaining was to run up to the top of the Washington Monument and throw that money out of the window, the bill was redrafted, coincidentally, just in time for the elections.

There has already been $1.9 to $2.3 billion approved by the administration in the recent tax bill to extend unemployment compensation benefits. There is already $192 million in the 1982 continuing resolution provided for youth employment on top of $3 billion in other jobs programs in that same bill. There is already $45 million in the urgent supplemental we just passed, and there is another $3 billion in the 1983 budget resolution for summer youth programs and job training.

But, there is another problem with this bill. The vagueness of the bill prompts quick, ill-conceived projects with poor supervision and ineligible recipients and inadequate supplies.

□ 1330

Benefits will not even be felt until the middle of next year when economic recovery is anticipated. So there may not be a need for this bill by the time it gets under way.

Most importantly, Mr. Chairman, the $1 billion increase in the deficit is bound to regenerate inflation and high interest rates.

Mr. Chairman, loosely drafted jobs bills are less efficient than the marketplace. They cost more to operate. They do not work. They add to the cost of Government and to the deficit, and that adds to the strain on interest rates and keeps production down, the exact opposite of what we are trying to accomplish here.

I will give you a perfect example. Over $31 billion was provided for antirecession programs between 1974 and 1975 during the recession at that time, but because of delays in implementation, $23 billion was not spent until after 1976, when we were not even in a recession. That money caused inflation to skyrocket.

Add that to the $26 billion thrown away in the public sector CETA program that we saw no benefits from and you wonder why we keep repeating the same mistakes.

Since 1960 we have compiled a total deficit in every year but one of over $550 billion, bringing the national debt to $1.109 trillion as of the end of August of this year.

And we are about to add more than $100 billion per year to that figure in each of the next few years.

When will we learn from our mistakes, Mr. Chairman? When will we stop? When will we learn anything?

Because of previous bills this money is not needed. Even if it is, it will not be spent well under any circumstances.

This bill has been born out of politics and it may well be passed and even enacted out of politics, and it is sure to be spent politically.

But good politics does not always mean good sense, Mr. Chairman, and that could not be more true than in this instance.

Even the Washington Post this very day says this is a tired, old melody; let us not play it again, Sam.

This is a political balloon, but it will not lift anything other than the deficit and the political spirits of those who support it.

I urge my colleagues to shoot it down before it takes flight.

Mr. WHITTEN. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Chairman, I rise in support of the joint resolution.

The economic condition of the Nation is anemic. It has been so; it is now so; and most indications are that it will remain so for some time to come.

After his first 6 months in office, President Reagan through his economic policies has driven the United States into its worst economic downturn since the Great Depression. This August, the unemployment rate reached 9.8 percent and 10.8 million workers were jobless. Not since the year of 1941 has the unemployment rate been higher—9.9 percent—and not since the year 1934 have more Americans been out of work—11.3 million.

In July 1981, when the Reagan recession officially got underway, there were 3 million fewer unemployed persons than there are today. More than half of all black teenage workers could not find jobs in August. The unemployment rate for adult men stood at a

postwar high of 8.8 percent in August; for adult women, at 8.2 percent, only one-tenth of a percentage point below its postwar high. Job losers comprised nearly three-fifths of all unemployed workers last month compared to half of the workers unemployed in July 1981. Most of these workers are not waiting to be recalled to their former jobs. Their former jobs will not be there even after the economy turns around.

Our emphasis, therefore, should be on job creation. This is why we need House Joint Resolution 562. It will employ workers while the private sector gets itself back on firmer footing.

On average, it is now taking an unemployed person almost 4 months to get another job. Last month, there were also 2 million people who had been out of work over half a year. These figures do not even take into account those workers who have become so discouraged that they have given up looking for employment. In the second quarter of 1982, there were 1.5 million discouraged workers. This is half a million more people than in the second quarter of 1981.

Between July 1981 and June 1982, the latest month for which data are available, 3.3 million persons exhausted their regular unemployment compensation benefits. In order to avoid total unemployment and the eventual exhaustion of benefits in a dried up job market, 5.6 million workers were forced to choose part-time employment in August as opposed to 4.4 million in July 1981.

You cannot blame workers for their unemployment when there are almost 2 million fewer jobs in the economy today than there were in July 1981. Yet that is precisely what President Reagan did earlier this year. Pointing to a Sunday edition of the Washington Post's want ads, he implied that there were jobs for the taking if the unemployed really wanted to work. However, if he had looked more closely at the kind of positions listed in the ads, he would have seen that they often required specific skills in the fields of engineering, computer science, and nursing, among other occupations. He would not have found numerous ads calling for construction workers, blue-collar production workers laid off from auto plants and steel mills, or for other unskilled and semiskilled workers.

President Reagan should not look to the want ads for comfort from the recession his policies created. The Conference Board's Help-Wanted Advertising Index fell to 80 in July 1982 (1967=100), 43 points below its level at the start of the Reagan recession. The volume of want ads declined from a year ago in all of the nine regions measured. This should come as no surprise to the President since unemployment in July 1982 increased in 48 States and the District of Columbia, according to the Bureau of Labor Statistics. Currently, 20 States are experiencing double-digit unemployment. In July 1981, only three States had unemployment rates at or above 10 percent.

President Reagan also should not seek solace in newspaper want ads because they are not a true measure of the absolute number of job vacancies present in the economy. They merely reflect the demand for new hires. If people are leaving jobs in about the same number as want ads placed, then the total pool of jobs in the economy will remain unchanged. Thus, the number of want ads cannot be used to judge whether the level of job openings would be sufficient to wipe out our present level of unemployment.

A professor of industrial relations at the Massachusetts Institute of Technology, Katherine Abraham, contends that not only is the amount of help-wanted advertising not the same as the number of available jobs, but also that if the data were adjusted to pick up all job vacancies in the economy, there would still be 10 or more unemployed workers per vacant job. This means that even if the workers displaced by new technology and foreign competition were retrained, there still would be a relatively high unemployment rate. How then can President Reagan pretend that the unemployed are out of work through pure laziness?

This is why we need House Joint Resolution 562. It will begin to make a dent in the unemployment rate by creating new jobs. In addition, it will create jobs designed to improve the Nation's infrastructure—a sorely needed improvement and an improvement only the Federal Government can make. State and local governments are being hurt by the recession and have had to cut deeply into the services they can offer in order to make ends meet.

So, rather than continuing to make excuses, the President might regain some of his lost credibility and popularity by acknowledging that Reaganomics was intentionally designed to reduce inflation at the expense of increased unemployment. In making such a statement, however, the President would be admitting his direct violation of the Full Employment and Balanced Growth Act of 1978. That piece of legislation strictly prohibits fighting inflation through unemployment.

Unemployment is an unjust and inadequate tool for fighting inflation. Despite many years of historically high unemployment, a recent Brookings study has shown that the core inflation rate in the United States has dropped by only 2 percentage points. In addition, unemployment exacerbates our deficit problem. According to the Congressional Budget Office, every 1 percentage point rise in the unemployment rate leads to a $30 billion increase in the deficit. Putting Americans back to work is the best policy for reducing the deficit, not cutting further holes in the social safety net the Congress has worked so hard to establish.

While testifying before Congress, Nancy Barrett, an American University economist, states that today's unemployment translates into lost output amounting to $325 billion. In the first quarter of the recession, productivity fell by 3.6 percent, the second worst productivity decline since the Great Depression. Along with this lost production, unemployment is putting a drain on the individual States economies: 19 States owed the Federal Government $7.7 billion as of midyear due to loans or earlier borrowings to finance unemployment insurance payments. How then, can we expect the States to improve our Nation's infrastructure on their own?

How then, can we expect the private sector to pull out of this recession on its own? Reaganomics will not get us out of the economic mess it has plunged us into. Something must be done to stimulate productivity in our sluggish economy and move us toward better times. House Joint Resolution 562 is a step in the right direction.

The continuation of employment programs would have moderated the recession's impact on workers. It also would have moderated the consequent increases in mortgage overdue payments and defaults, as well as the decrease in housing construction, among other related events. However, a key feature of Reaganomics is the budget cutting of social programs. Radical surgery was performed on the Comprehensive Employment and Training Act, with public service employment eliminated and youth employment and training programs emasculated. The Job Corps, one of our Nation's most successful training programs, is expected to have its outlays reduced by 31.1 percent between fiscal year 1982 and fiscal year 1983. President Reagan tried to eliminate funding for the community service employment program for older Americans by vetoing our supplemental appropriations bill. Let us show Americans that Congress cares about high unemployment. We overturned his decision by overriding his veto. Let us keep the momentum going and begin to rein in Reaganomics by passing House Joint Resolution 562.

Mr. CONTE. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. CORCORAN).

Mr. CORCORAN. Mr. Chairman, first of all I want to thank my friend and colleague from Massachusetts for giving me this time.

Second, let me say the reason that I sought this time is to address the comprehensive alternative amendment which will be offered to this unfortunate legislation by our good friend and colleague from Illinois (Mrs. MARTIN).

Mr. Chairman, as we examine this bill I think many of the criticisms that have been discussed, not only in the consideration of the legislation itself but with respect to the rule, have become documented. The one aspect of the bill, however, that I want to address is the funding mechanism.

It seems to me that as we consider this Rube Goldberg approach that is contained in House Joint Resolution 562, wherein it is going to be 5 percent of the latest estimated cost of unemployment compensation to the Federal Government, then further divided into 85 percent to productive jobs in accordance with section 2, and 15 percent in youth employment and training programs and other aspects of the formula, we find that it in itself is flawed.

But, besides that, the source of the money is the major objection which I have to this legislation.

□ 1340

In the amendment which will be offered later on this afternoon by our colleague, the gentlewoman from Illinois (Mrs. MARTIN), we are going to change the financing for the program from a new expenditure out of general revenues to a transfer of funds from the Synthetic Fuels Corporation.

Mr. Chairman, as you and my colleagues know, I have been for some time trying to alert this House to the white elephant that the Synthetic Fuels Corporation has become. As a matter of fact, I even have been fortunate enough to get the attention of our good friend and colleague, the gentleman from Texas, the Democratic majority leader (Mr. WRIGHT), who was quoted not too long ago as saying, "They will never make it to the floor."

Well, Mr. Chairman, this is a red letter day. After months of trying to get a Republican jobs program associated with housing before this House of Representatives, we are finally going to get a choice between synfuels and syncrude and corporate subsidies that the other party wants to maintain and the alternative that our friend and colleague, the gentlewoman from Illinois (Mrs. MARTIN), will be offering later on.

One of the key questions is, of course, whether or not there is money available in the Synthetic Fuels Corporation? Well, Mr. Chairman, you will recall that our former President, Mr. Carter, at the time that the revolution occurred in Iran and at the time in his judgment there was a malaise in this country, went to Camp David; and when he came down from that mountaintop he did not bring the Ten Commandments, Mr. Chairman. He brought the Energy Mobilization Board, the windfall profit tax on crude oil, the Synthetic Fuels Corporation, and other subsidies to various energy activities.

Mr. Chairman, I think it is interesting to note that the objective of the Synthetic Fuels Corporation was to reduce the importation of foreign oil by 2 million barrels a day. The Synthetic Fuels Corporation has not yet funded one project. All the money that they have expended so far has been for administrative costs, and that at the rate of about $40 million a year.

On the other hand, the people of this country, without the assistance of the Federal Government, have in fact through energy conservation, through the response to the price changes in the cost of oil, and through the use of other energy alternatives have brought about in fact, a reduction of over 2 million barrels of oil per day. So we have already accomplished the objective of the Synthetic Fuels Corporation without one project having been funded by that white elephant.

Mr. Chairman, the amount of money that we appropriated back in 1980 for this program was some $20 billion. That is money that has already been appropriated. That is money that is in the pipeline. It is in the budget process. By contrast, the funding for the legislation before us would call us to come forward with new tax revenues, with a new expenditure of funds, further enlarging the size of the Federal Government.

In my judgment, Mr. Chairman, if there was ever a time when what we ought to do in this Congress is to shrink the size of the Federal Government, to reduce in these days of budget crises the tremendous power that the Federal Government has in our society, particularly in the energy field, when we have seen the benefits of some of the changes in Government policy in energy, it seems to me that we ought to take that course at this particular time. What has happened so far is that of that $20 billion, only $5.1 billion has been obligated. Therefore, we have $14.9 billion of appropriated but unobligated funds in the SFC and it is from these unobligated funds that our amendment would transfer $1.5 billion to finance a workable jobs program to take people off welfare.

Mr. WHITTEN. Mr. Chairman, I yield 3 minutes to the gentleman from Kentucky (Mr. NATCHER), a member of the committee.

Mr. NATCHER. Mr. Chairman, the bill that we have before the Committee now, if enacted, will provide a total appropriation of approximately $1,035,000,000. This will be used for jobs for the unemployed.

In addition to appropriating the money, the bill before us also authorizes and creates the programs to be funded. There is room for this appropriation in the Committee on Appropriations section 302 allocation under the third budget resolution for fiscal year 1982.

At the time of the third budget resolution, the Budget Committee, on both sides of the aisle, contemplated and expected a jobs bill totaling in the neighborhood of approximately $1 billion to be presented. If this bill is enacted, Mr. Chairman, we would then have under section 302 funding for the Committee on Appropriations remaining after the $1,035,000,000, about $2,100,000,000 left.

My good friend, the distinguished gentleman from Louisiana who is a member of the subcommittee that makes recommendations for the appropriation of funds for the Department of Labor, the Department of Health and Human Services, the Department of Education, and an able Member of the House—mentioned CETA. Mr. Chairman, the CETA formula is a part of this bill, but there are no public service jobs here. In this bill we would have jobs for bridge repair and maintenance, potholes and other road repair, installation of graded ramps for the handicapped, fire hazard inspection, repair and rehabilitation of water systems, repair and rehabilitation of public buildings, security guards for schools, assisting public health programs for immunization for disease. Those are a few of the jobs that would be used in this particular bill.

Mr. Chairman, speaking of public service jobs, during the month of August of last year, I was in one of the small counties in the district that I represent. A little lady was pushing a lawnmower at the courthouse, the kind of lawnmower, Mr. Chairman, that you and I do not like. The kind that you push and you pull back with no gasoline, no electricity. She was wringing wet. I stopped her just so that she stop just for a minute to catch her breath. She told me that she had this job which was a public service job, Mr. Chairman. The county judge had given it to her, and she said, "Mr. NATCHER, my husband died. I have two little children. I am trying to take care of my children. I work at night down at one of the restaurant."

Mr. Chairman, she said, "I do not draw food stamps. I do not want to be on welfare. All I want to do is work and take care of my two children." This expresses the feeling of a great many people in the country.

I know that the distinguished gentleman from Louisiana knows, as far as public service jobs are concerned, some of them certainly were not good and we wasted money. This is the reason why we will have new legislation.

Mr. LIVINGSTON. Mr. Chairman, will the gentleman yield?

Mr. NATCHER. I yield to the gentleman from Louisiana.

Mr. LIVINGSTON. I thank my distinguished chairman for yielding to me, and I sympathize with the plight of that lady. I admitted earlier that some people will be helped; some good, conscientious, honest American citizens will be helped.

But the gentleman will recall the headlines in the papers where CETA was definitely abused in the public sector, abused in my city of New Orleans, and throughout the country. There were millions of dollars which were wasted, thrown away, or given to those who used taxpayer money for their own political purposes. to distribute it to their own political patronage clients. And I would hope that that would not be intended to reoccur. However, I understand that under this particular bill we will be using the same old formula under CETA to distribute money to the same old prime entities, the same prime sponsors, who were responsible for obligating the money under CETA. This indicates to me that we are just repeating the wasteful mistakes made under public sector CETA.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I rise in opposition to both of these bills. We are faced with votes on two politically motivated measures which sound great at first reading but which in reality will not have a significant impact on this country's excessive unemployment rate. I would just like to point out the problems involved. Members who are concerned should examine the wording very carefully, to see what their particular districts are eligible for.

Both bills use the prime sponsors of the CETA program as the eligible entities. In my particular case, even though my State is eligible for extended benefits for the additional 10 weeks, and even though it has areas of substantial unemployment, well above the national average, because of the particular circumstances in our State we will receive nothing under the Republican substitute and a little more than $700,000 under the Democratic program.

Obviously, what this means to my State is that we could put at most 75 people to work, on an annual basis. In July we had 16,250 unemployed.

Under either version of the bill, the money would have to be spent for construction labor during the winter months. I do not think we could repair too many bridges in the middle of January in Vermont, especially when the legislation provides no funding for material such as cement, steel, or nails.

□ 1350

Mr. Chairman, as a result, I do not have any great enthusiasm for voting for a $1 billion bill when its particular provisions are written such that areas which ought to have help do not have it.

If the bill had been designed to provide relief to areas of substantial unemployment, a defined concept under our laws, or areas where people have been on unemployment in excess of 15 weeks, if it had been designed to provide money for those areas, then I could support this legislation, either version.

But since it is designed in a way which provides little or no real relief to my State which has very serious problems with unemployment, I cannot vote for either program. This is what happens when you hastily draft a jobs bill for political purposes. The safe political route is to vote for one of these bills, that is unless you read them.

Mr. CONTE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this bill, House Joint Resolution 562, is like a watermelon. I can understand how people are supporting it. It is like holding out a great big piece of a juicy, ripe, red watermelon to a man who has been working hard all day on a hot summer day. Man, does that first bite of that watermelon taste good.

But after that first bite, one starts chewing and running into all kinds of seeds that you have to start spitting out.

Mr. Chairman, I am not against watermelon. In fact, that is one of my favorite fruits.

I am not against jobs. We had this unacceptably high unemployment hanging over our heads for too long. Like a piece of watermelon, after a long hot day, this bill satisfies a need, the need to put people to work.

But like that watermelon, it is about 99 percent water and in a fancy wrapper. What is more, it has a lot of seeds. We are going to be spitting out seeds for a long, long time to come.

I would like to talk about some of those seeds; there are a lot of them. I wish this bill were a clear choice of jobs over no jobs, but there are so many holes in this bill, I cannot even get to that issue. This bill is hastily drafted; it is ambiguous; it is bordering on irresponsibility.

This bill contains no provisions on waste, fraud, and abuse. One billion dollars going out over a period of 3 months in a system that has been scarred by abuses before in the checkered history of CETA, and not one provision on waste, fraud, and abuse. Has this Congress not learned its lesson yet?

Do the Members think this bill would give jobs to long-term unemployed? Do the Members know who gets the jobs under this bill? People who have been unemployed only for 2 weeks.

Do the Members know who else gets jobs under this bill and get priority over the people who cannot find jobs? People who quit their jobs, who get fired; they can get jobs under this bill.

I find that hard to believe. It is right there in the bill. If the Members do not believe me, look at section 2(b)(1) on page 3: "Priority given those who are not currently eligible for unemployment compensation."

There it is, written into the bill. That is people who quit their jobs, people who got fired, that are not eligible for unemployment comp. They can go out and get in on this bonanza.

Be sure the Members understand that this bill has hidden costs. It is estimated this bill will cost $220 million in additional unemployment comp money because people who get these jobs will be eligible for unemployment compensation.

I am not saying that that is bad, but I am saying that there is an additional cost here that we ought to be made aware of.

This bill is a melon. There is no doubt about it. It satisfies the craving for jobs, but it has a lot of seeds in it. If we pass this bill, we will be spitting those seeds for a long time to come.

I will go one step further. This bill is like a melon, but it comes close to being a lemon.

I am not against jobs. I am all in favor of jobs, but I am against this bill. There has been so much talk about bridges.

I was sorry to hear the statement of our beloved Speaker about our minority leader. I have the highest regard for, the highest respect for one of my dearest friends—the Speaker of the House. I am brokenhearted for they have a strong bond of friendship, those two have been wedded on the golf course for so long I hope the marriage does not break up today over this bill.

Let me tell the Members the Speaker was wrong. The Speaker was wrong when he had his people call Peoria, Ill., to check on those bridges.

Mr. Speaker, if you are watching this on the tube, there is not a bucket of cement in this bill. There is not a bucket of asphalt in this bill. There is not a piece of steel in this bill to take care of those bridges in Peoria, Ill.

If the Members want to take care of those bridges, do it in the transportation bill that is coming up this afternoon. How can those people in Peoria go out there with empty buckets, shovels, rakes, to repair those bridges? How are they going to fix those bridges in Peoria, Ill.?

The old Wright bill was a good bill. If the gentleman from Texas (Mr. WRIGHT) had his bill in here now, I

would be up here speaking for that bill, because that built buildings.

I know my party was against the Wright bill. I was for it. I said it is a good bill that will provide meat and potatoes on the table. People were not going to be shuffling pieces of paper. When this is all over with, what do we have? We have nothing. We have an empty table. The Wright bill put meat and potatoes on the table. It left lasting buildings.

When I go through my district, I see police stations built under the Wright bill. I see roads that were fixed, old buildings deteriorated that were improved. But there is not a nail in here, there is not a hammer in here, there is not a saw in here, there is not a bucket of cement in here.

It is just a waste of money. It is a bad bill. It is a political bill in an election year. We are going to live to regret it. I hope the bill is defeated, both bills. The other bill is as bad as this one.

If we are going to put people to work, let us get a bill out here that will build something lasting.

We could do that here today, if we really wanted. We could put money into EDA for our cities and towns. We could put money into the Army Corps of Engineers for bridges and dams.

We could put money into our Department of Transportation for road repairs, which is the next bill we will consider. We are not doing that in this bill. What we are doing is taking a "make-work" approach. That is not the way we should be spending the taxpayers' dollars. We should be putting money into a program that will produce lasting results, results that will be with us next year, and 5 years from now and 20 years from now.

I know what the situation is like out there. We need jobs. But let us not go for that one quick bite of watermelon. Let us go for meat and potatoes. The precedents are there. The laws have been enacted before. Let us go back to these precedents, rather than this ill-advised gesture.

That is what this bill is, a gesture. It will demonstrate that Congress has the muscle to put out a billion dollars if it wants. Mr. Chairman, I do not think there are too many people who doubt that Congress has the muscle to spend billions of dollars. There are a few people around who wish we not exercise that muscle so much.

The real question is whether we exercise that muscle responsibly. We can make a gesture, or we can hold off and get a real public works bill or a good transportation bill, that will not just hire workers, but will provide the supplies and equipment to do something about our bridges, our city halls, our eroding farmland. The true test of strength is its wise use.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. STOKES).

Mr. STOKES. Mr. Chairman, I want to share with my colleagues a very interesting article that appears on the front page of the Cleveland Plain Dealer this morning. It tells about a meeting that Mayor Voinovich—my mayor—had with President Reagan yesterday. The article tells us that Mayor Voinovich had his wish granted yesterday. "He looked President Reagan in the eye and told him Cleveland was in deep trouble."

The article tells us:

Armed with charts on the city's declining federal assistance and rising unemployment rates, the Republican mayor told the Republican President he could no longer respond to the needs of the jobless in Cleveland.

Then he told the President a very striking story about a man who was unemployed whom he had run into in a parking lot. The article says that the mayor said:

"There was nothing I could do for that man." Voinovich said he told the President. He and six other big city mayors had an hour-long meeting with Reagan.

Then he is quoted again.

"I got emotional in there," said Voinovich, who had been seeking such a White House meeting for months.

He told Reagan that people in Cleveland were losing their homes and that many of them, even whole families, were going to soup kitchens that once were the domain of the derelicts.

Mayor Voinovich then presented many statistics about our city. He told the President that,

In 1979, TRW Inc. employed 8,322 people. Now employment is down 24 percent to 6,294.

He told him that,

Youth unemployment in Cleveland has gone from 24 percent in 1979 to 38 percent today, with more than half of the city's minority youth out of work.

He told him that,

Bankrupticies to Cleveland went from 2,772 in 1979 to 5,332 to 1981.

Sitting there with him were mayors from Detroit, Pittsburgh, Syracuse, Tampa, Phoenix, and Charleston.

□ 1400

Then they asked, "What was the President's response?" Mayor Voinovich said that the President's response to these presentations were not in words, but the expression on his face. He was listening. I was watching his face and he was listening.

Mr. Chairman, every Member of this body now knows the human tragedy of the Reagan economic program. Instead of economic recovery, what we have from industrial strongholds like Cleveland, Ohio, to the Farm Belt to Wall Street is economic rubble. Dreams of economic growth have turned into dark economic nightmares. Instead of the 13 million new jobs for our Nation's people which we were promised, our Nation is now reeling from the effects of a staggering 11 million Americans out of work. Unemployment in my own city of Cleveland has reached a shameful 14 percent. Thousands of the unemployed have lost their homes, property, and possessions. Millions of Americans have simply given up all hope.

Mr. Chairman, House Joint Resolution 562 alone will hardly make a dent in turning around our crumbling economy and in arresting ravaging unemployment with its devastating social and economic consequences. House Joint Resolution 562 will, however, give hope and encouragement to countless workers and their families who have been decimated by long-term unemployment. The jobs provided in this bill will help a quarter of a million families who cannot wait another 6 months, another year or two for the economy to turn around. They need help right now. House Joint Resolution 562 will provide this needed relief. It will give a signal to our Nation's people that we do care about the disgraceful unemployment situation and that we are doing something about it.

Mr. Chairman, I would like to point out that the jobs funded in this measure are not simply make work jobs. The jobs created in this bill must provide tangible benefits to communities and will address the pressing needs in these communities for the repair and maintenance of public facilities. The jobs funded in this measure will protect the national investment in our streets, bridges, water and sewer systems, parks, and playgrounds.

The infrastructure needs of our Nation's cities and towns are great and varied. More than 8,000 miles of the Interstate Highway System and 13 percent of its bridges are now beyond the designed service life and must be rebuilt. More than two out of every five bridges in the Nation require replacement or rehabilitation. The 756 urban areas with populations over 50,000 will have to spend up to $100 billion over the next two decades just to maintain their water systems; $31 billion in sewer and wastewater treatment plant investments are needed over the next 5 years. No one, Mr. Chairman, can say that the jobs created in House Joint Resolution 562 are wasteful or unnecessary. Using these funds to put the unemployed back to work by maintaining and repairing the infrastructure of our Nation's cities and counties will yield multiple benefits for the entire country. Once again productive taxpayers, upgraded public facilities, and useful job skills for those youth who desperately need a chance to work and be successful in life will be the beneficial outcomes from the passage of this legislation.

We cannot afford to let millions of Americans sit idle and unproductive. We can ill afford to let our Nation's roads, bridges, and other public structures—vital to the economic growth of the country—further deteriorate. Mr. Speaker, we must act now. I urge the adoption of House Joint Resolution 562 as an urgent and critical step in rebuilding our Nation's economic and social health.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentleman from Puerto Rico (Mr. CORRADA.)

Mr. CORRADA. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of this very much needed legislation.

I would like to ask our colleague, the gentleman from California (Mr. HAWKINS) a question. House Joint Resolution 562 does not contain a definition of a State. Of course, the CETA legislation does and both the District of Columbia and Puerto Rico, as well as the other U.S. territories are included in the existing employment and training programs.

Since this bill does not contain a definition including or excluding these areas, I would like the gentleman to clarify this point.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield for the purpose of an answer?

Mr. CORRADA. Certainly, I yield.

Mr. HAWKINS. Mr. Chairman, it is certainly the intent of the authors of this bill to continue the definition of "State" to include Puerto Rico, the District of Columbia, and the other U.S. territories, as the current definition under the CETA legislation provides.

The committee report, in fact, states that the Department of Labor should utilize the existing employment and training system. Therefore, it is certainly appropriate to maintain the definition of "State" utilized in that system.

Mr. CORRADA. Mr. Chairman, I thank the gentleman for his clarification.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Florida (Mr. SHAW).

Mr. SHAW. Mr. Chairman, I appreciate the time.

I would like to respond briefly to the statement made by the gentleman from Ohio (Mr. STOKES) a few moments ago when he spoke of talks and conversations with the mayors.

In speaking of the mayor from Detroit, his own mayor from Cleveland, the mayor of Phoenix, mayors from all across this country, all of whom I know very well, having served with them for years and years, and most of whom you mentioned I have served with on the executive committee of the U.S. Conference of Mayors.

I think that we are missing the point here. This is not a question of solving the problem of poverty, the needs of the people of this country. This bill simply will not do it and to say it is nothing more than a cruel hoax.

All of us in this House on either side of the aisle want to solve the problems of the poor. I came here a year and a half ago with the idea that we were going to solve the problem; but this time we were going to solve it permanently. We were not going to continue to add to the problem, build up the deficits and continue the cruel hoax of using the taxpayers' money to throw at the problem and see if some of the problems might go away.

We have got to the position in this country where throwing money got to be the problem. We have to restrain ourselves. All of us want to produce jobs. All of us want to put the American people back to work; but let us not use their money for political purposes. Let us not use their money to get ourselves reelected.

The people of the United States are too smart to bite this apple and I hope the majority of the Members of this Congress are also too smart to grab this apple.

I will use the expression of the mayor of Detroit. I learned it from him very well. "This bill is full of fish hooks."

Mr. CONTE. Mr. Chairman, I yield 4 minutes to the gentlewoman from New Jersey (Mrs. ROUKEMA).

Mrs. ROUKEMA. Mr. Chairman, I rise to express my opposition to the bill.

House Joint Resolution 562, which would cost about $1 billion, is being offered as an urgent supplemental appropriations bill. As I understand it, we only take up "urgent" measures if they are something that must be done right away with the clear expectation that they will be done. However, I do not believe that there is a Member of this body who truly believes that this money will ever be spent. Regardless of the vote in the House, it is highly unlikely that this measure will be taken up in the other body and, even if it is, it is doubtful that there would be sufficient votes to override the expected veto.

Now, Mr. Chairman, I suppose it is possible that there is another sense of "urgency" about this bill. After all, we are almost 2 weeks past Labor Day and less than 2 months away from election day. I suspect that there are those who believe that they have very little time left to posture and pandering before the voters. Worse yet—the vehicle we have before us is not only without substantive merit but has tied up the Appropriations Committee which is faced with the most urgent of those measures yet before us prior to adjournment—the numerous fiscal year 1983 funding measures, only two of which have passed the House.

What about the substance of the bill? What are its actual promises? A quick review reveals what it really is: A revival of "make work" dead-end jobs such as those we earlier rejected when we eliminated public service employment under CETA. Here we have "son of CETA." Just what do we intend to do at the end of the 6 months' limit on the duration of the jobs under the bill? Lay them off with absolutely no training in marketable skills whatsover? Or do we continue the program ad infinitum as has occurred time and time again in the past. I say we cannot start down yet another road of wasteful spending for a program that will develop a life of its own.

Mr. Chairman, the American people are not so easily fooled. Two years ago, they rejected the tired notion of having the Federal Government try to manipulate the economy by throwing money at problems, often for political gain. They know that while, initially, these attempts were undertaken with the genuine belief that social and economic problems could be solved in that fashion, in more recent years such attempts have been made solely for appearances sake for lack of any creative, alternative ideas.

The fact is, Mr. Chairman, we have a jobs bill that is almost completed. It is a job training bill, which is the one area where we have learned that the Federal Government can be effective. As a member of the Education and Labor Committee, a number of us have worked diligently to achieve a program that will address real retraining needs while giving individuals abilities that will be of permanent benefit to them. Let us continue our focus on that key bill and the other important measures that we have less than a month to work out and stop wasting our time on this political charade that will not fool the American public.

□ 1410

Mr. LIVINGSTON. Mr. Chairman, I yield 3 minutes to the gentleman from Delaware (Mr. EVANS).

Mr. EVANS of Delaware. Mr. Chairman, I rise in support of jobs for all Americans and in opposition to the transparent hoax being put forward here today. It is remarkable that any member of the majority leadership can stand before the House and claim that this bill is what is needed to put people back to work. Throwing a billion dollars at a problem as a blatant political maneuver instead of making use of funds already appropriated in an existing program is nothing less than a scandal.

Let me remind the majority leadership that we had an alternative, an initiative that would have accomplished through the private sector much more than this bill is supposedly going to

do, and that other bill would have made use of funds already authorized and appropriated. I am referring to the Evans-Corcoran initiative which would have transferred $1 billion from the synthetic fuels program and used it in conjunction with the existing mortgage revenue bond program to help Americans buy homes while putting many people back to work in one of the most efficient industries in this country—the housing industry.

We need the permanent jobs that the private sector provides. But instead of addressing this chronic need, the Democratic leadership repeatedly blocked our initiative in the Appropriations Committee, in the Rules Committee—in every way possible to make sure this important initiative would never come up for a vote on the floor of the House. The Evans-Corcoran initiative would not have seriously aggravated the already bloated deficit, but it would have cut into some of the big oil subsidies that the House majority leadership wanted to protect. And that, fellow colleagues, is the real story behind this charade we are witnessing in this Chamber today. A billion dollar charade is something this Nation cannot afford.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentlewoman from Maryland (Ms. MUKULSKI).

Ms. MIKULSKI. Mr. Chairman, I rise in support of the committee bill.

As of this minute, we have in the State of Maryland 200,000 people who are certified unemployed and looking for work. We have a 10-percent overall unemployment record in Maryland, and in some pockets of the community it rises to as much as 35 and 50 percent.

I stand before you having come out of my Democratic primary with an 82 percent majority, to come to Washington to fight for the legislation and the philosophy that this bill represents.

The No. 1 issue in Maryland is jobs. My Governor had to call a special session of the Maryland General Assembly because we ran out of unemployment benefits; dipping into our own limited funds, we passed that bill. Upon that passage, the mayor of the city of Baltimore turned to the unemployed who are going to get extended benefits and said, "Will you volunteer to work for the city of Baltimore on a public works project, because I am desperate?"

The budget cutting has meant budget shifting onto the city of Baltimore, and we are facing tough times. Men and women, unemployed, stepped forward to do volunteer work to build the infrastructure because they did not like to sit around.

Now, who are these people that we want these jobs for? Sure they are temporary, sure they are stopgap; but my people will take anything they can get. Many are not the unskilled, they are not the hard core, they are not the illiterate. They are the men who fought at the Mekong Delta, who worked at General Motors and who have been knocked out of jobs because we have a lousy import policy. They have skills and they want to work.

It is the black man who went through the apprenticeship program in the construction trades just the way he was supposed to do and now he does not have a job because we do not have a housing industry.

It is that woman who took the WIN program on welfare and learned welding and wanted to go to work in my shipyards, but she does not have a job because we are now building ships in Asia.

Those are the people that we are here for. They know that $5,000 will not solve their problems; but they want to get up in the morning and they want to be able to do something and they want to show something at the end of it. And sometimes Band-Aids do not hurt. They often stop the bleeding.

Mr. LIVINGSTON. Mr. Chairman, the minority yields 3 minutes to the gentleman from Georgia (Mr. GINGRICH).

Mr. GINGRICH. I thank the gentleman for yielding this time to me.

Mr. Chairman, I think the gentlewoman from Maryland who just spoke is right: The No. 1 issue in America is jobs. For years we have been following a policy in this country of taxing and taxing, spending and spending, borrowing and borrowing.

For years our automobile industry has decayed, the housing industry has decayed, and we have been killing jobs. By 1980, the disease had gotten bad enough where we had 18½ percent inflation in April, we had a recession already started, the decay was striking at the very heart of the American system.

There will be an alternative offered in a few minutes which will provide targeted help to the seriously unemployed. That substitute will aid families with dependent children. That substitute will be targeted in a way so that it reaches people who genuinely need aid, in a manner that will help the country.

But that is not what is at issue right now. The Democratic leadership bill is one of the most shallow, cynical, and desperate acts of partisanship we have seen in a long time. The fact is that this bill will provide political patronage for a short time through local politicians to people who can be unemployed for as little as 3 weeks. It is a gimmick. It is worthy of big-city machine politicians, but it is not worthy of the pain this country is in.

For years, this Congress has not had the guts to stand up and do what was right. This Congress has wallowed in a large bureaucracy, in programs designed for partisan reasons. As we grew sicker, the politicians here found medicine that in fact simply increased the illness.

Today in this country we are watching a spectacle, as the Washington Post said this morning, of seeing the liberals once again "Play it again, Sam." It should have been entitled, frankly, "Play it again, Jim," or "Play it again, Tip."

The fact is that this bill would not stand up under a serious interrogation at a PTA meeting in any school district in this country. It is a travesty and a joke, and there is not a single Member of the majority who could explain how we could possibly in 3 weeks or 4 weeks time have this program working. It is designed not to help the poor, but as a hoax upon every American. It is a return to the politics of the past, the politics of phony promises, false hope, and tragic conclusion.

Mr. NATCHER. Mr. Chairman, I yield such time as he may require to the gentleman from Washington (Mr. DICKS).

Mr. DICKS. Mr. Chairman, I am here today to add my support to House Joint Resolution 562, the emergency supplemental appropriation for the Labor Department, and to urge my colleagues, for the sake of this Nation and the millions of unemployed Americans that are depending on us to pull our country out of this recession, to support this measure and help put our people back to work.

I think you would be hard pressed to find many Americans today who do not feel that economic conditions in this land are bad and getting worse. I certainly heard this viewpoint repeated often while in my district these past few weeks, and I am sure you have all heard the same dismal reports from your own constituents. And why should they not feel despondent about economic conditions? How could one avoid it after hearing the latest economic statistics?

Real gross national product showed a cumulative decline of nearly 2.5 percent from the first quarter of 1981 through the first quarter of 1982.

After-tax corporate profits have fallen to their lowest level in over 5 years.

The number of business failures has increased substantially, with bankruptcies during the first half of 1982 exceeding the total in all of 1980.

Incomes in the farming sector have fallen from about $27 billion in the third quarter of 1981 to about $15 billion in the second quarter of 1982.

The economy is operating at only 71 percent of capacity. High interest rates have made the dollar artificially strong, causing a slump in exports. Though inflation is receding, interest rates are still excessive, and the prime

rate has only just begun to fall below 16 percent.

But the worst statistics of all are the record levels of unemployment that have been caused by the recession. The unemployment rate nationally has climbed from 7.2 percent in July of 1981 to 9.8 percent in July of 1982, the latter is the highest jobless rate recorded in the postwar period. This means that almost 10.8 million persons are currently jobless; 10.8 million. I think it is difficult for us to imagine exactly the magnitude of this number. It has been estimated, that if all of these unemployed persons stood in one unemployment line, it would stretch from one coast to the other, covering the whole expanse of our Nation.

Obviously, some parts of the country are in considerably worse shape than others. Overall unemployment in the Pacific Northwest is about 13 percent—and in some counties where employment is dependent on a healthy forest products and housing industry, as much as 30 percent of the work force is unemployed.

This is not a bill that will hurt our economy. To reduce our national deficit, we must put people back to work. A single percentage point increase in our national unemployment rate costs us $25 billion in lost revenues and another $5 billion in benefits paid to the unemployed.

Mr. Chairman, I can certainly appreciate the comments made by some of my colleagues that this bill does not go far enough toward solving the problem of unemployment. I agree. However, I see this bill as a measure of last resort. It is only after passage of a housing initiative that was vetoed, of export assistance that was opposed, that this job stimulus package has received consideration.

I also understand the administration is again reluctant to support this measure, feeling that the provision for extended unemployment benefits would be sufficient to solve the current problem. But, Mr. Chairman, as necessary as unemployment compensation is, there is no resulting work nor restoration of the local community; no jobs are created. It is much more beneficial to the Nation to spend money on productive jobs for the unemployed to assist in maintaining our physical assets than to spend on unemployment compensation with no production.

The additional benefit to the elements of our infrastructure are also apparent. All over the country, our streets and highways are filled with potholes, our bridges and dams are judged unsafe, our buildings and parks cry out for attention and care. There are many jobs that this country needs to have done, from tending the fisheries in the Northwest to repairing our crumbling network of highways, and millions of people eager to regain their self-esteem and perform these jobs. All they need now is our assistance, to put the two together and provide the funding to carry it through. I believe we owe it to the citizens of this Nation to pass this bill, and to do everything in our power to encourage the other body to follow suit, and to urge the President to sign it into law. We owe it to this Nation to do our utmost to help put our people back to work and set our feet solidly back on the road to economic recovery.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Oklahoma (Mr. WATKINS).

□ 1420

Mr. WATKINS. Mr. Chairman, I rise today support of House Joint Resolution 562, the urgent supplemental appropriation to permit localities to provide employment on a temporary basis to approximately 200,000 of our Nation's more than 10 million unemployed in repairing and rebuilding our deteriorating infrastructure—our roads, streets, highways, bridges, water, and sewer systems and other public facilities. Jobs would be to help the unemployed.

We cannot close our eyes to the fact that we are in the midst of our most severe economic crisis since the Great Depression of the 1930's. Our national unemployment rate is 9.8 percent for the second consecutive month and all indicators point to further deterioration in our national economy in the coming months. With each 1-percent increase in the rate of unemployment adding $25 to $30 billion to the Federal deficit, we cannot expect to come to grips with the deficit until we take steps to put our millions of unemployed back to work. This bill will make a small start in that direction.

This bill is not a budget buster. Funding for the jobs to be created is in the first budget resolution which we already have approved. The jobs provided by this measure would not be make-work types of employment. It would provide productive employment in rebuilding and repairing our seriously deteriorated infrastructure—a matter in and of itself quickly becoming one of our highest national priorities.

The funding required by this bill is less than what we have already voted in unemployment compensation funds at the President's request—an effort that created not one single job. This not only would create more than 200,000 jobs immediately. It would do much to create self-esteem among at least a few of the millions of unemployed—a job in hand instead of the humiliation of hat-in-hand looking for a handout.

Mr. Chairman, there are those who say, "If people want to work they should use their feet and move to where the jobs are." Well, we have got thousands of people moving around the country looking for jobs that simply are not there. Increasingly, such jobseekers are finding only greater frustrations and hardships. During the past 50 years more than 50 percent of the people in rural areas of the Nation have had to leave in order to look for jobs. There are two counties within my district where over 68 percent of the people left to seek employment. During the tragic exodus we experienced during the 1930's there was a book entitled, the "Grapes of Wrath," by John Steinbeck. I cannot believe that the American people wish to experience a repetition of this tragedy.

Mr. Chairman, I represent a rural district that has experienced chronic and severe unemployment most of my life. I have dedicated my public career to the creation of productive employment for that part of my home State. I know what unemployment and underemployment is all about. Only a few months ago, my home State of Oklahoma had the Nation's lowest unemployment rate. Its rate has doubled within recent months. Discussions have been underway recently about calling a special legislative session to deal with the problem of the increasing number of people who have exhausted their unemployment benefits. There are 10 counties in my congressional district above the national unemployment rate—an increase of 4 in a month. One of those counties' rates stands at 18 percent—an increase from 9.2 percent in a month. Was the domestic increase due to a massive layoff? No; there is no manufacturing job in the county. This increase in unemployment numbers were from human beings who had heard about jobs that might be available from the start up of a worker project. They had given up hope—that hope was rekindled as they went forth to sign up for the hope of a job.

We know about the problems of unemployment in rural areas, as I said. These problems are chronic and long lasting. The median income of rural workers, in normal times, is 20 percent less than that for urban workers. Since 1950, the poorest 20 percent of our Nation's counties have been rural. The incidence of poverty is much higher in rural areas than in urban areas. Two-thirds of the Nation's substandard housing is in rural America. Over 4 million rural people have inadequate sewage disposal systems or none at all, and 5 million rural households drink contaminated water. Rural areas have fewer health care specialists. They must travel further, over worse roads, to far fewer job opportunities than the people in urban areas.

Of the 3.9 million miles of road in America, 3.2 million miles are in rural

areas, with local governments—and their inadequate tax bases and taxing and financing authority—responsible for their maintenance and upkeep. Only 14.2 percent of rural highway and road mileage is rated adequate. Ninety-five percent of our rural bridges were built before 1935 and are inadequate and totally unsafe. Most of the rail system abandoned since the end of World War II has been in rural areas. We have higher infant mortality rates, more chronic illnesses and four times the number of people killed as a result of accidents than the people of urban areas, yet nonmetropolitan hospitals are generally older, less likely to be accredited and lacking in many, if not most, specialized services.

It is obvious, Mr. Chairman, that our Nation is in a crisis of increasingly severe magnitude. It is urgent that we face our responsibilities as Members of the Congress. This legislation is a best of our sensitivity and compassion of this body toward the seriousness of the problem and a recognition of the responsibility each of us holds.

If we continue on our present course without corrective action we tempt economic disaster. It is imperative that the administration join with the Congress in acting now to address the plight of the millions of unemployed, underemployed, and discouraged Americans and recognize that this problem will not solve itself. At a time when we devote so much of our energies and national resources to the affairs of other nations, it is absolutely critical that we come to grips with the problems of the American domestic economy. This bill represents only a start, but at least it is that. At the same time, it is so drafted as to provide fairness and equity to rural areas of the Nation in the distribution of the jobs to be created under its provisions. I urge its adoption and passage.

Mr. LIVINGSTON. Mr. Chairman, I yield 3 minutes to the gentlewoman from California (Ms. FIEDLER).

Ms. FIEDLER. Mr. Chairman, this is a very serious issue, the issue of jobs for Americans. It is not something that can be resolved with a simplistic answer and a sweep of the pen. Had it been that simple we would have already accomplished that task in weeks and months and years of programs.

I have spent a good deal of time trying to evaluate how we reached the stage we are at and what we can do today to begin to move forward and improve the status of life for the American people. It is clear that we have seen a shifting of the balance of payments over a period of time at a loss of a substantial number of important and permanent jobs in this country. But, that comes as a result of an industrial change that has occurred and as a result of much of the increasing Government regulation which has required increases in the prices of goods and which has put this country into a less than competitive position in world trade.

It is in those areas that we need to begin to move to make some reasonable adjustments. I have authored several bills, one of them which would deal with the Trade Act of 1974, which would permit us as a Congress to become involved in some of the policy decisions at the international level, that would permit us to take a look at the unfair balance of trade and relationships with other countries.

I have also authored another bill which would permit us to extend jobs tax credits for those Americans who have run out of unemployment benefits to permit incentives to American business to help stimulate the economy and not require a further burden on the taxpayer of this country.

I would hope that our solutions in the future would be more realistic, would be more comprehensive, and would permit us to address the real problems that are causing unemployment and not deal with it at the superficial level which this bill does.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. BIAGGI).

Mr. BIAGGI. Mr. Chairman, I have some genuine concerns about the formula which will be used to distribute 83 percent of the funds under this bill. Just a few hours ago I learned from the Department of Labor that based on computer runs which they did for certain committees—and which is based on the formula proposed in the bill—the city of New York with more than 300,000 persons unemployed would be ineligible. This is based in large part on the fact that the data used is as much as 8 months old. This is because the data is national in scope and does not accurately reflect recent regional problems.

For example—based on the data from the Department's computer run—New York City's average unemployment rate is 9.5 percent—the national average is 9.6 percent, thus New York City does not qualify. However if you used data from the most recent 3 months, June, July, and August—New York City emerges with an unemployment rate of 10.1 percent which would qualify them for funds under this bill.

My question to the chairman: Can I get some assurance from the chairman that we will insist that the Department of Labor use the most recent data available when distributing funds under this bill? If a local entity supplies the Department of Labor with more recent data than they have, would it be the intent of this legislation to allow that data to be used in awarding funds?

Mr. NATCHER. Mr. Chairman, would the gentleman yield at that point?

Mr. BIAGGI. I yield.

Mr. NATCHER. Under the provisions of this bill the Department of Labor must use the latest available figures. They are the figures that have to be used. I would assume and I would hope that the figures that are now available in New York City would be acceptable.

Mr. BIAGGI. I thank the chairman.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. ERTEL).

Mr. ERTEL. Mr. Chairman, over 700,000 men and women are out of work in Pennsylvania, and 10 million Americans are unemployed. Yet, this administration and the administration is Pennsylvania have done nothing to get these people back to work. We see little compassion, let alone leadership, at the national or State levels to remove Pennsylvanians from the unemployment lines.

In my travels around Pennsylvania I have seen and talked with thousands of men and women who want to work. They are not shirkers. They want to contribute. They want to support their families through honorable, hard work. They do not want a handout, they want a hand. This bill I am voting for today gives them that hand.

When I went through the unemployment lines in Pennsylvania, I had the occasion to come upon people who had been working extended times at the same occupation. One particular individual had worked 29 years at the same plant, and on 2 day's notice he was told he was out of work and they did not expect him to be recalled. I saw the same thing for people who worked for 18, 10, 5, 20 years—all of these people without hope.

Mr. Chairman, this supplemental appropriation is not a complete answer to our employment problems. There is no substitute for job skills training and longer range planning. We need to develop meaningful job training at both State and Federal levels. But, the hardships suffered by over 10 million unemployed Americans and their families calls for immediate assistance provided in House Joint Resolution 562.

This bill puts some of our unemployed, especially those who have exhausted their unemployment compensation, back into productive, taxpaying jobs. These are jobs with tangible benefits to our communities and the Nation; jobs to fix our deteriorating roads, to repair our decrepit bridges, restore our failing water systems, and undertake other needed public projects.

In addition, this bill will help relieve pressure on Pennsylvania's unemployment compensation debt of nearly $2 billion which is owed to the Federal Government. This debt has steadily grown over the past 4 years, but jobs created today will move Pennsylva-

nians off unemployment and slow this pressure.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois (Mr. HYDE).

Mr. HYDE. Mr. Chairman, it is interesting that we are returning to the past. A sense of deja vu overcomes us because the answer to the unemployment problem, which is serious, seems to be more public service jobs, to reinvent CETA, which was a disaster, as the answer to a very serious problem.

I would suggest there are other answers around that are more cost-effective, such as moving the export trading company bill along. It has been like pulling teeth to get that passed into law. It is now at long last in conference, but the export trading company bill is estimated by Chase Econometrics as productive of 300,000 new American jobs, and maybe as many as 640,000. These would be permanent jobs in the private sector, not tax-consuming temporary jobs in the public sector.

If this export trading bill ever could get passed through Congress and get signed into law, there would be no additional Federal expenditures and we would be brought into parity with Japan and West Germany insofar as our exports are concerned.

We have the enterprise zone initiative that the two gentlemen from New York have worked so long and so hard on. It is in a drawer somewhere gathering dust, I suppose, but to do anything but revitalize the private sector, the only ideas that we have from the majority party are to create more public service jobs that did not work before and will not work again at a cost of $1 billion.

□ 1430

Now, it is excessive Government spending; it is increasing the deficit that got us into this fix in the first place. Nobody said that the cure was painless, and taking medicine is distasteful. But the only solution is private sector jobs that generate revenues and that last and that do not consume revenues we do not have.

We do not have this $1 billion. We are going to have to print it to pay for these jobs. That is going to exacerbate inflation, the deficit, and high interest rates. That is putting leeches on a bleeding patient.

Mr. Chairman, I earnestly implore the Members to support initiatives like export trading company legislation, or the enterprise zone, and not this boondoggle that is going to make a bad situation worse.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. Mr. Chairman, addressing myself particularly to these Members on the minority side who have claimed today that this is an ill drafted bill and an ill conceived piece of legislation, I would like to remind them that just recently from their side came a 700-page bill that was drafted overnight, a bill that I thought was very ill conceived also. What we got from that was a major problem facing us, so that our unemployment line runs all the way from New York to Los Angeles and then up to Seattle, Wash. That is a mighty, mighty long line for any country anywhere in the world when we have people who want to work.

Let me tell the Members that is the greatest waste of human resources I know of anywhere. We are giving our money away in these welfare programs, programs that do not produce any taxes, not only to the Federal Government but to the local governments.

We have families piling up with one another because they no longer can get anything but welfare because no jobs can be found. In my congressional district I have places where the unemployment rate is over 30 percent.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. ALBOSTA. I will not yield. I do not have the time to yield.

Let me also say to the Members, Mr. Chairman, that what I see going on now with this bill is a program that will bring some dignity back to those families that so desperately need it.

I do not believe, when Franklin Roosevelt proposed public works projects and other projects, that he had in mind to give anything away to anyone if they did not want to work. That is what we are talking about in this bill. That is what we are talking about, a work jobs bill.

I read this article just recently, "The Decaying of America," in Newsweek magazine, which describes the decaying of America because we refuse to put people to work to repair this decay.

Mr. Chairman, during the recent congressional recess I drove through Eastern and Western Europe. Some of you might be surprised, as I was, at how well-maintained the road and bridge infrastructure was, even in Eastern Europe. Their highways and bridges, their dikes along the rivers were much better maintained than those in our own country.

Mr. Chairman, what we need is for this Congress to devise a long-term public works plan through hearings by the House Public Works and Transportation Committee on which I sit.

The American people are demanding that Congress design that long-term plan, bringing together efforts of the local, State, and Federal Governments plus the private sector—both labor and management—to accomplish that goal.

The measure before us, House Joint Resolution 562, is only a short-term stopgap solution, as has been pointed out today. But, that does not mean we should not take this vital first step now.

The infrastructure of our country cannot wait any longer. We can no longer afford or suffer with this huge waste of human resources.

Mr. Chairman, many of the Members here today have argued that we must help the private sector put people to work. I agree, but I ask you: How is the private sector going to use our transportation system—our highways, bridges, railroads, and mass transit—when those are crumbling? How is the private sector going to safely dispose of its waste or even get adequate water supplies when our water and sewage systems are breaking down? How is the private sector going to export or import their goods and compete in world markets when our ports are old and deteriorating?

If there is any doubt that the people back home are ready to begin such a program as we have offered here today, let me tell you that they are ready and eager. Public works officials in various parts of the country have been contacted and asked if there was work to do and the means to get the jobs done and I am told the answer is a firm yes. So I say that we pass this bill, get our people working, and start rebuilding our crumbling infrastructure. That is the path to economic recovery.

Mr. Chairman, there is an immediate need for these improvements to our public works infrastructure. At the same time, we have an enormous idle work force. This idle work force is a drain on both the Federal Treasury and the country's morale. It is a waste of our national resources to pay unemployment benefits without any return to those people who are willing and able to work. House Joint Resolution 562 has a price tag of $1 billion. However, actual outlays, due to the substitution of jobs for Federal benefit payments, will be considerably less.

Let us not forget that 50 percent of the money allocated in this bill will go to persons currently receiving extended or supplemental unemployment benefits. This will reduce the cost of the unemployment program by substituting jobs for benefits. Another 25 percent of the money allocated will go to AFDC recipients. We are talking about taking people off the public assistance roles and putting them to work, giving them the chance to regain their dignity.

Mr. Chairman, I urge my colleagues to join me in supporting this bill. Congress can no longer do nothing while the jobless rate continues to climb. We need to act and to act now.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan (Mr. SILJANDER).

Mr. SILJANDER. Mr. Chairman, we ought to analyze this carefully. What will this jobs bill do for Americans? What will it do for the people we represent back home?

We have heard an extraordinary amount of rhetoric about this jobs bill, that it is going to be a panacea for our country. Let me ask the Members a couple of questions, if I may.

Can a 6-month jobs bill really heal the unemployment problem? We have heard that today on this floor.

Can a 6-month jobs bill truly repair all the roads and damaged bridges in America? We have heard that on this floor today.

Can a 6-month jobs bill build new cars and build homes in this country? We have heard that rhetoric as well.

I would ask the Members of this Congress: Can the jobs bill we are now considering really reduce interest rates when we are spending an additional $1,280 million?

I believe that what this bill will do is create a great political plum for many Members of Congress running for reelection this November, and it is no coincidence that this bill's promulgation date will be 1 to 2 weeks before the November election. How convenient that is for those of us who need to seek reelection.

This bill is playing a political game with the unemployed in this country, and it is sad that we would do this to those people: playing with their emotions, playing with the emotions of the desperate who are looking for work.

A leader in this Congress said today—and I quote—"Nothing has come forward yet as an alternative." Yet, he himself is a cosponsor of one of the major housing initiative and auto initiative private sector jobs bills yet introduced in the history of this country.

Mr. CONYERS. Mr. Chairman, will my colleague, the gentleman from Michigan, yield?

Mr. SILJANDER. I will yield in 1 minute.

However, the other side of this aisle decided yesterday in the Housing and Urban Development bill to block an attempt to amend that bill with a similar housing concept that would bring together a bipartisan and bi-ideological approach. It is a simple concept that has been criticized as being in fact too simple. It would allow public and private pension funds at their option to purchase a $10 billion bond. This bond would then be distributed to each State based on two simple criteria—unemployment and population. That money would then be used for 12-percent auto and housing loans to the American people.

What would this bill do in contrast to this $1 billion jobs bill we are talking about now? First, it would create 2 million jobs for Americans, long-term, permanent jobs rather than 200,000 part-time jobs for 6 months.

It also would create more training and utilize skill development rather than disallowing this, as the present 6-month jobs bill would propose. It would reduce the deficit by putting 2 million people back to work by an estimated $55 billion. The jobs bill would cost the taxpayers an additional $1,280,000,000.

We have been desperately looking in this Congress for ways to reduce the budget deficit, and I believe we have found a way in this jobs bill. We now need a private sector incentive.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. SILJANDER) has expired.

Mr. CONTE. Mr. Speaker, I yield 30 additional seconds to the gentleman from Michigan (Mr. SILJANDER).

Mr. SILJANDER. Mr. Chairman, I thank the gentleman from Massachusetts (Mr. CONTE).

Mr. Chairman, what we need in this country and what we need in this Congress is a private sector incentive, not more of the old—the deja vu, as one of our colleagues alluded to. We have seen the philosophy of the Keynesian economic system plummet American into economic chaos. What we need now is a private sector initiative.

Mr. Chairman, we need to help the 10 million people who are unemployed with something more, with something stable, something permanent, something consistent, something that will keep training Americans, and something that we can support on both sides of this aisle.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. GARCIA).

Mr. GARCIA. Mr. Chairman, I have heard a couple of speakers say that we are returning to the past. It is obvious that we really have no choice, because the past 2 years have been a disaster for those persons in America who want to work.

I would like to respond to my colleague, the gentleman from Illinois, if I may, for one quick second. He said that I am a sponsor of the enterprise zones bill, and I have been. But I would hope that nobody in this Chamber, including the President in the speech that he made last night at a political rally, thinks for one moment that the enterprise zones are going to be a cure-all for America. It was never meant to be. It was a small component, a very small component in 1980, when I introduced that bill with my colleague, the gentleman from New York, Mr. JACK KEMP.

This bill by no stretch of the imagination is a panacea, and I would hope that the President gets the message.

Mr. Chairman, I would hope that the enterprise zones, as it pertains to this body, can still work. I believe it is important, but it is in no measure going to be the cure-all for urban America and for putting America back to work.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. SOLOMON).

Mr. SOLOMON. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I do not rise to speak on the merits of this legislation because it has none, and I think that was very much dramatized when the Speaker of this House, for whom I have a great deal of respect, chose to personally attack our minority leader by facetiously suggesting that this bill would build four new bridges in Peoria.

Let me tell the Members what this bill does not do. It does not put people back to work at International Harvester, Caterpillar Tractor, or in the automobile industry, the housing industry, or the construction industry. What it does is fuel inflation. What it does is drive interest rates up higher.

Last weekend I was talking to a farmer in my district, and he said, "Jerry, if you want to put all those people back to work that I just mentioned, you get those interest rates down. I want to buy a Caterpillar tractor. I need a pickup truck. I can't afford to buy them. And I am speaking for a lot of other people in this country."

So we can go ahead and enact quick fixes for this country, and that farmer will continue not to buy and put even more people out of work.

□ 1440

The real reason I rose, Mr. Chairman, was to alert the Membership that I will be asking unanimous consent at the end of this debate to offer an amendment, since there is a possibility that this bill may possibly pass.

My amendment would cut off all jobs under this legislation to anyone who is in violation of the Registration for the Draft Act, and as you know, this amendment has passed overwhelmingly in the past.

I know many Members want to go home early and I will not debate the issue, but I will be seeking recognition to ask unanimous consent to offer that amendment. I am sure it will be graciously accepted.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentleman from Indiana (Mr. FITHIAN).

Mr. FITHIAN. Mr. Chairman, it is with great satisfaction that I stand in the well of this House today fighting for a piece of legislation that finally addresses the overwhelming problem that America and the American worker is faced with, unemployment. While we have had great debate on the floor of this House over such important matters as budget cuts, urgent

appropriations, and the largest tax increase in peacetime history. Up until this legislation this body has not taken a positive and progressive initiative to get America working again.

The Republican administration has shown no concern other than political rhetoric over the near record high rate of unemployment. They clearly have no jobs strategy. They have convinced themselves that unemployment is a necessary side effect of their overall goals and seem to feel it is acceptable that over 8 million Americans are out of work. Their Republican bankrupt economic policies are crumbling around them due in part to the out of work American.

This Republican administration's "neo-Hoover" economic ideology is based on the theory that making the rich richer will "trickle down" and make the working middle and lower class American better off. This clearly is a blatant show of neglect to the working American.

My home State of Indiana has lost 86,000 jobs since this second coming of the Hoover Republican economic policies. While this administration may have convinced themselves that unemployment is a "necessary and unfortunate side effect" of economic recovery, I would doubt the unemployed worker who is struggling to feed, clothe, and shelter his family would consider this merely an "unfortunate side effect" which will lead him to prosperity.

It has always been my belief that a job is the best social program ever devised. The unemployed Hoosier wants to work, and through no fault of his own, he has been laid off from his job. He has fallen victim to the self-centered policies of an administration of the wealthy, for the wealthy, and by the wealthy.

This administration pushed their policies through Congress under the guise of budget savings and Government efficiency. It is my understanding, however, that they oppose this legislation, which not only puts Americans back to work—which the committee report clearly shows is more efficient than paying unemployment compensation—it also provides a much needed repair and rehabilitation of public facilities.

The State of Indiana will benefit greatly by this legislation. It would put as many as 8,600 Hoosiers back to work again in a State that currently ranks fourth in the Nation in unemployment. It will also assist the monetarily strapped Indiana economy work toward a solution to a very serious problem. Indiana ranks in the top five States in the percentage of substandard bridges. Two-thirds of Indiana's 17,525 bridges are rated inadequate and potentially unsafe for today's traffic demands.

The Democratic leadership is to be commended for reviving the F. D. R. Democratic ideals of emphasizing the rile of the working American in getting this economy back on the right track. This resolution is a far cry from the initiatives needed to counter the damage that has been done to the working American by the bankrupt Republican policies. It will, however, have a positive effect on society by allowing the worker in Indiana and throughout the country to go back to work and earn the money needed to feed his family, while addressing the escalating problem of deteriorating public facilities with no draw on the already hurting State budget.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. I thank the gentleman for yielding.

I rise in opposition to this bill and in opposition to the Republican substitute.

Mr. Chairman, we have heard a lot of people talk about jobs here today and I would like to know if there is anybody in the House who is against jobs. So far as I know I have never met that person.

What I have not heard discussed here today is why we do not have jobs. Why do we have a recession? Is this the 1930's type recession where people are out of jobs because there has been a collapse in spending power where government can come in and pump new jobs into the private sector by spending money?

I think the facts fly in the face of that assertion. We have unemployment because in June of last year, 4 months before any budget cut or any tax cut took effect, the cumulative impact of high interest rates collapsed the automobile industry, collapsed the homebuilding industry and sent the economy into a tailspin.

In June of last year the average American family saved only 4.5 cents out of every dollar of after-tax income. Why? Because for the previous 15 years every time they saved money they found themselves losing ground because prices were rising and the interest rates they earned at the bank or the savings and loan were lower than the inflation rates.

Government in June of last year borrowed 55 cents out of every dollar being borrowed, creating massive competition for savings and causing high interest rates.

We are called on today to spend $1 billion to create jobs. What a worthy goal. I wish we had the $1 billion. But unfortunately we do not have $1 billion. We are going to have to go out and borrow that $1 billion. We are going to have to take that $1 billion away from the private capital market, from people who want to build new homes, build new farms, build new factories, create permanent new jobs in the private sector of the economy.

We are going to destroy a private, permanent, producing job for every public, nonproductive, make-work job we create here today.

Mr. Chairman, this is a return to the very programs that we are trying to eliminate. This is a great leap backward to the policies of the 1960's and the 1970's that have brought us to this sorry state.

If you want real jobs in the private sector vote to cut something. When we vote on the appropriations bill, which will be voted on after this bill is disposed of, if you want to create jobs vote against it because it is over budget.

If you want to create jobs, try to put the Federal Government on a budget so that we can continue to bring inflation down to encourage people to save, so money can be borrowed at interest rates business people can afford to pay.

That is the path to recovery. This bill is a path to a new inflation, to new high interest rates and to a new a recession at higher rates of unemployment than in the past.

This is a poor choice. This is a poor program and I urge my colleagues to vote no.

Even the Republican plan which seeks to take money out of synfuels is flawed because that money is not going to be spent in synfuels.

I urge a no vote on the bill whether on not the Republican substitute passes and I thank my colleague for yielding.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. I thank the chairman for yielding this time and for his work on this measure.

As I understand it, this is an emergency bill. Sometimes I wonder if we in this Chamber any longer have the ability to judge what an emergency is. We do have what many Democrats think is an emergency.

We have 3 million people who have lost their jobs since Ronald Reagan took office. There are 11 million people, nearly, out of work and only two-fifths of those people are receiving any benefits.

We keep hearing from that side of the aisle about how we are only creating 200,000 jobs. Only 200,000 jobs. What a fantasy land we live in when we are not prepared to take some action to put people to work, not on leaf-raking, unproductive jobs, but building things that we need.

I think that the excuses over there really do not fly. You say you have other proposals, you have other bills. We are not going to pass other bills.

This is your chance. You can call it partisan, you can call it simplistic. But it is your only chance to vote for jobs in this session.

Mr. Chairman, I fully recognize that there are some Members of this body who simply cannot accept the notion that the Federal Government has a role in controlling unemployment. It is an article of faith among some Members. They apparently believe that if they vote for a job-creation measure, some monstrous bolt of lightning from an Adam Smith-in-the-sky is going to strike them dead on the spot.

They will argue that, simply because its autumn, any employment bill we pass can be pawned off as a "leaf raking" jobs bill. Members who want to take that posture can surely do so.

But the American people are asking this body one simple question: What are we waiting for?

This legislation does not envision a quick fix. There is no quick fix available when the Interstate Highway System is deteriorating at a rate of 2,000 a year.

There is no quick fix when 1 out of every 5 bridges in the United States requires either major rehabilitation or reconstruction, with the cost of repair, according to the U.S. Department of Transportation running as high as $33 billion.

There is no quick fix when the major 756 urban areas now need between $75 and $110 billion to maintain their water systems.

I would ask again: What are we waiting for?

There are some among us who would like to believe that the private sector is going to step in and take care of this problem for us. That is an illusion. Business investment for the second quarter of 1982 ran at a negative 9.2 percent. If the business community, after the generous tax reduction we passed last year, cannot increase investment in the plant and machinery it needs, we simply cannot expect business to invest in areas where Government is responsible.

If we do not repair the bridges, the ports, the railroads, and the water systems in this country now, when are we going to do it?

Some will argue that we cannot afford this now—when should we put people back to work, if now is not the time? There are over 10 million people in this country looking for jobs.

Now, is the right time to begin making these kinds of exepnditures. The longer we wait, the more burdensome the investment will become.

This very morning, if you looked in the mail, you will find a GAO report titled: "Runways at Small Airports Are Deteriorating Because of Deferred Maintenance: Action Is Needed by FAA and the Congress."

In June 1982, CBO issued a report saying:

> Massive repairs are needed (for the Interstate Highway System) that are projected to cost about $16 billion between calendar years 1980 and 1990.

During the debate on the urgent supplemental, our distinguished minority whip, Mr. LOTT, said something to the effect of "this is a supplemental bill * * * we can wait until March, next year."

Let me suggest that it would be irresponsible to wait any longer. We have waited for the Senate to act since June on the bill I drafted with Mr. SEIBERLING to create conservative corps jobs. We have waited for 20 months for the Reagan recovery to begin. We have waited while an additional 3 million Americans have lost their jobs.

We cannot wait any longer.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Chairman, the gap between the rich and the working people of this country is widening. The excessive tax cuts which were tauted as the remedy for our economy have only produced more dividends for the wealthy, but not the expansion of our workforce, which was promised.

More than 11 million workers are without a job. For many, this is the first time in 20 years, or more, that they are without work and unable to earn an income to support their families.

The expressions on their faces, as they wait in growing lines to collect unemployment compensation checks tell the sad story of the failed economic program which is plaguing our Nation.

This year's $20 billion in unemployment compensation being paid to willing workers who have been left without jobs is not producing any real long-term benefits for the people or for the country. The working man and woman in America is not looking for compensation—the American worker wants a job—a productive job which will benefit the country and which will benefit the local communities of this great land.

This urgent supplemental appropriations for jobs will not provide an absolute and final solution to America's economic crisis, but it will provide a beginning to revitalizing America's 11 million out-of-work force.

The 200,000 jobs this appropriation will provide will put people back to work revitalizing this Nation's deteriorating public infrastructure. For these people, this public works program will provide their only opportunity to work in more than a year. For most of these workers, their regular and extended unemployment benefits have been exhausted and this is their last hope. This Nation owes them an opportunity to work. And just as important, the jobs they will be doing are vitally important to the continued well-being of our cities, counties, and States.

Today, throughout our land, our infrastructure is suffering from years of neglect. More than one-quarter million of our highway bridges have been declared deficient or obsolete, half of our roads are in desperate need of repair, and many of our largest cities have water systems which have become deteriorated and waste millions of gallons a day of clean water—one of our most previous resources.

Rural and metropolitan areas in every section of the United States have immediate needs for repairs to city buildings, streets, and sewers, schools, and many other worthy projects. And their need for workers to perform the necessary jobs could be met through the workers who would be made available through the passage of this bill.

This Nation's investments in its public projects has fallen in the last two decades, which is one of the chief reasons we now face deteriorating transportation network and public facilities. In 1965 the United States spent nearly $34 billion on public capital investment but in 1980 that figure had fallen to $24 billion—a 30-percent decline.

We have gone from investing 3.6 percent of our gross national product in our public capital projects to less than 1.7 percent—a 54-percent decline.

Public works projects are necessary, beneficial and productive investments in our country. They have made it possible for us to build a modern, comfortable society in which industries can expand, schools can improve, hospitals can provide better health care and commerce can move efficiently and economically.

Now this bill represents a dual opportunity for the Congress to help this country. Through its passage we will be able to tell the people of this country that we will begin revitalizing the public works projects of this country and we will begin putting American workers back to work.

President Franklin Roosevelt led this country out of a depression by showing confidence in the American worker and pride in the Nation's roads, public buildings, parks, water systems, and other necessary facilities. We have no option—the work must be done in order for our cities and States to continue providing essential services. And the unemployed workers of this country must be able to work and again earn needed income to support their families. This bill is wise and needed legislation. I urge your support of House Joint Resolution 562.

□ 1450

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Chairman, just a few weeks ago on the floor of the House we were considering the jobs training bill, which passed with a large margin of votes. We are not in

conference, working out the differences between our version and the version of the other body. The reason we are working on the jobs training bill at this time and must complete our work so that we can get the conference report to the President before the end of this month is that the CETA program's authority is expiring.

CETA contained, among other things, a public service employment component. It is interesting to note, the one thing that we did not recreate in either the House bill or the Senate bill was public service employment. There is a good reason for that. It was an acknowledged failure. Over the course of the years public service employment caused more scandals, wasted more money, and failed worse than any other program in this area.

Having really made that judgment just a few short weeks ago, that public service employment did not work, we now have on the floor something which at best recreates public service employment and at worst is a program really without guidelines which may take months or years to get off the ground.

I hear people supporting this bill saying that we are going to build bridges, there are a lot of bridges that have been declared obsolete. How in the world are you going to take unskilled labor, working for a maximum of 6 months, and draw plans for the construction of bridges, get all of the necessary permits, procure the material, and then put this unskilled labor to erecting bridges, something that they have never done before in their lives? This is patently ridiculous.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Massachusetts.

Mr. CONTE. Does the gentleman think that the heavy construction workers' union for 1 minute would allow that to happen?

Mr. ERLENBORN. I will guarantee you if this bill passes there will not be one bridge built with the money from this bill.

Mr. CONTE. I am surprised at some of these union busters.

Mr. ERLENBORN. Let me say that the prescription of this bill is something that our Democratic friends have believed in for many years. It is a simple home remedy. They are taking a warm, green poultice of money and applying it to the ills of society, in the hope that this money, thrown at the ills, will cure them. It has never worked before, and it will not work with this bill. I hope it is defeated.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. ROYBAL).

Mr. ROYBAL. Mr. Chairman, a great deal has been said that the bill before us is not perfect, that it is not designed to solve problems, and that there are other answers.

Well, I think that we can stipulate to the fact that this bill is not perfect. But then I ask myself: What do we do in this House that is?

We can also stipulate to the fact that this bill is not designed to solve problems, but, I don't remember the last time we solved all problems in one piece of legislation.

We are told also that there are other answers, and there may be, but the truth of the matter is that we only have one piece of legislation before us, and that is the committee bill. All of the other answers to the unemployment problem that you may have are not before the House at this time.

This is a bill that is designed to give employment for 6 months to those individuals whose unemployment compensation, has been exhausted.

It is not a bill that is designed to build bridges, or roads or any other heavy construction project. This is a bill designed to provide a means by which public facilties can be rehabilitated and repaired. To provide 6 months employment to a very few of the too many out of work.

Just last Sunday I went to a parade in my district where thousands of people attended. It was not the joyous parade of yesteryear. It was a parade of sadness, for there were people there who were hollering out to me and to those public officials riding in the parades, "We want jobs. We want jobs."

The truth of the matter is that there are more than 11 million people unemployed in this Nation. More than 6 million of them are people whose unemployment compensation has been exhausted. These are people who do not want to go back to the soup lines that existed in yesteryears. They want to be able to work, stay out of public welfare and feed their families.

This again is not a perfect bill. But it is an answer to the outcry of the American unemployed who want something other than the Dole. They want work. We must pass this bill and after we do so we can take all of those other ideas that you talk about with regard to unemployment and permanent jobs and put them together into one package so that the Congress can address itself to this problem in the very near future.

Mr. CONTE. Mr. Chairman, I yield 6½ minutes to the minority leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Chairman, this resolution before us is a one-way ticket down memory lane. It is a nostalgic effort to play once again the golden oldies of the Carter years when we did have 21 percent interest rates, double-digit inflation and over 8 million unemployed, all at the same time.

Yes, Mr. Chairman, just like old times. After 2 years of enforced economic sobriety, the Democratic leadership wants to go on a binge again, drinking from the same old bottle of economic moonshine labelled "Old Budget-Buster."

This a jobs bill is an example of misleading advertising. This is not a jobs bill. It is not even one of your dramatic make-work bills. It is a fake-work bill. There is one good reason to vote for a fake-work bill, but there are 10 good reasons not to. The one reason to vote for it is simple. It will deceive, deflect and defang a lot of unsuspecting unemployed working Americans who want their Congressman to do something about their plight, and they do not care what. It is a great way to flimflam your way through the election.

There are 10 reasons to vote against this fake-work bill. Let me tick them off to you, if I might. The bill will not cost $1 billion, but $1.2 billion by the time you pay the 6 months of additional unemployment. It will not create 200,000 jobs and probably not even 175,000 jobs. If it becomes law the bill will not create a single job for at least 3 months and probably longer. There are no provisions for training, trainors or equipment to train. Someone unemployed for as little as 2 weeks can grab one of these free paychecks. Someone can quit a job and take one of these. This bill brings CETA back from the grave with all of its graft, corruption, waste, and abuse. Should I repeat some of those horror stories like the guy who made $500,000 profit managing one jobs program?

Well, I will tell you, the bill just adds to the deficit. Some of this money is going to be dumped into areas where there is no unemployment problem, just so that we can make everybody happy. That is the same old discredited kind of stuff that the people voted against in 1980, and here you come again, as was said in the course of the rule—the gentleman from Arizona (Mr. RHODES), I think it was—"Can't you on the Democratic side come up with something more modern, up to times, up to beat, instead of just rehashing that old discredited programs?"

Well, there is nothing to prevent one Member of a two-earner family from getting one of these jobs and the unemployment benefits that go along with them.

Bad weather States may not be able to take advantage of the program until late spring or early summer. The jobs may be gone by then, but that is where most of the high unemployment is.

In the 1974–75 recession, the Congress went on a spending spree, pretending to pull the country out of it. We spent $31 billion, but $23 billion of that $31 billion did not get spent until after 1977, after the recession was long gone. Go back and reread your history

on what we did after the fact and then what it all did to contribute to higher and higher inflation. Take a look at the history book. That has been the terrible deceit of political solutions to economic problems. It is like the movies we see these days, the sequel of an earlier version. From 1977-80, we had "The Jimmy Carter Story," an economic flop all across the country. And now we have "Jimmy Carter II: the Vengeance of CETA."

A few weeks ago, the Speaker thought he would have a little fun at my expense. Taking the floor, he looked over to where I was sitting and said, "I wonder how things are in Peoria this morning," if I quote the Speaker correctly. And again today, making specific reference to my own district. I will have the Speaker know, incidentally, in checking on those four bridge projects, each one of them is scheduled for rehabilitation as part of Peoria County's short range plan. These are all State and county funded repair projects.

There is a serious unemployment problem in Peoria, Mr. Chairman, if that is the answer you were seeking, there it is.

But it is nothing for the Democratic leadership to gloat about. The economy of Peoria may be sick but the unemployed back there know your brand of inflationary snake oil will not cure it. They know what produced these problems and they know what it will take to solve them, real work, not fake work.

□ 1500

There is not one thing going to be done by this bill here. As the gentleman from Massachusetts (Mr. CONTE) said, we have to break and bust all union rules, all OSHA requirements while they are painting bridges out our way; but I tell the Members, they are not doing it with inexperienced people. We had one of the most bitter union controversies out there of a contractor trying to use nonunion workers as against those who were organized for a really highly technical bridge painting job, high above the water and all the rest. I do not know what we are talking about in this measure.

Mr. HAGEDORN. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Minnesota.

Mr. HAGEDORN. Mr. Chairman, I want to compliment our distinguished minority leader on his comments. Back in 1976 and 1977 this Congress appropriated $6 billion for public works projects. I read an article just a few months ago that at the beginning of this year, there were still between $600 and $700 million that had not been used in 6 years.

In addition, I checked today. There are still well over $100 million that have been authorized but not outlaid here now 5½ and 6 years later.

The point is that under this program, surely there are not going to be 100,000 bridges rehabilitated. I doubt there will be one bridge rehabilitated. There will not be millions of potholes filled. There probably will not be any filled.

The point of the matter is there will be little done. These will be very insignificant jobs in our society. We tried to amend Davis-Bacon and cut the cost of public construction and rehabilitation projects, and we have been thwarted on every attempt. This today is not the panacea that the people have demagogued about.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, when the Speaker addressed us this morning concerning his complaint about the bridges in the gentleman's district, that was all phony; is that correct?

Mr. MICHEL. It was about the same kind of flimflam as is being foisted on us with this proposition.

Mr. ROUSSELOT. In other words, it was more pure unadulterated bunk about what this bill will do?

Mr. MICHEL. The gentleman describes it pretty well.

Mr. NATCHER. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan (Mr. CONYERS).

Mr. CONYERS. Mr. Chairman, I do not know if my colleague, the gentleman from Michigan (Mr. SILJANDER) is here, but the gentleman was going to yield to me, and he ran out of time, understandably.

Michigan—I say to the gentleman (Mr. SILJANDER)—could get $80 million and put 1.8 percent of its unemployed back to work for a few months. So for all of my Republican colleagues who are thinking about voting for this measure after the phoney substitute is dispensed with, I would just want to say I thank them on behalf of the 12,000 Michigan workers who might get 6 months—who might get 6 months of work that would be 1.8 or 1.9 percent of the total 637,000 people who are officially not working in Michigan.

Thanks a lot; we deeply appreciate it. We know that the Members have more long-range substantive solutions to this problem, but the question is what are we going to do this term?

I would like to accompany any Michigan Congressman to a debate anywhere in our State who can find a rationale to object to this pitiable billion dollars' worth of jobs for 6 months.

The disgrace about the legislation in the Congress is that it is so darned small.

If I have some more time, I would just like to point out that what we are doing is something I would like to commend the Speaker for. I could not figure out why we would take something so ridiculously small and sell it to the American people; but now I know. There actually are Members in the Congress in September 1982 who are going to go and campaign on why they would not support this bill. Fantastic. I will be there with the Members. I guarantee that.

This is so incredibly insulting to 11 million people without work. That is the official record. The real unemployment figure is 14 million, and in this bill we are dealing for 6 months with 1 percent of the unemployed work force, and here it is being made a mockery of. Foreclosures in Michigan are at a record high. Workers who have never been unemployed in their life are now losing their jobs and their cars, and we are making jokes about a billion dollar bill, that it will not work, it will not build a bridge, it will break union contracts.

I want to tell the Members something: Please come to my State and find out what the 637,000 people would like to tell those Members who choose to vote against this bill.

We need many, many times the amount in the bill to put all the workers in Michigan back to work for 6 months.

Mr. Chairman, House Joint Resolution 562 to appropriate roughly $1 billion for public works jobs for the unemployed—some 203,000 temporary jobs—ought not to be a matter of contention in this body today. It bewilders me to find, however, that this bill has opposition, especially since the bill appropriates money for useful jobs that would otherwise be spent on unemployment compensation.

I am further dismayed that some of my colleagues could possibly object to the type of jobs the bill would fund—public works jobs to repair and rehabilitate public facilities; clean up and improve the condition of public lands; repair roads, ports, and water and sewage systems.

I would like to remind my colleagues of the staggering deficit in the Nation's physical infrastructure, according to a study done a year ago by the Council of State Planning Agencies entitled, "America In Ruins," the study reports that the task of rebuilding the public infrastructure is of such magnitude that nothing short of a national, Federal effort can succeed. This bill is a small effort in that direction.

Let me give you a few examples, according to that report, of the extent of the lagging public works effort to arrest the decay of our infrastructure: 20 percent or 8,000 miles of the Interstate Highway System must be rebuilt; 45 percent of the Nation's bridges are

structurally unsound; one-third of the 9,000 dams in highly populated areas are unsafe; and water and sewage systems in both rural and urban areas are in terrible shape, and some 756 urban areas over the next 20 years will have to spend an estimated $110 billion to maintain their systems.

Some colleagues may argue that temporary jobs are not needed; permanent ones are. I say to them: Find the permanent jobs. Until those are found, what else is there other than idled workers?

If the officially unemployed are added to the involuntarily underemployed as well as discouraged workers—jobseekers who simply have given up out of frustration—we would probably find about 15 million unemployed today. Is there a need for jobs, any type of jobs that are useful? Of course, there is. And the American people know that.

The bill before us is just a drop in the bucket. At least it will provide some jobs, something the administration has difficulty doing.

I urge a strong vote for House Joint Resolution 562.

The CHAIRMAN. The gentleman from Massachusetts (Mr. CONTE) has 5 minutes remaining, and the gentleman from Kentucky (Mr. NATCHER) has 8 minutes remaining.

Mr. NATCHER. Mr. Chairman, I yield 4 minutes to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, we have been here most of this afternoon hearing pious incantations from the other side of the aisle about the economic recovery that is expected to come and complaints that the money is too little, or that the jobs to be created are not enough, or that it is not going to do the whole job; yet, they offer nothing in return.

They have a program that is a hoax in itself, and we have heard the term "hoax" used on that side of the aisle. We will discuss their substitute in a few more minutes.

The gentleman from Massachusetts (Mr. CONTE) earlier said there is not a bucket of asphalt in this bill, and the gentleman is right. The gentleman would have criticized us if we had put a bucket of asphalt or a pound of concrete in the bill.

I checked with the American Association of State Highway and Transportation Officials. States, as a matter of routine, keep road maintenance materials on hand in their highway departments and counties do the same. Those reserves of materials are at an all-time high among the States, because the highway program has been cut back. I am not pointing fingers of blame. I am laying facts out.

This program is not to be done 100 percent by the Federal Government. The States have a role to play, and county highway departments have a role to play, and they have the materials, and the materials are available.

Yes, they should contribute and participate, and they will, because those materials are stockpiled at an all-time high with the county departments.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Massachusetts.

Mr. CONTE. I thank the gentleman for yielding.

What I said, if the gentleman was here, is there is not a bucket of cement or asphalt or steel in this bill to repair or build the bridges. I said I was for the old Wright bill and spoke for it when my party was against the Wright bill, that did build bridges, did build buildings, and that is the kind of bill I think I had a colloquy with the gentlemen before my committee about. That is the kind of bill I think we ought to be supporting today.

Mr. OBERSTAR. I just do not want the impression to be left that the bill will create jobs for which there are no materials and which cannot, therefore, be undertaken, because, in fact, this is to be a partnership with State and local governments; and they do have materials available.

We heard the minority leader talk about moonshine. I want to tell the Members, I think there are some of those on the other side of the aisle who have been taking the moonshine if they think this administration's economic recovery program has been working in the last year and a half. Why is this bill needed?

Let me give the Members a few reasons why this jobs program is needed. In northeastern Minnesota—which provides 70 percent of the iron ore for the Nation's steel industry—Reserve Mining Co., 2,100 workers laid off; Erie Mining Co., 1,650 employees laid off; Butler Taconite Co., 380 employees laid off; National Steel Pellet Co., 1,100 laid off; Inland Steel, 200 employees laid off; United States Steel's Minntac operations, 3,800 employees laid off; Hibbing Taconite, 1,240 employees laid off; Eveleth Mines, 130 workers laid off, a large percentage of that company's work force.

□ 1510

Nearly all the iron ore miners in northeastern Minnesota are laid off. There is 90-percent unemployment among taconite production workers, 85-percent unemployment in the building trades, and the State of Minnesota responded. They did a jobs program very similar to the one that we have before us today. They appropriated $10 million from the future economic development fund that was set aside for the year 2000, but the year 2000 is here now.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. NATCHER. Mr. Chairman, I yield the balance of the time of this side, 4 minutes, to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. I thank the gentleman.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield.

Mr. WALKER. Mr. Chairman, I have been trying to find out all afternoon just exactly how many people are going to be put to work in districts. The gentleman seems to have some pretty good figures there. Can the gentleman tell me how many people are going to be put to work in the district of the gentleman by the bill that the gentleman is speaking in favor of?

Mr. OBERSTAR. We do not have a precise formula. The gentleman understands that. The gentleman knows very well there is no precise formula.

Mr. WALKER. Well, we have a precise formula here that we are supposed to be discussing.

Mr. OBERSTAR. We can give the gentleman some estimates. We will do that later on.

Mr. WALKER. In other words, the gentleman does not want to do it now?

Mr. OBERSTAR. I want to point out that the State of Minnesota with its $10 million created a jobs program and of those 13,000 unemployed miners 9,000 of them signed up for jobs.

We have heard complaints from people that, oh, how are you going to get a trained craftsman and a trained steelworker to take a job under the conditions of this bill? Well, they are out there. They are lined up.

We have got 3,500 people working in northeastern Minnesota right now under that jobs bill and they are happy to have the jobs. You bet they are. They will take the jobs created under this bill, too.

Mr. ALBOSTA. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. Yes, I yield to the gentleman.

Mr. ALBOSTA. Mr. Chairman, I think it would be the wrong conception here to think that this was a long-term solution to our problem.

I think what this Congress ought to be doing, and I think the gentleman from Minnesota would agree with me and so would the chairman of the Public Works Committee and the Labor Committee and the Appropriations Committee; what we ought to do, as our first tasks during the next session of this Congress would be to put together a long-term plan for this country for public works.

Just recently on a trip to Europe, I have seen the way they were keeping up their infrastructure. Their highways are better than ours. Their bridges are better than ours. Their dams and their dikes along the rivers are better kept than ours.

I think it is time we made some changes. I certainly think we should in the Public Works Committee come up with some logical plan for the long term.

Mr. OBERSTAR. I thank the gentleman for his contribution. Time is running short.

There are so many holes in the arguments made on the other side that it is impossible to plug them all, but I do want to address some the points that have been raised on the other side.

Now, how can this program be put into effect, they ask? Yes, it can. It requires that the money be allocated within 30 days.

Can that be done? If this administration is willing to put people to work, if you are willing to go to bat and make the administrative machinery work, it can be done.

In the summer of 1980 under the public works impact program of the Economic Development Administration, a program to create summer jobs was announced on July 1; applications were submitted to EDA by July 9; projects were approved by July 16 and the work was essentially completed by October 15.

You bet it can be done. It can be done if you have the will, if your administration will direct that Labor Department to put people to work; but you are hiding behind a hoax over there. You do not want to put people to work. Jobs are serious business.

Mr. KEMP. Mr. Chairman, will the gentleman stop pointing and answer some serious questions?

Mr. OBERSTAR. Yes, I yield to the gentleman from New York.

Mr. KEMP. There were 8 million people unemployed when the gentleman in the well was with President Carter down at the White House and I never heard one speech from the gentleman about jobs. He did not say anything to Jimmy Carter about jobs.

Mr. OBERSTAR. We were putting people to work. We were voting our jobs program to put people to work. We did put people to work and now we come here with a program for 200,000 jobs, your side says it is too little and it will not work and they do not want to do it, because they do not want to work for a program their President is opposed to. That is why.

We have a program that will put people to work. We have people who want to work and there is a job to be done out there.

From the U.S. Conference of Mayors, a sample of urban—my goodness, they are all excited over there. Maybe they will vote for it, too.

Mr. Chairman, I just want to cite the work that can be done and is needed to be done for example in Detroit, Mich.: sewer system rehabilitation, water system rehabilitation, public works side rock repair, street resurfacing, alley repair.

No, these are not permanent jobs. There is all kinds of work to be done, but we did not come here with a long-term jobs program. We came here with a need facing this country of 13 million Americans out of work and we say put 200,000 of them to work.

Vote for it. Do not talk against it.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, when the talk is about jobs, no State listens better than Ohio. More than most States, even more than most States in the industrial Midwest, Ohio has suffered from the unemployment tragedy during the past 3 years.

In Ohio, our unemployment problems began in the 1970's; for it was then that employment in the State started to decline. Though most of the increase in unemployment took place before 1981, unemployment has continued to rise and it is now double what it was in 1979. In almost every area of the economy—construction, mining, transportation, wholesale trade, retail trade, and even government—employment has declined steadily from 1979. Ohio, which for the early 1970's had an unemployment rate below the national average, now has an unemployment rate of almost 13 percent, after Michigan, and perhaps Illinois, second or third highest in the United States.

No State has a greater need or desire for a meaningful national economic recovery than Ohio. But it is important to stress that this recovery must be meaningful, and not a temporary upturn triggered by myths or gimmicks. Ohioans have had enough of the easy answers; they want real answers.

Less than 1 month ago, we, with a bipartisan effort, took a step in providing a real answer to our economic problems. We, in surprisingly large numbers, agreed that the raid on the Federal Treasury must stop. We, in a strong, unified voice, said that deficits do matter and we were going to do something that hurt politically but was necessary for the good of the country. We, in no uncertain words, promised, less than 1 month ago, to the American people we would cease relying on deficit spending to achieve our economic goals.

Because of that promise we must approve the Martin amendment. That amendment is superior to House Joint Resolution 562 because it will help the truly needy—those who do not receive unemployment compensation, the long-term unemployed and AFDC recipients. Also the Martin amendment must pass because it offsets expenditures for jobs with reductions in welfare benefits, thereby reducing the cost of the amendment below that of the Wright bill. This amendment will not violate the budget and it will preserve the honor of our recent promise to the American people.

As I said earlier no one wants and needs an economic recovery more than Ohioans. But, all Americans want to be able to trust their elected officials. There has been much to discourage them in this latter concern. But last month they saw a new Congress, willing to bite a political bullet and act responsibly. A vote for the Martin amendment will be a vote for economic recovery and for lessening the misery of unemployment but, most importantly, it will also be a vote that reaffirms that this Congress is willing to keep its word with the American people.

Mr. CONTE. Mr. Chairman, I yield 1 minute to the gentleman from New Hampshire (Mr. GREGG).

Mr. GREGG. Mr. Chairman, what we are hearing today is a tired rhetoric, it is a rhetoric which evolved in the thirties, went through the forties and fifties, the sixties, and the seventies and was totally disproved as being ineffective. For the last 2 years we have listened to the liberal leadership of this House flay the administration for not having a program, and now what is the program they give us? The same program which they dealt the American people for the last 40 years, a program that failed, a program that gave us high interest rates, high inflation and an economy that suffered under lack of productivity.

What do they want to do, put everybody on the Federal payroll, is that what the idea was from the gentleman from Michigan when he cited that he wanted to put everybody on the program who was out of work?

The fact is that every time you put somebody on the Federal payroll, you reduce the productivity of everybody else in this country, because they have to pay for that job.

The simple fact is that what we have here is a leadership that is intellectually bankrupt and is giving us a political ploy in a political year, and that is all it is.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. COUGHLIN) for a stirring speech.

Mr. COUGHLIN. Mr. Chairman, certainly the debate we have had this afternoon has indicated the travesty of this 1930's WPA program that is being proposed.

The majority leader waved about in the Rules Committee pictures of the needs for changes and improvements in infrastructure and talked about bridges and roads; but this bill, we know, is not going to build a bridge or a road.

Right after we consider this bill we will have the transportation appropriations bill up. That is where the roads are built. That is where the

bridges are built, not in the bill here that takes untrained people and puts them on for 6 months and about the time they learn what they are doing, they are off again and they are nonunion people, anyway.

There is a requirement in the bill that projects have to be only for physical improvements. Well, every community that will get its ladle of the goodies will have to look for physical improvements that they may not even need. That is what they will be making, physical improvements that we may not need in any case. Those improvements and those jobs and those programs should be done through the process that we have, through public works, through the transportation appropriations and other appropriation processes; that is where we develop those kinds of programs.

□ 1520

It is said this bill will reduce the amount of unemployment compensation necessary. We know that is not true. We will be paying both the unemployment compensation and the money for this bill one on top of the other. It is bad legislation. It is a bad program.

There are claims that we are going to really have people at work and working at jobs that are not leaf-raking jobs, and that is just not the case.

Mr. KEMP. Mr. Chairman, will the gentleman yield to me,

Mr. COUGHLIN. I would be glad to yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman for yielding.

Mr. Chairman, the only thing people learn from history is that no one seems to learn from history—I thank my friend for yielding and I agree with him totally.

John Maynard Keynes once argued that we could get our economy moving by paying people to bury empty bottles in the sand and then dig them up again. Even when Keynesian orthodoxy was at its dizziest height most people could not swallow that. But if we pass this so-called jobs bill, Congress will be swallowing that notion today and repeating the mistakes of history.

Yes, of course we need a jobs program. I do not need to hear any lectures about unemployment, when I represent a district where unemployment is near 13 percent, where more than half of the autoworkers and steelworkers are out of work, many since 1979, and where families are in danger of losing their homes and possessions as their unemployment benefits run out. I agree with Members on both sides of the aisle that it is both callous and economically wrongheaded to tell unemployed workers that their personal economic catastrophe is the price we have to pay to bring down inflation. Recession is no answer to inflation and unemployment is no solutio to rising prices.

I support a full-scale jobs program for this Nation. This is why I have called for a repudiation of a monetary policy that through a Federal Reserve-engineered credit crunch has destroyed thousands of businesses and millions of jobs. This is why I have supported tax incentives for jobs and more production. This is why I have introduced legislation to create jobs and enterprise zones in America's hardest hit communities—a real jobs program with bipartisan support that this Congress has not yet acted upon. This is why I have supported a major Federal job training initiative, and unemployment compensation reforms to protect workers in our struggling industrial communities.

What we are being offered today, however, is not a strategy for creating permanent, well-paying jobs. The Democratic leadership is instead proposing to renew a bankrupt experiment: already twice rejected by this Congress in the fiscal year 1982 reconciliation bill and the Job Training Partnership Act; in creating short-term, dead-end jobs by transferring resources from workers and entrepreneurs to the Government through increased spending and borrowing.

True, those temporary public sector jobs will be highly visible. It is much harder to see the jobs that private enterprise, and above all the small businesses that are the great job generators of our economy, will lose or fail to create. It may make political sense to trade some visible temporary jobs for more, and more permanent, jobs in the private economy. And this is certainly a political bill. But I will not offer that kind of false promise and unfair economic sleight of hand to the unemployed workers in my community, because it offers them nothing.

My friend and colleague, the gentlelady from Illinois (Mrs. MARTIN) has proposed a substitute jobs measure which I believe is far more likely to create new opportunity. Rather than just tax away private jobs to create public jobs, the substitute amendment would take money from an unnecessary and unfair Federal corporate welfare program: the Synfuels Corp. Instead of extending eligibility to any worker who has been unemployed at least 2 weeks, it insures that jobs will go to the neediest, to welfare recipients and the long-term unemployed. I commend her efforts, and strongly urge my colleagues to support this substitute which targets real jobs to areas hardest hit by unemployment and not spread a few jobs over all areas of the Nation.

We need to focus attention on the Federal Reserve high interest rate policy which is strangling the oxygen supply of our "body-economic."

Let Congress once again exercise its constitutional responsibility to regulate the value of money and pass legislation that will direct the Fed to lower interest rates not by printing more money but by changing it's target from the supply of money to the stabilization of the purchasing power of money.

Mr. WRIGHT, Mr. BYRD of West Virginia, Mr. QUAYLE, Mr. BOWEN of Oklahoma, and Mr. MITCHELL of Maryland are Members of Congress who are progressive enough to realize the failures of Monetarism and the need to return to the normalcy of lower interest rates when the Fed target the price of money, real interest rates and more stable exchange rates. I join them in efforts to focus attention on a more positive and progressive monetary policy for American jobs.

Mr. COUGHLIN. The majority leader referred to this as a tourniquet. It is not even a band-aid.

● Mr. FRENZEL. Mr. Chairman, I rise in opposition to House Joint Resolution 562, the urgent supplemental job bill. In my judgment, this bill is contradictory to all of our continuing efforts to bring fiscal responsibility back into the Federal budget.

This good old-fashioned make-work program right out of the 1930's increases Federal deficit by a billion dollars. In addition, the Department of Labor estimates that House Joint Resolution 562 would increase outlays on unemployment compensation by $220 million.

The sponsors of this bill claim that it would provide productive, meaningful work. Yet we have passed this sort of bill again and again over the past 50 years with little effect except that we spent money uselessly. We also provided some overtime to employees who had jobs anyway.

There are no provisions in this proposal for vocational training. Planning and administrative costs are not considered in the resolution. The criteria for hiring and eligibility are vague. In fact, the whole bill is fuzzy.

Passing this bill will, in my judgment, create another high-priced CETA-type program that will fail to provide decent employment. Instead, its extra cost will delay permanent solutions to the unemployment problem.

This bill has all the odors and barnyard sounds of a purely political exercise. All it does it to present another splendid opportunity for the American taxpayer to fund another poorly planned, misguided, and wasteful Government program. The taxpayer does not deserve this, nor do the employed whose employment opportunities will be delayed by this extra, unneeded expenditure. I urge my colleagues to vote against this resolution.●

● Mr. MAVROULES. Mr. Chairman, I rise in support of House Joint Resolution 562.

Jobs, jobs, jobs, Mr. Chairman. That is what we are talking about today, and it is about time.

This resolution will put hundreds of thousands of Americans back to work—meaningful, important work, restoring this Nation's crumbling economic infrastructure of roads, bridges, water, and sewer systems, and public facilities.

With over 10 million Americans unemployed, the most since the Great Depression, the most important work on our agenda must be to put America back to work. Back to work now.

We can no longer be patient with the way things are going. Unemployment lines simply grow longer.

Patience does not put money in the pockets of laid-off American workers. Or food on their table. Or clothing on the backs of their children.

Only work can do that.

It is ironic that there are those of us who continue to refuse to address this problem, claiming the cure being offered today is worse than the disease. That this $1 billion jobs programs means more tax dollars for the Government and a bigger budget.

That is utter nonsense. In case you have missed the point before, let me stress it now. Growing unemployment means more Federal spending: $20 billion tax dollars are now going out to aid the unemployed in the form of unemployment compensation.

It is cheaper today to put people to work than it is to keep them in soup lines.

There is another group around here that continue to hold on to the notion that Government has only an indirect role in resolving unemployment problems. That jobs creation is the domain of the private sector, helped along the way, when the need arises, by Federal tax incentives.

I would say to these folks that we have tried that route last year, with the biggest business tax incentive program in the Nation's history.

The result? Again, over 10 million Americans are unemployed today; 3 million since this administration took office.

The lesson of the past year and a half is that business cannot do it alone. That Government has a major responsibility in addressing this national problem.

This resolution meets that responsibility. And, again, it does it in a way that not only helps the unemployed but also the economy at large.

There is a lot of work to be done to turn this economy around. The most important of which is repairing the roads, bridges, and public facilities that support our economy—the Nation's infrastructure.

Forty-five percent of all the Nation's highway bridges, for example, are in need of repair, or worse, obsolete. It is this way too in other parts of the infrastructure.

Can we not take off our ideological blinders for one moment, for one vote, and see the connection between the crumbling foundation of the economy and this modest jobs program?

For us to continue to take a hands-off policy to our unemployment problem is dead wrong.

Ten million Americans are hollering for work. The private sector alone can not meet the challenge. And we simply cannot afford the cost of continuing as we have. I stress this point again.

There is work to be done, Mr. Chairman, so let us put the unemployed to work doing it.●

● Mr. WEISS. Mr. Chairman, the urgent supplemental appropriation to create public works employment is only a small step in the direction Congress must act to counter current depression-level unemployment. Using Federal moneys to provide useful, productive work to those most in need reflects our Nation's commitment to employment for all those able to work.

Still, the $1 billion appropriated in the resolution before us is woefully inadequate in this current crisis of unemployment. Five or ten times this amount could be usefully applied to create jobs which serve public needs including repairs and improvements to the Nation's infrastructure. Unfortunately, the President has led an all-out assault on the unemployed by chopping away at funding for job training and employment assistance and forcing an end to public employment programs. Hopes for rapid, significant improvements in the labor market have been felled by this disregard for American workers.

We now have the largest number of unemployed, involuntarily part-time workers, and discouraged workers since the beginning of World War II. The official unemployment rate for August was 9.8 percent, and it is likely to rocket above 10 percent in the coming months. Almost 11 million Americans who want and seek work are not able to find jobs, and additional millions have stopped looking or can find only part-time work.

Nearly 2 years after President Reagan's election, it is obvious that his economic program is not working. No longer can we suspend our better judgment and accept empty promises of imminent economic recovery. Congress cannot wait for the President to acknowledge these uncomfortable realities and his pathetic policy failures. We cannot wait until the economy reaches crisis proportions before taking action.

House Joint Resolution 562 would provide approximately $1 billion to the Labor Department for youth employment and training programs. This money is stopgap in nature, a mechanism made necessary by the sluggishness of the President's economic program. The resolution properly targets aid to areas with high unemployment and prohibits displacement of existing jobs.

Equally important, the assistance given under this legislation would be provided for the purpose of making improvements in our public works infrastructure. This application of public employment funding is both productive for the economy and necessary to our crumbling infrastructure. According to a recent study, "America in Ruins":

One of every five bridges in this country requires major rehabilitation or reconstruction;

Many of our harbor facilities are unable to service efficiently world shipping coming to American docks;

The 756 largest urban areas will require between $75 billion and $110 billion over the next 20 years to maintain their water systems;

Over $40 billion must be spent in New York City alone during the next 5 years to repair, service, and rebuild basic public infrastructure;

Over $25 billion will be required over the next 5 years to meet current water pollution control standards.

These public works are vital to our Nation. The emergency funding provided in House Joint Resolution 562 should be used as a model for a permanent countercyclical public works employment project for the structurally unemployed. This would be used to create jobs when construction in the private sector declines.

The Democratic leadership is to be commended for stepping in with this bold funding proposal when Reaganomics is dismally failing the American people. The President had had his chance and his ideas have proved bankrupt. I urge passage of House Joint Resolution 562, which will help put more than 200,000 Americans back to work.●

● Mr. MARKEY. Mr. Chairman, I rise today in support of House Joint Resolution 562. I believe it is essential that we pass this resolution today. The American economy cannot wait. The jobless millions cannot wait. The hungry families cannot wait. This Congress must not wait. The administration tells us that recovery is on the way and that we are approaching the promised land. I suggest that recovery has been lost on the way and that we are approaching the barren land of broken promises.

In August, 9.8 percent of the American people were out of work, including 7.3 percent of the work force in Massachusetts. These statistics should not just upset us. They should outrage us. For these are not merely statistics. These are individuals—your constituents and mine—out of work. This bill

will at least put some of them back to work. It will restore human dignity and a feeling of worth to the 200,000 Americans who could immediately be put back to work repairing and rebuilding our bridges, roads, and water systems.

The administration opposes this bill, claiming that public service employment has been tried before and has failed. Tell that to the millions of Americans who have benefited from public works projects across this country. The administration claims the bill is too costly. Tell that to the millions of Americans outraged by the bloated defense budget of the administration. The administration claims the bill fails to address the unemployment problem.

Tell that to the 200,000 Americans who will be put back to work.

This bill is by no means a panacea for the problems of our economy. But it is a start. I ask Democrats and Republicans alike to join together to share this new beginning. Let us demonstrate our willingness to search for answers to the problems that the administration seeks to ignore. If the economy is to thrive again, we must restore work to our citizens.●

● Mr. BEARD. Mr. Chairman, I want to say that in refusing to vote for your so-called jobs legislation I am doing so with good reason. You have obviously introduced this bill for purely political reasons and in so doing are playing on the emotions of those unfortunate Americans who are now unemployed. To be so cynical is a shameful use of the legislative process.

I never cease to be amazed at your ability to avoid looking at the real cause of our current economic problems. When the prime interest rates reached the unprecedented heights of 21.5 percent under Jimmy Carter I do not seem to recall your expressions of outrage. Instead you and your liberal colleagues were still proposing the expansion of the Comprehensive Employment and Training Act, despite the fact that CETA had proved to be a total failure.

I would suggest to you that this current bill will do no more than did CETA at the outset, and if given time will expand into a huge new bureaucracy that only aids those with political connections.

Last month's unemployment rate was the same as prior month's. Let us hope that we have finally seen the bottom of this particular recession. If that does not prove to be the case, I would suggest that we all gather after the coming elections to consider the bill for its purely humanitarian aspects rather than just a political diversion to enhance your own reelection prospects. I would remind you that there is already a growing movement to convene such an extraordinary session. As you know, that movement stems from a bipartisan effort to examine the ailments of a social security system that you and some of your colleagues continue to diagnose as healthy.●

● Mr. AuCOIN. Mr. Chairman, I rise in support of House Joint Resolution 562, the urgent supplemental appropriation to put unemployed Americans who are desperate for work back to work in communities that are suffering severe rates of unemployment caused by the scorched-earth policies of this administration.

We have heard here today from the opponents of this resolution that it is only a bandaid, that it will not go very far to relieve the worst economic misery this Nation—and my State of Oregon—has been suffering since 1933.

Mr. Chairman, that this resolution is no panacea is not in dispute. But when people are bleeding, as they are in my State, whatever bandages as are available ought to be applied. I refuse, when there is an opportunity to do something—and to do it within the budget this Congress has already adopted—to do nothing and just let them bleed.

That is the attitude we have heard expressed over and over by the administration's cheerleaders. Mr. Richard DeVos, the finance chairman of the Republican Party, captured the essence of that attitude when he said on June 4 of this year that this recession "has been a beneficial thing, a cleansing thing for this society."

I will tell you how cleansing the administration's policies have been. They have cleaned the economy of jobs and businesses faster than any administration since Herbert Hoover's.

Mr. Chairman, this was the economic program that was supposed to unleash the most immediate, unprecedented economic boom this country had ever seen. It was only that promise of general prosperity that kept this program from being seen from the outset as a raw shift of resources from the folks at the bottom of society to the folks at the top—a massive shift of resources away from programs that create jobs and pay dividends to the Treasury in order to accelerate the building of bombs and missiles.

In my State, Mr. Chairman, there is another shift going on as well—a shift of human resources. I look at the unemployment figures for Oregon and note that they have declined for the last 3 months running—from 10.9 percent in June to 10.1 percent in August, from 145,100 unemployed down to 131,900 unemployed. But over the same 3-month period, the figures show that total employment has declined by 15,900 jobs, while 29,100 Oregonians have dropped out of the State's labor force.

I see the victims who make up these statistics in my district, Mr. Chairman. I see them standing alongside the freeway interchanges outside Portland, with suitcases in hand and signs marked "Sacramento," "Denver," "Salt Lake City"—anywhere they think there may be jobs to be had, for there are none to be had in Oregon.

This bill will create several thousand jobs in Oregon for people who are desperate to work and for whom a job of any kind, of any duration, is better than nothing, which is the only answer the opponents of this measure have to give.●

● Mr. WILLIAM J. COYNE. Mr. Chairman, I rise in strong support of House Joint Resolution 562, the urgent supplemental appropriations for jobs.

In this body, we often hear the word "urgent" used to describe a particular appropriations bill. For the 200,000 unemployed Americans who stand to gain useful, productive, temporary employment as a result of this measure, the word "urgent" is not an overstatement of the need. For some, especially those who face a cutoff in unemployment benefits as a result of administrative policy, the situation is near desperate. If we fail to approve this bill today, many Americans will continue to be victims of a stalled economy.

While there may be economic jubilation on Wall Street, there is little hope on the Main Streets throughout western Pennsylvania for an upturn in the economy. The disastrous economic policies of this administration have forced thousands of workers, especially those in backbone industries such as steel, onto the unemployment rolls. In July 1981, the unemployment rate for wage and salary workers in primary metal industries was 7.8 percent. In July 1982, after 1½ years of Reaganomics, that figure rose to a frightening 20.3 percent unemployed. I would like, at this point, to share with my colleagues the unemployment rates for primary metals and other industries:

UNEMPLOYMENT RATES FOR WAGE AND SALARY WORKERS IN SELECTED INDUSTRIES

[In percent]

Industry	July 1981	July 1982
Manufacturing	7.3	12.0
Durable goods	7.1	12.7
Lumber and wood products	10.9	17.0
Furniture and fixtures	7.2	13.3
Stone, clay, and glass products	6.2	14.5
Primary metal industries	7.8	20.3
Fabricated metal products	8.5	16.9
Machinery, except electrical equipment	5.2	10.9
Electrical equipment	6.1	9.2
Transportation equipment	8.7	13.0
Automobiles	11.8	15.9
Other transportation equipment	6.2	10.9
Nondurable goods	7.6	11.0
Food and kindred products	10.1	12.0
Textile mill products	8.5	19.3
Apparel and other textile products	12.1	15.0
Printing and publishing	4.9	7.0
Chemicals and allied products	4.6	5.8
Petroleum and coal products	4.6	4.6
Rubber and plastic products	9.3	13.9
Transportation and public utilities	4.1	6.1
Wholesale and retail trade	7.9	10.5

UNEMPLOYMENT RATES FOR WAGE AND SALARY WORKERS IN SELECTED INDUSTRIES—Continued

[In percent]

Industry	July 1981	July 1982
Finance, insurance, and real estate	3.8	5.4
Services	6.2	7.5
Private households	5.9	7.7
Other services	6.3	7.5

Source: Appropriations Committee.

The administration and its supporters contend that we should not develop temporary jobs for the unemployed of these and other industries. That would be too expensive, they argue. I would submit that what is costing the Government money at this point is not Federal action on employment, but Federal inaction on unemployment. The mistaken economic policies of this administration have proved expensive. In this fiscal year alone, the Federal Government will spend more than $20 billion on unemployment benefits. House Joint Resolution 562 appropriates only 5 percent of the amount in order to put people to work repairing and maintaining bridges, improving deteriorating streets, rehabilitating aging water systems, repairing public buildings, and other productive activities. In Pittsburgh, these are jobs that need to be done. I can assure my colleagues that we also have the people, many of whom are nearing the end of their unemployment benefits, who are ready to do the work.

Let us put them to work. Let us not stand in the way of allowing the jobless to become productive members of our society. Let us pass House Joint Resolution 562, the urgent supplemental appropriations for jobs.●

● Mrs. BOUQUARD. Mr. Chairman, while opponents of this bill are elaborating on its shortcomings and why it should not be passed in its present form, 10 million Americans are out of work. These are 10 million who are unable to make a significant contribution to any kind of economic recovery. Instead of being productive workers and taxpayers providing needed stimulus to an economy whose industrial output is 10 percent below last year and helping to reduce record high Federal deficits, these people will be drawing $20 billion in unemployment benefits. This bill, although providing employment for only 6 months, will put the long-term unemployed back to work and, more importantly, put them to work at gainful employment.

Testimony before the Economic Development Subcommittee indicated that needed investment in public works is upward of $400 billion including $300 billion for highways, $48 billion for bridges, and $90 billion for railroads. This same testimony showed that total public construction spending by all levels of Government was only $50 billion for 1981. So we have an urgent public need for these improvements and we have an urgent need for jobs. The obvious solution is to put the two together.

My own district just recently experienced heavy flooding. Damage was extensive; two counties were declared disaster areas. The July unemployment figures for those two counties were 12.2 percent and 14.8 percent. Again, here was a need for able-bodied workers to provide assistance to victims of the flooding, to repair roads and bridges, to rehabilitate public buildings and to work on flood and erosion control. And here was a total of 18,690 people out of work. A program such as this could relieve a great deal of suffering for the people of my district. It deserves to be passed in its existing form.●

● Mr. HOLLENBECK. Mr. Chairman, I rise in strong support of the supplemental appropriations bill before us this afternoon to provide immediate short-term relief for unemployed workers. This program is clearly the quickest means of putting the most people in jobs. With approximately 10 million Americans presently unemployed, I think we can little afford to delay this much-needed appropriation.

It is my understanding that of the funds appropriated under House Joint Resolution 562, the overwhelming margin, nearly 85 percent, would be used to provide jobs for the unemployed. The remaining 15 percent would be allocated to the Labor Department for youth employment and training programs. Jobs provided under the bill could last no longer than 6 months and the maximum salary would be $5,000. The measure would prohibit the displacement of currently employed workers with funds provided under the bill. It would offer temporary employment for the repair, maintenance, and rehabilitation of public facilities as well as the conservation and improvement of public lands. Certainly, we all realize that the repair of many public facilities and similar work on public lands is also a current priority. What better way is there to make these needed repairs than to put some of our current 10 million unemployed back to work at the same time?

Furthermore, House Joint Resolution 562 targets assistance to those areas with the highest unemployment. It gives State and local governments the ability to accomplish useful projects many of which have been deferred because of Federal program cuts. House Joint Resolution 562 has also been carefully drafted to make use of State and local government experience in implementing similar Federal jobs programs during the past.

Mr. Chairman, this appropriation is needed and it is needed now. I urge my colleagues to join me in voting for passage of House Joint Resolution 562 and providing jobs for thousands of unemployed workers and helping to recover our Nation's heavy investment in people and national resources.●

● Mr. GONZALEZ. Mr. Chairman, I support this effort to put people back to work.

We have 11 million Americans out of work today, almost 10 percent of the total labor force. Most of those have been out of work for better than 5 weeks, most are people who have been laid off because of economic conditions, and most do not have unemployment insurance benefits.

For the first time since the Depression, we have a growing number of poor people, not a shrinking number. For the first time since the Depression, the Nation is seeing its wealth shrink, not grow.

At a time when there are millions of idle people, we have a President who proclaims that antipoverty programs did more harm than good. Did it harm children to get a decent education? Did it harm people to get decent diets? What harm was there in job training, or in putting people to work? Is he saying that it is better to have millions unemployed than it is to bring people out of poverty? Is he saying that a 100-percent increase in teenage unemployment is good for us? That a 100-percent increase in the overall rate of unemployment since 1980 has brought joy to the Nation?

We need this bill because Americans need work.

We need this bill because our highways, our bridges and all manner of our public facilities are in a state of disrepair. This bill provides a billion dollars. This Nation could easily use 100 times that much and still not repair its eroding public facilities. At a time when so much needs to be done, it is a shame not to get it done.

Earlier this year, I suggested that we should develop a public works trust fund—much like the highway or airport fund. I suggested that we should have a dedicated tax for the sole purpose of providing urgently needed maintenance and replacement of public facilities—the roads that have been too long neglected, the bridges that are in a state of disrepair, the water and sewer works that need replacement, refurbishment or extension; the schools that need attention, the parks that have been ignored, and all the rest. I asked, when there is so much work to be done, and so much of it urgently needed, how can we tolerate mass unemployment? The answer is that we cannot.

This bill is a step in the right direction. We need to go further. We need to set up a long-term program to build and replace public facilities. We could do this through a dedicated tax.

President Reagan has said that he is against welfare, against dependency.

Everybody is. But he also opposes programs to provide work to people who have been thrown out of jobs through his economic program. He says he is against dependency, but his programs create it. This bill aims to provide work to people who cannot in any conceivable way hope to find work in today's depressed economy. It aims to provide jobs to people who need jobs, work for people who want to work. I support it, I commend those who brought it forward, and I condemn those who have brought us to this sorry and endless recession, and who then smile and say that poverty builds character. Only in Hollywood. Everywhere else, poverty is a blight and a badge of shame, something to escape. This bill is a ladder out of the pit of Reaganomics. It deserves our support.●

● Mr. CLAY. Mr. Chairman, it is critically important that we enact the urgent supplemental appropriations for jobs legislation (H.J. Res. 562). Unemployment is our Nation's most urgent problem and it should be this Congress' foremost priority. Instead, we have done very little to help the more than 15 million unemployed Americans. Until Congress gives some impetus to help relieve the unemployment crisis we are negligent in our responsibility to promote the human enterprise. We must take positive steps today to alleviate the adverse impacts of the unemployment situation or our Nation's economic ability will continue to stagnate and the quality of life in American society will continue to diminish.

The causes of today's unemployment are multifold. We live in an ever-changing world where priorities and conditions; truths and untruths are apt to overturn without warning. Congress does not have a single formula for restoring our Nation's positive growth and prosperity, and the jobs appropriations bill is not the solution to the widening gap between the real job availabilities and the skills of the average unemployed worker. Obviously, we must formulate and institute long-range employment policies to address these needs. But, in the meantime, we must be pragmatic and acknowledge the real needs of the unemployed American. The urgent supplemental appropriations for jobs legislation is an honest step in the right direction. The jobs it will create will be of tangible benefit to all citizens.

As elected Representatives of the people we cannot pretend to tolerate the conditions of unemployment any longer. Unemployment perpetuates a dangerous waste of human talent and ultimately destroys lives. Less than maximum productivity is neither healthy nor moral. Government has a duty to help keep the willing and able-bodied citizen employed. People are our most precious resource. We must begin programs to utilize the talents of all our citizens. We cannot continue to waste our most precious resource or we will become a very poor nation. Full productivity is the only key we have to the future. I encourage my colleagues to move in the direction of a more productive future and to support the urgent supplemental appropriations for jobs legislation.●

● Mr. BROWN of California. Mr. Chairman, today we are considering a $1 billion jobs package, a package which will have a substantial impact on my district—a district which now has an unemployment rate of more than 13.6 percent. For these people, the economic recovery is not "just around the corner." In fact, my area's unemployment rate rose a full 2 percent from July to August. To these unemployed people, and others affected by their unemployment, it appears that the U.S. Government, including the Congress, intends to maintain its "wait and see" attitude.

But to follow this policy while economic indicators continue to decline or sputter along is callous and irresponsible. While I realize that some of my colleagues are committed to the President's economic philosophy, we must also consider the individuals affected by this severe recession. A 9.8-percent unemployment rate nationwide is unacceptable no matter what economic philosophy one adheres to. This jobs package, while not the complete answer, is one small, temporary step which will help to alleviate the problem.

The $1 billion requested to fund this antirecessionary program is admittedly a stopgap measure. It equals only 5 percent of the unemployment compensation for this fiscal year. But it will help to renew the hope and promise of America. There are some, no doubt, who will argue that $1 billion is far too much; that we must consider the ever-increasing Federal deficit; that this will only exacerbate the entire economic woes of the country. But neglected in all this rhetoric is the fact that it has been estimated that for each percentage point of unemployment, the Federal Government loses $25 to $40 billion in reduced revenues and increased benefits. By spending a few dollars now, we may save more in the long run.

And these savings will not only be done on the Federal level. This bill will help to get people back to work in worthwhile productive jobs which, because of other fiscal constraints, have been neglected. These new jobs will be of tangible benefit to a community in such areas as street repair, bridge repair, rehabilitation of public buildings, park and playground rehabilitation, and repair of water systems. And it rewards people for their productive work, rather than merely sustaining them with unemployment compensation or other Federal benefits. This is in the tradition of the American work ethic.

No one should expect this bill to work miracles. In coordination with this measure, we must work to strengthen the very foundations of our economy. Government does have a vital role in this area which cannot be ignored. We have the responsibility to enhance the peformance of American industrial productivity. The present administration, and many of my own colleagues, believe that the Government of this great country has no business in job training and creation. I do not agree.

To sustain a revitalization of our economy, we must commit ourselves to training the hard working, displaced worker as well as the young, inexperienced worker for the jobs of the future. We already have many of the resources for such an endeavor available. The National High Technology Technician Training Act, H.R. 6950, sponsored by Congressman WALGREN, is but one example on how to approach this problem. By encouraging the training to take place in our already established community colleges, we use our available resources to meet our future needs. Other programs which help to acheive this vital goal include the Defense Production Act, H.R. 5540, and the the Jobs Training Partnership Act, H.R. 5320.

The appropriations set aside today for the formation of additional jobs cannot possibly resolve our economic problems. But neither will it harm it. The problems inherent to the unemployed cannot be ignored. Congress has the responsibility to soften the economic blows which may have been exacerbated by its very policies. I urge my colleagues to remember the plight of the unemployed and support this measure.●

● Ms. FERRARO. Mr. Chairman, I rise in support of House Joint Resolution 562, aid in opposition to the substitute, and I ask unanimous consent to revise and extend my remarks.

Mr. Chairman, this legislation is our chance to prove, by action instead of mere words, that we are committed, as a top priority, to putting people back to work. This program does not say "let us cross our fingers and hope interest rates will come down, or investment in productive enterprises will go up, or that by some magical and mystical formula people will find work." This bill is simple and straightforward. It provides jobs—200,000 jobs—for people who are unemployed.

This is truly an urgent supplemental appropriation. Unemployment is now at 9.8 percent, and is expected to go even higher. Officially, there are 10.8 million people unemployed. That figure does not, however, include another 1.5 million "discouraged work-

ers," who have been unemployed so long they have given up looking, and 5.5 million more who have had their working hours shortened because of the recession. The total number of workers unemployed or underemployed is 17.8 million, or over 15 percent of the work force.

On the basis of the unemployment picture alone, then, this bill is justified. We cannot continue making speeches about "putting America back to work" and banging our fists on the table shouting "jobs," "jobs," "jobs." We need direct action to provide jobs, and this bill so acts.

But the bill's value goes even beyond simply providing work for people who need it. The jobs provided will help address one of the most serious problems facing our country today, the crumbling public infrastructure.

The need for renewed efforts to rebuild America's public physical plant has been increasing at a dangerous rate. Streets strewn with potholes, collapsing subway tunnels, falling bridges, and leaking water supply systems plague our major cities. Municipal parks where you once could run barefoot through the grass are now minefields of broken glass.

I represent the city with the greatest public infrastructure repair needs. Estimates of the funds needed to repair New York's 6,000 miles of streets, 6,200 miles of sewers, 775 bridges, and 1.5 billion gallon-a-day water system range from $20 to $40 billion. While the situation in New York is more serious than that in other cities, every major metropolitan area, in all regions of the country, faces the same issues.

These two problems—rising unemployment and the need for repairs of public facilities—seem made for each other. The bill before us addresses both of them by putting the unemployed to work repairing streets, rebuilding bridges, rehabilitating public buildings and parks, and repairing water systems.

Putting people to work on public facilities is not a new approach. In fact, this bill is the direct descendant of Franklin Delano Roosevelt's Works Project Administration. It is an idea that has been tested, and it works.

Far from being a make-work scheme, the WPA achieved tremendous results. In its first year alone, the WPA built over 6,000 schools, 5,000 other public buildings, 7,000 water and sewer systems, and 130,000 rural roads. President Reagan, in an interview last December, expressed his unreserved admiration for the WPA's accomplishments.

There are two additional points I would like to address. Opponents of this legislation make two basic arguments. They argue that with almost 11 million unemployed, creating 200,000 jobs is not enough, and they say that the bill's cost, $1 billion, will "bust the budget."

Let me point out that to some extent, those positions are contradictory. The first statement asserts that the bill is too small, and will not do enough, and the second says the bill is too big.

Obviously, this bill will not solve the unemployment problem. But it is a constructive step, and for the 200,000 Americans who are now out of work and who will get jobs under the plan, it is the best economic news they have had in months.

As for the argument that it costs too much, this Congress, by passing the supplemental appropriations bill over the President's veto, saved almost $2 billion that the President had requested. The bill before us spends only half that, and there is no better purpose to which that money could be put than giving people jobs.

There is no reason why we cannot recreate the success of the WPA. There is no doubt that the times require serious, direct action to give jobs to people who are without them. I urge my colleagues to support this bill.●

● Mrs. COLLINS of Illinois. Mr. Chairman, today I rise in support of the urgent supplemental appropriations for the Department of Labor now before us. With over 10½ million persons out of work and dismal prospects for increased employment opportunities, there is no more urgent or important business facing the Congress than putting Americans back to work. It has been over a year since the President's economic recovery programs became law. Induced by promises of prosperity—including fourth quarter unemployment projections of 7 percent for 1982—the Congress has given President Reagan everything he wanted. As a result, the jobless total has risen 2.9 million in the last year, unemployment in July peaked at 9.8 percent (the highest since the Great Depression of the 1930's), and 1½ million more persons have simply stopped looking for jobs and therefore are not counted as unemployed.

This bill offers the Congress an excellent opportunity to give Americans a chance to put their skills and talents to work on vital public works and public health and safety projects which are of tangible benefit to communities and individuals, especially those experiencing the greatest hardships. Many will say that these programs provide only makeshift jobs, but if you look around at cities and towns across this country, you will see that our public buildings are in disrepair, water systems need repairs, roads and bridges are deteriorating, in short, useful jobs are there, and the challenge to put the skills of the unemployed to work, rebuilding their communities lies before us. The time to act is now. So far, the recession has cost at least $83 billion in lost incomes and output. The number of persons living below the poverty level rise by 2.6 million during the past 12 months and is certain to increase significantly due to the devastating impact high interest rates have had on the economy, which in turn has brought record unemployment.

I urge you to join me in supporting enactment of this essential effort to adopt a new course and remove some of the obstacles now encountered by hopeless and discouraged jobseekers nationwide.●

● Mr. FORD of Michigan. Mr. Chairman, the emergency jobs initiative is vitally needed legislation. The bill would create approximately 203,000 jobs, mainly in those areas where unemployment is highest and jobs are needed the most. With nearly 11 million Americans unemployed, we can no longer sit back and hope against hope that the Reagan recovery program will work as the unemployment rate continues to climb. Three million Americans have lost their jobs since July of last year, and more will be lost if the Congress does not repudiate Reaganomics and act swiftly to save the economy.

The emergency jobs initiative is a first step toward recovery for the whole Nation. It will put unemployed people back to work, doing useful projects which State and local governments, hard hit be recession and falling tax revenues, cannot afford to do themselves. The jobs that will be created, such as filling potholes, repairing public buildings and conservation activities are not "make-work." They will bring about real improvements in our communities and will benefit every taxpayer. I know with absolute certainty that the cities and townships in my congressional district will have no trouble finding productive work to match the skills and energy of the jobless people who will be employed.

How can David Stockman and his followers complain about the cost of this bill? Since July of last year, President Reagan's policies have cost the taxpayers $3 billion in additional unemployment compensation costs. I would far prefer that the Government pay to employ people than that it pay unemployment insurance and get no productive work in return.

I regret that this legislation will not help all of the millions of jobless workers, but as I said earlier, it is a first step in the right direction. The emergency jobs initiative will not exceed the President's budget. It is a responsible measure that will benefit thousands of communities and hundreds of thousands of needy Americans and their families. I urge all of my colleagues to support it.●

● Mr. BOLAND. Mr. Chairman, few bills deserve the description "urgent supplemental" as much as House Joint Resolution 562.

As my colleagues know, House Joint Resolution 562 will provide $1 billion to the Department of Labor. The funds will enable approximately 200,000 unemployed Americans to secure temporary employment at a time when employment prospects in the private sector are bleak.

There can be no argument over the fact that people want, and need, jobs. The Reagan administration took office promising "jobs", "jobs", but that promise remains unfulfilled. Unemployment has increased since the administration took office, and we now face a situation where 11 million Americans are out of work. Actually, the situation is worse than that because in addition to the 11 million people officially listed as "unemployed," an additional 1.5 million have given up trying to find work and therefore do not even show up in the statistics.

It seems to me that we have two choices. We can wait for the President's economic program to live up to its billing, and produce the economic resurgence it was supposed to guarantee; or we can take some action that will help some of the people who do not have jobs. I believe that we have waited long enough and that we cannot ask the people who are out of work to wait any longer. We must provide some relief, and House Joint Resolution 452 is a bill which can accomplish that goal.

This legislation will put people back to work, and it will have them working on what should be one of our national priorities—the reconstruction of our deteriorating infrastructure. Our roads, our bridges, our ports, our water systems—all of the structures upon which a healthy economy depends—need repair. The private sector is not going to do that job, and State and local governments do not have the resources to do it; it is going to be up to the Federal Government. It is a job that should not be delayed any longer, and passage of House Joint Resolution 452 will allow us to get started on it.

Mr. Chairman, no one piece of legislation is going to cure our economic ills or resuscitate the physical plant of this Nation. An inability to do everything we need to do in one neat package, however, is no reason to wring our hands and do nothing. House Joint Resolution 452 is admittedly a small step, but it is an important step and, I believe, a constructive step. It deserves our support.●

The CHAIRMAN. Under the rule, all time has expired.

Pursuant to House Resolution 582, the joint resolution is considered as having been read for amendment under the 5-minute rule. No amendments are in order except one amendment offered by Representative MICHEL or his designee, which shall not be subject to amendment but which shall be debatable for not to exceed 1 hour, equally divided and controlled by Representative MICHEL or his designee and the chairman of the Committee on Appropriations.

The joint resolution is as follows:

H.J. RES. 562

Whereas unemployment has increased to 9.5 per centum on a national basis, varying from a high of 14.3 per centum in the State of Michigan to a low of 4.3 per centum in the State of North Dakota;

Whereas unemployment compensation payments have reached an annual rate of over $20,000,000,000;

Whereas hundreds of thousands of workers have exhausted the period of time for which they are entitled to draw unemployment compensation;

Whereas legislation is now pending to extend that period, which will increase the cost; and

Whereas it is deemed to be to the best interest of the unemployed and the Nation that productive and essential work replace unemployment and the resulting payment of unemployment compensation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in an effort to reduce unemployment cost, to increase the benefit of expenditures, and to put people back to productive work, where the benefits of the efforts will be of value, there is hereby appropriated to the Department of Labor a sum equal to 5 per centum of the latest estimated cost to the Federal Government of unemployment compensation for the current fiscal year, to remain available until December 31, 1982, of which—

(1) 85 per centum shall be available to provide productive jobs for those unemployed in accordance with section 2, and

(2) 15 per centum shall be available for the youth employment and training programs of the Department of Labor (92 Stat. 1982).

SEC. 2. (a) No individual assisted with funds available in accordance with this section—

(1) shall be eligible for unemployment compensation during the period of productive job employment under this section; or

(2) shall be paid except upon certification in writing by the supervising official that such job was performed.

(b) Individuals assisted with funds available in accordance with this section—

(1) shall be certified as unemployed for at least two weeks in accordance with criteria established by the Secretary of Labor, with priority given those who are not currently eligible for unemployment compensation;

(2) shall be paid at a rate which shall not be less than the highest of (A) the minimum wage under section 6(a)(1) of the Fair Labor Standards Act of 1968, (B) the minimum wage under the applicable State or local minimum wage law, or (C) the prevailing rates of pay for individuals employed, but in no case shall the annual rate of such wage exceed $10,000; and

(3) subject to subsection (a)(1), shall be provided benefits and employment conditions comparable to the benefits and conditions provided to others employed in similar occupations by the same employer.

(c) No currently employed worker shall be displaced by any individual employed with funds under this section, including partial displacement such as a reduction in the hours of nonovertime work, wages, or employment benefits.

(d) Funds available in accordance with this section may be used for the purpose of providing unemployed individuals with temporary employment for not more than six months in repair, maintenance, and rehabilitation of public facilities and the conservation, rehabilitation, and improvement of public lands, such employment to include (but not be limited to) employment in—

(1) road and street repair,

(2) bridge painting and repair,

(3) repair and rehabilitation of public buildings,

(4) repair and rehabilitation of water systems,

(5) erosion, flood, drought, and storm damage assistance and control,

(6) removal of refuse from drainage ditches, illegal dumping sites, and other public areas,

(7) park and playground rehabilitation,

(8) installation and repair of drainage pipes and catch basins in areas subject to flooding,

(9) stream, lake, and waterfront harbor and port improvement and pollution control,

(10) forestry, nursery, and silvicultural operations,

(11) fish culture and habitat maintenance and improvement,

(12) rangeland conservation, rehabilitation, and improvement,

(13) installation of graded ramps for the handicapped, and

(14) energy conservation.

(e) Funds available in accordance with this section shall be allocated as follows:

(1)(A) Eighty-three per centum of the funds available in accordance with this section shall be allocated among eligible entities which, during the three months preceding the date of allocation for which satisfactory data are available, had an average rate of unemployment in excess of the national average rate of unemployment for such three months.

(B) In making such allocation, the Secretary shall allocate 50 per centum of the funds under this paragraph on the basis of the relative number of unemployed persons, 25 per centum of such funds on the basis of the relative number of unemployed persons residing in areas of substantial unemployment, and 25 per centum of such funds on the basis of the relative excess number of unemployed persons (in excess of 4.5 per centum of the labor force).

(2) Two per centum of the funds available in accordance with this section shall be allocated among Native American tribes, bands, and groups for use in meeting the need for employment and training and related services of such tribes, bands, and groups.

(3)(A) The remainder of the funds available in accordance with this section shall be allocated, in the manner described in paragraph (1)(B), among eligible entities which are not eligible for an allocation under paragraph (1) for the purpose of serving a locality—

(i) which has had a large scale loss of jobs caused by the closing of a facility, mass layoffs, natural disasters, or similar circumstances, or

(ii) which has experienced a sudden or severe economic dislocation.

(B) In expending funds from such allocation in the case of an eligible entity serving two or more such localities, the eligible entity shall take into consideration the severity of unemployment in each such locality.

(f)(1) For purposes of this section, an eligible entity is—

(A) a unit or consortium of units of general local government or concentrated employment program grantee (serving a rural area) with a population of less than one hundred thousand persons which has demonstrated the capacity to operate employment and training programs;

(B) a unit of general local government with a population equaling or exceeding one hundred thousand persons or a consortium including such a unit and other units of general local government; and

(C) a State.

(2) A State shall not qualify as an eligible entity with respect to an area served by another eligible entity. A larger unit of general local government shall not qualify as an eligible entity with respect to an area served by a smaller such unit.

SEC. 3. The Secretary of Labor shall notify recipients within thirty days after the date of enactment of this Act of the allocation of funds appropriated herein.

SEC. 4. The Secretary of Labor shall promulgate such rules and regulations as may be necessary to carry out the purposes of this joint resolution.

COMMITTEE AMENDMENT

Mr. NATCHER. Mr. Chairman, I ask unanimous consent that the committee amendment, which is technical in nature and printed in the joint resolution, be considered as adopted.

Appearing on page 6, at the bottom of the page, is the wording: "or concentrated employment program grantee (serving a rural area)". Using the same words that my distinguished friend, the gentleman from Massachusetts, knows about, the committee amendment moves those words to the end of the sentence.

Mr. Chairman, I make that as a unanimous-consent request.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

Mr. CONTE. We have no objection on this side, Mr. Chairman.

The CHAIRMAN. The Chair hears no objection.

The committee amendment just adopted reads as follows:

Committee amendment: On page 6, beginning on line 25, strike "or concentrated employment program grantee (serving a rural area)", and on line 4, page 7, after "programs" insert a comma and "or a concentrated employment program grantee (serving a rural area)".

The CHAIRMAN. For what purpose does the gentleman from New York (Mr. SOLOMON) rise?

Mr. SOLOMON. Mr. Chairman, as I stated in my remarks during the debate, I rise to ask unanimous consent to offer my amendment which would prohibit any of these jobs going to people who are in violation of the Draft Registration Act.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. HAWKINS. Mr. Chairman, reserving the right to object, on technical grounds, I personally have no objection to the amendment. As a matter of fact, I have supported the gentleman's amendment on other occasions. However, I would request that if he desires to have the unanimous consent, at least as far as I am concerned, that he limit the unanimous-consent request to the amendment which has been presented and which we have had given to us on this side, so that the amendment will not be subject to any further amendment.

If it is confined merely to this request, on that basis I certainly would remove my objection.

Mr. SOLOMON. I would make that request.

The CHAIRMAN. Is there objection to considering the amendment with the understanding that it is not subject to amendment?

Mr. LIVINGSTON. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. HAWKINS. My objection would be moot, then, Mr. Chairman, I was going to remove my reservation of objection, but it was the gentleman's colleague on the other side who objected.

The CHAIRMAN. The Chair now recognizes the gentlewoman from Illinois (Mrs. MARTIN).

Mrs. MARTIN of Illinois. Mr. Chairman, I am the designee, as the Chair mentioned, of the minority leader.

AMENDMENT OFFERED BY MRS. MARTIN OF ILLINOIS

Mrs. MARTIN of Illinois. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. MARTIN of Illinois: On page 2, line 7, immediately after the work "Labor", strike all that follows and insert in lieu thereof the following: "from the unobligated balance of the Energy Security Reserve established by Public Law 96-126 (93 Stat. 970) a sum of $1,500,000,000 to remain available until December 31, 1982, to provide productive jobs for those unemployed in accordance with section 2.

SEC. 2. (a) No individual assisted with funds available in accordance with this section—

(1) shall be eligible for unemployment compensation during the period of productive job employment under this section; or

(2) shall be paid except upon certification in writing by the supervising official that such job was performed; or

(3) shall be eligible for unemployment compensation because of the period of productive job employment under this section.

(b) Individuals assisted with funds available in accordance with this section—

(1) shall be certified as unemployed for at least six months in accordance with criteria established by the Secretary of Labor or shall have exhausted their unemployment benefits;

(2) shall be paid at a rate which shall not be less than the highest of (A) the minimum wage under section 6(a)(1) of the Fair Labor Standards Act of 1968, (B) the minimum wage under the applicable State or local minimum wage law, (C) their unemployment benefit rate for the period such individuals would otherwise be eligible for such benefits, or (D) their AFDC benefits rate, but in no case shall the annual rate of such wage exceed $10,000; and

(3) subject to subsection (a)(1), shall be provided benefits and employment conditions comparable to the benefits and conditions provided to others employed in similar occupations by the same employer.

(c) No currently employed worker shall be displaced by any individual employed with funds under this section, including partial displacement such as a reduction in the hours of nonovertime work, wages, or employment benefits.

(d) Funds available in accordance with this section may be used for the purpose of providing unemployed individuals with temporary employment for not more than six months in repair, maintenance, and rehabilitation of public facilities and the conservation, rehabilitation, and improvment of public lands, such employment to include (but not be limited to) employment in—

(1) road and street repair,

(2) bridge painting and repair,

(3) repair and rehabilitation of public buildings,

(4) repair and rehabilitation of water systems,

(5) erosion, flood, drought, and storm damage assistance and control,

(6) removal of refuse from drainage ditches, illegal dumping sites, and other public areas,

(7) park and playground rehabilitation,

(8) installation and repair of drainage pipes and catch basins in areas subject to flooding,

(9) stream, lake, and waterfront harbor and port improvement and pollution control,

(10) forestry, nursery, and silvicultural operations,

(11) fish culture and habitat maintenance and improvement,

(12) rangeland conservation, rehabilitation, and improvement,

(13) installation of graded ramps for the handicapped, and

(14) energy and conservation and weatherization.

(e) Funds available in accordance with this section shall be allocated among eligible entities which, during the three months preceding the date of allocation for which satisfactory data are available, had an average rate of unemployment in excess of the national average rate of unemployment for such three months.

(1) In making such allocation, the Secretary shall allocate 50 per centum of the funds under this paragraph on the basis of the relative number of unemployed persons, 25 per centum of such funds on the basis of the relative number of unemployed persons residing in areas of substantial unemployment, and 25 per centum of such funds on the basis of the relative excess number of unemployed persons (in excess of 4.5 per centum of the labor force).

(2) An entity receiving funds shall allocate 50 per centum of the funds provided by this Act for jobs for persons receiving unemployment benefits, 25 per centum of such funds for jobs for persons receiving AFDC benefits, and 25 per centum of such funds for jobs for persons receiving neither unemployment benefits or AFDC benefits.

(f)(1) For purposes of this section, an eligible entity is—

(A) a unit or consortium of units of general local government with a population of less than one hundred thousand persons which has demonstrated the capacity to operate employment and training programs, or a concentrated employment program grantee (serving a rural area);

(B) a unit of general local government with a population equaling or exceeding one hundred thousand persons or a consortium including such a unit and other units of general local government; and

(C) a State.

(2) A State shall not qualify as an eligible entity with respect to an area served by another eligible entity. A larger unit of general local government shall not qualify as an eligible entity with respect to an area served by a smaller such unit.

SEC. 3. The Secretary of Labor shall notify recipients within thirty days after the date of enactment of this Act of the allocation of funds appropriated herein.

SEC. 4. The Secretary of Labor shall promulgate such rules and regulations as may be necessary to carry out the purposes of this joint resolution.

SEC. 5. The Secretary of Labor shall insure that each individual participating in any program established under this Act, or receiving any assistance or benefit under this Act, has not violated section 3 of the Military Selective Service Act (50 U.S.C. App. 453) by not presenting and submitting to registration as required pursuant to such section. The Director of the Selective Service System shall cooperate with the Secretary in carrying out this section.

Mrs. MARTIN of Illinois (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

The CHAIRMAN. Pursuant to the rule, the Chair recognizes the gentlewoman from Illinois (Mrs. MARTIN) for 30 minutes.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield myself such time as I may consume.

The philosophical arguments concerning the worth of any bill that uses public funds for employment I leave to those, who have made those arguments, to be settled later.

I also leave the political arguments of what or how this should be handled. Is it indeed a Democratic ploy? Will the Senate pass it? Will the President sign it?

If we are sincere, what we should be doing is trying to make the best bill possible. Frankly, the committee bill just is not very good yet.

My amendment does a number of things. First, if indeed we want to help people get jobs, my amendment will provide twice as many jobs, by every conservative estimate, as the committee bill will.

Second, for those of us from areas dependent upon the automobile, construction, and machine tools, major kinds of capital commitments, the deficit does matter. We should be looking at ways to fund projects that do not increase the deficit, and thus will not affect the interest rates.

This, then, funds twice as many jobs from the Synthetic Fuels Corporation. That money has not been spent and, frankly, Mr. Chairman, although I recognize it is the pet of many around here, it it and it remains welfare for Exxon, welfare for big oil.

Now, if indeed the opposition party and my party care about people, then we must look at a bill that takes away from those who should not be enjoying Government largesse and gives a chance to those who find themselves caught in the incredibly vicious circle of unemployment.

Third, the bill targets. In doing so, I recognize that it may lose the votes, that indeed every Member of the Congress will not take back to their districts dollars for jobs, because districts that have low unemployment will not be eligible. We are looking at the people who want to work, but who cannot work and cannot just move families and homes to other areas.

So this bill suggests that instead of the rather frivolous 2 weeks that would mean that every mayor who had any brains would lay off everybody in the city that they could and just use the Federal money to do it, this says that you must have been unemployed for 6 months.

It also does something that I think matters to those men and women who wish to work. It restores dignity. If one is on welfare, he or she can be eligible for a job under this bill. If one is on unemployment benefits, he or she can be eligible for a job under this bill.

Now, if there are those who do not want to work who prefer benefits or prefer to let them run out, they are not forced to take the job. But if people want to work and if someone says, "I want to work," then they go to the bill and they are not penalized for that desire. They are paid at the same benefit level that they are receiving, whether it is from AFDC or from unemployment benefits.

The savings are obvious. First of all, there is minimal addition to the deficit; and second, there is a switch between benefit programs. And most importantly, they are earning every penny that they are receiving. They are doing the kind of work mentioned in the committee bill because we have retained the physical public works aspect of what the committee has proposed.

□ 1530

In other words, and I cannot claim this bill for mine; I act in place of the minority leader because I have the district that has the highest unemployment in the United States of America, this amendment takes what may well have been a political bill, although I sincerely hope that many people wished it, and targets it, keeps it from affecting the deficit, and indeed doubles the number of people it can help.

Now, I did not comment during the earlier debate because I listened to people especially from the other side of the aisle say $1 billion was not enough, and I agree. Therefore, this substitute can double what will surely not totally replace the private initiatives that we need, what can help people through these difficult times. People on this side of the aisle such as Representative JEFFORDS, Representative DENARDIS, Representative CONTE, found, because of the rule, that they could not add their own insightful additions that could have even perhaps produced something better. There is no question in my mind that if we are sincerely looking at helping the people of any district, the people of the districts around this Nation who have both Republicans and Democrats representing them, if we are interested in helping people, aside from the political choice it will grant us as individuals, that across the board, across the aisle, we will be supporting this bill.

Mr. ROUSSELOT. Mr. Chairman, will the gentlewoman yield?

Mrs. MARTIN of Illinois. She will indeed yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague yielding. Many of us in the House are pleased you have offered this superior alternative. I just want to repeat this, I am sure some of my colleagues may have missed a major point or two—the gentlewoman provides twice the jobs that the other side does, is that correct?

Mrs. MARTIN of Illinois. That is indeed correct.

Mr. ROUSSELOT. And she puts a 15-percent limitation on administrative costs, so that guarantees that more of this money will go to produce real jobs?

Mrs. MARTIN of Illinois. That is correct.

Mr. ROUSSELOT. I thank my colleague for this very well constructed program. Let me review again the major advantages of the Martin substitute:

The funds are targeted in a fairer way: $750 million to individuals on extended unemployment benefits; $375 million to individuals in AFDC families; and $375 million to individuals who have been unemployed 26 weeks or longer.

Administration costs are limited to 15 percent of total program expenditures.

Supplies would be provided by local communities.

Provides for 411,000 new jobs—twice as many as the other bill.

I urge support for her alternative bill.

Mrs. MARTIN of Illinois. I appreciate that.

Mr. Chairman, I reserve the balance of my time.

Mr. NATCHER. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Chairman, I, too, received this morning this letter from the gentlewoman from Illinois which made the statement that "I will offer nearly twice as many jobs at approximately half the cost," and I must confess that that sounds very attractive. But, I was wondering how she could do it until I had an opportunity to read the amendment this afternoon in its detail.

It is no great secret now, it seems to me, what she proposes to do. She proposes to really eliminate this as a jobs program entirely. The amendment, I think the Members should understand, those who are concerned about their districts, the amendment would eliminate funding for areas which do not have unemployment equal to or in excess of the national average. Now, there are many areas that temporarily may be in that fortunate situation in that their unemployment is slightly below the national average. Certainly, I do not think you can bring about 9.5 percent, let us say, on unemployment. If you want to go back to your districts and brag that because you are in that fortunate situation, that your unemployment is only 9.5 or 9.6 percent, and that therefore you are saved from some destruction under this amendment, then you do that, but under the bill without this amendment those areas would have at least 15 percent set aside for that.

This means that is you have an otherwise prosperous city or county, but you have a great unemployment area within that area where perhaps layoffs have occurred recently, some plant has closed up, you will be unable to deal with it. That is precisely what this amendment will do.

Second, let me point out to the Members also that the amendment strikes from the pending proposal and reference to youth, so that the youth program is completely eliminated. If you want to go back to your districts, where more than one-third of the unemployed who have been unemployed in the last year as a result of certain policies, have become unemployed, and tell them that you are supporting an amendment, a substitute that will offer no assistance to them, then you will support certainly this amendment.

In addition to that, and I hope I have some time to give all the groups that are eliminated under this amendment whereby they can make this magical reduction, reducing the cost and doing twice as much according to the claim——

Mrs. MARTIN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. If I get time on the gentlewoman's time I will be very glad to discuss the issue.

There is no incentive under this program for anyone to leave unemployment, because to take a job under this program one will be worse off than one would be on welfare, or one would be worse off in terms of the wage under this proposal because that would certainly place the person in a position in which he would be financially taking a sacrifice to leave unemployment in order to go on this program under this amendment.

Mrs. MARTIN of Illinois. Will the gentleman yield on that matter?

Mr. HAWKINS. At the end, if I may give the reasons. The gentlewoman may want to ask all of them together.

The amendment provides, as I say, no money for youth unemployment at a time when one-third of jobs lost have been lost by young workers. In addition to that, it refers to those who are not receiving any benefits. Now, over 6 million Americans are not receiving any benefits under the unemployment compensation program. Under this Martin amendment, these individuals would be reduced to 25 percent of the allocation to any area. So, 6 million persons who are not receiving unemployment insurance would be in a sense the means of reducing the allocation for those areas.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. Just briefly.

Mr. AuCOIN. Mr. Chairman, I appreciate the gentleman yielding. Is it not true that the Democratic proposal provides 100 percent of the jobs benefits under this bill to people who have no help of any kind today and under the Republican amendment 75 percent of the jobs would go to people who are already receiving some kind of benefits?

Mr. HAWKINS. That is precisely correct. The priority is set for individuals.

I think individuals should read this amendment and not be misled by rhetoric.

Mrs. MARTIN of Illinois. Mr. Chairman, very briefly before I do call on someone else, I think everyone understands that with the only $1 billion that is in the Democratic bill, certainly 15 percent of that is not going to take care of youth unemployment. There is already $3 billion in youth training in other bills. We are talking about people unemployed for months and months. That is whom this Congress said it was going to help. Now if we want a big package $1 billion would not do it, we are talking about 3 cents per person.

Mr. CORCORAN. Mr. Chairman, will the gentlewoman yield?

Mrs. MARTIN of Illinois. I yield to my colleague from Illinois.

Mr. CORCORAN. Mr. Chairman, I thank my colleague from Illinois for yielding. One of the criticisms of the gentleman from California to the Martin amendment is that he assumes unemployment is going to get worse. I would just like to call his attention to testimony before a congressional committee this morning by the Director of the Congressional Budget Office.

The current CBO forecast shows moderate growth in economic activity during the second half of this year and next year, and continued moderation of inflation.

And here is the critical sentence, Mr. Chairman:

The unemployment rate should begin to decline gradually later this year, resulting in an average annual unemployment rate of 8.8 percent to 9.3 percent in 1983.

□ 1540

Mr. Chairman, Alice Rivlin is hardly an advocate of Republican policies, and yet she provides a premise for our alternative.

Mrs. MARTIN of Illinois. Mr. Chairman, I thank the gentleman from Illinois (Mr. CORCORAN), and I yield 2 minutes of my time to the gentleman from Alabama (Mr. SMITH).

Mr. SMITH of Alabama. Mr. Chairman, our distinguished colleague from Illinois has done a great service in offering a sensible, workable, and positive alternative to the bill we have before us.

For my constituents in the Birmingham, Ala., area and for any district struggling with staggering unemployment rates, Mrs. MARTIN's plan offers the dignity of productive work to those on the unemployment and welfare rolls. My constituents would much rather be working than standing in line for demeaning public handouts.

Mrs. MARTIN's plan is far superior to the bill we are considering. For example, the Martin substitute targets relief to those who really are eligible.

The present bill allows benefits for those who have been unemployed for just 2 weeks, which is the approximate length of a good vacation.

The Martin substitute makes eligible those unemployed for at least 6 months, which is responsible.

The present bill lays yet another burden on the taxpayer and increases the national deficit by $1 billion. But Mrs. MARTIN's approach adds no tax burden by shifting existing funds to provide wages—instead of handouts—for the unemployed.

Each of us here is very much aware of our role as a public trustee. Each of us is aware of the crushing problem of unemployment in our districts. And each of us, I believe, wants to be responsible about solving it.

Mr. Chairman, it is clear that my colleague on the Budget Committee is

offering a responsible solution. I urge bipartisan support for her efforts.

Mr. NATCHER. Mr. Chairman, I yield 3 minutes to the gentleman from Oregon (Mr. AUCOIN).

Mr. AUCOIN. Mr. Chairman, I would repeat the point that was brought out by the gentleman from California (Mr. HAWKINS) in colloquy with me only a few minutes ago. I hope that all my colleagues who are listening to this debate understand the differences between the amendment being offered by the gentlewoman from Illinois (Mrs. MARTIN) and the committee's bill.

The committee's bill provides that 100 percent of the jobs benefits go to people who are receiving no help at all now. The amendment would provide only 25 percent of its jobs benefits to those people.

Who are these people? We are talking about 3.25 million Americans who have exhausted their unemployment benefits and no one is offering them a helping hand; no one is offering them any hope. Our bill does offer them hope, not just an unemployment check. Our bill offers a job that can give some degree of dignity and self-worth.

No one can tell me that the Martin amendment, which denies a helping hand to those who have exhausted their unemployment benefits is a sensible idea. It is not a sensible idea. We have a limited amount of money to work with here. We ought to be focusing on those people who are without hope today, those people who do not have unemployment benefits any longer, those people who have given up looking for a job.

The gentlelady's amendment is not targeted. Nor is it wise, producitive, effective, compassionate, or sensible. We need to be dealing with the human misery caused by the loss of jobs that results because of the administration's economic policies which have been advocated by the gentlewoman from Illinois.

My friend, the gentleman from Massachusetts (Mr. CONTE), the ranking minority member of the Appropriations Committee, stood up in the well a few minutes ago and said that there is not a bucket of asphalt in our bill. He said there is not a bucket of steel in our bill. We would like to have the kind of jobs that have buckets of asphalt and steel and all the rest. We listened to the administration, and they promised jobs, jobs, and more jobs, but they did not come through because their program failed.

We are dealing with the misery caused by that failure, and we want to offer something more than just an unemployment check. We want to offer some assistance to those people who have had unemployment checks and seen those benefits become exhausted.

If the Members think that unemployment is not getting worse, I ask them to come out to Oregon and talk to mill workers in Tillamook, in Tillamook County, Oreg., who are 30 percent unemployed today. The Oregon unemployment rate has just gone up another large fraction of a percentage point. It is 10.8 percent. You tell Oregonians that the unemployment problem is not getting worse.

Mr. Chairman, I ask the Members to defeat the amendment and to support the committee bill.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Chairman, I thank the gentlewoman for yielding me this time, and I appreciate the debate that is going on here on the floor of the House.

I rise in support of the Martin substitute—its targeted to jobs in the areas of the country like upstate New York with tragically high unemployment rates as well as to the people who need the jobs the most.

I also like the idea of using synfuel money. Let us take $1.5 billion from the corporate welfare program that subsidizes oil companies to create synfuels and use it to create jobs in this targeted way.

Here are the targets—

Mr. Chairman, a person must have been unemployed for at least 6 months or have exhausted his unemployment benefits.

First, 50 percent of the jobs must be reserved for persons receiving unemployment benefits;

Second, 25 percent of the jobs must be reserved for persons receiving AFDC benefits; and

Third, 25 percent of the jobs may go to nonunemployment or non-AFDC recipients;

Jobholders shall be paid the minimum wage, except that recipients of unemployment benefits shall be paid at the rate of the unemployment benefits during the remaining period of eligibility for those benefits, and except that recipients of AFDC benefits shall be paid at the rate of their AFDC benefits, if the unemployment benefit and AFDC rates are higher than the minimum wage rate.

The funds will be allocated only to those entities with unemployment rates above the national average.

Mr. Chairman, because 75 percent of the jobs must go to persons receiving unemployment or AFDC benefits, reductions in those benefits will offset a good deal of the total cost of the program. Actual outlay increases will thus be less than a billion dollars to the Federal Government, and the States will also realize some cost savings because the cost of some of the benefits is shared between the Federal Government and the States.

If we want to get America moving again, lets start talking about how the Fed got us into this recession in 1979 and how a lower interest rate policy in 1982 can create the jobs for all Americans who seek gainful employment. We should accept full employment and price stability and nothing less.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. ROYBAL).

Mr. ROYBAL. Mr. Chairman, during the debate we have heard many charges regarding a belief that the bill before us is imperfect. That discussion and/or charges came from the other side of the aisle, claiming that the legislation was not perfect, ill timed, and not necessary. I think we can stipulate to the fact that it is not perfect, but not that it is ill timed or unnecessary. We were also told that the legislation did not solve the problem and we stipulate to that.

□ 1550

But I think we must also admit that the Republican amendment also comes under the same criteria—that it does not solve problems and that it is not perfect. In fact, it makes the legislation before us even more imperfect for various reasons.

Under the amendment, 50 percent of the jobs would be reserved for persons receiving unemployment benefits. Under the committee bill, people whose unemployment compensation has been exhausted get priority.

One other point is that $155 million under the committee bill would be reserved to take care of unemployed youth. Under the amendment no mention is made of youth at all.

What we have before us then is a choice between the original bill before the House and the substitute amendment. Based on that choice we must decide which one of the two would bring the most benefit to the most people with the greatest need. The amendment before us does not. The committee bill does.

Mr. Chairman, a very important point was made by the gentleman from Michigan when he said that if only one-half of 1 percent of the unemployed people of Michigan would receive jobs under this legislation, that the unemployed would be most grateful for just a few weeks of unemployment, since they have been out of work for far too long. The more than 200,000 unemployed throughout the Nation that will receive work under the bill will be most grateful if we reject the amendment and pass the bill.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield myself 10 seconds to assure the body that in reference to the earlier colloquy between the gentleman from Puerto Rico and the gentleman from California regarding the

committee bill, it is the intent of the amendment that those areas also be included.

I did wish to assure the body of that.

Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. DUNN).

Mr. DUNN. Let me thank the gentlewoman for both her amendment and for the opportunity to speak.

I want to address two issues. No. 1, the targeting.

Under the original bill we could have a situation in the District, 2 or 3 percent, a man quits his job or a woman quits her job for 2 weeks and she qualifies.

The previous speaker talked about Michigan. The chairman of the committee said, and he actually urged, and I was surprised he actually urged his colleagues not to support it because there might not be something in it for their district.

Of course we target in this program. We target in every bill in front of us. Should I not vote for a farm bill, should I not vote for marine fisheries, should I not vote for defense, simply because it does not benefit my district?

We have to look at the problems of the Nation. The problems of the Nation are in the high unemployment areas.

The gentlewoman's amendment targets those areas by putting a restriction in there of 6 months and by putting a restriction of "above-the-national-average" on unemployment.

Furthermore, the gentlewoman's amendment addresses the problem.

The problem is the size of the Federal deficit. Rather than adding to these deficits, as the committee bill would do, she takes from allocated funds, that being from synfuels.

So if you have ever not liked the boondoggles of synfuels, if you have ever not liked unbalanced budgets, and if you have ever liked to truly help the truly needy then I would urge my colleagues to vote for the Martin amendment.

Mr. NATCHER. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, as you will recall, during general debate on this bill we had a number of speakers call attention to the types of jobs set forth in the bill.

In the substitute that we have before the Committee at this time, offered by the gentlewoman from Illinois—by the way, the gentlewoman presented her substitute in an excellent manner—in the substitute the gentlewoman offered, Mr. Chairman, the types of jobs are identical with the types of jobs in the bill that is before the Committee.

I think the Committee ought to know that, Mr. Chairman.

All during general debate we heard quite a bit about bridge repair, bridge painting and repair, and a number of other jobs. It was said, "How will you do it?" "When will you do it?"

Every job listed in this substitute, Mr. Chairman, on page 2, beginning with road and street repair—that is No. 1—and No. 2, bridge painting and repair and so on down the list for 14 different types of jobs, identical assignments, identical jobs, is copied right out of the bill.

Mr. Chairman, when you get right down to it and you talk about a boondoggle, if there is a boondoggle, why did you not change the type of jobs? You used the identical jobs as in the bill before the Committee.

Not only that, Mr. Chairman, another matter that I want to call to the attention of the Committee is that they cut out the youth employment section in this bill. They cut that out, Mr. Chairman, $150 million, the 15 percent the bill provides for, added to the amount in the continuing resolution of $192 million, and we have $342 million on our side, Mr. Chairman, for the unemployed youth in this country.

That is a good program, an excellent program, with $342 million on this side, and they cut it out on the Republican side, Mr. Chairman.

But when you talk about the type of employment and the type of jobs and you copy identically the 14 different types of jobs that are to be used, Mr. Chairman, the criticism is not well founded.

In addition to that, the substitute offered by the gentlewoman—and I say to the gentlewoman that she offered it in an excellent manner—is for 1.5 billion American dollars, a transfer, of course, $1,500,000,000 and the bill offered on this side, Mr. Chairman, by the gentleman from Minnesota, Mr. OBERSTAR, the gentleman from California, Mr. HAWKINS, the gentleman from Texas, Mr. WRIGHT, and the gentleman from Kentucky, Mr. PERKINS, provides for $1,035,000,000.

It is true that it is a transfer. If this is such a boondoggle, why provide $1,500,000,000 for it, even in a transfer?

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. COATS).

Mr. COATS. Mr. Chairman, I thank the gentlewoman for yielding.

I think there are many reasons to support this substitute over the original bill presented. Let me enumerate two of the more important reasons. First of all, the Martin substitute transfers funds from existing sources rather than spends new funds, and we all know that with the budget in the situation that it is that the new spending is just adding to the problem.

Second, the eligibility requirements of the committee bill as presented are badly flawed. It allows those unemployed for only 2 weeks to be eligible for this program.

I can just see the big city mayors rubbing their hands in glee with the prospect of once again replacing their street department, their public works department, replacing their payroll the same way they did under the old CETA program, providing public service jobs to their locally employed people by using taxpayer funds—Federal taxpayer funds—rather than local funds.

This is not only a rehash of the CETA program but it is a rehash of the worst part of that CETA program, the public service portion which people on both sides of the aisle agreed was badly flawed, which was removed in this year's jobs training bill, which was agreed upon as being a flawed program.

The substitute provides that 6 months is the eligibility requirement and I think this is a serious failure of the bill. I find it hard to believe that the other side, as the Speaker said this morning, worked 6 months on this bill and yet comes up with a portion of it as flawed as it is.

The big city mayors have to be just waiting for us to pass this, not because it is going to employ any new people but because it is going to allow them once again to have the opportunity to replace part of their payroll, maybe improve the city budget, but replace part of the payroll at the taxpayers' expense.

That is not going to employ any new people that are unemployed.

If I thought this employed any people in my town, and we have many that are unemployed, and would put them to work I could support it. But I can just see the same thing coming down the line that happened before, and I think for that reason the substitute is far preferable to the bill that was provided by the committee.

□ 1600

Mr. NATCHER. Mr. Chairman, I yield 3 minutes to the gentleman from Iowa (Mr. SMITH), a member of the committee.

Mr. SMITH of Iowa. Mr. Chairman, here we are again today, considering an amendment which includes a formula which will not treat some Americans equally and will in fact discriminate against some who are as much in need as those who are not discriminated against.

Twenty-five percent of the money in the substitute would go only for those who have been lucky enough to have had a job and received unemployment compensation. There are a lot of people in this country who have never been lucky enough to have worked in covered employment. Why should they be discriminated against and limit the jobs to those who have been lucky enough to at one time have had a job and unemployment compensation?

Another 25 percent is only for those who have been on AFDC. Do some not understand that there are people in this country who could be eligible for AFDC who do not go on AFDC? Why should someone be discriminated against because they do not choose to apply for AFDC?

It is another attempt to discriminate against Americans if they do not take advantage of programs that they could take advantage of.

The substitute also limits jobs to those areas which have higher-than-average unemployment. A person who happens to be unemployed is just as much in need of a job whether he has two neighbors unemployed or 4 neighbors unemployed. He needs a job. There is no attempt here to equalize—make benefits available to those Americans who have not been lucky enough to have had a job, to help the youth even though in some cases 40 or 50 percent do not have a job. The substitute does not provide benefits of whatever meager program we have for youth programs. We are not talking about a program that is going to have an excess of jobs, but if statistics are to be used, they should not be faulty statistics. And all we have in the area of unemployment compensation statistics is faulty statistics.

Some of us have been working for years to try to secure better statistics because the statistics we have do not really measure the number of people who are unemployed in an area who are looking for a job. They measure more accurately the number who have had a job. We need to have better statistics on who is available for a job before we use those kinds of statistics to exclude people from a program like this.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Chairman, I think it is rather surprising to hear the side arguing about the formula that is in the Martin amendment. They today could not explain after supposedly 6 months of work on their bill anything about their formula. I asked on a number of occasions to have their formula explained. They could not do it. And yet they come out here and they complain about the formula that had to be written in 24 hours. I just find that absolutely amazing.

But that is hardly the point. Let us talk about what is really happening here today. What is really happening here today is that the Democrats have looked around, and they have seen that our economic recovery program is beginning to work. The interest rates have dropped from their 21½ percent down to 13½ percent; inflation has been cut in half; personal disposable income is up; the misery index has dropped; et cetera, et cetera, et cetera. So they know that their political hope lies in destroying that economic recovery program. It does not matter what happens to the country. It does not matter that that destroys what is going on in the country. But it is good politics. And that is all their bill is about today: It is pure politics. That is what they brought to this floor.

Well, it is a pretty good attempt at undermining our efforts, I must say that. What we are trying to do is put millions of Americans back to work on a broad-based scale. What they do is undermine that with increased deficits, thus raising interest rates and thus putting even more people out of work.

I cannot quite believe what the Speaker told us today, that they worked 6 months on this program. This is their jobs bill. This is all they have to offer. Think about it for a moment. They talk about 200,000 jobs. That means they are permanently going to leave 10.6 million people unemployed. After 6 months of work, that is what they came up with. "Let us leave unemployed 10.6 million people."

The Martin amendment at least keeps us on course. It has no new money in it, so it produces no new deficits; and therefore it keeps us on the economic course that we should be taking. I think that is one thing we ought to think about, because the Democrats' bill is an ET, it is an economic turkey. The trouble is, it does not get energized with Reeses Pieces either. It gets energized with hundreds of millions of new dollars that we cannot afford. I urge that we reject it and vote for the Martin amendment.

Mr. NATCHER. Mr. Chairman, I yield 5 minutes to the chairman of the Education and Labor Committee, the author of the bill, the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Chairman, I rise in support of the resolution and against the substitute.

First, let me state that the substitute, in my judgment, is unworkable. Under the resolution, reported by committee, we can put over 65,000 youth to work almost immediately. We would preclude the funding of any programs for the employment of youth if we were to adopt the substitute.

I know many of you have visited your State parks in the last year or 6 months. Today you have many fewer of the youth working to keep those parks safe and functioning than you had a year or a year and a half ago.

I think it is time that the Congress should move and do something about the unemployment situation. We cannot afford to stand idly by any longer and listen to these stories that prosperity is just around the corner—"Do not do anything to tinker with the economy from a governmental viewpoint by spending any money, otherwise we will cause interest rates to remain high."

They are making one of the craziest arguments that I have ever heard. That was the same type of argument that was made against Harry Truman when we tried to expand the Social Security Act when I first came to Congress in 1949, the same type of arguments made against Franklin Roosevelt when he founded the WPA and the CCC. But where we spent money on public improvements, bridges, roads, schoolhouses, and all types of public facilities, they are still standing and being utilized today. And by taking the jobless off the dole and giving them the jobs they so desperately want, we will improve the economy's chances for revival. But we do not intend to build any new bridges or any new water or sewer systems. We intend to only make the repairs and do some renovating on these vital public facilities that are crumbling today. That is what this bill calls for.

With the 10-percent unemployment rate throughout the Nation and with communities by the thousands that have roads, bridges, sewer systems and water systems deteriorating so rapidly, this money will be money well expended if we appropriate this billion dollars. It comes within the budget.

For fiscal year 1982, current Federal employment and training expenditures will not total more than $3.5 billion. We have cut these programs from about $8 billion in fiscal year 1980 down to about $4.1 billion, even if we appropriate this extra billion dollars for 1982. For fiscal year 1983 we do not have any money in either of the training bills now in conference with the Senate that will provide any jobs. We have training in the House and Senate bills, and that is all we have for fiscal year 1983 and beyond.

I think if this Congress fails to take steps to do something about the unemployment situation—oh, it can be said, "Let us not spend any Government money, let us keep doing everything we can to save money." That is a good argument, but when we have 13 million people unemployed, being paid all of this unemployment compensation, not paying any taxes, and on welfare, I think we have got to consider those costs, and not cut off our noses to spite our faces.

This economy is in a terrible shape. And you say, "Don't touch it, don't touch it. Let's not spend any Government money. It will make things worse." I say to you that if we take that attitude we will never get this economy moving again. Those arguments were thrown overboard under Harry Truman and under President Roosevelt.

□ 1610

The Government has to move in instances of extreme emergencies—that is its purpose. We should have moved long before this time not only on jobs legislation, but also on the interest rate and done something about it instead of letting the Federal Reserve and the administration destroy the economy of this Nation.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 1 minute to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Chairman, I would like both managers of these bills to tell me something: Does either bill cover a situation in a State which is slightly below the national average of unemployment but contains a county where there are 17-percent unemployed and cities where there are 15-percent unemployed?

Mr. NATCHER. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Kentucky.

Mr. NATCHER. The answer to the gentlewoman's question is "yes."

Mrs. FENWICK. In both cases?

Mr. NATCHER. As far as the committee bill before the committee, the answer is "yes." I will let the gentlewoman from Illinois (Mrs. MARTIN) answer on her side.

Mrs. MARTIN of Illinois. I am glad the gentleman is letting me answer even though the respected chairman wishes to answer.

The answer is "yes," although the difference is there probably would be twice as many jobs under my amendment.

Mr. NATCHER. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. PHILLIP BURTON).

Mr. PHILLIP BURTON. Mr. Chairman, the Reagan economic program has ravaged this Nation. Unemployment now stands at a rate higher than any time since the Great Depression. More than 10 million Americans are out of work.

The President and his supporters in Congress have brought this Nation to the edge of disaster—now we have an opportunity to repair some of the damage of Reaganomics.

This legislation will put people back to work. It will be directed at those jobs which will begin the monumental task of rebuilding this Nation's infrastructure—bridges, roads, sewers, and ports. This is not make-work, but a vitally important task which has been stalled by this administration's massive cutbacks in funds for transportation, wastewater treatment, and other important Federal programs.

I urge passage of this bill. The people of this Nation need jobs, not the failing economic experiments of the Reagan administration.

The CHAIRMAN. The Chair wishes to inform the gentleman from Kentucky (Mr. NATCHER) that he has 9 minutes remaining, and the gentlewoman from Illinois (Mrs. MARTIN) has 10 minutes remaining.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. CROCKETT).

Mr. CROCKETT. Mr. Chairman, today, after many months of watching the White House and others railroad this House into voting outrageous sums of money for defense, and into whittling away the desperately needed funding for domestic programs, today we are finally coming to grips with one of the most frightening and dangerous problems we have in this country—the growing ranks of the unemployed. The urgent supplemental appropriation for jobs, which is before us today, finally begins to recognize the urgency of the problem of unemployment and the absolute necessity for us to deal with it.

Mr. Chairman, I know that many Members in this Chamber have heard from their constituents about the unemployment problems they face. Members who have been home lately have heard increasing angry and bewildered constituents who have never before been out of work beseeching them for answers.

I would doubt, however, if any Member of this body has had to face what we in Michigan have faced over the past 2 years, during this long Reagan recession. In Michigan, more than 630,000 people are now out of work. In the 13th District which I represent, one out of every four workers is unemployed. And that figure does not count the thousands who have given up looking for work. Furthermore, that figure does not reflect the depression that afflicts the minority and youth segments of the job force in Detroit, where their unemployment averages between 50 and 75 percent.

The bill before us today is a good bill. It provides jobs for the unemployed for up to 6 months on projects that would tangibly benefit their communities. It gives priority to those areas hardest hit by the Reagan recession. It gives State and local governments a partnership role in determining the projects to be included in the program. And, contrary to the claims being offered by our Republican colleagues, it does not "bust the budget."

As the Reagan recession continues to drag on, more and more Americans are finding themselves caught in the economic vise. This bill would begin to address their needs, and would provide useful temporary jobs to 200,000 Americans, most of whom have or will have exhausted their unemployment benefits. It would allow communities to tackle needed projects that have been scuttled or put on "back burners" as their own revenues dried up. And, most importantly, it would give a signal to the American people that this Congress is finally willing and able to tackle the real issues before us.

Mr. Chairman, I urge my colleagues to join me in supporting House Joint Resolution 562.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 2 minutes to the gentleman from Connecticut (Mr. DENARDIS).

Mr. DENARDIS. Mr. Chairman, on many occasions during this 97th Congress, I have been extremely proud to be a Member of this body. There have been some excellent debates that have clarified and dramatized issues in contention. Sadly, this debate today does not rank with those occasions.

On the subject of jobs, the state of the art as discussed by this body in 1982 should transcend schoolboy and schoolgirl rhetoric, which unfortunately is all that we have had thus far.

The committee bill is a slapdash response to a critical problem. There is no effective job delivery and accountability system in the bill, not to mention a number of other defects that I have found in the bill. Unlike many on my side—and I want to assure those on the other side—I do believe there is a Federal role in dealing with high unemployment, particularly the problem of displaced workers who lose their jobs because of foreign trade and changes in consumers' buying choices, government policies and market responses. I must say that the committee bill inadequately deals with these and other problems connected with the merchanization of work in modern times. I commend the gentlewoman from Illinois (Mrs. MARTIN) for trying to make a poor bill better. The gentlewoman has improved the bill in several ways: the funding mechanism, eligibility standards, the allocation of jobs among them.

However, I disagree with the wage rate provision in the substitute bill. I think that is a dangerous undermining of the prevailing wage rate system. It can be condoned only because we are talking about short-term 6-month employment. Both bills, through, are not very creative approaches to the problem of unemployment in the 1980's.

What we are seeing today is not simply an economic upheavel but something far deeper, something that cannot be understood within the framework of conventional economics. That is why increasingly mystified economists complain that the old rules do not work any longer. We are seeing a general crisis in industrialism, a crisis that transcends the tired old economic debate between parties and ideologies.

We see emerging a different economic and social order: A postindustrial civilization that is increasing technological rather than industrial.

Our Federal "jobs policies" are quite pedestrian when measured to the high-speed world we now live in.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, unlike the bill that the Appropriations Committee has brought to the floor, the substitute does not provide funds for areas that have unemployment rates below the national average. It is very important to understand that. The committee bill has a 15-percent set-aside for those areas whose unemployment rates are below the national average.

Under the terms of the substitute bill, the following cities would be ineligible for funding: New York City, Los Angeles, Boston, Las Vegas, Philadelphia, Pittsburgh, Memphis, Atlanta, Kansas City, New Orleans, Miami, and Milwaukee.

How can one offer a bill that is a jobs program that does not touch some of the largest urban areas of the Nation? Our bill does provide for funding for such areas. Our bill is within the budget.

A letter from Budget Committee Chairman JAMES JONES to the Speaker certifies that the bill that we have brought to the floor is within the outlays remaining under the fiscal year 1982 budget resolution which has $1,096,000,000 in outlays remaining, and our bill is set at $1.035 billion. Those are some of the misconceptions that have been spread about this afternoon that have to be put to rest.

Furthermore, during the interim, I had my staff call some of the cities in my district and ask the public works department: "Are you ready to go to work? Are you ready to put people to work in 30 days if this bill is signed into law?"

The answer is: Yes, they are. They have people already lined up; people who have signed up for the jobs program in northeastern Minnesota that I mentioned earlier. The city of Duluth and the city of Virginia already have tar on hand, buckets of it, and asphalt for repairing city streets. They have aggregate piled up for fixing the potholes in those streets. They have wood for salt and sand boxes and they have paint ready to go on to the bridges and the buildings.

It is all ready to go. What they need is the money from this jobs bill to hire the workers. Let us pass the committee bill and put them to work.

□ 1620

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 1 minute to the gentleman from Georgia (Mr. GINGRICH).

Mr. GINGRICH. Mr. Chairman, this Martin substitute is a good substitute. Compassionate liberals who care about good government can vote for the Martin substitute because it cleans up some of the problems in the liberal leadership bill precisely by targeting the hardest hit unemployed areas and by providing jobs where jobs are most needed.

Conservatives who worry about budget deficits can vote for the Martin substitute because it takes money out of the Synfuels bill and away from giant corporations and turns that money into jobs for the unemployed without busting the budget.

Every Member who is concerned about the welfare system can vote for the Martin substitute because it does include a first step toward a workfare program to help welfare recipients gain real jobs.

The Martin substitute is compassionate, practical, targeted, and rationally written.

The Martin substitute is good politics, good government, good for this country and a good vote for any Member this afternoon.

Mr. OBERSTAR. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names.

□ 1630

The CHAIRMAN. Three hundred and fifty-nine Members have answered to their names, a quorum is present, and the Committee will resume its business.

The Chair will state that there are 7 minutes remaining on the part of the gentlewoman from Illinois (Mrs. MARTIN) and 5 minutes remaining on the part of the gentleman from Kentucky (Mr. NATCHER).

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 3 minutes to my colleague, the gentleman from Illinois (Mr. CORCORAN).

□ 1640

Mr. CORCORAN. Mr. Chairman, again I want to thank my colleague from Illinois (Mrs. MARTIN) and congratulate the gentlewoman from Illinois for the wisdom of offering her alternative.

With respect to the provisions of her amendment, most of them have been addressed already. I would like to address two other aspects: First, the financing procedure for this amendment; and second, the comparison in the cuts thus far that have been made with the Synthetic Fuels Corporation which is involved in our amendment, and the reductions that have been made throughout the balance of the Federal Government elsewhere.

First of all, Mr. Chairman, with respect to the financing for our approach, it is a transfer of $1.5 billion from the Synthetic Fuels Corporation, which I think can be easily digested by that boondoggle operation because of the fact that 2 years ago we appropriated some $20 billion to that agency. Out of that $20 billion, some $14.9 billion remains unobligated and available for this kind of program, or, if the priorities are on the other side, with some additional synthetic fuel project.

There is no question about the fact, Mr. Chairman, that there is short-term outlay. Let there be no mistake about that. There are several differences however, Mr. Chairman, between the approach taken in House Joint Resolution 562 and the pending Martin amendment. First, we do not enlarge the size of the Government. We do not add to the power of the Federal Government in our society. In fact, what we do provide for is a transfer from an already appropriated funding program in the Synthetic Fuels Corporation to this jobs program.

It is an initial outlay, but on the other hand I would quickly point out that one of the things that concerns us the most is the fact that there will be huge outlays made by the Synthetic Fuels Corporation. The gentleman from Texas (Mr. WRIGHT), one of the prime advocates of Synthetic Fuels Corporation, will try to tell the Members that the loan guarantees, the price supports, and all the other kinds of subsidies to the large energy corporations do not amount to money, do not amount to real funding responsibilities on the part of the Federal Government. In fact, that is not true, and we have only to look again with reference to the Congressional Budget Office, Mr. Chairman, to see that their analysis suggests that in the next several years the outlays from the Synthetic Fuels Corporation will be somewhere between $4 and $5 billion.

As I said, Mr. Chairman, the Congressional Budget Office has estimated that the Synthetic Fuels Corporation outlay impact on the Federal budget and on our economy will be somewhere between $4 and $5 billion. In case my articulation is not too good, that is with a "B," "as in busted."

Second, Mr. Chairman, there is the impact that the presence of loan guarantees in the magnitude remaining of some almost $15 billion has on the money markets. One of our problems in this country today is that we have had the Federal Government too heavily in the credit markets. That is one of the reasons why we have not been able to get the interest rates down to realistic levels for people of this country.

Third, with respect to inflation, because our approach benefits the country not only from the standpoint of interest rates but inflation, as the Washington Post points out this morning, the Democratic alternative would exacerbate inflation.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield 30 additional seconds to the gentleman from Illinois.

Mr. CORCORAN. Mr. Chairman, one other point I would like to make is this: As everybody in this House knows, we have made substantial reductions in the Federal budget for fiscal year 1982. In addition to that, for fiscal year 1983 we have cut the nutrition program 10 percent, the food stamp program 10 percent, COLA 15 percent, student loan programs 11 percent. We are now asking for a 10-percent cut in the Synthetic Fuels Corporation, $1.5 billion out of roughly $15 billion of remaining funds.

Do we want to continue from the standpoint of the Democratic Party, which, in my judgment, in this issue has lost its soul to support subsidies for the big oil companies, or do we want to change and reorder our priorities in view of existing circumstances? We can reorder our priorities by supporting a reduction in synfuels which would help us in the battle against high inflation and high interest rates while also taking people of welfare and putting them to work. I think the answer should be clear both to the Congress and the American people.

Mrs. MARTIN of Illinois. Mr. Chairman, I yield such time as he may consume to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. Mr. Chairman, I rise in support of the amendment offered by the gentlewoman from Illinois and in opposition to House Joint Resolution 562.

This bill is just another example of how the leadership of the majority party has failed to develop a constructive alternative to the President's economic recovery program. The only alternative they offer is a return to the policies of the past which led us into the current recession.

This bill is being presented as a "jobs" bill. Unfortunately, that is a misnomer. This is not a jobs bill but an antijobs bill. If the Congress were to enact this legislation, more Americans would lose their jobs than would be hired under the provisions of the bill. I say that Mr. Chairman, because this legislation would add another $1 billion to the deficit, thus rekindling inflation and increasing pressure to raise interest rates. The financial community of the Nation would react very negatively to passage of this legislation. Any hope of an economic recovery would be lost for months to come.

Any economist can tell you that the last area to show improvement when an economy comes out of a recession is unemployment. Before businesses can rehire laid-off employees, the economy must be stimulated. Interest rates must come down as well as the inflation rate. Yes, unemployment remains unacceptably high.

But as the economy picks up, people will return to work, to meaningful, long-term jobs. Our economy is now primed for the recovery. To yield now to the temptation to pass a bill entitled "Jobs," regardless of how poorly constructed that bill may be, would destroy the groundwork we have worked so hard to create.

It seems absolutely irresponsible for the leadership of this House to risk any chance we have of an economic recovery for the sake of preelection demagoguery. I have yet to hear the leaders of the majority party give the President credit for the improvements in the economy which have occurred since he took office. And in those cases where success has yet to be achieved, the only solutions offered are policies of the past. Policies such as those incorporated into this bill. Policies which have been proven to be failures. We have tried these make believe jobs bills in the past. Their history demonstrates that they fail and fail miserably to achieve their goals.

A great number of those who have expressed concern about the unemployment rate represent the Detroit area. Well, I represent a district heavily impacted by the auto industry. However, I know that not one unemployed auto worker will be returned to his or her job in an auto factory if this bill were ever enacted. It seems the cruelest hoax of all to offer this legislation as a solution to unemployment in the auto industry.

I have talked to a number of unemployed auto workers. Not one of them wants to be hired on a short-term public works job. They want to return to their chosen vocation and work for a living in a meaningful and rewarding job.

Perhaps the one sector of our economy which would most adversely be affected by passage of this legislation

are small businesses. Small businesses are the ones most adversely affected by the slow economy and therefore have the greatest stake in seeing the economy improved. I have read where 80 percent of all new jobs are created by small businesses. If we enact legislation which will increase interest rates, we will be doing exactly the opposite of what we desire to accomplish. More small businesses will be bankrupt and it will be harder than ever to find meaningful employment.

I urge my colleagues to reject this legislation. What this Nation wants is a strong economy. Americans want to be able to work in a meaningful job without fear of being unemployed. This bill does nothing to bring us closer to that goal. We owe our constituents a better effort than simply throwing up our hands and giving up on the President's economic recovery program. We owe our constituents our best efforts for long-term economic recovery. This bill does not represent our best effort, nor does it represent any hope for a long-term recovery. I urge defeat of the bill.

Mrs. MARTIN of Illinois. Mr. Chairman, I reserve the balance of my time.

Mr. NATCHER. Mr. Chairman, we only have one speaker on this side who will close debate. The balance of the time will be yielded to the majority leader.

Mrs. MARTIN of Illinois. May I ask a question of the Chair? As the sponsor of the amendment, I reserved time so that I could close the debate on this side of the aisle. Certainly if it is the wish of the majority leader to close, I wish to do what is appropriate, however, and I bow to the wishes of the Chair.

The CHAIRMAN. The Committee has the right to close, and so the gentlewoman will proceed.

Mr. NATCHER. Mr. Chairman, I yield the balance of the time on this side to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

The CHAIRMAN. The gentleman from Texas (Mr. WRIGHT) is recognized for 5 minutes.

Mr. WRIGHT. Mr. Chairman, I think it is somewhat remarkable that after all these months of telling us we did not need to do anything at all to create jobs, when we finally get a modest jobs bill up for consideration the Republican side now says, "Well, we are going to do it better. We are going to do twice as many jobs at half the cost."

That is indeed an extravagant claim and if it were achievable it would be worth considering. The difficulty is it does not really work that way, and I do not think anybody is deceived.

I do not suggest that the very charming and intelligent gentlewoman who is the author of the amendment is trying to deceive anybody. I do not make that suggestion.

But I do suggest that if anybody seriously believes there are going to be twice as many jobs for half the cost, that person is indulging in a self-deception. Obviously that claim is not true and is thoroughly uncreditable.

What are they trying to do with this substitute? They are trying to make it appear that they can perform the work and not cost anything. They say they will take it from synthetic fuels.

I wonder how long our memories are. Twice in a decade the American economy was brought to its knees by an Arab oil embargo. After the second time this House responded with an initiative. The synthetic fuels program passed this House by 368 to 25. Now the person who I understand had something to do with the drafting of this amendment, Mr. Stockman, was one of the 25. He has never believed in alternate fuels. Mr. Stockman has never supported the synthetic fuels program. But by a ratio of about 15 to 1 Democrats and Republicans did.

We staked out our claim. We said we are going to make this Nation of ours energy independent, however long it takes. That was our firm resolve.

Now scarcely 2 years later some are back saying, "Oh let's take that money from the energy independence program and put it on this program and that way it won't cost anything."

Some tried to do that scarcely 4 months ago when we had a housing initiative. The gentleman from Illinois (Mr. CORCORAN) who seems really more interested in destroying the alternate fuels program than he is in helping to create jobs, made his speech then. It was the same as his speech today, and it was rejected by a bipartisan vote of 240 to 158. That position did not prevail then and it will not prevail today.

Obviously if you take the money that is appropriated for future expenditures, for loan guarantees, and spend it this year it adds just exactly that much to this year's deficit. You do not get any free lunch; no such thing. If you spend it, it is spent. And it adds to the deficit.

So that is the choice.

The second thing they say is this: "Oh, well, it is not going to cost us so much because we shall pay only those people who are drawing benefits."

Stop and analyze whom that leaves out. Only two-fifths of the unemployed are drawing those benefits.

Who are the hardest hit? Three and a half million people already have exhausted their benefits and at the end of this month another 600,000 will join the ranks of those for whom the benefits are exhausted, 4 million.

Sixty percent of the unemployed do not draw the benefits. Are they not after all those who are in most need of help? Yet they are the very people who would be excluded by the Republican substitute.

Finally, it is suggested, I suppose, that you can have more jobs for less money by paying substandard wages. Perhaps you could.

But surely an enlightened citizenry long since has determined the policy and a wise public policy that public funds should not be used to depress wages in any market. It never ought to be said that we have used public funds for the purpose of offering substandard wages, below the prevailing wage.

So for all of these three reasons the amendment reluctantly offered by our friends from the Republican side, those who never offered anything by way of a jobs initiative until this bill came to the floor, really is flawed and wanting.

If you are serious about wanting to provide some jobs for some people, not all of them unemployed—this bill is no panacea—but if you want to help to provide a tourniquet to staunch the hemorrhage by which this economy is bleeding, and unemployment still rising, if you want to try to put people back to work and turn the economy around, maybe begin the recovery that everybody has been anticipating, some have been prophesizing, others already heralding, but which by the statistics has not yet arrived, then vote for the bill. Reject the substitute and support the bill.

PREFERENTIAL MOTION OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. CONTE moves that the Committee do now rise, and report the joint resolution back to the House, with the recommendation that the resolving clause be stricken out.

The CHAIRMAN. The gentleman from Massachusetts (Mr. CONTE) will be recognized for 5 minutes.

Mr. CONTE. Mr. Chairman, I listened very attentively to this debate today from both sides of the aisle.

When I first got up here today I spoke against the Democratic bill and termed that bill as a "watermelon" which was 99 percent water and filled with seeds, and I said that if we passed that bill, we will be spitting those seeds out for a long, long time to come.

There is nothing in the bill on waste, abuse, and fraud. We saw what happened with the old CETA program. It was loaded with waste, fraud, and abuse.

Now we come over here with a Republican bill and I am going to term that bill the muskmelon bill. Same thing, 99 percent water; the seeds are smaller, but they are just as tough to digest.

It is an election year and everybody wants to get on the bandwagon to show that they are doing something

for the unemployed. They want to go back home, pound the tom-toms, and say "we have done something."

This is pouring corn down a rat hole and a waste of $1 billion of taxpayers' money.

Nobody got up here today and said what is the root cause of our problem. There are two primary reasons why unemployment is so high in this country: the automobile industry and the housing industry.

The housing industry is sick because of high interest rates.

You know we passed that tax bill—that was a bipartisan bill—a couple of weeks ago and that was really great, great to have the Democratic leadership and the Republican leadership come in here together for a good bill. We saw the reaction on Wall Street, and we saw what happened in the stock market.

Are we going to send them a signal now that we are coming up here with a balloon that will do nothing but give people some jobs for shuffling papers?

The gentleman from Minnesota keeps talking about how there is plenty of cement out there, there is plenty of paint out there, and there is plenty of steel out there.

Mr. CONTE. Let me tell you something, you have got to have the expertise to take on a job to fix those bridges.

Let me tell you another thing, as an old union man. The last thing in the world you want to do is to bring someone up there that has never worked on a bridge or never worked on a high structure and say, "Look, come in here and do this work."

One, he is going to get hurt, or she is going to get hurt, and, second you are busting the unions. That is what you are doing.

□ 1700

These workers are not members of that union, and they do not qualify for those unions. And you do not want any scabs on the job. And if you get those interest rates down and you start building houses, then you will see that people will start buying appliances, stoves, washing machines, dishwashers, and dryers. This will put people to work.

Then there is the automobile industry. Look at what happended, the tragedy. You cannot blame this on the Republicans. You cannot fool the American public. The automobile industry was sick during the Carter administration. Unemployment in Michigan was 20 or 21 percent during the Carter administration. It was the Japanese and it was the Europeans who were coming in here, flooding our markets, putting those good people in Michigan out of a job. If you will put the automobile industry back to work, you will have the glass industry back to work, you will have the steel industry back to work. But this bill here will put nobody back to work.

Now, we passed a good bill here recently, the old CCC bill, the old Civil Conservation Corps bill. I remember that bill during the depression because my father was laid off from the General Electric Co. I went through that Depression and I know what we went through, and I know what people are going through today. Roosevelt came in with the CCC camps. He put people to work in the front. He took people from the cities who were unemployed and brought them up to the forests, and there they built campsites, trails, and picnic areas. And those places today are functioning. You tell me what is going to function after this bill is passed. You will not even be able to find a piece of paper after it is passed.

That is why I said I was for the Wright bill, the old Wright bill, the old public works bill. That was a good bill.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. CONTE) has expired.

Mr. CONTE. What a shame.

Mr. NATCHER. Mr. Chairman, I rise in opposition to the preferential motion.

Mr. Chairman, during the debate on this bill, as you will recall, we pointed out that in the committee bill we had $1,035,000,000. We still have remaining, if this bill is enacted, about $2,100,000,000 under our section 302 allocation for the Committee on Appropriations.

Now, the substitute offered by the gentlewoman—and, Mr. Chairman, as I have said to her twice before, she handled her substitute in an excellent manner—$1,500,000,000, just transfer the money. On this side, in the committee bill, Mr. Chairman, we have $1,035,000,000. The substitute is more expensive.

During general debate on this bill a number of speakers said, "Why, take a look at the jobs they are talking about in the bill." Road and street repair, that is No. 1, set out on page 4 in the bill. No. 2, bridge painting and repair. And, Mr. Chairman, you will recall, they said, "How many bridges are you going to repair? How are you going to do it?" And then the substitute comes along with 14 types of jobs and every category copied out of the committee bill.

Mr. Chairman, let me say this to you: In the committee bill we keep the 15 percent for the youth program, $150 million. I do not believe that a Member in this House will tell you that this is a bad program, that this is a squandering of money. That $150 million, added to the $192 million in the continuing resolution, gives us about $342 million for the youth in this country. That is in the committee bill.

And I say to you, Mr. Chairman, the fact remains in this country we have about 11 million people walking the streets, looking for jobs. They want to go to work, Mr. Chairman. Eleven million people, 9.8 percent. Mr. Chairman, those are the facts.

This bill on the committee side is a step in the right direction.

You say it is a boondoggle. When are you going to move? When do you intend to take that step? This is the day to take it.

Mr. Chairman, the preferential motion should be refused. The substitute offered by the gentlewoman from Illinois should be refused. This bill should be voted up and enacted into law.

The CHAIRMAN. The question is on the preferential motion offered by the gentleman from Massachusetts (Mr. CONTE).

The preferential motion was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Illinois (Mrs. MARTIN).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mrs. MARTIN of Illinois. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 152, noes 243, not voting 37, as follows:

[Roll No. 338]

The Clerk announced the following pairs:

On this vote:

Mr. Beard for, with Mr. Annunzio against.
Mr. Butler for, with Mr. Pepper against.
Mr. McClory for, with Mr. Akaka against.
Mr. Tauke for, with Mr. Weiss against.
Mr. Young of Alaska for, with Mr. Smith of Pennsylvania against.
Mr. Moorhead for, with Mr. Rose against.
Mr. Thomas for, with Mr. Reuss against.
Mr. Johnston for, with Mr. Simon against.

Mr. BETHUNE and Mr. CARNEY changed their votes from "aye" to "no."

Mrs. ASHBROOK changed her vote from "no" to "aye."

So the amendment was rejected.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker, having resumed the chair, Mr. MINETA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the joint resolution (H.J. Res. 562) making an urgent supplemental appropriation for the Department of Labor for the fiscal year ending September 30, 1982, pursuant to House Resolution 582, he reported the joint resolution back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the joint resolution?

Mr. CONTE. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. CONTE moves to recommit the joint resolution (H.J. Res. 562) to the Committee on Appropriations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the joint resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. CONTE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 223, nays 169, not voting 40, as follows:

[Roll No. 339]

□ 1740

The Clerk announced the following pairs:

On this vote:

Mr. Annunzio for, with Mr. Beard against.

Mr. Pepper for, with Mr. Butler against.

Mr. Akaka for, with Mr. McClory against.

Mr. Weiss for, with Mr. Tauke against.

Mr. Smith of Pennsylvania for, with Mr. Young of Alaska against.

Mr. Rose for, with Mr. Moorhead against.

Mr. Reuss for, with Mr. Thomas against.

Mr. Simon for, with Mr. Johnston against.

Mr. John L. Burton for, with Mr. Frenzel against.

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

RESOLUTION TO EXPRESS THANKS TO FORMER FIRST LADY BETTY FORD

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the concurrent resolution (H. Con. Res. 407) a resolution to express thanks to former First Lady Betty Ford, and ask for its immediate consideration in the House.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore (Mr. FOLEY). Is there objection to the request of the gentleman from Michigan?

Mr. MICHEL. Mr. Speaker, reserving the right to object, and I shall not object, I want to thank the gentleman from Michigan for his motion here.

What I have introduced is a concurrent resolution commending our former First Lady, Betty Ford, for the efforts that have led to the establishment of the Betty Ford Center at the Eisenhower Medical Center in Rancho Mirage, Calif. They are going to dedicate this center on October 3, and what we would obviously like to have is a concurrent resolution passed by the House and the other body in time for that very special dedication ceremony.

I thank the gentleman from Michigan again for his cooperation.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I will be happy to yield.

Mr. FORD of Michigan. Mr. Speaker, I would simply like to thank the gentleman from Illinois for the opportunity to join in this very worthwhile tribute to a great American who is especially close to us in Michigan. We appreciate the gentleman's initiative on her behalf.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, I simply want to take this moment to join in saying how appropriate is this tribute and urge support of the resolution.

Mr. MICHEL. I thank the gentleman.

Mrs. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I am happy to yield to the gentlewoman from Louisiana.

Mrs. BOGGS. I thank the gentleman, and I thank the House for the consideration of this resolution to thank a beautiful and remarkable lady who has been such a good friend to all of the people of the United States, particularly those who are suffering with cancer.

I applaud the gentleman from Illinois and the gentleman from Michigan for giving us this opportunity to say thank you to her.

Mr. MICHEL. I thank the gentlewoman, and will be seeing the former First Lady tomorrow in Michigan at the ceremonies at the library in Grand Rapids, and I shall be sure to tell her of the comments of the gentlewoman from Louisiana, the distinguished majority leader, and the cooperation of my friend from Michigan (Mr. FORD).

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the concurrent resolution as follows:

H. CON. RES. 407

Whereas former First Lady Betty Ford has shown exemplary courage in making public her personal problems with alcohol and drug addiction; and

Whereas Betty Ford's unselfish revelation has given hope and incentive to countless Americans who have been engaged in unsuccessful battles with alcohol and drugs; and

Whereas Betty Ford has not only overcome her own problems with chemical addiction, but has led a vigorous and beneficial life dedicated to helping those struggling with alcohol and other drugs; and

Whereas Betty Ford has devoted her talents to securing passage of legislation by the State of California providing for high quality yet lower cost care for victims of this disease and in leading a successful fundraising drive to create such a facility to offer treatment and hope to those suffering from chemical dependency; and

Whereas Betty Ford's efforts have led to the establishment of the Betty Ford Center at Eisenhower as a part of the Eisenhower Medical Center in Rancho Mirage, California, and whereas the Betty Ford Center will be dedicated on October 3, 1982 and will begin treating its first patients, suffering from chemical dependency, on October 4, 1982.

Resolved by the House of Representatives (the Senate concurring), That the Congress of the United States expresses its grateful appreciation to Betty Ford, on behalf of the people of the United States, for the courage and dedication of her efforts to recognize the massive problem of chemical dependency, and to give care and hope to those who labor under the burden of this heinous disease: and, therefore, be it

Further resolved,

That a copy of this concurrent resolution be duly presented to the Betty Ford Center and to Mrs. Ford.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend

their remarks on the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

CELEBRATING THE 172D ANNIVERSARY OF MEXICAN INDEPENDENCE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs be discharged from further consideration of the resolution (H. Res. 586) celebrating the 172d anniversary of Mexican independence, and ask for its immediate consideration in the House.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, may I ask my colleague, is this the resolution that several of us have been encouraging be brought to the floor today, the one I have cosponsored with the gentleman?

Mr. ZABLOCKI. The gentleman is correct.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 586

Whereas September 16, 1982, marks the one hundred and seventy-second anniversary of the declaration of Mexico's independence from the Kingdom of Spain;

Whereas Mexico has enjoyed a longer uninterrupted period of democratically elected self-government than any other nation in Latin America;

Whereas the destinies of our two countries are inextricably bound together by geographic, cultural, historic, and economic ties; and

Whereas the people of the United States have long recognized the important contributions made by its citizens of Mexican descent who have immeasurably enriched our own society and culture: Now, therefore, be it

Resolved, that the House of Representatives—

(1) extends to the Government and people of Mexico its warmest congratulations and sincerest best wishes on the occasion of the anniversary of Mexican independence;

(2) expresses confidence that Mexico, in cooperation with other nations, will help overcome the economic difficulties facing the hemisphere; and

(3) renews the expressions of friendship and understanding which have long characterized relations between our two countries.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 1 hour.

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may consume, and I yield to the gentleman from Texas (Mr. WRIGHT), the distinguished majority leader and a principal sponsor of the resolution.

Mr. WRIGHT. Mr. Speaker, this resolution commends our sister Republic of Mexico and our good neighbor across the border on their valiant efforts to restore economic stability and the declaration of faith in their future on this, the day on which they celebrate their independence.

I think all Members most surely would want to join in support of this resolution.

Mr. ZABLOCKI. Mr. Speaker, I rise in support of House Resolution 586.

Mr. Speaker, I would like to join the distinguished majority leader, who spoke earlier today with his usual eloquence and historical perspective, in recognizing that today, September 16, 1982, marks the 172d anniversary of the Declaration of Mexican Independence.

The majority leader has described the events of that day in the year 1810, which began Mexico's long struggle for freedom, national dignity, and self-determination. Today, it should be noted that Mexico has enjoyed the longest period of democratic self-government of any nation in Latin America. As that country's closest neighbor, we recognize that Mexico's destiny is inextricably linked with our own.

The history of Mexico's independence movement, which has brought that country to the forefront of world attention as one of the leading nations of the Third World, is increasingly recognized and understood by Americans in all regions of this land. Our peoples are linked by cultural, family, and economic ties and more of our own citizens visit Mexico than those of any other country. To Mexico, tourism has emerged as the second largest and most significant industry.

We have also learned to recognize and appreciate the important contributions made by Americans of Mexican descent to our own society, our economy, and culture. The impact of Mexico on our national life is not, in fact, limited to the 2,000-mile border area—often referred to as one of the longest undefended borders in the world today. Even in areas as far north as my own Fourth Congressional District in Wisconsin, the Mexican-American community plays a vital and constructive role in local government and community affairs.

Mr. Speaker, Mexico today is experiencing severe economic problems and a period of financial uncertainly—caused to a considerable extent by world economic trends and dislocations—as the Government's leadership attempts to cope with the challenges of recession, foreign indebtedness, and high unemployment. Mexico is, however, a land of vast natural and human resources and has a clear potential for future development and prosperity.

I know that Members of this body join me in expressing the profound hope, and indeed basic conviction, that these current difficulties will be successfully overcome in a spirit of international cooperation and mutual understanding. Our interest in Mexico's ultimate fate and survival as a democratic nation in this hemisphere is, we fully realize, inseparable from our own, and we must work together as neighbors to insure that Nation's economic viability and stability.

□ 1750

Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. BROOMFIELD).

Mr. BROOMFIELD. Mr. Speaker, as the ranking minority member of the House Foreign Affairs Committee, I am pleased to join with the chairman in supporting this legislation which recognizes the 172d anniversary of the declaration of "El Grito de Dolores," the "Cry of Dolores," the inspiring call to freedom for Mexicans. It is the day when our great neighbor, Mexico, celebrates the spirit of freedom and the extension of human rights and privileges to the populace of that country.

On that day in 1810, Father Miguel Hidalgo y Costilla, a parish priest in Dolores, Mexico, spurned his usual sermon; he, instead, asked his followers to take up arms against their Spanish oppressors. Father Hidalgo's parishioners, consisting of Indians and Mestizos, were fully prepared to answer the call; they banded together and began to attack Spanish outposts. Inroads against Spanish troops were continually made. Father Hidalgo was captured and later executed. Others took up the struggle. Spain finally acknowledged Mexico's independence after many bloody and arduous years.

Throughout the history of our two nations, the people of Mexico and the United States have maintained a close friendship. This affinity is based on the common heritage of our struggle for freedom from European domination. It is necessary and fitting that we honor those Mexicans and their descendants for contributing to the unending quest to maintain human dignity. They also fought to preserve a unique cultural heritage.

Today, Mexico and America are becoming increasingly interdependent as two dominant nations in the Western Hemisphere. Mexico has made great strides in developing its natural resources and its economy. As an important trading partner and a growing market for Mexican energy exports, the United States can share with pride its close neighbor's economic progress.

Let us not forget, however, the cultural contributions of Hispanic-Americans to our Nation. Americans of Hispanic heritage are becoming an ever-increasing political force in our coun-

try. As its largest ethnic minority group, Hispanic art, music, food, and language have greatly enhanced the richness of American life.

This is why we celebrate this day to honor Father Hidalgo y Costilla as a great patriot. Not only did he lead the movement toward independence for his country, but he gave hope for a better life to the poorest in his country.

I take great pride in saluting Mexico and our citizens of Mexican descent on this, the day of "El Grito de Dolores."

Mr. ZABLOCKI. Mr. Speaker, I have no further requests for time, and I move the previous question on the joint resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 6995, FEDERAL TRADE COMMISSION ACT AUTHORIZATION EXTENSION

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 97-821) on the resolution (H. Res. 587) providing for the consideration of the bill (H.R. 6995) to amend the Federal Trade Commission Act to extend the authorization of appropriations contained in such act, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 5723, DEPARTMENT OF TRANSPORTATION AUTHORIZATION FOR CERTAIN MARITIME PROGRAMS, 1983

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 97-822) on the resolution (H. Res. 588) providing for the consideration of the bill (H.R. 5723) to authorize appropriations for certain maritime programs of the Department of Transportation for fiscal year 1983, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PROVIDING FOR CONSIDERATION OF H.R. 5543, OCEAN AND COASTAL RESOURCES MANAGEMENT AND DEVELOPMENT BLOCK GRANT ACT

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 555 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 555

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5543) to establish an Ocean and Coastal Resources Management and Development Fund and to require the Secretary of Commerce to provide to coastal States national ocean and resources management and development block grants from sums in the Fund, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Missouri (Mr. TAYLOR), pending which I yield myself such time as I may use.

Mr. Speaker, the resolution provides for the consideration of the bill, H.R. 5543, a bill to establish an ocean and coastal resources management and development fund, and to require the Secretary of Commerce to provide to coastal States national ocean and resources management and development block grants from sums in the fund.

The rule provides 1 hour of general debate to be equally divided and controlled by the chairman and the ranking minority member of the Committee on Merchant Marine and Fisheries. This is a straight open rule, allowing any germane amendment to be offered under the 5-minute rule. There are no waivers of points of order in this rule. There is one motion to recommit in order.

Mr. Speaker, H.R. 5543 establishes a coastal zone management fund from a portion of the total revenues the Treasury receives from its Outer Continental Shelf mineral leasing. The bill provides that 10 percent of all future receipts from the Outer Continental Shelf revenues, up to a maximum of $300 million annually, shall be deposited in the coastal zone fund. The Secretary of Commerce shall then use the fund to make block grants to coastal States based on their relative amounts of population, coastline, and off-shore leasing activity. The grant money can then be used by the States for any of the activities listed under five broad categories in the bill.

Mr. Speaker, the purpose of this bill is to facilitate the management of offshore oil and mineral leasing activities by making the States and Federal Government partners in this management. This bill recognizes the role the States must play in the managing and developing of our off-shore resources. The bill also earmarks money for the national sea grant college program.

Mr. Speaker, it is important that we maintain our commitment to those States that must share the burden of developing our energy and mineral resources in the national interest. I urge my colleagues to adopt House Resolution 555, so that the House may proceed to the consideration of this very important legislation.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 555 is a straightforward, open rule providing for consideration of legislation to create a new program of block grants to the States for improving the management of ocean and coastal zones.

The rule is a simple one, allowing any and all germane amendments, and containing a straight motion to recommit.

The bill it makes in order, however, H.R. 5543, is a complicated effort on the part of the Committee on Merchant Marine and Fisheries to undertake a new Federal expense at a time when our main focus is—and should remain—the reduction of expenditures and bringing under control our almost overwhelming Federal deficit.

When this legislation was considered in the Committee on Rules, we were told of the high degree of controversy over this bill. The ranking Republican member of the Merchant Marine Committee, the distinguished gentleman from Kentucky (Mr. SNYDER), described this bill as "an insult to the American taxpayer."

Mr. Speaker, I am inclined to agree with the gentleman from Kentucky, who also told us that this bill "flies in the face of everything we have been trying to accomplish to decrease Federal spending, decrease Government regulation, and decrease the Federal deficit."

As reported from committee, the bill made in order by this rule, will earmark up to $300 million to fund a sea grant program. I am told that this inventive program is designed to assist college graduate students in getting their education paid for by the taxpayer. In addition, the bill provides a revenue-sharing program with funds going to coastal States to continue the federally funded jobs for planners of State coastal zone management.

The bill would finance all these programs out of the revenues from the Outer Continental Shelf oil and gas leasing receipts, receipts which go directly to the U.S. Treasury.

Mr. Speaker, even with the controversy surrounding the committee's bill, we are not told that a substitute will be offered to replace the block grant concept with a genuine revenue-sharing program. That is a wonderful

improvement, I guess—but the Federal financial liability is increased in the substitute from $300 million per year to $500 million.

I am very pleased to call to the attention of the Members that the gentleman from Kentucky (Mr. SNYDER) has filed in the CONGRESSIONAL RECORD of September 9 a series of amendments. There are 28 in all, and I am told that he intends to offer each and every one of them.

Mr. Speaker, while I do not like to oppose an open rule, I certainly hope the Members consider carefully the bill this rule makes in order.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Illinois.

(By unanimous consent Mr. MICHEL was allowed to speak out of order.)

LEGISLATIVE PROGRAM

Mr. MICHEL. Mr. Speaker, I ask the gentleman to yield noting that the majority leader is on the floor, and I wonder if it might be appropriate for us to take time at this juncture to aprise Members of what is in store for us for the balance of the day.

I am apprehensive that some Members might have thought we had concluded the business and would be taking leave when there may very well be a rollcall or two here.

If that is in order, Mr. Speaker, I would like to yield to the distinguished majority leader out of the time allotted me here that we might find out for sure what is taking place for the rest of the evening.

□ 1800

Mr. WRIGHT. I thank the gentleman, and I agree that it is appropriate at this time.

I had not supposed that we would have any controversy on this rule. I was not aware that the rule had controversy, and we had planned that we would take up this rule on this bill and then the rule on the Department of Transportation appropriation bill, and we would then complete general debate on the Department of Transportation appropriation bill. The manager of the bill, the gentleman from Florida (Mr. LEHMAN), indicates to me that it is his belief that it can be done with a minimum of expended time. That was our hope, in order that we could conclude the debate tonight and not have any session tomorrow at all.

The House would meet at noon on Monday, but would postpone any recorded votes on a series of suspensions which are scheduled until Wednesday, and that we would conclude general debate on a bill for which the presently pending rule would make a 1-hour open rule in order, but not take up anything beyond general debate on Monday. So there will be no votes on Monday.

On Tuesday we would begin with the Private Calendar, then take up the Agriculture appropriation, bill for fiscal year 1983 and complet consideration of the Transportation Department appropriations bill for fiscal year 1983. Thereafter we shall try to finish the ocean and coastal resources management bill.

For Wednesday and the balance of the week, the House would meet at 10 o'clock. The first thing we shall do is to take recorded votes on suspensions debated on Monday. Members should expect that a continuing appropriations bill for fiscal year 1983 might be considered, perhaps on Wednesday, if the Appropriations Committee can perfect such a bill on Tuesday.

In addition to that, we want to complete the Defense Industrial Base Revitalization Act, which has been on the floor more than once. There is a bill clarifying jurisdiction of Securities and Exchange Commission and another companion bill known as the Commodity Futures Trading Act of 1982. We have some obligation to try to get those enacted.

The FTC authorization, subject to a granting of the rule.

The Surface Transportation Act of 1982, also subject to the granting of a rule, as are the others which I shall hereinafter name:

Health Planning Block Grant Act; Health Research Extension Act; Regulatory Reform Act of 1982, about which the gentleman from Georgia (Mr. LEVITAS) frequently has inquired; and the nuclear waste disposal bill.

Members should expect that there will be a Friday session next week. We have only a relatively few days remaining before our expected adjournment of October 8, and we would like to conclude as much of the business as possible by that time.

We would expect, of course, to adjourn by 3 p.m. on Friday, and on other days we will just have to announce the adjournment hour from time to time. Of course, conference reports may be brought up at any time, and any further changes will be announced.

Mr. MICHEL. I thank the distinguished majority leader. While the gentleman said that he understood there was no controversy on this rule, it is my understanding that at least one Member was concerned about it and wanted to have a rollcall vote. Now, I am not sure whether or not that Member would still exercise that prerogative, but I think it is best that Members be put on notice, as a precautionary move, rather than having Members needlessly miss a rollcall vote.

I see the gentleman from Georgia (Mr. LEVITAS) is on the floor. He has been persistently arguing and agitating for the Regulatory Reform Act to be brought to the floor of the House. I see a broad smile on his face indicating his pleasure, obviously, that at least it is scheduled. I hope that we get to it. I would be happy to yield to the gentleman if he has some comment to make.

Mr. LEVITAS. I thank the gentleman from Illinois for yielding, and I express my appreciation to him for his assistance. But I also want to commend the leadership, the majority leadership, for scheduling this bill. I realize it is subject to a rule being granted. But we take them one at a time as we get them. I think it is consistent, of course, with a letter which the Speaker wrote to President Reagan, saying that he expected to complete action on regulatory reform by mid-September. The Speaker, obviously and quite clearly, is a man of his word, and I think that the inclusion of regulatory reform legislation on the calendar for next week is totally consistent with that. I am glad that we will finally have the opportunity to do what the American people want us to do.

Mr. MICHEL. In conclusion, Mr. Speaker—and if I might have the attention of the majority leader—on the transportation appropriation bill, the administration does seem to have some reservation about that. So if we were to achieve final resolution of that yet this evening, it would be quite obvious there would be a rollcall or two. If it gets deferred until next week, of course, that is another thing.

Mr. WRIGHT. All things that are deferred until next week will not be voted on today.

Mr. MICHEL. That is quite obvious; yes.

Mr. TAYLOR. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I yield 1 minute to the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I rise in support of House Resolution 555, as reported from the Committee on Rules. This resolution would provide for the consideration of H.R. 5543, a bill on which the Committee on Merchant Marine and Fisheries has worked diligently through the entire 97th Congress.

By way of a brief summary, this bill would institute a legislative concept known as "OCS revenue sharing." This program would be based upon 10 percent of the future growth in Federal OCS receipts, up to $300 million annually. It is based on Secretary Watt's acceleration of OCS leasing and is intended to provide a partnership with State governments so that the program may proceed smoothly while protecting the coastal environment.

We will be discussing the details of the bill when the House considers it in general debate. I simply want to point out to my colleagues that 56 Members

have sponsored the legislation and the bill has the support of at least 20 individual Governors. Also, it has the support of the New England, Western, Southern and National Governors Associations. There is broad grassroot support from local governments, private associations, and individuals.

H.R. 5543 is a timely and thoroughly considered piece of legislation with solid and proven support from our coastal States and local governments. I urge support of House Resolution 555, which provides an open rule and 1 hour of general debate.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. PHILIP M. CRANE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 342, nays 8, not voting 82, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). The Chair will inform the Members that we have a partial computer breakdown. Regular order is being pursued. A terminal malfunction is causing a delay in the recording of written votes, and there will be a delay in concluding the vote accordingly.

□ 1830

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO HAVE UNTIL MIDNIGHT, FRIDAY, SEPTEMBER 17, 1982, TO FILE CONFERENCE REPORT ON H.R. 6133, ENDANGERED SPECIES ACT AMENDMENTS OF 1982

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may have until midnight Friday, September 17, 1982, to file a conference report on H.R. 6133, the Endangered Species Act Amendments of 1982.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 6529 AND H.R. 3269

Mr. ROEMER. Mr. Speaker, I ask unanimous consent that my name be removed from the list of cosponsors of the bills, H.R. 6529 and H.R. 3269.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATION BILL, 1983

Mr. LONG of Louisiana. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 583 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 583

Resolved, That during the consideration of the bill (H.R. 7019) making appropria-

tions for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes, all points of order against the following provisions in said bill for failure to comply with the provisions of clause 2, rule XXI are hereby waived: beginning on page 3, line 12 through page 4, line 17; beginning on page 5, line 6 through 15; beginning on page 14, lines 3 through 14; beginning on page 15, lines 1 through 4; beginning on page 16, lines 1 through 22; beginning on page 18, lines 12 through 22; beginning on page 20, line 14 through page 21, line 6; beginning on page 21, line 20 through page 23, line 2; beginning on page 28, line 12 through page 30, line 2; and beginning on page 34, line 4 through page 36, line 2; and all points of order against the following provisions in said bill for failure to comply with the provisions of clause 6, rule XXI are hereby waived: beginning on page 4, lines 6 through 13; beginning on page 16, lines 1 through 22; and beginning on page 18, lines 12 through 22.

The SPEAKER pro tempore. The gentleman from Louisiana (Mr. LONG) is recognized for 1 hour.

Mr. LONG of Louisiana. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 583 waives certain points of order against specific portions of the bill, H.R. 7019, making appropriations for the Department of Transportation and related agencies for the fiscal year 1983.

H.R. 7019 provides $11,199,399,919 in new budget authority for the programs of the Department of Transportation and related agencies. This figure represents an increase of $802,588,000 above the President's budget request. But the bill is $42 million below the section 302(b) Budget Act allocation to the Subcommittee on Transportation of our Appropriations Committee under the budget adopted by Congress.

Mr. Speaker, this legislation is the handiwork of our late beloved colleague, Adam Benjamin, who chaired the Subcommittee on Transportation most ably until his recent untimely death. It bears the mark of the diligent craftsman he was, and it is one of the cruel ironies of fate that he left his committee work well attended but was not permitted to see the legislation through on the floor. For those of us whose districts are deeply dependent upon the Coast Guard, upon urban mass transit, upon highway and railroad programs, we owe Adam Benjamin a last debt of gratitude for his careful consideration of programs so important to the Nation's welfare.

The Benjamin bill recommends a total new budget authority of $10,568,066,350 for the Department of Transportation for fiscal year 1983. This amount would fund the Office of the Secretary, the Coast Guard, the Federal Aviation Administration, the Federal Highway Administration, the National Highway Traffic Safety Administration, the Federal Railroad Administration, the Urban Mass Transportation Administration, the Office of the Inspector General, as well as the Research and Special Programs Administration. Related agencies funded by this bill are provided a total new budget authority of $665,852,569 for fiscal year 1983. These agencies are the Architectural and Transportation Barriers Compliance Board, the National Transportation Safety Board, the Civil Aeronautics Board, the Interstate Commerce Commission, the Panama Canal Commission, the U.S. Railway Association, and the Washington Metropolitan Area Transit Authority.

I want to make special note of an appropriation of $32 million for rural public transportation. This is a vital program for rural people, and these funds are essential to keep this lifeline open to isolated rural areas.

The rule provides a waiver of points of order under clause 2 of rule XXI, which prohibits consideration of unauthorized appropriations or legislation in appropriations bills, against paragraphs making appropriations for the Coast Guard, the National Highway Traffic Safety Administration, the Federal Railroad Administration, the Urban Mass Transportation Administration, and the Panama Canal Commission. Most of these authorizations have already passed the House. A clause 2 waiver is also included for Federal-aid highways and highway safety construction programs.

The rule, in addition, provides a waiver of points of order under clause 6 of rule XXI, prohibiting reappropriations, against consideration of parts of the bill dealing with certain Coast Guard programs, Conrail labor protection, and commuter rail service.

Chairman WHITTEN's letter of September 2, 1982, addressed to Chairman BOLLING, explained the need for these waivers is herewith included in the RECORD, as follows:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON APPROPRIATIONS,
Washington, D.C., September 2, 1982.

Hon. RICHARD BOLLING,
Chairman, Committee on Rules,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. CHAIRMAN: On August 19, 1982, the Committee on Appropriations reported the Department of Transportation and Related Agencies Appropriation Bill for the fiscal year ending September 30, 1983.

The bill includes appropriations for a number of programs for which authorizing legislation has not yet been enacted or items which technically constitute legislation in an appropriation bill. The principal items in this category involve the activities of the following agencies:

TITLE I—DEPARTMENT OF TRANSPORTATION

Some or all of the Coast Guard appropriations under the paragraphs operating expenses; acquisition, construction and improvements; alteration of bridges; and research, development, test, and evaluation, are not authorized. Authorization for these items is contained in H.R. 5617, which passed the House of Representatives on July 15, 1982.

Authorization is also required for part of the appropriation for operations and research, National Highway Traffic Safety Administration. Authorization for these items is contained in H.R. 6273, which passed the House of Representatives on June 14, 1982.

The appropriations for railroad safety and commuter rail service, Federal Railroad Administration, are not authorized. These authorizations are contained in H.R. 6308, which passed the House of Representatives on August 12, 1982. The appropriation for Conrail labor protection, Federal Railroad Administration, also may technically be subject to a point of order.

The appropriations for administrative expenses; research, development and demonstration and university research and training; non-urban formula grants; and urban formula grants, Urban Mass Transportation Administration, require authorization. The authorizations for these items are contained in H.R. 6211, which was reported by the Committee on Public Works and Transportation on May 17, 1982.

TITLE II—RELATED AGENCIES

The appropriations for operating expenses and capital outlay, Panama Canal Commission, are not authorized. Authorization for these items is contained in H.R. 6196, which was reported by the Committee on Merchant Marine and Fisheries on May 12, 1982.

TITLE III—GENERAL PROVISIONS

The limitation on obligations for Federal-aid highways contained in section 10 may technically be subject to a point of order since it contains a formula for distributing the funds under the limitation. The language is virtually identical to the language contained in H.R. 6211.

Accordingly, in the interest of orderly legislative procedure, we respectfully request a hearing before your Committee to seek a rule waiving points of order under clauses 2 and 6 of Rule XXI against the items specified above.

Your cooperation is greatly appreciated.

Sincerely,

JAMIE WHITTEN,
Chairman.

Mr. LONG of Louisiana. Mr. Speaker, I am unaware of any controversy concerning the waivers provided by this rule. I yield to the gentleman from Tennessee for purposes of debate, and reserve the balance of my time.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 7019, Transportation and related agencies appropriation bill for 1983, needs to be debated on the floor and it needs to be passed.

The administration opposes the measure because it is some $800 million over the budget request, but nevertheless there is no objection to the rule.

Mr. Speaker, I urge adoption of the rule and I have no requests for time. I yield back the balance of my time.

Mr. LONG of Louisiana. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. LEHMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 7019, making apppropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and that I be permitted to include extraneous matter.

The SPEAKER pro tempore (Mr. PANETTA). Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. LEHMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7019) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Pennsylvania (Mr. COUGHLIN) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The motion was agreed to.

□ 1840

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 7019, with Mr. GEPHARDT in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from Florida (Mr. LEHMAN) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. COUGHLIN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, we submit for your consideration and for the consideration of the Committee the bill H.R. 7019, the Department of Transportation and related agencies appropriation bill for fiscal year 1983.

This is not an easy task for me. This bill is a product of the legislative craftsmanship of Adam Benjamin, who was an outstanding chairman of our subcommittee. As my colleagues on the subcommittee well know, Adam was a strong and effective chairman, but above all he was fair in balancing Federal support among the conflicting transportation needs both of the various transportation modes and of the different regions of our Nation.

I was struck by an observation made by the gentleman from Missouri (Mr. BOLLING) shortly after the news of Adam's untimely death reached the House floor. Mr. BOLLING remarked on how quickly Adam had achieved power and influence in the House, and on what an extraordinary Congressman he was.

I agree entirely; and it seems to me that while we have lost other valuable Members during my 10 years in this body, I have not observed that any other death has touched so many of our colleagues so deeply as Adam's.

At this time, Adam would recognize the contributions of his friends and colleagues on the subcommittee, including the gentleman from Minnesota (Mr. SABO), the gentleman from Oregon (Mr. AUCOIN), the gentleman from Pennsylvania (Mr. GRAY), the gentleman from Massachusetts (Mr. CONTE), the gentleman from Alabama (Mr. EDWARDS), and the gentleman from Michigan (Mr. PURSELL). He would mention the very special working and personal relationship he had with the gentleman from Pennsylvania (Mr. COUGHLIN). And he would not forget the efforts of the staff, Tom Kingfield, Greg Dahlberg, and Jeni Leasor. Each of these people played an important role in preparing H.R. 7019.

I would like to add my own thanks to the subcommittee members and staff. We all lost a chairman as well as a friend, and their help and support have been invaluable as I have worked to take on the responsibility of guiding Adam's bill to enactment.

TRANSPORTATION AND ECONOMIC RECOVERY

Mr. Chairman, with the host of budgetary issues confronting this body concerning such important matters as social security, defense, food stamps, and taxes, many of us tend to underestimate the importance of some of the other programs supported by the taxpayers—including transportation. I suspect that one of the reasons we sometimes take transportation for granted is that the public-private partnership that has existed to develop our transportation system has worked so well. We have indeed developed a transportation system that is second to none—our highway and air transport systems are the envy of the world; our rail freight system is highly developed and provides efficient service to hundreds of thousands of shippers; transit systems currently exist in 279 urban areas around the country. Our transportation network is truly unmatched anywhere in the world.

The importance of our transportation system to the national defense and the American economy cannot be overstated. It is vital for transporting American citizens to work, bringing food to our tables, maintaining our national defense, and supporting the exchange of goods and ideas.

SENIOR CITIZENS JOB BILL

As Chairman Benjamin stated last year, the committee believes the trend of reduced capital investment in this national asset must be reversed. This problem has also been recognized by the Secretary of Transportation. As the Secretary has stated, and I quote from his December 14, 1981, letter to David Stockman:

> There is a pressing need for added capital investment in transportation generally. The deferral of capital improvements in recent years is reflected in marked deterioration of both highway and transit facilities and services. Necessary capital investments were further postponed in the fiscal year 1982 budget and accompanying legislation to achieve the immediate goal of controlling Federal expenditures. Unless this trend is reversed, the resulting inefficiencies and increased costs, in both goods and people movement, will begin to erode private sector productivity gains and dampen the Nation's economic recovery.

When prudent transportation capital investments are deferred, maintenance and operating costs rise significantly. The cost of these actions can be measured in many ways, including delays in the movement of both freight and passengers, increased wear and tear on transportation vehicles, and increased accidents. Inadequate and higher cost transportation will also increase the cost of production and limit the ability of producers to market their products.

The committee does not agree that the budget requested by the administration is sufficient to meet our transportation challenges. As past experience has shown, decreases in capital investments result in the deferral of necessary construction and maintenance work and a more rapid deterioration of our transportation facilities. The committee believes that there are ample statistical reports to support this conclusion, particularly with regard to our highway system. The committee also believes that the American traveling public has come to the same conclusion, that is, our national transportation infrastructure is deteriorating and needs attention.

SUMMARY OF THE BILL

Mr. Chairman, the bill before you contains $11.199 billion in new budget authority. Compared to the President's proposals, the bill is $802,588,000 over the budget. I would

like to make special note of the fact that this bill is just $81 under the subcommittee's 1983 allocation of budget authority for discretionary programs under section 302 of the Budget Act. Any amendments for increased spending in any discretionary program should therefore be accompanied by proposals for corresponding decreases in other accounts.

MAJOR ITEMS

Some of the major provisions in this bill are as follows:

First. The appropriation of $1.63 billion for the urban discretionary grant program of the Urban Mass Transportation Administration;

Second. A general provision providing for obligations of not to exceed $8 billion for Federal-aid highways—an increase of $300 million over the budget;

Third. The appropriation of $1.588 billion for operating expenses of the Coast Guard;

Fourth. The appropriation of $788 million for Amtrak;

Fifth. The appropriation of $2.457 billion for operations of the Federal Aviation Administration;

Sixth. Appropriations totaling $865 million for highway and transit projects substituted for Interstate Highway segments, including an increase of $350 million over the budget for substitute highway projects;

Seventh. The appropriation of $1.3 billion for urban mass transportation formula grants; and

Eighth. A general provision providing for obligations of not to exceed $600 million for airport development and planning grants, an increase of $150 million over the budget estimate.

OFFICE OF THE SECRETARY

For the functions of the Office of the Secretary of Transportation, the bill contains $39,532,000—an increase of $1,682,000 from the current level and a decrease of $9,968,000 compared to the budget. The committee remains concerned about the size of the Secretary's policy office and expects continued action to streamline this office.

COAST GUARD

With respect to the Coast Guard, the committee has become disturbed by the continued lack of support for this agency from the administration. The Coast Guard has been plagued by continual budgetary gamesmanship on the part of the administration which the committee believes must end for the good of the Nation. For instance, last year the committee was forced to call to the GAO's attention the administration's illegal impoundment of $216 million that was earmarked to help renew the Coast Guard's aging fleet of ships. The committee also had to apply pressure on the administration to operate 18 brand new jet aircraft that OMB directed be mothballed in the desert as soon as they were delivered off the assembly line. In addition, the Congress had to recommend an urgent fiscal year 1982 supplemental appropriation which was not requested by the President to prevent the closure of 13 search and rescue stations which safeguard the lives and property of American citizens. The administration could not adequately defend these cuts and would not oppose their restoration.

Judging from these actions, the committee is concerned that the OMB has lost sight of the value of the Coast Guard's mission and is causing irreparable harm to this service. As demonstrated in fiscal year 1982, the OMB is making single-minded, short-sighted budgetary decisions without regard to their impact on life and property and the long term viability of the Coast Guard. The committee will continue its close scrutiny of the administration's actions in fiscal year 1983 to insure that congressional intent is carried out.

For fiscal year 1983 the bill contains $1,587,980,000 for Coast Guard operating expenses, which is $9,950,000 more than the amended budget request and $213,808,000 more than the fiscal year 1982 level. This level should continue Coast Guard operations at their fiscal year 1982 level of service.

For acquisition, construction and improvements, we are recommending $287 million which includes $9 million by transfer. This will continue the procurement programs for new 270-foot medium endurance cutters, medium-range surveillance jet aircraft, and short-range helicopters. It will also provide funds for renovation of four 210-foot cutters and one patrol boat, and construction of various shore facilities. The bill includes $12.7 million for the alteration of two bridges that are unreasonable obstructions to waterborne commerce, and $20 million for research, development, test and evaluation. The sum of $336 million is provided for retired pay of military personnel of the Coast Guard and Coast Guard Reserve. For reserve training, the deepwater port liability fund and the offshore oil pollution compensation fund, we have approved the full budget requests. The committee has not approved the $5 million request for the recreational boating safety programs authorized by the Recreational Boating Safety and Facilities Act of 1980.

FEDERAL AVIATION ADMINISTRATION

The largest single appropriation in the bill is $2,456,783,000 for the operation of our national air traffic control system and for the execution of aviation regulatory, research, and financial assistance programs.

I know many of you are interested in the status of the air traffic control system, so let me recap the situation for you. According to the FAA, over 11,300 termination notices were issued after the PATCO strike. The FAA estimates that 8,500 new controllers will be needed to restore the system to prestrike air traffic demand levels. Since the strike, 4,330 air traffic control trainees have been enrolled at the FAA Academy. The first graduates, totaling 2,660 as of August 31, have arrived at critical facilities for classroom and on-the-job training. In addition, over 1,195 former military controllers have been hired who, based on their traffic control experience, have been assigned directly to facilities—primarily towers. Controller checkouts on operating positions have now begun. We are informed by the FAA that the system is currently accommodating 88 percent of the prestrike workload. The FAA has testified that all capacity restraints on the system will be removed completely by the end of 1983. In every case, a new controller will be fully qualified for his or her assigned position before assuming the duties of that position. The recommended funding level fully accommodates this schedule.

The bill includes $382.98 million—including $7.45 million by transfer—for the installation of new facilities and equipment. This is $42.02 million below the budget request. The committee has deferred action on an additional sum of $300 million which the administration has proposed for later transmittal. The committee has yet to receive a budget request for this item.

In addition, the bill includes appropriations of $16.2 million for facilities, engineering, and development; $93 million for research, engineering, and development; and $43,035,000 for the operation and capital improvements at Dulles and National airports. For the grants-in-aid for airport development, we are recommending a $600 million limitation on obligations. The bill also includes language limiting the authority for new Federal Government guarantees of private aircraft loans to any unused authority carried over from the $100 million fiscal year 1982 limitation.

FEDERAL HIGHWAY ADMINISTRATION

Under the Federal Highway Administration, the bill includes a limitation on contract authority obligations for the Federal-aid highways program of $8 billion during fiscal year 1983. This is $300 million more than the level proposed in the budget and the same level as the fiscal year 1982 limitation.

The bill also contains $500 million for highway projects substituted for Interstate highway segments. This amount is $350 million more than the budget request. We believe that this increased funding level is required to make a meaningful reduction in the large balance of unfunded authority under this program. That balance, as of December 31, 1981, was over $5.69 billion, and according to estimates of

the Federal Highway Administration, may rise to as much as $10 billion by the end of 1983. We believe that higher funding levels must be provided for this program if we are to avoid making this a permanent grant program.

The bill also includes appropriations for motor carrier safety, highway safety research and development, and territorial highways. General operation expenses of FHWA would be limited to $188.5 million in fiscal year 1983, a reduction of $3.062 million from the budget request.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

For the National Highway Traffic Safety Administration, the bill includes $70 million for operations and research which is $11.6 million below the budget request and $4.9 million below the fiscal year 1982 level.

The administration has been quick to blame the safety programs and regulations of the National Highway Traffic Safety Administration for many of the financial ills plaguing our auto industry. Even though we doubt that NHTSA is the real villain in this story, we hesitate to recommend additional funding for an agency whose mission has not been clearly articulated by the current administration. The administration has simply not adequately explained how it plans to manage the programs and responsibilities of this agency in a manner consistent with its rhetoric extolling the evils of auto safety regulation and the necessity for transferring Federal governmental functions to State and local jurisdictions. Until we can be assured that the taxpayers' dollars will be used effectively, we cannot recommend higher funding levels for this program.

With respect to those highway safety programs financed with contract authority and administered by States and communities, we are recommending a limitation on obligations of $100 million. This is $23 million more than the amount requested in the budget. This increase is intended to permit a minimum allocation of $23 million for drunk driving countermeasure projects.

FEDERAL RAILROAD ADMINISTRATION

Mr. Chairman, for the Federal Railroad Administration, major recommendations include $23.232 million for railroad safety, $17 million for research and development, $30.84 million for rail service assistance, $115 million for the Northeast corridor improvement project, $20 million derived by transfer for Conrail labor protection and $75 million derived by transfer for commuter rail assistance.

The bill would also provide $788 million for Amtrak for fiscal year 1983. This $788 million level is consistent with Amtrak's request as well as the fiscal year 1983 authorization. We understand that Amtrak has estimated that it can operate all of its existing system under this funding level.

RAILROAD ABANDONMENT IN ILLINOIS

Mr. Chairman, the committee learned just within the past few days, too late to address the issue in our bill or report, of the plight of a group of agricultural shippers in the State of Illinois which requires attention. These groups, known locally as the "Bloomer shippers," are striving to acquire an abandoned railroad line for future redevelopment which runs from Normal, Ill., to the vicinity of Kankakee, Ill. It is the committee's understanding that the railroad formerly operating this line was, prior to the rail deregulation movement, adjudged to be in violation of its basic common carrier obligation with respect to the service over that line and its maintenance. The Bloomer shippers strongly supported rail service on this line and invested a substantial amount of funds based on the historic scheme of regulation. Railroad deregulation action has had an adverse affect on the shipper's ability to acquire this line. Based on the unique and unusual circumstances of this situation, the Federal Government should take all practicable steps necessary to bring about a fair and equitable resolution of this problem.

URBAN MASS TRANSPORTATION ADMINISTRATION

Under the committee recommendations, a total program level of $3.6435 billion would be provided for the activities of the Urban Mass Transportation Administration for fiscal year 1983. This is $493 million more than the President's request, but is $82.2 million less than the amounts provided for similar activities for fiscal year 1982. Under this recommendation, $1.3 billion would be provided for the section 5 "urban formula" program which provides subsidies to our transit authorities around the country to operate their systems. This is $65.25 million less than last year's level. The bill also provides $1.63 billion for section 3 "urban discretionary" grants to buy buses; extend and modernize existing rail transit systems; and continue or begin work on new rail transit systems in Baltimore, Miami, Atlanta, Buffalo, Detroit, Los Angeles, Santa Clara, and Denver. The bill also contains $32 million for the nonurban formula program in fiscal year 1983. This program is designed to assist in the development of public transportation in small communities and rural areas. In addition, we estimate over $100 million in carryover funds will be available for this program in fiscal year 1983.

The bill also includes $365 million for transit projects which have been substituted for interstate highway segments. As I stated earlier, we are concerned about the unfunded balance in this program which is currently hovering at $5.69 billion. Without significant appropriations to draw down this balance, interstate transfers will become a permanent fixture in our budget which was not the intent of Congress.

The bill also includes a new appropriation of $230 million for continuing the construction of the Washington Metro rail system. This amount, when combined with the $45 million provided in the interstate transfer account, will provide a total of $275 million for Metro construction in fiscal year 1983.

The bill also includes $86.5 million for the research and administrative expenses of UMTA.

RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION

The bill includes $20,022,000 for the Research and Special Programs Administration, which includes the materials transportation bureau, the transportation systems center and grants to States for natural gas pipeline safety. The amount recommended is $1,278,000 less than the budget request.

OFFICE OF INSPECTOR GENERAL

For the Office of Inspector General, the bill contains an appropriation of $24,946,000 in fiscal year 1983. This is the amount requested in the President's budget.

TITLE II—RELATED AGENCIES

Title II of the bill contains $631,333,569 for seven transportation related agencies and commissions. This is $34,519,000 below the budget requests and $58,505,431 below last year's level.

More specifically, the committee is recommending $1.9 million for the Architectural and Transportation Barriers Compliance Board; $19.97 million for the National Transportation Safety Board; $72.75 million for the Civil Aeronautics Board; $66.3 million for the Interstate Commerce Commission; $416.75 million for the Panama Canal Commission; $2 million for adminstrative expenses of the U.S. Railway Association; and $51,663,569 for the Washington Metropolitan Transit Authority.

Mr. Chairman, the bill before you is the product of our very able subcommittee. The bill was reported by the full Appropriations Committee on August 19. The committee held 27 days of hearings and received testimony from 8 Members of Congress, 131 officials from the executive branch, and 103 interested individuals and representatives of groups and organizations. The committee printed 7 volumes of hearings, numbering 5,877 pages.

Mr. Chairman, I believe we are bringing a balanced and carefully considered bill to the committee today and I ask for its favorable consideration and approval.

Mr. COUGHLIN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, for the last several hours in this Chamber we have been debating a so-called jobs bill that, during the course of the debate, was claimed would do something about the infrastructure of this country, our roads and our bridges. Of course, a great many of us feel that that particular bill will do nothing for the infrastructure of this country and our roads and our bridges; that it is simply a make-work program that will not produce real wealth for the country; that will do nothing for our infrastructure, and it will just be pouring money down a drain.

This bill, the bill we have before us now, is the one that does do something about the infrastructure of our country. It is the bill that does build the roads. It is the bill that does repair the bridges. It is the transportation appropriations bill for this year.

□ 1850

This is where those funds should be. This is where they should be funded, not in some wild special bill that is going to turn into simply a pot of waste.

So I rise in support of the fiscal year 1983 transportation appropriation bill. This bill is in a real sense a tribute to the late Adam Benjamin, the chairman of this subcommittee, and it is with a somewhat heavy heart that I know that the acting chairman and I bring this bill before the Congress.

It is sad that he is not here with us today to work the product of his handicraft which he did so very well. One would have been hard pressed to find a more knowledgeable or hardworking subcommittee chairman than Adam Benjamin.

The bill itself is a testimony to his high degree of skill and I can think of no better tribute than swift completion of this bill on which Adam labored so long and hard.

Carrying on in the Benjamin tradition, our acting subcommittee chairman, BILL LEHMAN, has done an excellent job of explaining the bill, so I will not belabor the House with a repeat of what has been heard and will be in the RECORD.

Let me just touch on a few of the major recommendations.

The bill provides $11,199,399,919 in new budget authority for programs of the Department of Transportation and related agencies.

I note that although this is above the President's budget request, it is $81 below the section 302(b) allocation.

If anyone has an $81 project, I might add, that they would like to add into this, we can still put that in under the section 302(b) allocation.

Of course, it is that section 302(b) allocation by which the appropriations subcommittees are governed under the budget process.

The bill contains $1,630,000,000 for urban discretionary grants in the Urban Mass Transportation Administration. It has an $8 billion obligational ceiling for the Federal-aid highways; $1,587,000,000 for the Coast Guard operating expenses; $788 million for grants to the National Railroad Passenger Corporation; $2,456,000,000 for operations of the Federal Aviation Administration; $865 million for highway and transit projects substituted for interstate highway segment; $1,300,000,000 for formula grants of the Urban Mass Transportation Administration; $600 million obligation ceiling for airport development and planning grants; $287 million for capital acquisition, construction, and improvement programs of the Coast Guard; $115 million for continued Northeast corridor improvement project work; and $382,980,000 for facilities and equipment of the Federal Aviation Administration.

The minority supports this bill.

I particularly want to pay compliments to the staff who also worked long and hard on this, Tom Kingfield, Greg Dahlberg, and Jeni Leasor from the majority, Betsy Stark from Congressman Benjamin's office, and Kennie Kraft from my own for the minority side.

This a good bill. This is always a tough bill to work on because it contains so many projects of such great interest to Members of this House.

But Chairman Benjamin has been, as acting Chairman LEHMAN has been, fair to the Members and fair in the way the bill is presented.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

I know that he and the members of the committee worked extremely hard on this bill and I want to congratulate them for that.

But I had some understanding that the administration has some problems with this bill. Is there not an indication from the Office of Management and Budget that this bill might be subjected to veto for some of the provisions in it and, if so, could the gentleman detail for me what his understanding of those problems are?

Mr. COUGHLIN. There are two objections that the Office of Management and Budget have, two primary objections.

One was the bill does not include provision for some $233 million in Federal Aviation Adminstration acquisition for new radars and so forth.

The fact is that the budget request for that has not yet come down and the fact is that when we held the hearings Secretary Lewis testified that that request was contingent upon the user fee legislation passing so that we did not include it in the bill at the time we wrote it because the user fee legislation had not passed and the budget request had not come down.

The user fee legislation has now passed. The budget request still has not come down and so that will have to be handled at a later time.

Mr. WALKER. If the gentleman will continue to yield, so that is $233 million of additional spending that they are complaining about rather than $233 million in savings?

Mr. COUGHLIN. There is no additional spending in for that. That is not in the bill.

Mr. WALKER. If the gentleman would yield further, in other words, though, to meet the administration's request in that case you would have to add $233 million to your bill?

Mr. COUGHLIN. They would have to have a supplemental request of some sort.

Mr. WALKER. I thank the gentleman.

What was the other?

Mr. COUGHLIN. The other is the air traffic controllers' pay question.

Again, there is no authorization for that and that is about $61 million. Again, that would have to be handled once there is an authorization for it. There is no budget request and there is no authorization.

Once we get a budget request and an authorization that would have to be handled also as a supplemental matter.

Mr. WALKER. The problem with getting the authorization there is the fact that in the Post Office and Civil Service Committee they have refused to consider any fee for the air traffic controllers unless we do something to try to hire back all of the people that went on strike; is that not the problem?

Mr. COUGHLIN. That is essentially correct.

The gentleman will recall that last year on the final, I believe it was, continuing resolution of the last session of Congress we tried to add money in for the controllers that stayed on the job and tried to have that included in that continuing resolution. It was eventually knocked out before we finally got a continuing resolution that was adopted, unfortunately, in my opinion.

I have sought in this legislation to provide money for the controllers who stayed on the job, but there is simply no way to do it when we do not have any authorization.

Mr. WALKER. If the gentleman would yield further, then, do I understand that in both instances where the administration has objections to this bill they are objecting because you are spending too little rather than they are objecting because you are spending

too much? Is that a fair characterization?

Mr. COUGHLIN. I think what they would like to see is maybe more room left so that later, when additional requests come down, and there would be less money spent now, and they could spend that money later. But they are going to ask for additional spending, there is no question about that.

Mr. WALKER. If the gentleman will yield further, then, the question here is whether or not by putting items into the bill you have, therefore, blocked them from adding a couple of hundred million more in one case, and I have forgotten what the figure was in the other.

Mr. COUGHLIN. $61 million.

Mr. WALKER. So you are talking, in other words, about $300 million all told, you block them from doing that other than as an add-on in a supplemental later on? Is that their objection?

Mr. COUGHLIN. It has not blocked them. They would have to come down with a request and a supplemental.

Mr. WALKER. But they would prefer to leave room in this budget or in this appropriation rather than have to come in with a supplemental that is an add-on; is that correct,

Mr. COUGHLIN. I would say that is accurate. But they have not come in either with the budget request that we need so that we could include it in this bill.

Mr. WALKER. I thank the gentleman very much.

Mr. COUGHLIN. I reserve the balance of my time.

Mr. LEHMAN. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts (Mr. STUDDS).

Mr. STUDDS. Mr. Chairman as chairman of the Subcommittee on Coast Guard and Navigation, I want to congratulate the Committee on Appropriations for doing the best it possibly could for the Coast Guard, given the limitations of the first congressional resolution on the budget. I will be offering an amendment shortly which I believe will further improve the bill within the limits of the budget resolution, and I hope that this will be approved without controversy.

I do feel an obligation to point out to Members, however, the impact which the budget resolution, a resolution which, incidentally, I did not support, will have on the Coast Guard during the coming year.

The appropriations bill before us calls for a $275 million reduction in Coast Guard funding compared to what Congress has appropriated for the current year. There is no money presently in this bill to restore cutbacks which have had to be made in Coast Guard aids to navigation services throughout our country, in Coast Guard recruiting and training programs, and in the budget for routine maintenance functions which provide the bread and butter of Coast Guard operations every day of the year.

This bill contains no money to replace the C-130 transport plane which recently crashed while on a mission in Alaska, killing two coastguardsmen and seriously injuring several more; it contains no money to replace helicopters lost while on training or search and rescue missions during the past year in Alabama, Oregon, and Hawaii, accidents which took the lives of a total of eight additional Coast Guard men and women.

This bill contains no additional money to help the Coast Guard perform its vital law enforcement functions, including its role in restricting the flow of illegal drugs into this country. It is true that a diversion of resources to southeast Florida has had an effect in that part of the country, but the evidence is overwhelming that smugglers have chosen to move north to New York and New England and that the national problem is not being solved.

This bill does not contain sufficient funds to keep Coast Guard Reserve training at the level which existed in 1982. That level, providing for a reserve strength of 12,000, was still only 55 percent of the amount estimated to be necessary for defense mobilization requirements, and this is despite the very critical role which the Coast Guard Reserve plays in the performance of normal peacetime Coast Guard missions such as search and rescue and law enforcement.

Finally, this bill does not even begin the job of eliminating the immense backlog in Coast Guard procurement and maintenance projects which have been built up over the past decade.

Mr. Chairman, the funds for the Coast Guard which are contained in this legislation are not sufficient for that service to do the kind of job which the American people have come to expect from the Coast Guard in years past. I think this lack of funding is clearly harmful to our economic well-being, and to the health and safety of all those who live or work in coastal areas of the United States. I urge my colleagues to consider these facts carefully, and I hope that they will be willing in the months ahead, to provide additional funds—through supplemental appropriations, a continuing resolution or other means—to give the Coast Guard the resources it requires to operate successfully on behalf of the people of the United States.

□ 1900

Mr. PURSELL. Mr. Chairman, I yield 3 minutes to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. I appreciate the gentleman yielding.

Mr. Chairman, for the purpose of legislative history, I would like to address the $9.8 million contained in this bill providing for construction of 550 feet of unpaved safety strip at the north end of runway 36 and improvements on the south overrun, all at National Airport in the Washington metropolitan area.

I am pleased to join with my colleague, the gentleman from Virginia (Mr. WOLF), in informing the Congress that we have received assurances from the Department of Transporation that this authorization intends in no way to amend the National Airport operating plan or the policies contained therein, that no approval for the use of National Airport by wide-bodied jets is intended or implied, and there are no plans to permit that type of equipment in National Airport in spite of the construction of the additional safety areas. I am pleased and satisfied with those assurances and I look forward to the added safety factor that this construction will provide at National Airport.

Mr. PURSELL. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. LENT).

Mr. LENT. Mr. Chairman, as a member of the Coast Guard and Navigation Subcommittee, I would like to add my support for H.R. 7019 and for the amendment to be offered to the Coast Guard portion of title I of this bill. Further, as the ranking minority member on the Panama Canal/OCS Subcommittee, I wish to alert my colleagues in the House to actions taken by the Approrpriations Committee concerning fiscal year 1983 funding for the Panama Canal.

The Coast Guard amendment to be offered by the gentleman from Massachusetts, who is the chairman of the Coast Guard and Navigation Subcommittee, and supported by a gentleman from Alaska, the ranking minority member of that subcommittee, would transfer $18 million from the retired pay account of the Coast Guard to other accounts where additional funding is needed. This transfer is possible because the Coast Guard will be able to meet its obligations to retired personnel without this additional amount. Thus, the transferred amount would be divided between operating expenses and Reserve training in the amounts of $14 million and $4 million respectively.

The additional amount for operating expenses will be to support ongoing Coast Guard programs, but in particular the short-range aids to navigation program, recruiting and training programs, the Haitian migrant interdiction operations, and needed routine maintenance of vessels and aircraft used for search and rescue and law enforcement. The additional funds for Reserve training are to support the Reserve program at the newly authorized level of 12,000 reservists. I urge all

my colleagues to approve this amendment which will serve to make the Coast Guard more effective and keep the total funds within the bill at the level approved by the Appropriations Committee.

With regard to the funding for the Panama Canal Commission in title II of the bill, I want to commend the members of the Appropriations Committee and especially the members of the Transportation Subcommittee under the chairmanship of our distinguished colleague, the late Adam Benjamin, Jr., for approving our Authorizing Committee's figures for operating expenses and capital outlays. The Merchant Marine and Fisheries Committee unanimously approved a Panama Canal authorization of $416,750,000 which is $35,839,000 less than the administration's fiscal 1983 request.

Not only is this reduced spending level consistent with reduced operating expenses anticipated by the Panama Canal Commission in fiscal 1983, but it minimizes the need for a toll increase. Indeed, this reduced spending recommendation is already having a positive effect; the members of the Panama Canal Commission Supervisory Board have agreed to defer action on a proposed 9.8 percent toll increase—an increase which most assuredly would have been passed along to American shippers and consumers in the form of higher transportation costs and higher prices of consumer goods.

As ranking minority member of the Panama Canal/OCS Subcommittee, I have worked long and hard to carry out the oversight responsibilities with which our committee is charged. I want to see the canal operated safely and efficiently by the Panama Canal Commission, a U.S. Government agency. In addition, I am anxious to make sure that the requirements of the 1977 treaties and the implementing legislation are met.

According to the General Accounting Office, the reimbursement of the general fund of the Treasury is appropriate and is in keeping with the provision of the Panama Canal Act of 1979 (22 U.S.C. 3712) that requires the Commission to be self supporting and financed totally from its revenues.

Accordingly, at the proper time, I intend to offer an amendment similar to one which was included in a previous Department of Transportation Appropriations Act, Public Law 96-400. Its purpose is to continue the reimbursement of taxpayer funds appropriated in late 1979 as a "startup" fund to operate the canal during the period when tolls had just started to be deposited into the Commission fund.

Mr. PURSELL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to congratulate the subcommittee on an outstanding bill, particularly our late chairman, an outstanding young man from Indiana, 47 years old, Adam Benjamin. We attended his funeral. I think the respect of his colleagues was outstanding, and I want to congratulate his replacement here, the gentleman from Florida (Mr. LEHMAN), who has done an exceedingly good job of homework at this point in replacing an outstanding young man, Mr. Benjamin.

I want to say a bit about transportation in general. I think this is a comprehensive piece of legislation dealing with water and air transportation, ground, public transportation and highway programs. I want to compliment the staff, which has done an outstanding job in assisting us in the markup and in the congressional hearings that have been held earlier this spring.

I would like to address one relevant issue. I know that the evening is late and that we want to move onward and go home to our families. But I would like to compliment the staff, particularly in the committee report, to address the issue of the St. Lawrence Seaway and the Great Lakes, particularly with relevance to the Midwest.

Going back and looking at all of the history of the St. Lawrence Seaway and the Great Lakes, this Congress has had an outstanding record of history in the development of that project in respect to our growth. It is a program that was developed under the Truman and Eisenhower years. By the way, through the National Security Council, I read all of the congressional testimony, way back then, when President Eisenhower called upon Congressman George Dondero from Michigan and Senator Wiley from Wisconsin, and developed the basic St. Lawrence Seaway Corporation.

At this present time, the Great Lakes serves as a useful tool mainly to Canada. The Midwest does not utilize the Great Lakes to its maximum potential. So in looking at the possible future modernization, both from an environmental standpoint and widening standpoint, we cannot get the Great Lakes usage because the great seagoing vessels are too wide in order to get through the locks like the Welland Canal. Consequently, concerning the present status of the St. Lawrence Seaway, which I have traveled and visited, both the Corporation and the locks themselves, I would like to suggest that the Transportation Committee in this Congress work in a bipartisan effort with the authorization committee and other members of interest not only to the Midwest but to the whole United States, and in a partnership with Canada in developing further improvement that is environmentally sound and economically sound, to see that we draw some great opportunities for being competitive in a world trading market.

At this point in history, Canada uses that seaway at about 70 percent of its capacity and usage, and the United States only 30 percent. In the Midwest we are losing a great deal of what I consider competitive product delivery in the world trading market because the Canadians are bringing a great deal of products up by rail into Canada and shipping out overseas by boat; consequently, we are losing a competitive edge, not only as a partner with Canada, but, more importantly, with other countries in the world.

So I would like to suggest later on that we continue in our transportation studies. I have read about 30 different management marketing consulting studies in the Great Lakes region, by various consulting firms that we have paid through contract through this bill and other appropriate public works bills, and in looking at the development of public works projects through the Corps of Engineers, I would just like to say in closing that I would hope that Congress in our partnership with Canada continually look to upgrade and modernize the St. Lawrence Seaway, because at one time more tonnage passed through the St. Lawrence Seaway than any passageway in the entire world. I think from a competitive standpoint that we ought to address that issue. I am very happy that this committee is beginning to recognize that, what I call phase 1 of looking at that future development possibility. It would be my hope that the committee continue that support, and I would encourage a bipartisan effort to improve and develop the Great Lakes and use it at a maximum potential and still be environmentally sound.

I rise in support of this legislation which makes appropriations for the Department of Transportation and related agencies for the coming fiscal year. The bill is a well-balanced approach to the transportation needs of America and stands as a tribute to the late chairman of the House Transportation Appropriations Subcommittee, Adam Benjamin. Under Chairman Benjamin's leadership, the subcommittee has approved funding recommendations addressing the needs of public mass transportation; the Interstate Highway System; the activities of the United States Coast Guard; and America's railroad system.

Chairman Benjamin and the distinguished ranking Republican of the subcommittee, Congressman COUGHLIN, recognize the fundamental importance of meeting America's transportation needs. In many respects, the variety of transportation methods made available to the American public and business is taken for granted. Our Interstate Highway System is the best

in the world and has fostered the economic growth of America. America's railroads continue to provide reliable, efficient transportation of American commerce. To a large degree, the growth and expansion of the American economy occurred only because of America's transportation system. And during this current period of economic sluggishness in America, it is absolutely essential that transportation remain funded at adequate levels.

I believe the appropriations recommendations of the Subcommittee on Transportation adequately fund the activities of the Department of Transportation. However, I also believe that more needs to be done before the transportation systems of the United States can both contribute to and lead an economic recovery. The interstate transportation system continues to demand funds for maintenance. Without attention to problems of deteriorating highways and secondary roads, the efficiency and competitive costs of transporting goods will be reduced. I also believe the Congress must maintain as a priority funds for mass transit. Urban and rural bus systems, for example in the State of Michigan, continue to provide essential service in cities like Jackson and Ann Arbor. In both of these communities, public transportation is provided for the elderly, the handicapped, and the working commuter. And finally, I believe Congress must continue to explore methods by which America's waterways can contribute to the national and international flow of goods. This year's transportation appropriations report contains language expressing the interest of the subcommittee in taking actions to enhance the economic viability of the St. Lawrence Seaway, especially those actions which will make the needs of the seaway more visible.

Again, I offer my support for passage of this measure and express my appreciation for the work of our late chairman, Adam Benjamin. Congressman COUGHLIN, our subcommittee's ranking Republican is also to be congratulated for his effectiveness in shaping this bill.

● Mr. CONTE. Mr. Chairman, I rise in support of the Department of Transportation appropriations bill we are presently considering, and urge my colleagues to do the same.

I would like to say at this point, Mr. Chairman, that the absence of our former colleague, Adam Benjamin, is probably very much in the thoughts of the Members here today since Adam was the chairman of the Transportation Subcommittee and would have been before the House today.

I know Adam would want the membership to pass this bill in the interest of our Nation, and he would want the membership to give the gentleman from Florida, (Mr. LEHMAN), the support he deserves in his efforts to move this bill to passage.

Mr. Chairman, this bill provides funds over and above what the administration requested for fiscal year 1983, but for good reason. The committee looked on the Nation's transportation needs this year as being somewhat unfulfilled at this point in time. Thus, the bill is oriented toward trying to make up for the gap between the country's transportation needs and its present state.

This year, we looked more at the overall role our transportation system plays in our economy, and how we could best insure that our transportation infrastructure contributes to improving our Nation's productivity. As was noted in the committee report, inadequate transportation increases the cost of production and stifles the ability of producers to market products. This in turn is reflected through increase prices to consumers.

Touching briefly on a few points, I continue to feel that the committee needs to pay more attention to the Coast Guard and its ever-present fiscal problems. As I have said before on this floor, we continue to strap the Coast Guard with requirements, and we continue to expect them to produce, but when it comes time to give them the resources to live up to our expectations, we too often get a little stingy. Oh yes, the Coast Guard always manages to hang in there and perform, but often without needed spare parts, for aircraft, for example. I think we need to continue to pay more attention to this service, and I am going to try to do my part to achieve that end.

In the area of rail assistance, the committee has provided $788 million to Amtrak. This is a considerable degree above the budget request, but it eliminates the need to suspend service on some of Amtrak's routes. Also, we have provided the full $115 million budget request for the Northeast corridor improvement program, which is vitally important to the heavily traveled Northeast rail passenger segments of our railroad system. We must continue to strive toward more safe and reliable rail travel for this portion of the country.

We have provided some $3.6 billion in authority in the urban mass transportation category, including transit projects substituted for Interstate Highway segments. Of that amount, $105 million is earmarked for the Red Line extension project in Boston. I also note here that we have provided $32 million in non-urban formula grants for assistance to transit operators in small and rural communities.

All in all Mr. Chairman, I think we have a balanced bill here, given the need to be mindful of the inflationary impact of Federal spending, and at the same time, the importance of our transportation infrastructure to the Nation's economy. I strongly urge my colleagues to support it.●

● Mrs. SNOWE. Mr. Chairman, I rise in support of the Department of Transportation bill being discussed here today. While I feel all segments of this piece of legislation are quite worthy of this body's support, I would like to point out that full funding for the Coast Guard is particularly essential to the Nation. Coming from the State of Maine, which has over 3,000 miles of coastline and supports a huge commercial fishing and recreational boating population, I see a well-equipped, well-manned Coast Guard as vital.

It is no secret that we demand that the Coast Guard fulfill an ever-increasing amount of tasks while asking them to perform these duties with delapidated equipment. We must provide adequate funding for replacement of these aged vessels and decrepit aircraft.

Also, we must recognize that enforcement of the 200-mile limit is a full-time job which requires much time and effort. But when one factors in the marked upswing in drug trafficking, it is easy to see why the Coast Guard is stretched thin. To meet these challenges, an increase in manpower is necessary. But this bill will barely maintain our present manpower levels for the Coast Guard. To agree to anything less would be imprudent. Of course, we are all aware of the need to be austere with our limited resources, as deficits continue to loom. But, we also must recognize priorities in our spending. To allow the Coast Guard to be funded at levels which would threaten public safety would be totally irresponsible. Therefore, I urge my colleagues to support this Transportation appropriation bill. Thank you, Mr. Chairman.●

● Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 7019, the fiscal 1983 appropriations bill for the Department of Transportation and related agencies.

This legislation provides the resources and Federal funding for a wide variety of critical transportation programs of the Federal Government, programs which fund highways so necessary to the development of our country and those of the Urban Mass Transportation Administration, the major source of funding for our bus systems in urban and rural areas on the mainland and in Puerto Rico.

H.R. 7019 also funds, I am pleased to note, the airport development and aid program which was recently reauthorized due to the splendid work of Congressman NORM MINETA and the House Aviation Subcommittee.

The bill before us is $802,588,000 more than the administration's budget requests and is clear congressional recognition that the surface and air

transportation needs of this country are considered to be a major priority. The legislation is also a tribute to the late Congressman Adam Benjamin, a dedicated public servant who will be sorely missed in the House of Representatives.

The funding levels for urban and discretionary and formula grant programs for the Urban Mass Transportation Administration and the Federal Highway Administration, as well as the $5,630,000 increase for the Coast Guard are noteworthy and, as Congress nears the target date for adjournment, I am pleased to note the progress of this and other appropriations measures still pending on the calendar.

This bill is vital to the transportation needs and I am pleased to support this measure.●

● Mr. FRENZEL. Mr. Chairman, H.R. 7019, the Department of Transportation and related agencies appropriation for fiscal year 1983 is described in a House Budget Committee early warning report for the week of September 13, 1982, as over the outlay targets for both its mandatory and discretionary programs.

Any relationship between this bill and the budget resolution is either casual or coincidental. By any standard it is a budget buster. It deserves the fate of budget busters—either defeat or veto.

When H.R. 7019 is scored against the budget resolution assumptions for discretionary budget authority, it is $64 million over target. But when the necessary supplementals are added, the overage climbs to a whopping $516 million.

According to the Budget Committee's early warning summary, the overall bill is $720 million over the budget. The Appropriations Committee of course is not sound by outlay totals.

But this House ought to be bound. I believe the administration even though it considers the budget too high, will consider itself bound. I believe the American people will take more than a passing interest in a bill that spends three-forths of a billion dollars more than the budget approved by the Congress.

The overages occur in many places throughout the bill, with one of the more flagrant cases being the FAA facilities and equipment and FAA research, engineering and development accounts. Pursuant to the recently passed increases in aviation taxes, budget amendment increases for these two accounts totaling $323 million were required. However the Appropriations Committee has deferred action on the $323 million, setting it aside for a later supplemental. Regretably however, the committee increased funding for other discretionary programs where funding should have been reduced.

In the end, the discretionary funding level has been raised, and the two FAA programs for which the $323 was earmarked will be funded in the spring supplemental. At the same time, however, the budget is busted.

With another account, FAA operations, the committee omitted $61 million that will be required once Congress approves a pay package for air traffic controllers. There is no reason why this $61 million should be deferred. Camouflaging overfunding of the discretionary accounts with this $61 million and the $323 million mentioned earlier is a customary, but deceptive policy.

This bill does violence to the budget resolution in many ways. Interstate transfer grants for highways, urban mass transportation, Coast Guard operating expenses, and the FAA accounts are all over the budget resolution assumptions in either budget authority, outlays, or both. Further, while the bill is over budget now, it will take another quantum leap over the budget once the necessary supplementals are enacted.

I do not necessarily assume that the overspending here is intentional but, nevertheless, it is here, and therefore the bill should not be passed. The committee may someday learn that outlay targets must be met. Budgeting by supplemental is unacceptable and contrary to our efforts toward responsible fiscal and budgetary policies.

This bill should be defeated. If passed, it should be vetoed.●

● Mr. WOLF. Mr. Chairman, the Department of Transportation and related agencies appropriations for fiscal year 1983, which the House is considering today, includes an appropriation requested by the Metropolitan Washington Airports for $9.8 million to construct a runway safety overrun at National Airport.

As my colleagues know, I have been persistent in my efforts to bring a balance to the air transportation system in the Washington area, which includes National and Dulles Airports, the only two airports owned and operated by the Federal Aviation Administration. Those efforts have included implementation of the Metropolitan Washington Airports policy which limits growth and improves safety at the congested National Airport and emphasizes a new and expanded service role for the underutilized Dulles Airport.

I am pleased to join with my colleague Mr. PARRIS in stating it is our understanding that the request for $9.8 million for a safety overrun at National Airport is consistent with this policy. In a letter I received from James A. Wilding, director of the Metropolitan Washington Airports, on June 8, 1982, Mr. Wilding stated, in answer to a question on the reason for the runway project:

> The project is being proposed solely to enhance the runway safety areas at the airport. The project is desirable to handle the traffic that exists at the airport today. It is not our intention by this project to alter the operating length of National's main runway or to allow longer nonstop flights or larger aircraft to operate at National.

I hope this information helps to clarify the reason for this appropriation request.●

Mr. PURSELL. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

□ 1910

Mr. LEHMAN. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. RALPH M. HALL) having assumed the chair, Mr. GEPHARDT, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7019) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes, had come to no resolution thereon.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO HAVE UNTIL MIDNIGHT, FRIDAY, SEPTEMBER 17, 1982, TO FILE REPORT ON H.R. 5238, THE ORPHAN DRUG ACT

Mr. LEHMAN. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce may have until midnight, Friday, September 17, 1982, to file a report on H.R. 5238, the Orphan Drug Act, which passed the committee unanimously.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

ADJOURNMENT TO MONDAY SEPTEMBER 20, 1982

Mr. LEHMAN. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 12 o'clock noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

REQUEST TO DISPENSE WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. LEHMAN. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednes-

day rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. WALKER. Reserving the right to object, Mr. Speaker, I am very concerned about us putting aside Calendar Wednesdays at this point. The Speaker announced on television this morning that this House would not be considering the school prayer legislation, and we would not be considering the balanced budget legislation. We see the regulatory reform bill scheduled for next week but the Rules Committee, as I understand it, has not been scheduled to even meet on that bill.

The only way that we are ever going to have a change to even get at some of these bills is to begin to go through the committees and take a look at some of this legislation; so I am constrained to object and do object, Mr. Speaker.

The SPEAKER pro tempore. Objection is heard.

NATURAL GAS POLICY ACT SHOULD BE AMENDED

(Mr. YOUNG of Missouri asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. YOUNG of Missouri. Mr. Speaker, throughout this Congress I have been forecasting sharp increases in natural gas prices for this fall and winter. As you know, Mr. Speaker, I introduced legislation earlier this year addressing this problem of skyrocketing gas prices and to provide residential consumers protection from unreasonably high natural gas prices.

Mr. Speaker, this week articles in both U.S. News & World Report and Business Week confirm my unhappy predictions. According to U.S. News the Energy Department has predicted residential natural gas prices 20 percent higher this winter than last. Business Week forecasts gas price increases of up to 50 percent this winter.

Experts universally blame the phased-in deregulation of natural gas prices established by Congress in the Natural Gas Policy Act of 1978 for these increases. U.S. News quite accurately points out that this act (the NGPA) forces utilities to pay higher prices for gas even though currently there exists a surplus of natural gas supplies such that some producers have shut down wells because they cannot sell the output.

Mr. Speaker, I emphasize once again that unless the Natural Gas Policy Act is amended, gas prices will continue to increase faster than the rate of inflation and many people will be unable to afford to heat their homes this winter. My bill provides the means necessary for Congress to protect residential consumers from unreasonbly high natural gas prices by containing those prices at just and reasonable levels.

I urge my colleagues to take a look at this week's issue of U.S. News and Business Week relative to the problem of natural gas and begin work now to prevent a disaster this winter.

Mr. Speaker, I include copies of the articles referred to here in the RECORD, as follows:

[From U.S. News and Business Week, Sept. 20, 1982]

A PRICING PLOY TO KEEP INDUSTRY HOOKED ON GAS

With individual buyers of natural gas facing rate increases of up to 50 percent this winter, competition between oil and natural gas for industrial customers is heating up. Plagued by soaring natural gas costs, recession-crimped demand for energy in industrial markets, and sinking fuel oil prices, the nation's gas utilities are losing the battle

Now, in a scramble to retain high-volume industrial customers, a handful of the utilities are asking state regulatory commissions to approve price discounts for these customers, even though consumer gas rates are rising sharply. Favorable rulings from the commissions are likely to send more gas companies scurrying for similar assistance.

Over the past year, gas prices have ballooned by 20 percent. Under the Natural Gas Policy Act of 1978 (NGPA), written in response to supply shortages, price controls are gradually being lifted from about 40 percent of the nation's gas supplies from now to 1985. But with a steady supply of gas now assured well into the 1980s, U.S. utilities find themselves facing unexpectedly fierce price competition from residual fuel oil. In many regions of the country, "residual" is selling at below $5 per million Btu to industrial customers, while the industrial price of gas has risen to $5.18 per million Btu or more (chart). Industrial buyers, who last year burned 40 percent of the 20.5 trillion cu. ft. of all gas used, are switching to oil with alarming frequency.

In response, local gas utilities are seeking lower rates for their eroding industrial markets. In August the Pennsylvania Utility Commission granted Pittsburgh-based Equitable Gas Co. permission to set a special "floating rate" that will allow the utility to tie its industrial gas price to the price of fuel oil—now underselling gas by 14 percent in the area—without holding public hearings. People's Gas, Light & Coke Co., a Chicago distributor, is hoping for approval of a similar plan by the Illinois Commerce Commission by December. "We're hurting right now," says John A. Lawrisuk, a vice-president at People's. "Gas prices are going to be higher than residual straight through 1983, and we expect sizable [industrial] load losses if the new rate is not approved."

Up in arms

Utilities contend that unless lower prices to industrial users are approved, gas rates will be forced up for all customers. If significant industrial fuel-switching occurs, utilities would have to increase rates to their remaining customers to earn an allowed rate of return on assets now ranging from 10 percent to 15 percent. But consumer groups are already up in arms over price increases that analysts expect will average 20 percent over the next year. In California, Michigan, and Illinois, some consumers may see stunning increases of up to 50 percent in their gas bills, which will make price breaks to industrial users a bitter political pill. "We're between a rock and a hard place on this one," says Charles Pavalko, a staff analyst at the Ohio Public Utility Commission.

Over the past few years, however, industrial customers have carried much of the burden of rising gas prices. The incremental pricing provision of the NGPA charged industrial customers up to 50 percent more than other users for increased gas consumption. With the supply uncertainties of the 1970s, such burdens drove industry away from gas. Industrial consumption fell from 10.4 trillion cu. ft. in 1973 to 8.4 trillion cu. ft. in 1980. Now, with gas supplies in excess, utilities are struggling to prevent more losses.

Interstate gas transmission companies, which supply gas utilities, also are worried about the industrial market (BW—Aug. 2). In late August, Columbia Gas Transmission Corp., which wholesales gas in eight Northeastern states and is locked into expensive long-term contracts with producers, asked the Federal Energy Regulatory Commission to allow a price cut of $1 per thousand cu. ft. on 88 billion cu. ft. of gas slated for industrial use. Not surprisingly, distribution companies that buy gas from Columbia are applauding the move. "It's a very interesting proposal," says one executive at an Ohio gas utility. "Residential rates are going up, but they'll go up even more if we don't hang on to the industrial market. If we don't save those customers, everyone loses."

[From U.S. News & World Report, Sept. 13, 1982]

SAY GOODBYE TO CHEAP GAS HEAT

Even as air conditioners continued to hum, grim news came in early September for many Americans about the winter ahead: Costs of heating and cooking with natural gas will shoot up sharply.

Gas utilities throughout the country warned customers to prepare for the same kind of shock experienced in recent winters by owners of homes heated by oil or electricity.

Utility officials blamed phased deregulation of natural-gas prices, approved by Congress in 1978. The law, executives complained, forces them to pay higher prices for gas even though the fuel is in such a surplus that some producers have shut down wells because they cannot sell the output.

Nationwide, the Energy Department predicted, residential natural-gas prices will be 20 percent higher this winter than last. But costs will differ widely from place to place.

Southern California Gas Company said residential customers will find their heating bills 70 percent higher. Residents in Massachusetts and New Jersey face 20 percent increases.

Lone Star Gas Company requested a rate increase that could raise residential gas bills by 13 percent in Texas and up to 67 percent in Oklahoma. In Cleveland, East Ohio Gas plans to boost prices 15 percent in November on top of a 15 percent rise in May and a 4 percent hike in August. Gas costs in Cincinnati will increase 33 percent.

In Maryland, home-gas rates are going up 30 percent, and costs to commercial and industrial users are jumping 50 to 60 percent. Baltimore Gas & Electric Company ran newspaper ads putting the blame for the rises solely on its gas supplier, Columbia Gas Transmission Corporation.

Columbia, which sells gas to utilities in much of the Eastern half of the country, has shut down some 20,000 gas wells in the Appalachian region because the recession has dried up the demand for gas. The company still must charge high prices for gas, its executives explained, because it is locked into costs fixed in long-term contracts that it signed with other producers.

Gas prices are expected to keep rising through 1985, when all controls will be lifted. Still, officials doubt gas will cost more than oil or electricity.

What about using another fuel?

Heating-oil prices this winter, analysts say, may rise a penny or two a gallon over those of last winter.

Electric-heat costs are expected to go up 6 percent nationwide, with sharp variations from area to area. Customers in the West may find bills lower—a result of abundant water this summer for hydroelectric dams—but many users will pay extra for rising expenses of building nuclear power plants.

CABLE TV/COPYRIGHT BILL

(Mr. RAILSBACK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RAILSBACK. Mr. Speaker, as one of the original cosponsors of H.R. 5949, the so-called cable TV/copyright bill, I remain hopeful that it will be possible to pass this important bill before the end of the 97th Congress. The legislation originated in the Judiciary Committee's Subcommittee on Courts, Civil Liberties, and the Administration of Justice, of which I have the privilege of being the ranking Republican. Along with our distinguished colleague and subcommittee chairman (Mr. KASTENMEIER), we have been working to revise the copyright laws to take into account major changes in the television industry in recent years.

We have worked with many concerned parties—program producers, broadcasters, cable TV operators, and others—who have a direct interest in this matter and have fashioned a bill that makes significant improvements in existing law. But as I told the subcommittee when it considered the matter, and as I emphasized when the full Judiciary Committee reported the bill almost 5 months ago, we have failed to include the valid concerns of one significant party of interest, and that is professional sports. I offered a very limited amendment in this area; it garnered the votes of nine other members of the Judiciary Committee.

Since the Judiciary Committee favorably reported this legislation, it has been pending in the Telecommunications Subcommittee of the Energy and Commerce Committee, where I know sincere efforts to move the bill are now being made. But I cannot help but wonder whether if we had heeded the pleas of professional sports, best represented by baseball Commissioner Bowie Kuhn, if this legislation might not have progressed more rapidly.

Commissioner Kuhn provided the subcommittee with excellent testimony on the need for relief from the compulsory license. He made effective and eloquent arguments, and by failing to respond to Commissioner Kuhn, we denied ourselves a significant and valued ally. During these past several months, I would have far preferred to have someone of his ability, someone well known and well liked on Capitol Hill such as Commissioner Kuhn, working with us to secure legislation, rather than being forced to the sidelines.

As I said at the outset, Mr. Speaker, I am hopeful that H.R. 5949 will be enacted this year. But I continue to believe strongly that the bill will have a better chance of success, if the Congress would provide a positive response to the legitimate concerns of professional sports, which were so ably advocated by Commissioner Kuhn.

JOBS FOR AMERICA'S UNEMPLOYED

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. FIEDLER) is recognized for 60 minutes.

GENERAL LEAVE

Ms. FIEDLER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous material, on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. FIEDLER. Mr. Speaker, I have called this special order today so that Members may further address the crucial issue of jobs for America's unemployed. Of all the economic problems which we must deal with in this Congress, unemployment is the most devastating for American families and communities across the Nation.

The key to long-term solutions to high unemployment lie in first recognizing that it is a structural problem in our economy that will continue through the decade, unless we address its causes: movement in our economy toward high technology, service and information industries, changes in industry due to automation and innovation, shifts in consumer demand for different products, and the problem of increasingly strong and unfair foreign competition.

My colleagues and I will highlight the positive steps we believe Government can take to revitalize the private sector to stimulate employment for years to come.

In the present population of unemployed Americans, a portion can be termed "dislocated." They are people who have lost their jobs and remained unemployed for long periods of time as a result of structural change in the economy. Even as we recover from the current recession, these workers are not likely to regain employment easily at previous jobs or elsewhere.

Shifts in foreign competition are causing many traditional manufacturing industries such as steel, automotive, and textile firms, to grow slowly or decline in the years ahead. This will contribute substantially to the displacement of labor in the 1980's. The number of such dislocated workers in 1983 may equal 20 percent of the Nation's unemployed.

I have introduced two bills which address both the cause and effect of this type of economic dislocation. H.R. 7006 strengthens Congress power to deal with foreign countries engaged in unfair trade practices that are threatening the whole global free trade system. H.R. 7007 creates strong incentives for industry to hire and retrain those dislocated workers.

The first bill, H.R. 7006, acts to reduce unemployment by strengthening Congress power to act under the Trade Act of 1974. America is a trading nation, an exporting nation. Yet the unfair trade practices in foreign countries have threatened the global economy. Unfair trade practices have cost American products and services markets at home and abroad.

The Trade Act of 1974 is a powerful and flexible tool to deal with this issue. It permits a wide range of remedies, including tariffs and quotas. Currently, action under this act is initiated in two ways, either by the President directly or through the Special Trade Representative.

H.R. 7006 would create a third way. It would allow the Congress, by passing a concurrent resolution, to request Presidential action under the provisions of the Trade Act of 1974. This would bring congressional factfinding and investigative strengths into direct involvement with the problem of international unfair trade practices.

To provide Congress with a groundwork for its investigative actions, H.R. 7006 also requires the President to submit a report on each country with which the United States has a negative balance of trade, setting forth to what extent this is due to unfair trade practices and also setting out what actions have been taken to remedy the situation. By giving Congress direct access to the remedies of the Trade Act of 1974, H.R. 7006 will strengthen our ability to react to unfair trade practices that have cost jobs in the United States.

The second bill which I have introduced, H.R. 7007, is a new version of the targeted jobs tax credit, for employers who hire long-term unemployed workers. Under the bill, the targeted jobs tax credit would provide employers with a tax credit for a por-

tion of first and second year wages—50 percent of the first $6,000 in the first year and 25 percent of the first $6,000 in the second year—of those dislocated workers who fall into two categories: First, those who have exhausted all of their extended unemployment benefits; and second, those who have exhausted all of their regular unemployment benefits in States where extended benefits are not available and who qualify for trade adjustment assistance. The program would be targeted on those who are eligible only in 1982–83, but it would be in effect for 5 years, so that employers would have ample time to incorporate the incentive into their hiring practices.

In effect, this jobs proposal targets assistance to those unemployed Americans hardest hit by foreign competition in high unemployment States. The bill gives tax-generating, expanding industries a strong incentive to bring those workers back into the labor force in new jobs. The proposal does not create an elaborate and costly bureaucracy. It would use the resources of the present unemployment service system to place workers in jobs.

It is my hope that these two initiatives, along with the proposals my colleagues will discuss, will strengthen the expansion of our private sector and lead us to a stronger, more vital economy in the years ahead.

Mr. EMERSON. Mr. Speaker, will the gentlewoman yield?

Ms. FIEDLER. I yield to the gentleman from Missouri.

Mr. EMERSON. Mr. Speaker, I want to thank the gentlelady from California (Ms. FIEDLER) for providing us this opportunity to discuss one of the most serious problems our economy faces today; unemployment. Although the U.S. economy is now employing 57.5 percent of the total adult population, 11 million people are idle.

The most substantial group of unemployed workers now are the so-called blue-collar workers. One of the reasons U.S. blue-collar workers have been displaced is because of increased competition by our foreign competitors for a place in the U.S. market. It is simple economics that a company that can produce a product at a cheaper cost will be the one which will obtain a larger share of the market. Many of our foreign competitors have been able to accomplish this by means of employing workers at a lower cost or subsidizing their industries, thereby producing goods at a cheaper price.

Another reason for the displacement of blue-collar workers has been a decline in the demand for the products that they help produce. Indeed, this Nation is on the verge of a technical revolution, and many of the jobs to be had now and in the future are not in the traditional manufacturing occupations, but in the field of high technology.

There is no doubt that a problem exists and what we should be asking ourselves is: What is the Government's role in insuring that the American worker can again find and keep meaningful employment that will contribute to the high standard of living that is the right of all Americans who are willing to work for it?

First of all, I strongly believe that this Nation must continue to pursue a strong trade policy which will make clear to our trading partners abroad that we expect a fair shake. Foreign competitors which flood U.S. markets with goods while blocking American products in their own countries presents a problem that runs counter to our policy of fair trade. We all know that while the Japanese flood our free market with their vehicles, American cars imported to Japan are virtually priced out of the market. This is only one of many examples of the inequities that exist. Although I am a strong proponent of free trade, I do not believe we should be the only country practicing it, at the expense of our labor force and our entire economy.

On that same note, I believe that we must enact policies which will encourage U.S. companies to do business abroad. There is currently legislation pending before a House/Senate conference committee that would encourage small and medium businesses to increase their exports, which would, in turn, create several thousands of jobs. This bill, S. 734, would establish a new office in the Department of Commerce to promote the formation of export trading associations and companies. It would also allow bank holding companies to invest in export trading companies. This legislation would work to eliminate the many obstacles to exporting and pave the way for businesses to increase their export trade. It has been estimated that this legislation, if enacted, would result in the creation of anywhere between 4,500 and 5,900 private enterprise jobs in Missouri alone.

Another solution to our present problem of the dislocated worker is to retrain the work force so that they will be able to gain new skills to respond to the demand for those skills in growing industries. Mr. Speaker, we have always been a nation of progress, and technological progress in the United States will mean that many jobs presently performed by men and women will be performed by machines in the future. However, this progress also means that many new and exciting job opportunities will open up. For example, increased automation of many of our industries will require well-trained people to operate and repair electronic equipment. It is encouraging news that many of the Nation's labor unions have begun training programs to teach new skills to those workers who have become victims of the decline in manufacturing.

Furthermore, the distinguished Member from California (Ms. FIEDLER) has introduced legislation that will provide tax incentives to expanding industries to hire and retrain unemployed workers so that the proper adjustments in the present demand and supply of labor can be made.

Many of the problems we currently face with unemployment will not be resolved overnight. The problems in many industries are complex and do not lend themselves to simple solutions. We must look to tomorrow and assure that we are in the vanguard of attaining a smooth transition to our changing world and the skills that will be required to run it.

● Mr. NELLIGAN. Mr. Speaker, I am honored to have this opportunity to participate in the special order of the gentlewoman from California. I share the concerns of participants here today about the future course of our economy. I believe that discussions such as this are vital to the development of strategies for restoring the economic base of our great Nation.

While much of the discussion today has centered on national tendencies and trends, it is also important to note that our country is a collection of disparate regions, States and communities, all with distinctive problems, and all in need of separate strategies for economic recovery.

Along with many of my Republican colleagues, I sometimes have been identified solely as a "supporter of President Reagan," to the exclusion of nearly everything else I have tried to accomplish during my term in Congress. This ploy, which is widely used by the media, and which has caught on among many of our Democrat opponents, is not without a basis in fact. But, like so many shortcut labels, it serves to focus attention too exclusively on some of the major Federal initiatives we Republicans have undertaken under the able leadership of our President. It obscures the fact that we Republicans, like our Democrat colleagues, represent diverse constituencies, with diverse needs. As responsible legislators, our actions are conditioned not only by our commitment to the Republican national program, but also by the distinctive needs of the people who have elected us.

During my 20 months in Congress, I have been proud to support the major initiatives of President Reagan. I believe that program will be successful. Already there are signs that inflation has moderated for good. That interest rates may be coming down for an extended period. That home mortgages are becoming available again at costs families will be able to afford. All of these are good signs for the future,

and I believe the President, and the Republicans in Congress along with many Democrats deserve a great deal of credit for them.

But despite these positive signs, unemployment remains a serious national problem. It is even a more serious problem in certain regions, States, and communities around the country. My own congressional district—Pennsylvania's 11th—is one of the hardest hit areas, with an unemployment rate of about 12 percent. Our district's unemployment problems are not of recent origin. In fact, I am somewhat amazed when I speak with Members from other areas of the country who refer to such terms as "structurally unemployed," "labor displacement," and "dislocated workers" as if these were new phenomena.

In Pennsylvania's 11th District, these terms are already well understood, and not just in an intellectual sense. Many of our citizens experienced "displacement" and "structural employment," as early as the 1940's and 1950's. That was the period when the anthracite coal industry—which for a century had defined our region—went into decline. In the 1960's and 1970's, civic, business, and labor leaders in our area were successful in attracting literally hundreds of new industries to our region. This cooperation not only saved the region's declining economic base, but it provided thousands of jobs for dispossessed coal miners and their descendants.

In short, our area residents are already well versed in the fine art of job creation strategy. We have some of the best professional redevelopment experts in the Nation. Our redevelopment organizations have won national awards. Our strategies have been imitated across the Nation. Our area has begun to look, feel, and think better about itself than it has in 30 years.

This is not to say the problems associated with job creation are solved in our area—far from it. Ironically, we are now faced with the fact that many of the industries we attracted in the 1960's, including the textile, apparel, shoe, and heavy metal equipment industries, are now themselves beset with problems. Plant closings and job losses remain crucial problems in our area. For the remainder of my time, I want to discuss some of the initiatives I have taken which have been specifically tailored to retain existing jobs, and create new jobs, in our area. I believe there are three distinctive categories of actions I have undertaken, and I shall form my remarks around these categories. The first group is actions to reduce foreign imports and encourage American exports; the second is actions to provide structural improvements to aid area industries; and the third is actions designed to improve the human resources among the work force in our area.

One of the most serious problems confronting our area is unfair foreign competition. I have taken several legislative actions to help stem the growth of imports. I was an early cosponsor of H.R. 5133, the Domestic Content Act, which would require that increasing percentages of all cars sold in the United States would have to be manufactured in the United States with American Labor. One of the largest industries in our area manufactures parts for automobiles, and I believe passage of this legislation cannot help but have a positive effect on area employment.

As a member of the Congressional Steel Caucus, I am also a cosponsor of H.R. 6505, which would establish restrictions on carbon and specialty steel imports. Such restrictions are necessary to defend Pennsylvania's steel industry against unfair competition.

I have also cosponsored a bill, H.R. 6239, which would discourage the growth of imports in the cut flower industry, a major product in the district I represent.

Currently, the single largest employer in our area is the apparel industry. That is why I have taken every opportunity I could to promote an awareness among Federal officials of the need for additional import protections for this vital industry. Too often in the past, ill-advised Federal import policies have contributed to the decline of the apparel industry, instead of serving to help offset inherent wage disadvantages now threatening the industry. I was gratified last year when the Reagan administration successfully renegotiated the multifiber arrangement, the international treaty which regulates textile and apparel trade in the international market. While the MFA was toughened to the advantage of American textile and apparel companies, I would like to see it toughened even more.

I feel the same way about the shoe industry, which employs about 2,000 people in the 11th District. I believe that additional import protections are necessary to preserve jobs in this industry. I have consistently opposed any provisions of the proposed Caribbean Basin Initiative which would grant any trade advantages to shoes produced in that region.

In addition to changing treaties and laws which regulate foreign trade, I believe we must take actions to make it easier for American companies to export. As the Congressman from a district which is a leading producer of anthracite coal, I am proud to be a founding member of the House task force on coal exports. As a member of the task force, I am especially interested in finding ways to increase anthracite coal exports.

I am also a cosponsor of legislation to create the so-called export trading companies. This legislation would allow banks to set up trading companies to help assist small businesses—such as our area's anthracite industry—in increasing exports. Department of Commerce studies indicate that ETC's could produce thousands of additional jobs in Pennsylvania alone, and hundreds of thousands nationwide.

A second major type of jobs-creation activity I have undertaken for my district is what I refer to as structural improvements. We all know that each of our congressional districts is unique, with a different set of strengths and weaknesses. I have taken several actions which are designed to help solve specific structural problems that thwart economic development, and jobs creation, in the 11th District.

Two of these efforts pertain to our area transportation network. By working closely with Federal officials, railroad representatives, and area businessmen, I have been instrumental in maintaining adequate rail service to our area, in the face of threatened route abandonments by Conrail. I was extremely gratified to learn that the Interstate Commerce Commission recently gave unanimous approval to a plan I supported allowing the purchase of the Delaware and Hudson Railroad by a Connecticut firm. This plan will continue vital service to our district on D. & H. lines, and provide for continued transport of 11th District products throughout the Northeast and the rest of the Nation. Loss of such railroad service would have meant the loss of hundreds, perhaps thousands, of jobs in our region.

Another transportation problem confronting our area is our deteriorating highway bridges. Many of our most important bridges are up to 60 years old. In order to help solve this problem, I have become a cosponsor of H.R. 3227, to increase the allowable Federal share of financing for bridge replacement and rehabilitation projects.

Other actions I have taken have been designed to revitalize our area's anthracite industry. While anthracite production has decreased markedly during the past 30 years, I believe that our changed national energy situation bodes well for the revival of the industry, which will, in turn, create jobs for our people.

To help revitalize the anthracite industry, I have sponsored legislation to extend energy tax credits to anthracite stoves. I have cosponsored legislation that would make it easier for small anthracite producers to obtain Federal loan guarantees to help finance expansion of their operations.

I have also worked to bring Federal projects related to anthracite to our region. Last year, I was successful in obtaining $3.1 million for a fluidized bed combustion boiler which will be

fueled by anthracite, and which will provide steam heat for the entire downtown area of the city of Wilkes-Barre, Pa. Projects such as this will not only provide a market for anthracite products, but will also make our region more attractive as a place to locate other businesses.

I have also been active in defending Department of Defense contracts to purchase anthracite for heating overseas military bases. I have met repeatedly with DOD officials, in an effort to preserve these contracts, which have provided the primary export market for anthracite for 20 years, but which have recently been threatened by foreign competition.

Working closely with my esteemed colleague, Representative JOSEPH M. MCDADE, I have been successful in obtaining revised DOD contract terms to benefit the industry. I have also been successful in adding language to the fiscal year 1982 supplemental appropriations bill that would require DOD to purchase only American-produced coal for its heating requirements in Europe. Actions such as these should help to preserve the jobs of hundreds of miners in our region.

The third area of activity I would like to discuss briefly concerns my efforts to develop the human resources in our area, so as to improve the economic climate. Let me emphasize that the work force in the 11th District is among the most highly motivated in the entire country. Like other areas, however, our workers need to be able to obtain the skills necessary to remain competitive in our quickly changing technological environment.

Toward this end, I have utilized existing Federal programs and treaties to preserve area jobs, and to provide benefits for those who lost jobs to foreign competition. I assisted one area firm in qualifying for assistance under the Trade Adjustment Assistance Act. I presented a written statement on behalf of another area industry that had petitioned the Federal Trade Representative for relief from unfair trade competition. In each case, my efforts were successful.

I also supported legislation which recently passed the House which would create a new and improved Federal jobs training program. As you know, this bill had wide, bipartisan support. It was widely agreed that, by placing renewed emphasis on private sector input, the revised job training program envisioned by the legislation would serve to train individuals for meaningful jobs in the private sector. Such training programs are vital to the well-being of our area, and I am pleased to have had the opportunity to support the legislation.

Finally, I want to mention a legislative initiative I have undertaken which may ultimately help create jobs in our area for disadvantaged youths. Last year, I introduced legislation which would create a special fund for maintenance projects in our national parks. The fund would consist of all franchise fees currently paid by concessioners in national parks.

I was gratified when the funding mechanism contained in my bill was adopted as part of the legislation adopted by the House in June which would create the American Conservation Corps. Modeled after the Civilian Conservation Corps of the 1930's, the ACC would create job opportunities for youths from high unemployment areas to improve and maintain our Federal lands. I am hopeful that this legislation will be enacted in the Senate.

In brief, these are a few of the actions I have undertaken to help create needed jobs in our region. I am grateful to my colleague, the gentlewoman from California, for providing me with this opportunity to point out that the Republican plan to bring about economic recovery does not end with appropriations bills, budget resolutions, and tax bills, but includes the efforts of each Republican Member to improve the economic climate in his or her own congressional district.●

● Mr. LAGOMARSINO. Mr. Speaker, there are few things as demeaning to a person as being out of work. For most of us, a job means dignity, self-respect, and making our own way in the world, and when retirement comes, we see it as our reward for having contributed to society and to our own and our family's enrichment.

When a person's job disappears through no fault of his own, it is more than a personal tragedy; it is a loss to society as well. That is why the current unemployment figures are a matter of such serious concern. Today, almost 1 person in 10 in the available work force of the Nation is idle. The causes of this dilemma are many and complex. They include foreign competition; loss of productivity; a drying up of capital and investment funds; the past ravages of inflation; and Government bungling. Some go so far as to say we are experiencing a realinement in the nature of our labor force comparable to that which occurred when we shifted from an agrarian economy to an industrial economy. Whether that is true or not—and I think the question is open to debate—there seems little doubt that a relatively high level of unemployment, say in the range of 5 to 6 percent, has persisted in the economy for many years and is likely to persist for some time to come.

It may be useful to look behind these figures to gain some historical perspective on our current problems. One point which is pertinent is the changing nature of the work force itself. The 15 years of rapid Government growth which followed the institution of the Great Society in the mid-sixties vastly increased the revenues of the Federal Government. It also vastly increased the load of taxation on working people, and caused a rapid inflation in the cost of living, which peaked in the double-digit inflation rates experienced at the end of the Carter administration.

One of the most rapidly increasing components of the cost of living in recent years has been interest rates. Heavy Government borrowing to finance Government growth was the primary cause of the runup in interest rates. And high interest rates, were the primary cause of the runup in housing costs and subsequent stagnation of the housing industry.

As costs rose, more and more families found they needed more than a single salary to get by. Women who had remained as homemakers now entered the labor force. Then the shortage of credit caused by Government borrowing began to impact on industry. Expansion was deferred, as were plant improvements. Productivity declined, and foreign products became more competitive, resulting in declining markets and eventually, in job losses. The workers who were the first to be let go were those who had most recently entered the market: Young people and homemakers. People attempting to enter the market for the first time, found themselves shut out. And the unemployment rate soared.

Interestingly, the percentage of the total working-age population now employed—the so-called employment ration—now stands at 57.7 percent—two full points higher than at any time in the boom years of the sixties. In the depths of the Great Depression, this ratio had fallen to 44 percent—with a corresponding unemployment rate of 24 percent. In 1975, at the low point of the last serious recession, the employment ratio was 55.3 percent, nearly two full points below today's, even though the unemployment rate was 8.5 percent, more than a point below today's rate. This seeming contradiction between the employment ratio and the unemployment rate is due to the changing definition on the unemployment rate and to the changing character of the work force. Many of today's unemployed are members of families which still have an income, as compared to the 1930's, when many sole breadwinners were out of work. In addition, the existence of unemployment compensation and other social assistance programs has mitigated, to an extent, the full impact of job loss. This is illustrated by a study at Northeastern University in Boston which found that the average family with an unemployed household head, still managed to maintain an income at the national and statewide median level.

This is not to say that unemployment is not serious; it remains a serious problem and current levels are too high. Most economists now agree that a 5- to 6-percent unemployment rate is built into the economy, due to the mobility of the work force and the number of optional workers. So we are still several points above a normal level.

What is the remedy for this problem? One remedy would be to reduce the deficit. Less Federal borrowing to meet the deficit could free up billions of dollars for job creation and expansion, as we witnessed so vividly when the stock market took off last month following passage of the tax bill and the lowering of interest rates. Business improvements would also allow us to meet head on the challenge of overseas competition, which is due in part to a newer physical plant. This alone could substantially reduce the unemployment rate.

In conclusion, Mr. Speaker, there are a number of steps we can take to reduce unemployment, but the first and most critical step has to be to reduce the deficit. And generally, that means reducing the rate of Government expansion. The answer is not, as some have suggested, zero growth in the private sector.●

● Mr. ROGERS. Mr. Speaker, I would like to commend the gentlewoman from California for having called for this special order. She is entirely correct—the question of jobs certainly deserves careful consideration in the Congress.

Americans are seeking employment in record numbers. Each of us is hit monthly with national, State, and local figures reflecting Americans out of work. The population is shifting continuously motivated by the desire for gainful employment. Rural Americans are searching for work in the cities, urban Americans are moving to the country; northerners are moving South and West, and southerners are moving North and West; and on and on. Our constituents are leaving their communities, their States, their regions, in hopes of finding an adequate livelihood.

What can we do? What are we doing as a Congress to solve this problem? The burden is certainly on our shoulders.

First of all, we must improve the state of the economy—reduce inflation, stimulate economic growth, curb illegal immigration and employment practices, implement effective training and employment legislation and much more.

Currently, House and Senate conferees are hammering out the details of H.R. 5320 and S. 2036 which will help train and employ Americans—our youth, our aging, our veterans, our handicapped, our poor, our homemakers. From past experience we know it is imperative to emphasize training for available and future job opportunities rather than throw money into temporary and meaningless employment. We know from past programs which have been ineffective in the long run that employers must play a major role in planning training and employment programs. Coordination at the State and local levels is essential to avoid duplicative and wasteful efforts. We have an opportunity with the current job training bills to make great strides toward an effective employment program.

The fact is Mr. Speaker, that privately-owned businesses, run with the expertise of entrepreneurs across the country, are the only way for us to create and keep permanent jobs. The best legislation is not legislation which will create yet another Federal program—a program which businesses in all of our districts will end up paying for and which will skim off capital which would be better invested in growth and jobs. The best legislation is to get rid of the regulations, taxes, and high interest rates which have crippled all of our businesses and especially our small businesses.

The Export Trading Company Act is a prime example of this kind of beneficial legislation. This bill, which was endorsed by the administration, got rid of unnecessary and restrictive laws and allowed small businesses to combine their efforts in order to give them more clout in the export market. In my own State, where there is extensive interest in exporting coal, the Commerce Department estimates that this bill could lead to between 2,000 and 5,000 jobs. And this program, while creating jobs, will not cost the taxpayers a single cent. On the contrary, we could end up saving money with lower welfare and unemployment costs when we put workers back on the job.

I am looking into legislation now to prevent cheap clothing imports from flooding our markets and shoving our workers onto the unemployment lines. The past import policy has allowed jobs, jobs which we need so badly here at home, to slip away to the cheapwage countries in Asia. It is high time our trade laws became responsive to the needs of Americans.

And we need to continue to support the President's program for economic recovery, so we can get our economy back into shape and so we can get rid of the outrageous interest rates left in our laps by the previous administration. Given just half a chance, the small businesses which have been the bedrock foundation for our economy, the strongest economy on the face of the Earth, will be able to get back to the task which they do so well of providing jobs in each of our districts.

The private sector is the key to our country's growth and the key to creating jobs. We have got to have the guts to stick to the administration's policy, so we can get our country and our businesses back onto their feet, once and for all. This is the only solution which will give us the jobs we so need and want.●

● Ms. HOLT. Mr. Speaker, the high unemployment rate is a concern to every compassionate American, but it cannot be discussed in isolation from the general condition of the economy.

It is our goal to restore the American economy to the strength we all remember, to the robust growth that offered abundant jobs and advancement opportunities for people. We are correcting the problems that have afflicted our economy for years.

In the recession year of 1980, American people elected President Reagan and changed the character of Congress because they wanted to stop the economic decline that had been proceeding for years. The seventies was a decade of rising inflation, a rising tax burden, rising interest rates, and rising unemployment.

We are turning this around. We are correcting the problems that dragged our economy into stagnation. The new economic program came too late to prevent the deep recession of 1981–82, but the things we have done offer great hope for the future.

The inflation rate has been cut from 12.4 percent in 1980 to 8.9 percent in 1981 to an estimated 6 percent for this year. The 10-percent cut in personal income tax rates on July 1 will be followed by another 10-percent cut next July 1. Interest rates have been slowly falling.

All of this means hope and opportunity for the American people. It means the blight of unemployment will be reduced as the great American economic engine responds to the policies that encourage growth.

Republicans are too often accused of not caring about the unemployed, which is nonsense. It is because we care that we have undertaken the difficult program of restoring the strength of the American economy.

At the risk of offending potent special interests, we have reduced Government spending so that the productive sector of our economy will have the resources to grow and create jobs. It is seldom that politicians have the courage to do such things, but the painful choices we have had to make have helped to establish the foundation for economic growth.

We have eliminated many of the extravagances that have been built into the Federal budget over the years, but we have maintained programs essential for the support of the elderly, disabled, and our neediest citizens.

It takes time to lay the foundation for economic growth after years in which the strength of the productive

sector was eroded by the growth of Government, but I believe we are creating that foundation.

Our goal is jobs, jobs, and more jobs for the American people.●

● Mr. VANDER JAGT. Mr. Speaker, I want to commend my colleague from California (Ms. FIEDLER) for her leadership in bringing employment and jobs issues to the forefront of debate in this body. Her deep concern over economic and employment problems is indicative of the seriousness that Republican leaders have in getting the economy moving, and giving American workers the opportunity for meaningful employment.

When President Reagan took office last year, he clearly made the economy his No. 1 priority. His actions once in office reaffirmed that commitment as he wasted no time in pushing hard for policies to set the stage for economic recovery—with budget and tax reductions as his centerpiece.

In his inaugural speech, President Reagan warned that it would not be easy to get the Nation back on course, that recovery would not come overnight. There has been great progress in controlling the runaway inflation we faced just 2 years ago, and there is considerable basis for optimism that the recession has finally bottomed out, with good prospects for a healthy recovery over the next few months.

And, while the unemployment rate is still high—far too high—there are some optimistic indicators as well. The employment rate among the U.S. working age population is high, 57.5 percent in June. That is a statistic frequently overlooked and overshadowed by the unemployment rate, but is perhaps a better indicator of the health of the economy. That 57.5 percent of the working age population is employed is important. That is an employment rate higher than 1972 by 1½ percent, and 2½ percent higher than in 1960. In fact, the employment rate has seldom been higher.

But, rather than arguing about one statistic or another, we should really be talking about what we can do to make the economy stronger, to put even more Americans to work in productive jobs. That is where we must have better ideas, to look forward to our needs and goals, rather than turning to the past and repeating our mistakes.

I am proud that Republicans do have better ideas, that we are looking forward and not resorting to the same wornout ideas that have not worked before. With the unemployment rate at 9.8 percent just 8 weeks before election day, it is easy to call for a budget-busting program to create make-work Government jobs, but that will not help the problem.

The ultimate solution is revitalizing the private sector, to create new jobs that will give a worker an opportunity for a productive career for years to come. That has been the focus of the Reagan economic program, and that is the focus of legislative initiatives I have taken during the past 2 years.

One of the most significant contributions I have made during my service in the House came last year during action on the tax bill with the new incentives for industrial research and development. The tax incentives included in the 1981 Economic Recovery Tax Act have already encouraged American industries to undertake more R&D activities, and that effort will translate into higher productivity, more innovative products, greater competitiveness in the future and new jobs. American business must be innovative and productive to successfully compete in the international markets of the future, and the R&D undertaken today will contribute to the success of the future.

Another legislative effort in which I have been deeply involved is the targeted jobs tax credit. This mechanism provides a tax credit to employers who hire workers from certain target groups, including low-income youth, veterans, and the handicapped. I worked this year to develop legislation, H.R. 6700, to expand those categories to include unemployed workers who have exhausted their extended unemployment benefits, or who qualify for Trade Adjustment Assistance and have exhausted their regular unemployment benefits. This tax credit would help unemployed workers who have been out of the work force for an extended period or have been displaced by imported products get rehired by another employer in the private sector. I am convinced that this would be an effective way to get workers off the unemployment and welfare rolls, and on tax rolls as a productive worker.

And last, I want to recognize the important initiative taken by the President in cooperation with many of my colleagues in developing the urban enterprise zone legislation. This is the kind of innovative approach we need to solving the problems of our aging urban areas, to restore economic vitality and employment opportunities in areas that have been left to waste. I have been proud to join as a cosponsor of that legislation, H.R. 6009, and I look forward to its serious consideration in the Congress later this year or during the 1983 session.

We must continue to look forward, to plan for the economy of the eighties and nineties, not look back on the programs of the thirties. Innovation, productivity, and competitive aggressive American industries will be the strength of our economy, and we must develop programs which will accelerate that progress, not impede it.●

● Mr. SHUMWAY. Mr. Speaker, I am pleased to have this opportunity to express my thinking on the crucial jobs and employment issue, particularly since the House is scheduled to consider so-called jobs creation legislation this week.

I am certain that most of my colleagues have had experiences similar to my own when traveling through their districts this summer. No matter where I go, the No. 1 economic problem besetting my constituents is easy to identify: unemployment. In some sections of northern California, unemployment rates approach 30 percent. Clearly, this critical problem must be responsibly and effectively resolved, not simply patched or haphazardly bandaged in a stopgap manner.

For entirely too long, we have tended to turn to Washington for answers, no matter what the question, and no matter whether it was appropriate for the Federal Government to intervene. I have always maintained that it is not the role of the Federal Government to "create" or directly provide jobs. Instead, a more appropriate Government function would be to stimulate a healthy economic climate in which plentiful private sector jobs can meet employment needs.

Before us this week will be legislation which is a classic example of the old "spend-and-patch" thinking. House Joint Resolution 562, the urgent supplemental for job creation, will do virtually nothing to solve unemployment. It will, however, add $1 billion to the deficit, thereby increasing inflationary pressures. Reinstituting the costly and ineffective public service employment program of CETA is no answer, particularly when one considers that no jobs could be "created" until 1983. The bill is not even a good "stopgap" measure.

The most effective way to end unemployment is to heal the economy, and the most effective way to heal the economy is to continue what we have already begun: cutting spending, cutting taxes, and reducing burdensome Government regulations. Continued dedication to those three goals cannot help but produce a chain reaction of beneficial results. Less Federal spending will reduce the deficit, thus the Government will not be forced to consume so much of the private credit market in order to meet its obligations. More available capital in private markets will ultimately result in lower interest rates, thus encouraging businesses to expand. Reduced taxes will leave more money in the hands of Americans, and an incentive tax policy will encourage savings and investment. Increased savings and investment will permit critical capital formation to occur, thus providing the resources for increased business production. And increased production means jobs, real jobs, not hastily contrived public serv-

ice positions underwritten with nonexistent public moneys.

Easing Federal regulations, some of which are little more than Government sanctioned restraints on employment, will also reduce the jobless rate. As side benefits, lower Federal spending levels and a restoration of individual freedom of choice will also result from reduced regulations.

Finally, the achievement of these three reductions will leave more money in wage earners' wallets once they are earning wages again. It makes far more sense to me for Americans to keep their money, rather than giving it to Uncle Sam to spend for them.

An example of specific legislation which I believe will ease unemployment is the export trading company measure which has passed both the House and Senate. As a sponsor of the bill, and as a member of the House Banking Committee which contributed to its authorship, I am extremely enthusiastic about its potential for increasing U.S. export opportunities and reducing unemployment. In fact, the Department of Commerce estimates that as many as 30,000 new jobs will result from implementation of the bill in California alone. As passed, the bill seeks to increase U.S. exports through the formation of export trading companies (ETC's), which would serve as intermediaries for U.S. companies, large and small. On the whole, many companies have shied away from foreign markets because of unfamiliarity with overseas laws, languages and practices, as well as the staggering cost and potential risk involved. With the passage of this effort, ETC's will orchestrate American skill and resources, and will attract producers of goods and services along with export management companies, banks, freight forwarders and other service businesses into a joint effort to exploit foreign markets. This legislation is a fine example of a congressional effort to remove obstacles in the path of private sector production, and to encourage the very type of thriving economy so necessary to promote adequate employment opportunities.

I would like to share with my colleagues some very touching comments passed along to me by two of my constituents who understand far better than any of us the burdens of unemployment. Not only is the husband in this family out of work—his unemployment benefits have just run out. Still, this is what they had to say:

> We urge you to support the President's economic program . . . we can see beyond the present situation to a better time.
>
> We feel this better time is worth some sacrifice and efforts on our parts, and we are willing to "tough it out" in good faith. We are looking forward to a more sound fiscal program . . .

And so am I. It seems clear that these individuals understand some basic truths about our economy better than many of our big-spending colleagues. They realize that we have spent far too long throwing money we do not have at problems which are not appropriately within our purview as Federal legislators. By contrast, we spend too little time implementing positive and constructive approaches which keep in mind the basis of our free market system.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 5 minutes.

● Mr. GILMAN. Mr. Speaker, on September 15, 1982, I was unavoidably absent due to an economic development meeting with Japanese industrialists in our congressional district, causing us to miss the following rollcalls:

On rollcall No. 326, on agreeing to the conference report on S. 923, the Pretrial Services Act, which was agreed to by a vote of 367 yeas to 20 nays, had I been present I would have voted "yea"; on rollcall No. 327, on resolving into the Committee of the Whole for consideration of H.R. 6956, which motion passed by a vote of 346 yeas to 5 nays, had I been present I would have voted "yea"; on rollcall No. 329, on agreeing to an amendment offered by Mr. SCHEUER to add $33.1 million to the EPA research and development account, which failed by a vote of 263 nays to 131 yeas, had I been present I would have voted "yea"; on rollcall No. 330, on agreeing to Mr. FLIPPO's amendment to delete the $140 million appropriated for the sole-source procurement of a Centaur upper stage, which failed by a vote of 316 nays to 77 yeas, had I been present I would have voted "nay"; on rollcall No. 331, on agreeing to the Walgren and Dannemeyer amendment to prohibit the use of EPA funds to impose sanctions on States that have not complied with the vehicle emission inspection and maintenance program, which was agreed to by a vote of 200 yeas to 184 nays, had I been present I would have voted "yea"; on rollcall No. 332, final passage of H.R. 6956, the Housing and Urban Development and independent agencies appropriation which passed by a vote of 343 yeas to 38 nays, had I been present I would have voted "yea."●

PUERTO RICAN STATEHOOD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. BAILEY) is recognized for 10 minutes.

Mr. BAILEY of Pennsylvania. Mr. Speaker, yesterday I introduced a resolution expressing the sense of the House that enabling legislation passed by this body in the future, pertaining to Puerto Rico, should Puerto Rico decide to seek statehood, encourage, promote, and maintain the needs of our fellow citizens there. The resolution is timely, particularly so because of the tax bill enacted recently. A major issue debated and decided during passage of the measure was the tax status of Puerto Rican industry.

Incidentally, Mr. Speaker, as someone who has diligently fought for Puerto Rico and its needs, I think a special effort should be made here to recognize the terrific job that was done in their behalf. BALTASAR CORRADA, the Puerto Rican Representative here, is not only a good friend, but has worked very, very hard to promote and maintain the interests of Puerto Rico. The Governor of Puerto Rico, Governor Ramirez, and in particular a fellow who has become a friend of mine, Jose Madera, administrator of the economic development administration, all did a tremendous job during the recent legislative scuffle. The time and effort spent by these people, and others I might add, who came from all parts of Puerto Rico, representing various political, business, and labor interests on the island, did a great job. They worked very closely with a conferee respected by all of us here, and that was Congressman CHARLIE RANGEL of New York. Congressman RANGEL was particularly effective in working on behalf of Puerto Rico during the conference committee deliberations. All of these people deserve a great deal of praise and credit.

But that conference committee action and the controversy that swirled around the tax bill, pointed up the need for direct representation for our fellow citizens from Puerto Rico. My resolution merely expresses the sense of the Congress that should our fellow citizens in Puerto Rico decide to petition this Congress for admission as a State, that in the event that they do so, any enabling legislation would preserve, protect, and defend in the interests of all of the States the interests and needs of Puerto Rico.

There are a number of fears on the island that this resolution would help calm. One is that there either would be no propensity nor any mechanism to recognize some of the unique difficulties which Puerto Rico faces. And neither one of those doubts, of course, have any merit.

I shall be seeking support for my resolution here in the House and plead with all Members to join me in this effort. I, for one, feel honored and privileged to share my American citizenship with the hard working people in Puerto Rico. The courage, hard work, and energy exhibited by our citizens there are unequalled anywhere else in the United States.

One need only look at the honor rolls of our veterans to see the vividly

painful, but most deeply appreciated contribution that the American citizens of Puerto Rico have made to the well-being and safety of the United States of America. The blood they have spilled, the lives they have lost, and the tremendous capacity for hard work, creativity and courage can only strengthen and contributed to the overall greatness of the United States, should we and they properly recognize and advance the common ties that should bind us irrevocably forever.

□ 1920

RETHINK SINAI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

● Mr. GONZALEZ. Mr. Speaker, I wonder how many of my colleagues, how many citizens, remember that the United States still has a sizable number of soldiers in the Middle East. The Marines have indeed left Beirut, but the Army is still in the Sinai as part of the multinational force that is charged with overseeing the peace between Israel and Egypt.

It is difficult for me to understand why this commitment is necessary. It is clear that Egypt and Israel are not about to go to war. If they did want to fight, the multinational force there is no more insurance against conflict than was the hapless U.N. force that stood between Israel and Lebanon. If a token of good faith is needed, why must it be indefinite, open-ended? After all, the adventure in Beirut was a strictly limited affair. That was a commitment of 30 days or less, and our troops did get out in less than 30 days. If we have no reason to doubt the good faith of the agreement to demilitarize the Sinai, there is no need for troops to be there at all, certainly not on an open-ended basis.

I remind you that I opposed the Kissinger scheme that committed American civilians to the Sinai earlier; I also opposed the commitment of troops that came as a result of negotiations in the Carter administration. I expressed my doubt about the wisdom of sending Americans there, when the Reagan administration acted to do so. I reiterate my concern today.

What can those soldiers do? They are too few and too lightly armed to resist any serious attack by anyone. They are nothing more nor less than hostages, hostages in the ancient sense—there to guarantee that anyone who violates the peace does so at the risk of inflaming the United States. But why is it necessary to take that risk? If the parties have acted in good faith, there is no need for anyone to act as a guarantor of that faith. If they have not acted in good faith, our troops can do nothing to turn any aggressor away.

I understand the present strain that tests the long ties between the United States and Israel, and in turn the more recent and much more fragile ties between Israel and Egypt. Yet I cannot believe that the national interest or the good faith between these countries needs to be sealed in blood, nor that a blood seal makes any bond between them any stronger. Peace is in the interest of Egypt and also in the interest of Israel. They do not need foreign soldiers to guarantee it, nor would they be deterred from breaking the peace by the presence of any such token contingent.

The administration is in the process of making a bold move to settle the Palestinian problem. Surely that problem can never be resolved without some good faith in all the many parties that are in conflict there. It seems clear that foreign troops did more to destroy Lebanon than to preserve it. Events of the past few days suggest that the greatest need in Lebanon would be for Syrians and the PLO to leave altogether, and for Israel to do likewise. Maybe then the Lebanese could sort out their own problems. However that tragedy ends, it can only end by the good faith and good sense of all concerned. The same is true in the Sinai. I do not believe that faith is inspired by foreign police, foreign border guards, or foreign hostages. I believe that the commitment must be rethought. If we bring those forgotten soldiers home, we might in turn be doing more than anything else to promote the peace. In the end, it will be faith and good sense, not a blood seal, that keeps the agreement in the Sinai.●

HIGH HOLY DAYS 5743

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, the evening of September 17, the first day in the autumn month of Tishri, 5743, commences Rosh Hashana, marking the beginning of the Jewish New Year. For Jews all over the world, this is a joyous, but solemn, holy day of deep religious significance, and the start of a 10-day period of penitence, the Days of Awe, culminating in Yom Kippur, the holiest day of the year.

According to Jewish tradition, on Rosh Hashana, also called the Day of Judgment, God remembers all his creatures and judges humankind, and their destinies are inscribed in the Book of Life. It is a time of reflection, prayer, and penitence. During the evening celebration in the home, festival candles are lit, and a holiday meal is served, including a round loaf of bread and apples dipped in honey to symbolize the hope for a sweet new year. The next day is devoted to prayer and self-reflection in the synagogue. Reform and Israeli Jews celebrate Rosh Hashana for 1 day from sundown to sundown, while Orthodox and Conservative Jews observe this holiday for 2 days.

The high point in the Rosh Hashana service is the blowing of the shofar, or ram's horn, symbolizing the beginning of the high holy days. Its shattering sound is meant to awaken man's conscience, to renew his faith, and to return him to God, and to summon all Jews to meditation, self-examination, and repentance. This year, because the first day of Rosh Hashana also falls on the Jewish Sabbath, a day of rest, the shofar cannot be blown until the very end of the day.

During the Days of Awe, Jews search their souls and repent for their sins, and their deeds and fate are weighed in the balance, to be sealed on the last day. Beginning on the 10th evening, Yom Kippur, the Day of Atonement, Jews fast until the next sundown. Most of this time is spent in the synagogue, repenting, and asking pardon from God and from their fellow men. In turn, they freely forgive their neighbors. At the end of the day, the shofar is blown one last time, and with a cleansed heart, all Jews look forward to a good new life for the following year, and return to their homes for a hearty break-the-fast dinner.

As Congressman for the 11th District of Illinois, I am happy to join my colleagues in Congress, and my constituents and friends of the Jewish faith in extending my greetings and best wishes for a happy, healthy, and prosperous new year. "May you be inscribed in the Book of Life." I also hope and pray that the coming year brings an end to persecution of the hundreds of thousands of Jews living under Communist oppression, who are unable to observe these most holy days, so they too may worship in religious freedom, "Next year in Jerusalem."●

DEMOCRATIC RESPONSE TO PRESIDENT'S SPEECH ON NEED FOR TAX INCREASE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. DICKS) is recognized for 5 minutes.

● Mr. DICKS. Mr. Speaker, I am submitting for the RECORD the August 16 Democratic response to President Reagan's speech on the need for a tax increase.

As my colleagues know, this response was made by the distinguished Majority Whip THOMAS S. FOLEY, who hails from the great State of Washington and the fine city of Spokane.

As my friends also know, I agree with the majority whip's remarks and

believe that they should be printed in the RECORD so that all in this House may read them.

REMARKS BY THOMAS S. FOLEY

Good Evening.

I am Tom Foley, a Member of Congress from the state of Washington. With me is Senator David Boren of Oklahoma.

We are speaking to you from the Capitol of the United States.

I want to thank this network for giving us the chance to respond to what President Reagan said tonight. This issues the President discussed—the condition of our economy, the need to cut interest rates and put people back to work—are matter of critical importance to all Americans. They are matters of historic concern to those of us in the Democratic Party.

Ours is a party dedicated to economic growth, economic opportunity and economic justice. We believe that the most important task our country has right now is get the millions of unemployed workers back to work, to restore dignity and self-reliance to the jobless and restore confidence to those concerned about the economic future.

President Reagan is trying to rally support for the tax bill now before the Congress. It is obvious that there are major differences within both Parties on this bill. Those differences are real. No one person can presume to speak for every member of either Party.

Yet, weighing the benefits of passing this bill against the cost of not passing it, I have come to the conclusion that dispite our differences in the past this is one occasion when the President's position is right. He said that we need this revenue measure—and we do.

We need to take action, and action now, in dealing with our country's growing economic crisis. This is not just a matter of political urgency for the President or the Congress. It is a matter of economic urgency for the entire country.

I am sure most of you watching at home tonight agree. You do not want to see a lot of finger-pointing. You watched and listened to the President, you are watching and listening to us now, to get some answers.

Looking to the difficult months ahead, there is enough work, and enough economic challenge, for all of us to share. When we can agree together, we must act together for the good of the country.

To this end, I support the President's position. I take this view not because I support all of the President's economic theories. Democrats do agree on many of the broad goals of economic growth and expansion, but we've had differences with the President on how to attain them.

Most of us favored cutting taxes. Most of us supported strengthening our national security. But we questioned the wisdom of enacting the largest tax cut in history in the same year that we enacted the largest increase in defense spending in history. We felt that such a combination, particularly in years to come, only guaranteed enormous deficits—and higher interest rates.

Most Democrats ageed it was necessary to control federal spending. But we opposed the President's most severe budget cuts because we felt they were unfair. We felt that last year's tax bill gave the greatest benefits to those who already have the most and that it failed to give enough tax relief to those who need it the most.

Where we disagreed with the President, we offered sound and constructive alternatives.

In each significant case, these alternatives were rejected and the President's economic program was adopted and put into effect.

Unfortunately, the President's legislative successes did not translate into the economic successes we all sought. Even the Administration's own leadership now admit that the promises made for its program have yet to be realized. The recession has instead become worse.

The great advantage of the tax bill now before the Congress is that it helps to balance many of the excesses enacted last year.

It helps to cut down on the deficits—and therefore helps relieve pressure on interest rates.

It helps to cut down on the basic unfairness in last year's tax bill. It plugs some loopholes and helps to divide the cost of our society more fairly.

The Democratic influence on the compromise now before us is unmistakable. We won extended unemployment benefits. We helped shift the burden from the individual taxpayer. We have worked to protect the benefits of those who need that protection the most.

I support the revenue bill because it is fair and because it brings some long-overdue moderation to the Administration's economic program.

We Americans, all of us, have a stake in this moderation. We have a stake in bringing balance—and commonsense—to our country's economic policies. Only by cutting back on the deficit, only by bringing a measure of fairness to our tax policies can we enlist the confidence of the American people in our country's future.

I know how important it is that we rebuild this confidence. I represent an agricultural and industrial area in our country's great Northwest. I know first-hand the hardship that people are feeling today—on the farm, in the timberlands, in many thousands of small businesses, as well as in major industries. People may not be demonstrating in the streets. They may not be crying out loud, but they are certainly feeling the pain—there and throughout the rest of the nation.

Those people have a right to expect that members of both parties are doing their best to turn the economy around.

It is never easy to pass any tax bill. But somehow we have to stop the economic slide. This is a critical first step. Some say we need a vote of political courage. I say we need a vote for economic reality.

Not too long ago, Congressman Richard Bolling of Missouri had a similar opportunity to respond to a Presidential address. He said then that our problems are not Democratic problems, or Republican problems. They are American problems, and we must overcome them together.

That was true four months ago. It is even more true today. And it is in that spirit that I join with the President in asking for your support.●

TENNESSEE FLOOD VICTIMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. GORE) is recognized for 20 minutes.

● Mr. GORE. Mr. Speaker, many Tennesseans hit hard by the recent flooding now face unfair obstacles as they seek Federal disaster aid to rebuild homes, farms, and businesses that were damaged.

These victims of Tennessee's worst flooding in recent memory come from varied economic backgrounds—some are farmers, small businessmen and homeowners. But all now share a similar challenge to regain and reestablish what the floods washed away. Thousands of acres of valuable crops, including dozens of homes and some factories were flooded, and several lives were lost.

Swept off balance by the economic losses, many of the flood victims have turned to the Federal Government—to its disaster relief programs in particular—for help in getting their feet back on the ground. But a large number of these victims, when they applied for Government assistance, found that confusing policy changes over the past 2 years have transformed once generous disaster relief programs into unreasonable plans that offer ridiculously high interest rates on loans and tight eligibility requirements. Like pouring salt into an open wound, many people—their lives shattered and financial standing on shaky ground—were turned away in frustration.

These policy changes were set into place just last year, after the current administration proposed deep reductions in the Federal Government's disaster relief funds. The year before these reductions were brought forth, our Nation's disaster programs provided $2.5 billion to meet the needs of citizens who were suffering from the destruction of natural disasters. In the past, these programs have offered a helping hand to get crippled businesses started again, farms back into productive operation and homes rebuilt. Through affordable low-interest loans, like Farmers Home Administration credit programs once offered at 3-percent interest, victims of natural calamities found opportunities that provided direction on the road to recovery. There were some problems with the programs in the past, and changes were proposed. Then however, for budget reasons, the new administration slashed the programs across the board. Now, after the sweeping changes, the same FmHA loans provided at 3-percent interest had their rates bumped up to between 8 and 17 percent. Coupled with these record high borrowing rates, tighter restrictions on credit eligibility now require that applicants must be rejected by other financial institutions before even being considered for Government aid.

The recent flooding in the Fourth District was the first test of these new disaster policies, and after witnessing the unbelievable obstacles to relief that victims have encountered, I have concluded that our Nation's disaster

programs are failing miserably. In fact, the experiences of Smith County victims—who suffered more than $2.5 million in flood damage—will, I hope, form the basis for a powerful argument in favor of change in our disaster programs.

In an effort to restore critical funds for America's disaster relief programs, I am introducing this legislation to return disaster loans and eligibility requirements to reasonable levels. But the success of my efforts will depend heavily on whether the Congress and the American people can be convinced that more assistance is warranted. Our attempt to restore funding will mean bucking a trend that this administration has followed with regard to domestic programs.

Disaster relief should be a high priority on our Nation's agenda. We are historically a nation of caring people, willing to help a neighbor in time of need. But to accomplish this task I need your support. Join with me in the fight to restore the effectiveness of disaster relief programs to levels where they can do the most good.●

STOP SHORTCHANGING GUAM'S VETERANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Guam (Mr. WON PAT) is recognized for 5 minutes.

● Mr. WON PAT. Mr. Speaker, I am today asking Congress to come to the aid of Guam's veterans. There is an estimated 10,000 veterans on Guam plus their dependents. These brave men and women served this Nation in time of war and in time of peace.

They do not ask their Nation for the impossible. Nor do they seek more than what is given to other American veterans.

Yet, the sad truth is this: Guam's veterans are denied many basic services, including lifesaving health care.

The closest veterans' hospital to Guam is 3,500 miles away in Hawaii. Guam's own medical facilities are working overtime to care for our people. But we lack the sophisticated medical techniques, the costly new medical devices, and the highly trained doctors found in veterans' hospitals in the States.

Today, I am introducing a resolution to cure this terrible situation. My resolution calls on the Secretary of Defense and the Veterans' Administration to designate the naval hospital on Guam a joint-use facility to permit Guam's veterans to receive full-time medical care at that hospital.

This is not presently the case. The naval hospital on Guam has reserved only five beds in that vast facility for local veterans and their dependents. Five beds to serve a veterans population of thousands. This would not be tolerated in California or New York. It will not be tolerated any longer in Guam.

My constitutents have paid their dues. Many of our veterans have wounds from combat. They deserve more from their Government than five beds in a naval hospital. It is time that Washington rally behind Guam's veterans and give them justice.

The naval hospital is not overworked. In fact, it is closing down wards because of limited military needs. Why waste this valuable resource any longer when Guam's veterans need these services now. A seriously ill veteran on Guam faces two choices today: He can either take his chances in getting into the naval hospital or he can be evacuated to Hawaii. Many Guam veterans have gone to Hawaii only to be away from their families for months. This is no way to treat our veterans. The cure is provided by my resolution. I ask that it be adopted quickly by my colleagues. Guam's veterans are counting on you.●

PRELIMINARY RESULTS OF NAVY DRUG TEST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 10 minutes.

Mr. ADDABBO. Mr. Speaker, in 1980 a worldwide survey of drug and alcohol abuse by military personnel revealed that 60 percent of all Navy and Marine Corps personnel of pay grades E-5 and below used drugs, excluding alcohol, for nonmedical purposes. The study showed that for these same junior enlisted personnel, 1 in 4 suffered some degree of work impairment due to drug abuse and 1 in 25 was actually dependent upon drugs.

I have long been concerned over the abuse of both drugs and alcohol by personnel in the military services. Drug and alcohol abuse not only impairs the lives of users but also impacts adversely on military readiness. For example, drug and alcohol abuse accounted for 44 percent of the 5,342 disqualifications of personnel in the nuclear weapons reliability program during 1980; a Hawk missile battery of 400 marines in North Carolina reported 35 to 40 drug incidents during the first 6 months of 1981, including several sergeants arrested for sale of drugs; and at a sensitive Navy communications facility in Great Britain, 25 percent of the sailors were implicated in drug abuse.

In an announcement on September 14, 1982, the Navy released the results of a recent survey on drug abuse. Administered on August 30, 1982, by the firm of Booze, Allen & Hamilton Associates, the surprise urinalysis survey indicates that marihuana usage among Navy junior enlisted personnel has been cut by nearly two-thirds in San Diego and by one-half in Norfolk for an overall average abuse rate of between 20 to 25 percent.

I have long been a critic of the Navy's lax attitude toward drug abuse. However, based upon these recent positive results I have sent a letter, which I request be included at this time in the RECORD, to Adm. James D. Watkins, Chief of Naval Operations. In this letter, I commend the Navy for its aggressive program to eradicate drug abuse. Now that the Navy brass has let it be known that drug abuse is not acceptable in the U.S. Navy, our fine young sailors are responding to this positive leadership which was absent for too long a time.

I am pleased to report this positive development and pledge the continued support of the Defense Appropriations Subcommittee in the battle against drug and alcohol abuse in our Armed Forces.

CONGRESS OF THE UNITED STATES,
COMMITTEE ON APPROPRIATIONS,
Washington, D.C., September 15, 1982.

Adm. JAMES D. WATKINS, USN,
Chief of Naval Operations, Department of the Navy, Washington, D.C.

DEAR ADMIRAL WATKINS: This morning I received a most welcome call from Real Admiral Paul Mulloy concerning the dramatic results of the recent surprise urinalysis survey at Norfolk and San Diego.

I wish to congratulate you and your predecessor, Tom Hayward, for taking a tough stand on drug abuse in our Armed Forces. As a consequence of your resolute, and in some quarters unpopular, decision to promote a drug-free environment for those dedicated people who are defending our country, there has been a 50 percent reduction in marijuana usage among our junior sailors. The long term impact of these dramatic results should not be minimized since the character and self-discipline instilled by the Navy can be expected to last a lifetime.

I believe the results of this survey show a clearly improved situation and should be considered vindication for the Navy's "get tough" policy. Every sailor who has stood up to the tremendous peer pressure to abuse drugs deserves special praise. That simple but often-time courageous decision surely represents the U.S. Navy at its finest.

Sincerely,

JOSEPH P. ADDABBO,
Chairman, Defense Subcommittee.●

TAX RELIEF FOR HOMES LOST BY DISASTER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, today I am introducing legislation to address an inequity which presently confront residents in the Love Creek area of Santa Cruz County, Calif., in my congressional district. These residents have been forced to vacate and demolish their homes following the tremendous disaster which hit this area in January. Following the January disaster, the Army Corps of Engineers did a

study of this area and concluded that the area was unsafe because of its proximity to the area where slide activity had occurred and because of the threat of further slide activity. The county government under provisions of its uniform code proceeded to issue an abatement notice forcing residents of Love Creek to either relocate or demolish the existing structures. The homeowners of this area have experienced the unfortunate occurrence of having their homes—ranging in value from $100,000 to over $400,000—become virtually economically worthless.

In the wake of this dreadful situation, an inquiry was made to the Internal Revenue Service to determine whether these residents would be eligible for deductions for casualty losses as result of their being forced to remove or demolish the existing structures in the area. In responding to the inquiry, the IRS has concluded that under current regulations, these residents would not be entitled to a casualty loss deduction in this situation. The IRS indicated that this decision was reached because it found no proximate relationship between the occurrence of the disaster and the loss sustained by the residents because of the abatement order issued by the country.

Mr. Speaker, the simple fact is that if these residents would have suffered any kind of physical damage to their homes as a result of the disaster, they would be eligible to apply for a casualty loss deduction. This fact was clearly pointed out to me in a meeting I held with IRS officials discussing this situation. Like homeowners who experience physical damage to their residences, the residents in Love Creek have suffered a tremendous economic devastation. They have experienced a virtual total economic loss. Because of the absence of physical damage, I do not feel that in this situation, these residents should be prevented from applying for a casualty loss deduction.

Therefore, I am today introducing legislation to allow residents who, as a result of a disaster, are issued an order by a local government requiring homeowners in the area affected by the disaster to remove or demolish their homes to be eligible to apply for a casualty loss deduction. I think that in such a unique situation, these residents should be provided recourses provided to other taxpayers who experience similar economic loss.

The situation which has developed in Love Creek has proven to be a test case in reference to our disaster assistance program in many ways. So far, the unique circumstances which are evident in this area have found Federal disaster aid to be unfulfilling. I think appropriate changes are necessary in our tax code to meet the unique situation which has occurred in the Love Creek area. I would hope that in this instance the taxpayers and homeowners of Love Creek who have been forced to abandon their homes will find Federal policies available to meet their distressful needs.

Following is the text of this legislation:

H.R. 7134

A bill to amend the Internal Revenue Code of 1954 to allow a disaster loss deduction with respect to a taxpayer's residence for losses which occur where the taxpayer is ordered to demolish or relocate such residence because of the danger of mudslides, earthslides, or flooding

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DISASTER LOSS DEDUCTION ALLOWED FOR RESIDENCES IN DISASTER AREAS WHERE TAXPAYER ORDERED TO DEMOLISH OR RELOCATE RESIDENCE BECAUSE OF DANGER OF MUDSLIDES, EARTHSLIDES, OR FLOODING.

(a) GENERAL RULE.—Section 165 of the Internal Revenue Code of 1954 (relating to losses) is amended by adding at the end thereof the following new subsection:

"(j) TREATMENT AS DISASTER LOSS WHERE TAXPAYER'S RESIDENCE IS IN DISASTER AREA AND TAXPAYER, BECAUSE OF DANGER OF MUDSLIDES, EARTHSLIDES, OR FLOODING, IS ORDERED TO DEMOLISH OR RELOCATE SUCH RESIDENCE.—

"(1) IN GENERAL.—In the case of a taxpayer whose residence is located in an area which has been determined by the President of the United States to warrant assistance by the Federal Government under the Disaster Relief Act of 1974, if—

"(A) within 120 days after the date of such determination, the taxpayer is ordered, by the government of the State or any political subdivision thereof in which such residence is located, to demolish or relocate such residence, and

"(B) such order is based on a determination that there is a danger of mudslides, earthslides, or flooding.

then any loss attributable to such order shall be treated as a loss described in subsection (i)."

SEC. 2. EFFECTIVE DATE.

The amendment made by section 1 shall apply to taxable years beginning after December 31, 1981, with respect to residences in areas determined by the President of the United States, after such date, to warrant assistance by the Federal Government under the Disaster Relief Act of 1974.●

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE REPORT ON JOINT RESOLUTION MAKING CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1983

Mr. LEHMAN. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a report on a House joint resolution making continuing appropriations for the fiscal year 1983, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

INTRODUCTION OF BILL TO STRENGTHEN THE CONGRESSIONAL BUDGET ACT OF 1974, AND FOR OTHER PURPOSES

(Mr. JONES of Oklahoma asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. JONES of Oklahoma. Mr. Speaker, today I am introducing on behalf of myself and a bipartisan group of colleagues a bill which we hope will become the central discussion vehicle for changes in the way Congress addresses spending issues.

The bill is a product of innumerable meetings between Members on our side of the aisle, and other meetings with some of our thoughtful colleagues on the other side of the aisle.

Many of us privately and publicly have serious misgivings about the advisability and workability of a constitutional amendment to require a "balanced budget."

Most of us, however, share the goal of implementing the best possible economic policy for our Nation. That policy dictates that we close the deficit gap, and bring some sanity and control to our fiscal policy. For the past few weeks, we have been working on some possible solutions to our economic problems that would address the concerns about deficits, interest rates, unemployment, and productivity through a statutory approach.

It is not correct, as critics charge, that "Congress already has a statute in place that requires a balanced budget." True, there has been simple language passed by a previous Congress that calls on Congress to pass a balanced budget. Nothing, however, provides any mechanism for Congress to achieve that goal. In that sense, the existing statutory admonishment is as deficient as the proposed constitutional amendment pending before the House of Representatives.

What is needed is not more politically attractive language calling on Congress to balance the budget. That will not extricate us from the difficulties we are in, and will not fool the American public. What is needed is a coherent procedure to insure that Congress can enforce the spending and taxing decisions that we make.

This bill is in part due to the diligent efforts of our colleagues, DICK GEPHARDT and BILL FRENZEL, who have worked hard with their respective party members to craft a bill which is not perfect, but which embodies the desire we all have to make the budget process more meaningful.

Other Members who have contributed to the shaping of this bill include our colleagues BILL HUGHES, BILL GRADISON, JOHN MURTHA, BERYL ANTHONY, RALPH REGULA, JOEL PRITCHARD, TONY BEILENSON, GERALDINE FERRARO, TOM LUKEN, JOHN LAFALCE,

JERRY PATTERSON, PHIL SHARP, and BERKLEY BEDELL.

In addition to these actual cosponsors of the bill, other Members have expressed an interest in our efforts. For instance, Congressman LEON PANETTA, who has taken a vocal role in speaking out on budgetary issues, has in the past sponsored legislation which contains many of the features of this bill. Congressman PANETTA, Congressman MINETA, and Congressman HOYER are attracted to our bill, but have delayed cosponsoring because they would prefer to see a limit on the Federal deficit rather than a limitation on Federal spending as a percentage of GNP. Whatever differences we might have on the technical aspects of this approach, I think we all agree that it is time that we took a strong public stand against political slogans. Instead we must roll up our sleeves to take the hard positions, grapple with the difficult facts, and make the choices that will get us to sounder economic footing.

The economic difficulties we face are real and will not go away until the public, the administration, and responsible Members of Congress pull together to put their votes and their positions on the line, and make these hard public choices. We hope you will carefully consider the proposals described in our draft bill, a summary of which follows, and work with us in the future to strengthen budget discipline.

If you would like to cosponsor our legislation, or have any ideas or questions concerning our proposal, please call the chief counsel of the Budget Committee, Wendell Belew, at 225-7233.

SUMMARY OF H.R. 7123

1. Modifies the budget process beginning with the fiscal year 1984 budget, aimed towards the goal of a balanced budget.

2. Requires the President to submit to Congress a balanced budget. Should the President determine that due to economic necessity or national security a balanced budget is infeasible for that fiscal year, he may also submit a budget not in balance with appropriate explanation why a balanced budget is not being recommended.

3. Requires the Committees on the Budget to report a budget resolution in balance for each fiscal year. The Committees could recommend an alternative budget out of balance if in their view a balanced budget was not appropriate for any given fiscal year.

4. Provides for a reduction in Federal spending as a percentage of GNP (gross national product) as a transition to a balanced budget. The Committees on the Budget would be required to report budget resolutions, beginning with fiscal year 1984, which reduce outlays as a percentage of "Trend GNP" on the basis of a projection of the average GNP level and growth rate for the last five completed fiscal years.

5. Strengthens budget discipline by requiring three-fifths of the members voting to waive the spending ceiling or revenue floor for any bill exceeding the spending ceiling or breaching the revenue floor in the budget previously adopted. The proposal also streamlines the budget process by eliminating a mandatory second budget resolution.

6. Requires the Chairmen of the House and Senate Budget Committees and a designated representative of the President, after consultation with the Board of Governors of the Federal Reserve System and the Congressional Budget Office, to meet and agree upon economic assumptions to be used to evaluate the President's budget and the congressional budget on common terms so as to focus debate on policy rather than confusing and conflicting numbers. The proposal also requires them to calculate "Trend GNP" and submit it to the Committees on the Budget.

7. Directs the Committee on Government Operations of the House and the Committee on Governmental Affairs of the Senate to study the budget and accounting systems, including capital budgets of states required to maintain balanced budgets by their constitutions and the impact of off-budget activities on the budget process. After completing such a study, the Committees shall recommend appropriate changes in the Federal budget and accounting system necessary to operate within a Federal balanced budget framework.●

INTRODUCTION OF A BILL TO ESTABLISH A COMMISSION ON MONETARY POLICY

(Mr. DICKS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DICKS. Mr. Speaker, today I am introducing a bill to create a Commission on Monetary Policy. The need for such a commission, I believe, is clear. Our monetary system has undergone a series of broad changes during the last decade. Many of those changes were made without the benefit of public discussion, congressional input or executive examination. Yet those changes effect the economy of the Nation in profound ways. We see their influence in everything from the price of a loaf of bread to the stability of business, and everywhere from Wall Street to our local banks. It is time—perhaps it is past time—when the process by which monetary policy is set should be examined by the Congress and the people of the United States. The bill I am introducing today will provide such an opportunity.

Informed opinion seems to be moving away from strict monetarism as a guide to money policy. Yet the debate continues to rage concerning what approach to adopt in its stead.

Many seem to desire more rigid controls on the Federal Reserve Board, requiring policy modifications in times of economic trouble. Others feel that bringing the Federal Reserve into the control of the political realm would cause its decisions to be excessively short term in nature, thereby jeopardizing the confidence of Wall Street. Some suggest a return to the policies of Arthur Burns, under whose direction the Federal Reserve Board observed a practice of pegging interest rates, and allowing monetary growth to follow only as a secondary factor. Still others recommend a combination policy—tracking both money growth and money cost. But transcending all this discussion is a concern that any change might cast us back into the inflationary spiral, undoing all the progress we have made during the past year.

To address some of the questions facing us on monetary policy formulation, I am today proposing the establishment of a Monetary Commission. This Commission would be charged with the duty of examining the various proposals for change, and making a recommendation to the Congress, the President, and the Federal Reserve Board for future action. It would be composed of nine members representing the Congress, the Federal Reserve, the President, small business, labor, agriculture, and economics. These people would have 9 months in which to prepare their report, and would spend that time analyzing current economic conditions and considering the effect of any proposed alterations in policy direction.

In order to effect an economic recovery, people must be put back to work. Yet the high cost of money has caused businesses to cut back on employment rather than expanding. Until the financial climate becomes more favorable, the average businessman is going to stay in the trenches. He is going to aim at staying in business by following the most conservative program he can. And that means he's not going to increase his exposure by hiring additional help. Until interest rates fall, business in this country is not going to expand. And that means that the recession will drag on. We cannot afford to let that happen. We must modify our monetary policy, and provide some relief to the millions of Americans who are currently looking for work. Interest rates must come down to achieve that goal.

But at the same time, if interest rates drop and inflation increases, we may not be much farther ahead than we are now. We need to identify and pursue a policy which will bring us affordable credit and inflation control. We need to take another look at recent policy changes by the Federal Reserve and their effect on the price of money. The Commission I am asking for by introducing this legislation today will help us formulate a solution to our current economic crisis. It will provide us with the background we so desperately need to create a new monetary policy which will make credit affordable.

Mr. Speaker, I urge my colleagues to join me in supporting the establishment of this Commission.

Thank you.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. AKAKA (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. CHAPPELL, for September 15, on account of business in the district.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. EMERSON) to revise and extend their remarks and include extraneous material:)

Mr. GILMAN, for 5 minutes, today.

Mr. ROGERS, for 5 minutes, today.

Mr. MICHEL, for 60 minutes, on September 21.

Mr. MICHEL, for 60 minutes, on September 22.

Mr. MICHEL, for 60 minutes, on September 23.

(The following Members (at the request of Mr. LEHMAN) to revise and extend their remarks and include extraneous material:)

Mr. BAILEY of Pennsylvania, for 10 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. COELHO, for 5 minutes, today.

Mr. DICKS, for 5 minutes, today.

Mr. GORE, for 20 minutes, today.

Mr. WON PAT, for 5 minutes, today.

Mr. ADDABBO, for 10 minutes, today.

Mr. PANETTA, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. EMERSON) and to include extraneous matter:)

Mr. GOODLING.

Mr. LENT in two instances.

Mr. GREEN in three instances.

Mr. PORTER in two instances.

Mr. MCKINNEY.

Mrs. ASHBROOK.

Mrs. FENWICK.

Mr. LEE.

Mr. NELLIGAN in two instances.

Mr. FINDLEY in two instances.

Mrs. HOLT.

Mr. MYERS in two instances.

Mr. GILMAN.

Mr. WORTLEY.

Mr. GUNDERSON.

Mr. DANIEL B. CRANE.

Mr. COLLINS of Texas.

Mr. COUGHLIN.

Mr. RITTER.

Mr. WOLF.

(The following Members (at the request of Mr. LEHMAN) and to include extraneous matter:)

Mr. FAUNTROY.

Mr. ROE in two instances.

Mr. BRODHEAD in two instances.

Mr. WALGREN.

Mr. WEISS.

Mr. MOAKLEY in two instances.

Mr. AUCOIN.

Mr. LUNDINE in two instances.

Mr. COELHO.

Mr. GORE.

Mr. BONIOR of Michigan.

Mr. HARKIN.

Mr. CORRADA.

Mr. SHARP.

Mr. WASHINGTON in three instances.

Mr. SYNAR.

Mr. ROSENTHAL in two instances.

Mr. EDWARDS of California.

Mr. ECKART.

Mr. YOUNG of Missouri.

Mr. STARK.

Mr. STOKES in three instances.

Mr. MARKEY in three instances.

Mr. MOFFETT in two instances.

Mr. EDGAR.

Mr. WYDEN.

Mr. SKELTON.

Mr. FRANK.

Mr. DE LUGO.

Mr. CONYERS in two instances.

Mr. CLAY in two instances.

Mr. BEDELL in two instances.

Mr. OBERSTAR.

Mr. FLIPPO.

Mr. HAWKINS.

Mr. GAYDOS.

Mr. ADDABBO.

Mr. LEHMAN.

Mr. KASTENMEIER.

SENATE BILLS, JOINT AND CONCURRENT RESOLUTIONS REFERRED

Bills, joint and concurrent resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 349. An act to amend title 38, United States Code, to establish certain procedures for the adjudication of claims for benefits under laws administered by the Veterans' Administration; to apply the provisions of section 553 of title 5, United States Code, to rulemaking procedures of the Veterans' Administration; to provide for judicial review of certain final decisions of the Administrator of Veterans' Affairs; to provide for the payment of reasonable fees to attorneys for rendering legal representation to individuals claiming benefits under laws administered by the Veterans' Administration; and for other purposes; to the Committee on Veterans' Affairs;

S. 2420. An act to protect victims of crime; to the Committee on the Judiciary;

S.J. Res. 241. Joint resolution to provide for the designation of the week of December 12, 1982, through December 18, 1982, as "National Drunk and Drugged Driving Awareness Week"; to the Committee on Post Office and Civil Service;

S.J. Res. 243. Joint resolution authorizing and requesting the President to designate October 15, 1982, as "National Poetry Day"; to the Committee on Post Office and Civil Service.

S. Con. Res. 120. Concurrent resolution to commemorate the seventy-fifth anniversary of the Washington Cathedral; to the Committee on Post Office and Civil Service.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 923. An act to amend chapter 207 of title 18, United States Code, relating to pretrial services.

BILLS PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills of the House of the following title:

H.R. 1710. An act to authorize the use of the frank for official mail sent by the Law Revision Counsel of the House of Representatives;

H.R. 3620. An act transferring certain Federal property to the city of Hoboken, N.J.;

H.R. 3835. An act for the relief of Rutherford K. Clarke and his wife Ida T. Clarke; and

H.R. 6068. An act to authorize appropriations for fiscal year 1983 for intelligence and intelligence-related activities of the U.S. Government, for the Intelligence Community Staff, for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, and for other purposes.

ADJOURNMENT

Mr. LEHMAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 22 minutes p.m.), under its previous order, the House adjourned until Monday, September 20, 1982, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4769. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting a report on negotiated contracts for experimental, developmental, test or research work, or for industrial mobilization in the interest of the national defense, covering the period October through March 1982, pursuant to 10 U.S.C. 2304(e); to the Committee on Armed Services.

4770. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense articles and services to Turkey (Transmittal No. 82-81), pursuant to section 813 of Public Law 96-106; to the Committee on Armed Services.

4771. A letter from the Assistant Secretary of the Treasury for Legislative Affairs, transmitting a report on the impact on the provision of basic human needs of economic

adjustment programs supported during 1981 by financing from the International Monetary Fund, pursuant to section 30(b) of the Bretton Woods Agreements Act, as amended; to the Committee on Banking, Finance and Urban Affairs.

4772. A letter from the Director, Federal Mediation and Conciliation Service, transmitting the agency's 34th annual report covering fiscal year 1981, pursuant to section 202(c), chapter 120, of the act of June 27, 1947; to the Committee on Education and Labor.

4773. A letter from the Secretary of Health and Human Services, transmitting the annual progress report on the 5-year plan for family planning services and population research, pursuant to section 1009(a) of Public Law 94-63; to the Committee on Energy and Commerce.

4774. A letter from the Assistant Secretary for Congressional Relations, Department of State, transmitting a draft of proposed legislation to facilitate the adjudication of certain claims of U.S. nationals against Iran, to authorize the recovery of costs incurred by the United States in connection with the arbitration of claims of U.S. nationals against Iran, and for other purposes; to the Committee on Foreign Affairs.

4775. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report of political contributions by Ambassador-designate Robert B. Oakley, and members of his family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

4776. A letter from the Director, Defense Security Assistance Agency, transmitting quarterly and annual reports on foreign military sales of June 30, 1982, pursuant to section 36(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

4777. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense equipment and service to Turkey (Transmittal No. 82-81), pursuant to section 36(b) of the Arms Export Control Act, together with certification that the sale is consistent with the principles contained in section 620C(b) of the act; to the Committee on Foreign Affairs.

4778. A letter from the Deputy Director, Office of Management and Budget, transmitting a draft of proposed legislation to terminate unnecessary Government instrumentalities; to the Committee on Government Operations.

4779. A letter from the Inspector General of the Veterans' Administration, transmitting a copy of the Administration's computer matching program report, pursuant to section 5(b) of the Public Law 95-452; to the Committee on Government Operations.

4780. A letter from the Executive Director, President's Commission on Executive Exchange, transmitting a draft of proposed legislation to amend section 1304(e)(1) of title 5, United States Code; to the Committee on Post Office and Civil Service.

4781. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a final report from the Chief of Engineers on the shoreline erosion control demonstration program, pursuant to section 54 of Public Law 93-251; to the Committee on Public Works and Transportation.

4782. A letter from the Secretary of Energy, transmitting the eighth quarterly report on biomass energy and alcohol fuels, pursuant to section 218(a) of Public Law 96-294; jointly, to the Committees on Agriculture, Energy and Commerce, and Science and Technology.

4783. A letter from the Comptroller General of the United States, transmitting a report on an examination of the Overseas Private Investment Corporation's financial statements for the year ended September 30, 1981; jointly, to the Committees on Government Operations and Foreign Affairs.

4784. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Neighborhood Reinvestment Corporation's fiscal year ended September 30, 1981 (GAO/AFMD-82-89, September 15, 1982); jointly, to the Committees on Government Operations and Banking, Finance, and Urban Affairs.

4785. A letter from the Comptroller General of the United States, transmitting a report on the changes needed in U.S. assistance to deter deforestation in the developing countries (GAO/ID-82-50, September 16, 1982); jointly, to the Committees on Government Operations, Banking, Finance, and Urban Affairs, and Foreign Affairs.

4786. A letter from the Secretary of Energy, transmitting the Department's fourth annual report to Congress, pursuant to section 657 of Public Law 95-91; jointly, to the Committees on Armed Services, Foreign Affairs, Energy and Commerce, Interior and Insular Affairs, and Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

A bill to provide for the use and disposition of Miami Indians judgment funds in dockets 124-B and 254 before the U.S. Court of Claims, and for other purposes; with an amendment (Rept. No. 97-815). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 5916. A bill to declare certain Federal lands acquired for the benefit of Indians to be held in trust for the tribes of such Indians; with an amendment (Rept. No. 97-816). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 5795. A bill to provide for the use and distribution of the funds awarded to the Shawnee Tribe of Indians in dockets 64, 335, and 338 by the Indian Claims Commission and docket 64-A by the U.S. Court of Claims, and for other purposes (Rept. No. 97-817). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 6122. A bill to authorize the Twenty-nine Palms Band of Luiseno Mission Indians to lease for 99 years certain lands held in trust for such band; with an amendment (Rept. No. 97-818). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 6403. A bill to provide for the use and distribution of funds to the Wyandot Tribe of Indians in docket 139 before the Indian Claims Commission and docket 141 before the U.S. Court of Claims, and for other purposes (Rept. No. 97-819). Referred to the Committee of the Whole House on the State of the Union.

Mr. EDWARDS of California: Committee on the Judiciary. H.R. 6976. A bill to amend title 28, United States Code, to require the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing persons (including unemancipated persons). (Rept. No. 97-820). Referred to the Committee of the Whole House on the State of the Union.

Mr. BOLLING: Committee on Rules. House Resolution 587. A resolution providing for the consideration of H.R. 6995, A bill to amend the Federal Trade Commission Act to extend the authorization of appropriations contained in such act, and for other purposes. (Rept. No. 97-821). Referred to House Calendar.

Mr. ZEFERETTI: Committee on Rules. House Resolution 588. A resolution providing for the consideration of H.R. 5723, A bill to authorize appropriations for certain maritime programs of the Department of Transportation for fiscal year 1983, and for other purposes. (Rept. No. 97-822). Referred to the House Calendar.

Mr. UDALL: Committee on Interior and Insular Affairs. S. 1872. An act to amend the act establishing the Capitol Reef National Park in the State of Utah to provide for a grazing phaseout schedule, and for other purposes; with amendments (Rept. No. 97-823). Referred to the Committee of the Whole House on the State of the Union.

Mr. KASTENMEIER: Committee on the Judiciary. H.R. 6872. A bill to provide greater discretion to the Supreme Court in selecting the cases it will review, to extend to all Federal jurors eligibility for Federal worker's compensation, to provide for the taxing of attorney fees in certain actions brought by jurors, to authorize the service of jury summonses by ordinary mail, to permit courts of the United States to establish the order of hearing for certain civil matters, and for other purposes; with an amendment (Rept. No. 97-824, Pt. I). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 6875. A bill to provide financial assistance to the Wolf Trap Foundation for the Performing Arts for reconstruction of the Filene Center in Wolf Trap Farm Park, and for other purposes; with an amendment (Rept. No. 97-825). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 6055. A bill to revise subchapter S of the Internal Revenue Code of 1954 (relating to small business corporations); with amendments (Rept. No. 97-826). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 1524. A bill to amend

sections 46(f) and 167(l) of the Internal Revenue Code of 1954 with respect to the treatment of public utility property; with amendments (Rep. No. 97-827). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 3191. A bill to amend the Internal Revenue Code of 1954 to exempt conventions, et cetera, held on cruise ships documented under the laws of the United States from certain rules relating to foreign conventions; with an amendment (Rep. No. 97-828). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 3581. A bill to amend the Internal Revenue Code of 1954 to exclude certain foreign commodity income from treatment as foreign personal holding company income; with amendments (Rep. No. 97-829). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 4948. A bill to amend the Internal Revenue Code of 1954 to provide for the application of cash or deferred arrangement rules to money purchase plans; with an amendment (Rept. No. 97-831). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 5470. A bill to amend the Internal Revenue Code of 1954 to insure periodic payments for damages received on account of personal injuries or sickness, and for other purposes; with amendments (Rept. No. 97-832). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 7093. A bill to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income. (Rept. No. 97-833). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITTEN: Committee on Appropriations. House Joint Resolution 599. Joint resolution making continuing appropriations for the fiscal year 1983, and for other purposes. (Rept. No. 97-834). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows.

By Mr. BIAGGI:

H.R. 7121. A bill to amend the Internal Revenue Code of 1954 to permit certain cooperative housing corporations to replace conventional financing with tax-exempt financing; to the Committee on Ways and Means.

By Mr. BROWN of Ohio (for himself and Mr. RITTER):

H.R. 7122. A bill to amend the National Gas Policy Act of 1978 to restrain natural gas price increases by facilitating price responsiveness during periods when supplies exceed demand, and for other purposes; to the Committee on Energy and Commerce.

By Mr. JONES of Oklahoma (for himself, Mr. GEPHARDT, Mr. FRENZEL, Mr. REGULA, Mr. ANTHONY, Mr. BEDELL, Mr. BEILENSON, Ms. FERRARO, Mr. GRADISON, Mr. HEFTEL, Mr. HUGHES, Mr. LAFALCE, Mr. LUKEN, Mr. MURTHA, Mr. PATTERSON, Mr. PRITCHARD, and Mr. SHARP):

H.R. 7123. A bill to amend the Congressional Budget Act of 1974 to strengthen the budget process, and for other purposes; jointly, to the Committees on Government Operations and Rules.

By Mr. COURTER:

H.R. 7124. A bill to reform the insanity defense; to the Committee on the Judiciary.

By Mr. DICKS:

H.R. 7125. A bill to establish a Commission on Monetary Policy for purposes of evaluating the formulation and implementation of monetary policy by the Federal Reserve System; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DREIER:

H.R. 7126. A bill to repeal the withholding on interest, dividends, and patronage dividends enacted by the Tax Equity and Fiscal Responsibility Act of 1982 and to require, in lieu of such withholding, the Secretary of the Treasury to use existing information returns to insure that the proper amount of tax is collected with respect to interest, dividends, and patronage dividends; to the Committee on Ways and Means.

By Mr. EDGAR:

H.R. 7127. A bill to implement the Convention on the Means of Prohibiting and Preventing the Illicit Import, Export, and Transfer of ownership of Cultural Property; to the Committee on Ways and Means.

By Mr. EDWARDS of Oklahoma:

H.R. 7128. A bill to amend the Internal Revenue Code of 1954 to improve Internal Revenue Service procedures concerning investigations and audits of churches, and for other purposes; to the Committee on Ways and Means.

By Mr. FRANK:

H.R. 7129. A bill to amend the Internal Revenue Code of 1954 to increase the 2-year periods for rollover of gain on sale of principal residence to 3 years; to the Committee on Ways and Means.

By Mr. FUQUA (for himself, Mr. WALGREN, and Mrs. HECKLER):

H.R. 7130. A bill to provide a national policy for engineering, technical, and scientific manpower, to provide for cost sharing by the private sector in training such manpower, to create a national Coordinating Council on Engineering and Scientific Manpower, and for other purposes; to the Committee on Science and Technology.

By Mr. GORE:

H.R. 7131. A bill to amend the Consolidated Farm and Rural Development Act to reduce the interest rate payable on certain disaster emergency loans made and insured under such act; to the Committee on Agriculture.

By Mr. KASTENMEIER:

H.R. 7132. A bill to amend title 28 of the United States Code regarding jurisdiction in bankruptcy proceedings, and for other purposes; to the Committee on the Judiciary.

By Mr. McDADE:

H.R. 7133. A bill to amend title II of the Social Security Act to provide for continued payment of disability benefits during appeals of terminations of such benefits and to provide more equitable basis for findings of ability to engage in substantial gainful work in making disability determinations; to the Committee on Ways and Means.

By Mr. PANETTA:

H.R. 7134. A bill to amend the Internal Revenue Code of 1954 to allow a disaster loss deduction with respect to a taxpayer's residence for losses which occur where the taxpayer is ordered to demolish or relocate such residence because of the danger of mudslides, earthslides, or flooding; to the Committee on Ways and Means.

By Mr. PERKINS:

H.R. 7135. A bill to strengthen the security and the economic and cultural progress of the Nation through Federal assistance for improved student opportunities in mathematics, science, technology, and foreign languages in the elementary and secondary schools; to the Committee on Education and Labor.

H.R. 7136. A bill to provide for a moratorium on terminations of disability benefits under title II of the Social Security Act based on determinations made under the continuing disability investigation program and a moratorium on the collection of overpayments based on determinations under such program and to amend such title II to provide for continued payment of disability benefits during appeal of terminations of such benefits; to the Committee on Ways and Means.

By Mr. SIMON (for himself, Mr. PERKINS, Mr. ERDAHL, and Mr. SMITH of Iowa):

H.R. 7137. A bill to increase the authorization of appropriations for certain education programs, and for other purposes; to the Committee on Education and Labor.

By Mr. TAUKE:

H.R. 7138. A bill to amend the Internal Revenue Code of 1954 to allow a credit against tax for expenses incurred in the care of elderly family members; to the Committee on Ways and Means.

By Mr. WILSON:

H.R. 7139. A bill to name the building to be constructed in Lufkin, Tex., and leased to the United States as the "Col. Homer Garrison, Jr. Federal Building"; to the Committee on Public Works and Transportation.

By Mr. WHITTEN:

H.J. Res. 593. Joint resolution making continuing appropriations for the fiscal year 1983, and for other purposes; to the Committee on Appropriations.

By Mr. BARNES (for himself, Mr. HANSEN of Utah, Mr. HOWARD, and Mr. CLAUSEN):

H.J. Res. 594. Joint resolution to provide for the designation of the week of December 12, 1982, through December 18, 1982, as "National Drunk and Drugged Driving Awareness Week"; to the Committee on Post Office and Civil Service.

By Mr. BIAGGI: (for himself and Mr. GARCIA):

H.J. Res. 595. Joint resolution designating December 11, 1982, as "Fiorello H. La Guardia Memorial Day"; to the Committee on Post Office and Civil Service.

By Mrs. FENWICK:

H.J. Res. 596. Joint resolution to commemorate the 100th anniversary of Christ Church of Short Hills, N.J.; to the Committee on Post Office and Civil Service.

By Mr. FINDLEY:

H.J. Res. 484: Mr. HILER, Mr. OXLEY, Mr. LUNDINE, Mr. PETRI, Mr. TAYLOR, and Mr. RUDD.

H.J. Res. 496: Mr. NEAL, Mr. GEPHARDT, Mr. DORGAN of North Dakota, Mr. PANETTA, and Mr. CAMPBELL.

H.J. Res. 499: Mr. COLLINS of Texas.

H.J. Res. 557: Mr. BARNES, Mr. BOLAND, Mr. EDWARDS of California, Mr. ERTEL, Ms. FERRARO, Mr. FOGLIETTA, Mr. FOWLER, Mr. HERTEL, Mr. HUGHES, Mr. LANTOS, Mr. LEVITAS, Mr. MARKEY, Mr. OTTINGER, Mr. PANETTA, Mr. STOKES, Mr. VENTO, and Mr. BEARD.

H.J. Res. 565: Mr. ANNUNZIO, Mr. MOLINARI, Mr. FORD of Tennessee, Mr. O'BRIEN, Mr. HUGHES, Mr. CONYERS, Mr. BARNES, Mr. LAGOMARSINO, Mr. WINN, Mr. ANTHONY, Mr. ROBINSON, Mr. MONTGOMERY, Mr. CLAUSEN, Mr. RUDD, Mr. QUILLEN, Mr. STENHOLM, Mrs. FENWICK, Mrs. HOLT, Mr. ROBERTS of South Dakota, Mr. BRINKLEY, Mr. SCHEUER, Mr. SIMON, Mr. FLIPPO, Mr. FROST, Mr. ROE, Mr. HILER, Mr. YATRON, Mr. REGULA, Mr. GRISHAM, Mr. BONER of Tennessee, Mr. SHELBY, Mr. ADDABBO, Mr. BOWEN, Mr. DASCHLE, Mr. DONNELLY, Mr. DYMALLY, Mr. WORTLEY, Mr. DYSON, Mr. GINN, and Mr. GORE.

H. Con. Res. 275: Mr. HAMILTON.

H. Con. Res. 361: Mr. FRANK and Mr. OTTINGER.

H. Con. Res. 362: Mr. OTTINGER and Mr. LEHMAN.

H. Con. Res. 381: Mr. DENARDIS, Mr. WAXMAN, Mrs. FENWICK, Mr. LOWRY of WASHINGTON, Mr. PORTER, and Mr. ECKART.

H. Con. Res. 384: Mr. MAVROULES, Mr. BEVILL, Mr. DYSON, Mr. O'BRIEN, Mr. SCHEUER, Mr. BARNES, Mr. GINGRICH, Mr. YATRON, Mrs. KENNELLY, Mr. LONG of Maryland, Mr. FLORIO, Mr. GONZALEZ, Mr. DWYER, Mr. PANETTA, Mr. LANTOS, Mr. STOKES, Mr. LOWRY of Washington, Mr. HUGHES, Mr. DE LUGO, Mr. BOLAND, Mr. CROCKETT, Mr. CONYERS, Mr. VENTO, Mr. MITCHELL of Maryland, Mr. MOLLOHAN, Mr. FASCELL, Mr. EDGAR, Ms. MIKULSKI, Mr. MOAKLEY, Mr. MAZZOLI, Mr. WEAVER, Mr. ANNUNZIO, Mr. HARKIN, Mr. YOUNG of Alaska, Mr. HORTON, Mr. RAILSBACK, Mr. JENKINS, Mr. EVANS of Iowa, Mr. DORGAN of North Dakota, Mr. BLANCHARD, Mr. HATCHER, Mr. ZEFERETTI, Mr. FOGLIETTA, Mr. MATSUI, Mr. SUNIA, Mr. OBERSTAR, Mr. LEHMAN, Mrs. BOGGS, Mr. HOYER, Mr. ROE, Mr. EDWARDS of California, Mr. SOLARZ, Mr. DASCHLE, Mr. BONIOR of Michigan, Mr. BINGHAM, Mr. MINETA, Mr. RODINO, Mr. GIBBONS, Mr. BEREUTER, Mr. ROSENTHAL, Mr. RAHALL, Mrs. SCHNEIDER, Mr. HALL of Ohio, Mr. OTTINGER, Mr. MARKEY, Mr. STARK, Mr. YATES, Mr. BEDELL, Mr. GEJDENSON, Mr. TRAXLER, Mrs. COLLINS of Illinois, Ms. OAKAR, Mr. FRANK, Mr. FAZIO, Mr. RANGEL, Mr. FUQUA, Mr. MADIGAN, Mr. FINDLEY, Mr. FISH, Mr. WORTLEY, Mr. HEFTEL, Mr. DUNN, Mr. BRINKLEY, Ms. FERRARO, Mr. EVANS of Delaware, and Mr. MITCHELL of New York.

H. Con. Res. 391: Mr. JEFFRIES.

H. Res. 268: Mr. ZABLOCKI, Mr. YATES, Mr. PEPPER, Mr. WILLIAM J. COYNE, Mr. DOWNEY, Mr. GRAY, Mr. STARK, Mr. FORSYTHE, Mr. BONKER, Mr. FARY, Mr. MATTOX, Mr. MOAKLEY, and Mr. WALGREN.

H. Res. 421: Mrs. FENWICK, Mr. GILMAN, Mr. ROSE, Mr. MARTIN of North Carolina, and Mr. HOLLENBECK.

H. Res. 532: Mr. BIAGGI, Mr. LELAND, Mr. PEYSER, Mr. HUGHES, Mr. WALGREN, Mr.

GOODLING, Mr. BINGHAM, Mr. MCCLORY, Mr. BONER of Tennessee, Mr. WHITEHURST, Mr. DUNN, Mr. STRATTON, Mr. HYDE, Mr. MAVROULES, Mr. WOLPE, Mr. FAZIO, Mr. RAILSBACK, Mr. CORRADA, Mrs. BYRON, Mr. BARNES, Mr. LONG of Maryland, Mr. HILER, and Mr. WON PAT.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 3269: Mr. ROEMER.
H.R. 6529: Mr. EDGAR and Mr. ROEMER.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

592. By the SPEAKER: Petition of Religious Society of Friends, Westbury, Long Island, N.Y., relative to conscientious objectors; to the Committee on Armed Services.

593. By Mr. SMITH of Alabama, et al.: Petition relative to H.R. 1454, gay rights; to the Committee on the Judiciary.

594. Also, petition relative to H.R. 3955, family protection; to the Committee on the Judiciary.

595. By the SPEAKER: Petition of Mrs. Frances A. Regan, Setauket, N.Y., relative to social security benefits; to the Committee on Ways and Means.

596. Also, petition of the Ewing Township Committee, Trenton, N.J., relative to mutual nuclear freeze; jointly, to the Committees on Armed Services and Foreign Affairs.

597. Also, petition of the Council, Village of Munroe Falls, Munroe Falls, Ohio, relative to content requirements for motor vehicles sold in the United States; jointly, to the Committees on Energy and Commerce and Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5540

By Mr. BETHUNE:

—Page 30, after line 10, insert the following:

"(h) No loan, loan guarantee, or commitment for a loan guarantee may be made under this section unless the Administrator of the Environmental Protection Agency conducts a feasibility study to determine the potential costs, benefits and environmental impacts of such loan, loan guarantee or commitment for loan."

Redesignate the following subsections accordingly.

—Page 30, after line 10, insert the following:

"(h) No loan, loan guarantee, or commitment for a loan guarantee may be made under this section unless the Secretary of Commerce conducts a feasibility study to determine the potential costs, benefits and environmental impacts of such loan, loan guarantee or commitment for loan."

Redesignate the following subsections accordingly.

—Page 30, after line 10, insert the following:

"(h) No loan, loan guarantee, or commitment for a loan guarantee may be made under this section unless the Secretary of the Treasury conducts a feasibility study to determine the potential costs, benefits and environmental impacts of such loan, loan guarantee or commitment for loan."

Redesignate the following subsections accordingly.

—Page 30, after line 10, insert the following:

"(h) No loan, loan guarantee, or commitment for a loan guarantee may be made under this section unless the Secretary of Defense conducts a feasibility study to determine the potential costs, benefits and environmental impacts of such loan, loan guarantee or commitment for loan."

Redesignate the following subsections accordingly.

—Page 30, after line 10, insert the following:

"(h) No loan, loan guarantee, or commitment for a loan guarantee may be made under this section unless the Secretary of Interior conducts a feasibility study to determine the potential costs, benefits and environmental impacts of such loan, loan guarantee or commitment for loan."

Redesignate the following subsections accordingly.

—Page 30, after line 10, insert the following:

"(h) No loan, loan guarantee, or commitment for a loan guarantee may be made under this section unless the Secretary of Commerce determines that such loan, loan guarantee or commitment for loan guarantee is economically justified."

Redesignate the following subsections accordingly.

—Page 30, after line 10, insert the following:

"(h) No loan, loan guarantee, or commitment for a loan guarantee may be made under this section unless the Secretary of the Treasury determines that such loan, loan guarantee or commitment for loan guarantee is economically justified."

Redesignate the following subsections accordingly.

—Page 30, after line 10, insert the following:

"(h) No loan, loan guarantee, or commitment for a loan guarantee may be made under this section unless the Secretary of Defense, Secretary of Labor, Secretary of Commerce and the Secretary of Interior determines that such loan, loan guarantee or commitment for loan guarantee is economically justified."

Redesignate the following subsections accordingly.

—Page 25, line 9, strike out "This Act may be cited as the Defense Industrial Base Revitalization Act" and insert in lieu thereof "This Act may be cited as the Throw Money at the Problem Act.".

—Page 25, line 9, strike out "This Act may be cited as the Defense Industrial Base Revitalization Act" and insert in lieu thereof "This Act may be cited as the Corporate Welfare Act of 1982.".

—Page 30, after line 10, insert the following:

"(p)(1) The total amount of loans, loan guarantees, and commitments for loan guarantees issued under this section in any fiscal year shall not exceed $100,000,000.

"(2) Notwithstanding paragraph (1) or any other provision of law, if the deficit in the Budget of the United States for any fiscal year, as contained in the Second Concurrent Resolution on the Budget for that fiscal year, exceeds $100,000,000,000, the amount specified in paragraph (1) shall be reduced by an amount equal to the amount by which such deficit exceeds $100,000,000,000.".

Redesignate the following subsections accordingly.

By Mr. ERLENBORN:

—Page 41, beginning on line 22, strike out all of subsection (m) through line 2 on page 43, and redesignate the succeeding subsections accordingly.

By Mr. LUNDINE:

—Page 51, after line 9, insert the following:

COST-ACCOUNTING STANDARDS

SEC. 4. (a) Section 719 of the Defense Production Act of 1950 (50 U.S.C. App. 2168) is amended to read as follows:

"COST-ACCOUNTING STANDARDS

"SEC. 719. (a)(1) The Director of the Office of Management and Budget (hereinafter in this section referred to as the 'Director') shall from time to time promulgate cost-accounting standards designed to achieve uniformity and consistency in the cost-accounting principles followed by defense contractors and subcontractors under Federal contracts. Such promulgated standards shall be used by all relevant Federal agencies and by defense contractors and subcontractors in estimating, accumulating, and reporting costs in connection with the pricing, administration, and settlement of all negotiated prime contract and subcontract national defense procurements with the United States in excess of $500,000, other than contracts or subcontracts where the price negotiated is based on (A) established catalog or market prices of commercial items sold in substantial quantities to the general public, or (B) prices set by law or regulation.

"(2) In promulgating such standards and major rules and regulations for the implementation of such standards, the Director shall take into account, and shall report to the Congress in the transmittal require under subsection (b)(3), the probable costs of implementation, including inflationary effects, if any, compared to the probable benefits, including advantages and improvements in the pricing, administration, and settlement of contracts.

"(b)(1) The Director is authorized to make, promulgate, amend, and rescind rules and regulations for the implementation of cost-accounting standards promulgated under subsection (a). Such regulations shall require defense contractors and subcontractors as a condition of contracting to disclose in writing their cost-accounting principles, including methods of distinguishing direct costs from indirect costs and the basis used for allocating indirect costs, and to agree to a contract price adjustment, with interest, for any increased costs paid to the defense contractor by the United States because of the defense contractor's failure to comply with duly promulgated cost-accounting standards or to follow consistently his disclosed cost-accounting practices in pricing contract proposals and in accumulating and reporting contract performance cost data. Such interest shall be paid at the rate determined under the last two sentences of section 105(b)(2)(A) of the Renegotiation Act of 1951 from the time such payments were made to the contractor and subcontractor to the time such price adjustment is effected. If the parties fail to agree as to whether the defense contractor or subcontractor has complied with cost-accounting standards, the rules and regulations relating thereto, and cost adjustments demanded by the United States, such disagreement will constitute a dispute under the contract dispute clause.

"(2) The Director is authorized to prescribe rules and regulations exempting from the requirements of this section such classes or categories of defense contractors or subcontractors under contracts negotiated in connection with national defense procure-

ments as he determines, on the basis of the size of the contracts involved or otherwise, are appropriate and consistent with the purposes sought to be achieved by this section.

"(3) Cost-accounting standards promulgated under subsection (a) and rules and regulations prescribed under this subsection shall take effect not earlier than the expiration of the first period of thirty calendar days of continuous session of the Congress following the date on which copies of the proposed standards, rules, or regulations are transmitted to the Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate. For the purposes of this paragraph, in the computation of the thirty-day period, there shall be excluded the days on which either House is not in session because of adjournment of more than three days to a day certain or an adjournment of the Congress sine die.

"(4) The Director shall coordinate existing cost-accounting standards with the procurement policies, regulations, procedures, and forms promulgated pursuant to the Office of Federal Procurement Policy Act.

"(c)(1) Prior to the promulgation under this section of rules, regulations, cost-accounting standards, and modifications thereof, notice of the action proposed to be taken, including a description of the terms and substance thereof, shall be published in the Federal Register. All parties affected thereby shall be afforded a period of not less than thirty days after such publication in which to submit their views and comments with respect to the action proposed to be taken. After full consideration of the views and comments so submitted, the Director may promulgate rules, regulations, and cost-accounting standards, and modifications thereof which shall have the full force and effect of law and shall become effective not later than the start of the second fiscal quarter beginning after the expiration of not less than thirty days after publication in the Federal Register.

"(2) The functions exercised under this section are excluded from the operation of sections 551, 553 through 559, and 701 through 706 of title 5, United States Code.

"(3) The provisions of paragraph (1) shall not apply to rules and regulations prescribed by the Director under subsection (b)(2).

"(d) For the purpose of determining whether a defense contractor or subcontractor has complied with duly promulgated cost-accounting standards and has followed consistently his disclosed cost-accounting practices, any authorized representative of the head of the agency concerned or of the Comptroller General of the United States shall have the right to examine and make copies of any documents, papers, or records of such contractor or subcontractor relating to compliance with such cost-accounting standards and principles.

"(e) The Director shall appoint and fix the compensation of not more than 10 employees for purposes of carrying out the provisions of this section.

"(f)(1) The Director may utilize personnel from the Federal Government (with the consent of the head of the agency concerned) or appoint personnel from private life without regard to chapter 51, subchapters III and VI of chapter 53, and chapter 75 of title 5, United States Code, and those provisions of such title relating to appointment in the competitive service, to serve on advisory committees and task forces to assist the Director in carrying out his functions and responsibilities under this section.

"(2) The authority granted to the Director under this section may not be delegated to any other officer or employee of the United States.

"(g) All departments and agencies of the Government are authorized to cooperate with the Director and to furnish information, appropriate personnel with or without reimbursement, and such financial and other assistance as may be agreed to between the Director and the department or agency concerned.

"(h) The Director shall make an annual report to the Congress with respect to his activities and operations, together with such recommendations as he deems appropriate.".

(b) All orders, standards, determinations, rules, regulations, interpretations, waivers, and contracts, made, issued, or granted by the Cost-Accounting Standards Board in connection with any function which is transferred by this section, and which is in effect at the time of such transfer shall continue in effect to the same extent as if such transfer had not occurred, until amended or repealed by the Director of the Office of Management and Budget (hereinafter in this section referred to as the "Director").

(c) The provisions of this section shall not affect any proceedings pending before any agency, or part thereof, at the time this section takes effect, but such proceedings, to the extent that they relate to functions so transferred shall be continued before the Director.

(d) No suit, action, or other proceeding commenced by or against any office, agency, or any officer of the United States acting in his official capacity shall abate by reason of any transfer made pursuant to this section, but the court on motion or supplemental petition filed at any time within 12 months after such transfer takes effect, showing a necessity for the survival of such suit, action, or other proceeding to obtain a settlement of the question involved, may allow the same to be maintained by or against the appropriate office, agency, or officer of the United States.

(e) All records and property of the Cost-Accounting Standards Board are hereby transferred to the Office of Management and Budget.

(f) With respect to any function transferred by this section and exercised after the effective date of this section, reference in any other Federal law to the Cost-Accounting Standards Board shall be deemed to be a reference to the Director of the Office of Management and Budget.

(g) This section shall take effect on October 1, 1982.

H.R. 6995

By Mr. MADIGAN:

—Page 14, after line 19, insert the following new section (and redesignate the subsequent sections, and any references to such sections, accordingly):

INFORMATION DISCLOSURES AND CERTIFICATIONS REGARDING SALE OF USED MOTOR VEHICLES

SEC. 8. The Federal Trade Commission Act, as amended in sections 6 and 7, is further amended by inserting after section 25 the following new section:

"INFORMATION DISCLOSURES AND CERTIFICATIONS REGARDING SALE OF USED MOTOR VEHICLES

SEC. 26. (a) For purposes of this section:

"(1) The term 'buyer' means any person who is not a seller of a used motor vehicle. Such term shall not include any dealer who purchases a used motor vehicle from any other dealer for purposes of resale.

"(2) The term 'motor vehicle' does not include any motor vehicle with a gross vehicle weight rating of 8,500 pounds or more, a curb weight of 6,000 pounds or more, or a frontal area of 46 square feet or more.

"(3) The term 'seller' means any dealer and any other person who transfers ownership of a used motor vehicle to a buyer.

"(4) The term 'used motor vehicle' means any motor vehicle driven more than the limited use necessary in moving or road testing a new motor vehicle before delivery to a buyer. Such term does not include any motor vehicle which is sold only for scrap or parts, if title documents are surrendered to the State involved and a salvage certificate is issued by such State for such motor vehicle.

"(D) (1) Each seller of a used motor vehicle shall furnish the buyer, at the time of sale, with a written statement which contains the following information with respect to such used motor vehicle—

"(A) the present tire tread depth for each tire, as compared to the original tire tread depth for each tire;

"(B) the present compression ratio for each engine cylinder, as compared to such compression ratio as stated by the manufacturer of such used motor vehicle at the time of its sales as a new motor vehicle;

"(C) the present condition and performance of each battery cell, as compared to the original condition and performance of each battery cell; and

"(D) the present thickness of the brake linings or pads, as compared to the original thickness of such brake linings or pads.

"(2) The Commission shall have authority to issue interpretive rules to the extent necessary to carry out the provisions of this section.

"(c)(1) Each seller of a used motor vehicle shall furnish the buyer, at the time of sale, with a written certification that the brake system, headlights, horn, steering system, taillights, and tires of such used motor vehicle are in safe operating condition.

"(2) The certification required in paragraph (1) shall be included as a provision of the contract or other agreement for the sale of a used motor vehicle, or incorporated into such contract or other agreement by reference. The provisions of such certification shall supersede any contrary or inconsistent provision in such contract or other agreement.

"(d)(1) If a buyer notifies the seller of a used motor vehicle, before the end of the period of 10 business days following the date of the sale of such used motor vehicle, that any component certified by such seller under subsection (c)(1) was not in safe operating condition at the time of such sale, then such seller shall—

"(A) provide for the repair or replacement of such component before the end of the period of 10 business days following such notice; or

"(B) rescind the contract or other agreement under which such used motor vehicle was sold to such buyer.

"(2) If a seller elects to provide for the repair or replacement of a component under paragraph (1)(A), but then fails to repair or replace such component before the end of the period of 10 business days specified in paragraph (1)(A), then the buyer may re-

scind the contract or other agreement under which the used motor vehicle was sold.

"(3) In the case of any rescission of a contract or other agreement under paragraph (1)(B) or paragraph (2), the seller shall refund the purchase price of the used motor vehicle to the buyer, excluding the cost of any repairs made necessary by any damage sustained by such used motor vehicle during possession by such buyer.

"(e) Any buyer purchasing a used motor vehicle may elect to waive the imposition of requirements upon the seller under subsection (b) and subsection (c). Such waiver shall be made in writing and furnished to such seller at the time of sale. Such waiver shall be included as a provision of the contract or other agreement for the sale of a used motor vehicle, or incorporated into such contract or other agreement by reference.

"(f)(1) Any seller who, with intent to defraud, violates any requirement imposed in this section shall be liable to the buyer involved in an amount equal to the sum of—

"(A) three times the amount of actual damages sustained by such buyer of $1,500, whichever is greater; and

"(B) in the case of any successful action to enforce the liability imposed in subparagraph (A), the costs of the action together with reasonable attorney fees incurred by such buyer, as determined by the court.

"(2) If any seller violates any requirement imposed in this section, the chief law enforcement officer of the State in which the violation occurs may bring an action—

"(A) to restrain such violation; or

"(B) to recover amounts for which such seller is liable under paragraph (1) to each buyer on whose behalf such action is brought.

"(3) An action under paragraph (1) or paragraph (2) may be brought in a United States District Court without regard to the amount in controversy, or in any other court of competent jurisdiction, during the two-year period following the date upon which the liability arises.

"(4) If the Commission determines that any State is not enforcing the requirements of this section in a manner consistent with the purposes of his section, the Commission shall furnish notice of such determination to the Secretary of Transportation. The Secretary, after receiving any such notice, may exercise the authority established in paragraph (2), in lieu of the chief law enforcement officer of such State.

"(5) The penalties and procedures established in this section for purposes of enforcing the requirements of this section are in lieu of, and not in addition to, any other penalties or enforcement procedures established in this Act or the National Traffic and Motor Vehicle Safety Act of 1966.

"(g) It is the intent of the Congress that the provisions of this section shall not be construed to supersede any State laws insofar as such laws currently or hereafter establish requirements relating to the disclosure of information and certifications by sellers of used motor vehicles which are the same as, or more stringent than, the requirements established in this section.".

Page 5, line 7, strike out "section 26 and section 27" and insert in lieu thereof "section 27 and section 28".

H.R. 7019

By Mr. STUDDS:

—On page 3, line 18, after the word "reduction" insert the following: ", together with an amount not to exceed $14,000,000 which shall be derived from appropriations for retired pay,".

On page 5, line 5, after "$50,094,000" insert the following: "together with an amount not to exceed $4,000,000 which shall be derived from appropriations for retired pay".

EXTENSIONS OF REMARKS

THE NUCLEAR THREAT

HON. FORTNEY H. (PETE) STARK
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. STARK. Mr. Speaker, the debate on the nuclear weapons freeze continues. Many of the arguments are becoming well known. I believe, however, that the following interview will shed some new light on the subject. In a recent interview published in "Common Cause," Admiral Noel Gayler, who has become an outspoken opponent of an increased military build-up, and a supporter of arms reduction, lets us know his view on the issues we are facing.

As the former commander and chief of U.S. forces in the Pacific, and the former Director of the National Security Agency, as well as the deputy director of the Strategic Target Planning Staff of the Joint Chiefs, Admiral Gayler brings expert insight into the debate. I think his comments deserve close attention.

[FROM COMMON CAUSE, AUGUST 1982]

THE NUCLEAR THREAT: CUTTING THROUGH THE TOUGH TALK

(In the following interview, retired Admiral Noel Gayler answers some of the complex and puzzling questions frequently asked about nuclear arms control. He concludes that now is the time for the United States and the Soviet Union to negotiate bilateral arms reduction treaties.

(Gayler is former commander in chief of United States forces in the Pacific (1972-76) and former director of the National Security Agency (1969-72). He is also the former deputy director of the Strategic Target Planning Staff of the Joint Chiefs.)

Are you really worried about the possibility of a nuclear war?

Yes, I think it's reason for grave concern. I don't think it's likely, but it certainly is not impossible. There are very practical ways to cut back on the possibility of nuclear war, and we should lose no time adopting them.

What are some of those ways?

The first thing I think we have to do is to stop trying to convince the Soviets and get the Soviets to stop trying to convince us that we or they really might contemplate nuclear war under some circumstances. We need to have a statement on the part of both that they do not contemplate nuclear war under any circumstances. A statement like that would be very important. I also think we should put an end to the intemperate and threatening rhetoric between the United States and the U.S.S.R.

I have two observations about that argument, which you often hear. One is that it betrays a complete lack of understanding of the nature of nuclear weapons and, as a matter of fact, of the nature of war.

Your expression about keeping the Russians in line—well, to risk nuclear war in any way in order to keep the Russians in line about such things as the integrity of Europe, for example, is just a complete confusion of ways and means. Europe can be defended without resort to nuclear weapons. This is not a statement of "better Red than dead." It's a statement that we need be neither Red nor dead. Furthermore, I think it's a very dangerous doctrine to keep the Russians uncertain, because if we do, the Russians are going to keep the Americans uncertain. Neither one of our societies understands the other very well. I've been shocked at the misperceptions that professional Russian observers have about the United States. And I think the same is probably true of our total understanding of Russia. So the notion that we're going to keep each other guessing is an extraordinarily dangerous idea, because they might guess the wrong thing. They might believe we were going to strike them, and feel the need to strike us first.

President Reagan says that we have to continue the arms buildup because we have a "window of vulnerability." Do you agree?

No. Taking the nuclear forces as a whole, there is no "window of vulnerability." There's no window of vulnerability because there's no vulnerability when it comes to our bomber forces and our submarine forces (which could not be easily destroyed). And it's quite dubious, I think, that even the fixed land-based missiles are as much at risk as people suggest. It would be suicide for the Russians to attempt to use a preemptive strike.

I don't think that the Russians are ahead of us. We have more of some things; they have more of others. I think it's interesting that if you ask senior military people in office if they would trade our own armed forces for the Russians', they would decline to do so.

The important thing to remember is that we now both have thousands of nuclear weapons, so there's nothing realistic even about the idea of being ahead or behind, for example, when he's got 6,000 and you've got 9,000 and it takes only 400 megatons to destroy a country. In point of fact, it makes more difference what the targeting policy is; it makes more difference what the fusing policy is, whether they choose to blow up at ground level and create fallout. It even makes more difference which way the wind is blowing, carrying fallout on a given day, than an extra thousand missiles on either side.

Then why do we continue to hear that the United States is behind?

You're in the public affairs business. You tell me why people can't see simple truths. The idea of strategic nuclear superiority and inferiority at these force levels simply has no meaning.

What is the mutual assured destruction (MAD) theory? Does it have any relevance?

It sure does. Mutual assured destruction is the idea that neither side will dare start a nuclear war because it knows that if it does, it will get it in return. That requires that a sufficient amount of the nuclear forces on either side be relatively or totally invulnerable to a first strike from the other side. We're both in that position now, and as far as I can see we will be indefinitely. The attempt to attain nuclear superiority is an illusion. There is no such thing.

Is a first strike capability important?

A first strike capability is an illusion. It's generally used to refer to the idea that an adversary will strike the nuclear forces of the other country and keep it from attacking back. The fact is that it's impossible. First, it's impossible because the submarine forces of either side can't be effectively attacked. Second, it's impossible because not all of the bomber forces of either side can be effectively attacked. But this illusion is extremely dangerous.

Many people are worried about negotiating with the Russians because they feel we just can't trust the Russians. That seems to be a major concern of many Americans.

Let's see why. Because the Russians might cheat? All right, what if they cheated? Suppose they cheated by a thousand weapons. It wouldn't make any difference, but we would be very likely to know it. If they cheated by 10,000 weapons, we would be certain to know it.

Isn't it important to have nuclear weapons as a deterrent against other war?

I can't prove it, but in my opinion, it's certainly not true that nuclear arms have prevented war. As a matter of fact, we've had major wars all over the place and are continuing to have them right now. There has not been war in Central Europe, in my judgment, because the U.S.S.R. has correctly estimated that the potential gains are not worth the risk.

But you could still argue that nuclear weapons have served as a deterrent in Europe, for example.

I understand the argument. I'm telling you that I don't think it has any validity because nuclear weapons can't be used by us in any sensible way, and they can't be used by the Russians in any sensible way.

But since they can't be used in a sensible way, doesn't that mean they've served as a deterrent?

They don't serve as a deterrent to conventional war and they haven't. We remember Korea and Vietnam. There's a conventional war going on in Lebanon, Iran, Iraq. There's a conventional war still going on in Afghanistan. We just finished one in the Falklands. What good did their nuclear weapons do the British there? They did not prevent the U.S.S.R. from taking over Czechoslovakia by armed force, from taking over Hungary by armed force, from abolishing the Baltic states, Latvia, Lithuania, Estonia, doing all of those things.

How do you think a nuclear war might start? Would it most likely be an accident?

I don't think an accident is as likely as a misguided attempt to use nuclear weapons in some limited way, with the exchanges escalating to a total nuclear exchange. I think that's the most dangerous possibility. Another quite dangerous possibility is the temptation to use nuclear weapons by some third country, perhaps in the Middle East. There are some pretty unstable figures out there. And we could be drawn into it.

For example, if there's a nuclear explosion in Leningrad, you could understand how the Russians might think we did it, but we might have had nothing to do with it.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

I don't think the deliberate massive attack by Russia against the United States is something to worry about very much because I think it would be insane on their part. But these other things are things to worry about. And unfortunately, neither we nor the Russians have much credibility in inducing other countries to forego nuclear weapons because we're not foregoing them ourselves. In fact, we're not even doing anything very serious about reducing them.

We keep hearing talk about "a limited nuclear war." Is such a thing possible today? We had one in Nagasaki and Hiroshima, of course.

That was because there was only one nuclear power. Now there are two major nuclear powers, and a number of others. And the two major nuclear powers have roughly equivalent forces. It's a totally different situation.

The reason I don't think there could be a limited nuclear war is because any nuclear initiative will have a reply. And the reply will be bigger than the initiative. That's the way doctrine is on both sides, and that's the way people are. And so it's only a question of how many steps up the ladder of escalation before you have the total holocaust.

What do you think about civil defense plans?

I think that civil defense for the purpose of disaster relief in the case of earthquake, flood, fires and so forth is a very valuable thing, but I think that the proposed civil defense program which is directed toward allegedly reducing the impact of nuclear war is totally impractical and will not work. It is bad because it tends to create the illusion that somehow or other nuclear war isn't so bad. That illusion is a very dangerous thing.

Do you think it's possible we could survive a nuclear war?

It depends on what you mean by "survive." I think that depending on a lot of things, that some Americans might still be living after a nuclear exchange if they live in some place well away from targets and they don't get caught in the heaviest of the fallout. But I don't think that either the United States or Russia would survive as a civilization, and I don't think that those who were left would be very happy with living anymore.

Why do we keep hearing that the Soviet Union has an elaborate civil defense plan?

Because it suits the purposes of people who want to push a civil defense plan in this country, and it also suits the purposes of people who either enjoy the illusion or wish to push the idea that the Soviets somehow or other have got a strategic advantage.

If you go to competent, intelligent Soviet sources, you find out that while they spend a lot of money on civil defense, it's pretty much a sham, just like it is here. They, too, have been the victims of wishful thinking. It's a turkey, and there's no reason why we should copy it.

You don't think, then, that they know something that we don't know about civil defense or that they've got some sort of secret weapon?

No, I don't think that.

Do you agree with those who say that building more nuclear weapons reduces our security and increases the risk of nuclear war?

Yes, I do. It increases our risk because the more weapons there are, the more terrible the consequences of a nuclear war and also the more likely that a military commander might imagine that he could use them for some purpose or other. It also increases the chances of accidental or unauthorized use or the possibility that a weapon or two would fall into the hands or terrorists.

Do you think the MX missile is a good idea?

No, I don't think the MX missile is a good idea. I think it is a destabilizing weapons system because nobody has figured out a way yet to make it invulnerable to attack, and therefore it's in that position where officials would be tempted to use them or lose them. And it puts the Russians in the same bind—increasing the risk to us.

What about SALT II? Should we ratify SALT II?

I think that that would be a healthy first step.

Do you think the Soviets are just as scared of us as we are of them?

In the nuclear field, I think yes. I think they're very much concerned about what they regard as saber-rattling and illogical behavior, and they're worried to death about nuclear war.

How do you respond to those who say the recent concern about the nuclear arms threat is just an overreaction that has been whipped up by the media?

I find it very hard to comment on that dispassionately. I think that is so wrongheaded that it's very difficult to be temperate about it. People who talk like that have never seen a nuclear weapon explode. They've never taken the trouble to look at what happened at Hiroshima and Nagasaki, and they've never taken the trouble to analyze what would happen with nuclear weapons exploding over our cities or theirs. I just think it's a totally irresponsible, damnable position to take.

But haven't we had the same threat of a nuclear war for years?

As a matter of fact that's not true. We have not had this threat for years. In recent years the total number of nuclear weapons and the disposition among the powers has more than doubled. Even more important, the level of rhetoric since about 10 years ago and the irresponsible cracks about potential ways in which you might fight war with nuclear weapons have increased. I think we're in worse shape than we have been.

Do you think that's why people seem to be worked up over this issue now?

I think it's a very reasonable thing to be worked up over. After all, it is a situation where you're going to get slaughtered without any warning and without your consent, you and your family and everybody you know, and your civilization and everything else. It seems that it ought to be something to get your attention.

Do you support a nuclear freeze?

Yes, I do. I understand the arguments made about the imbalance resulting from a freeze; I understand the arguments about verification; I understand the arguments about the time it would take to negotiate and so forth. I think those are all manageable, and that they all pale into insignificance when compared to the importance of stopping the continuous buildup while we negotiate for deep arms reductions.

I don't think the freeze is a substitute for deep arms reductions, but I can't see how it does anything but help with the negotiating process toward them. I particularly reject the idea that we should or can build up our nuclear forces in order to gain an advantage over the Soviets before we can negotiate. I think that's nonsense. They can build up just as fast, and in my judgment, they will.

But you said before that you think we're about equal now.

That's my opinion, yes.

Can citizens make a difference on this issue?

If by citizens you mean voters, yes. And I think it's extraordinarily important that those citizens who feel strongly on this issue should become voters. At the same time I hope very much that this very sound revulsion against nuclear weapons doesn't spill over into a general antimilitary attitude.

We need to keep and improve a military capability to defend Europe by conventional means, so nobody will be tempted to use nuclear weapons. We need to keep the oceans open, because the Western alliance is an oceanic alliance. We need to be able to protect remote places in the world, such as the Middle East, for peacekeeping and because our vital interests are at stake there. These are things which we very much need. And they come together under the rubric of conventional weapons, and those are things that we need for our security and our freedom and much of the world's.

So do you think citizens should be voting for those people who want to do something about the nuclear arms buildup?

Yes, I think it is the most effective thing and, of course, sensitive political antennae will be out long before the voting even takes place. So the fact that there are citizens concerned about this and that they intend to vote will be registered by politicians, and it will result in changes in policy.

Now let me make it clear that I'm not talking about unilateral U.S. actions. I'm talking about developing the political will here and in the U.S.S.R. to reduce the probability of nuclear war.

But how can we influence what the U.S.S.R. does?

They follow us very closely, and I think they pay a great deal of attention to what they perceive our intentions and our capabilities are.

In my judgment, what it really takes is the political will on the part of the United States and the political will on the part of the U.S.S.R. to tell their negotiators, "You find the means to take this terrible peril away." With that political will, I promise you there is no security obstacle, no physical obstacle, no technical obstacle, no economic obstacle to making massive reductions in nuclear weapons. All that is the political will between the two of us.

Is that likely to happen?

I think so. I think that the present nuclear arms situation is so dangerous to the security of the United States and so dangerous to the security of Russia that logic and common sense should compel us to get together and do something about it. And in this area we and the Russians have two very strong, common interests. One is that we don't want to be blown up and the other is that we don't want nuclear weapons all over the world in the hands of Qaddafi anf Khomeini and people like that.

Do you think that there's any evidence that the Soviets would be willing to put down some of their arms?

Yes, I think there's a lot of evidence—their pronouncements at the highest levels in the Soviet Union, from Brezhnev on down. They have formally, of course, agreed to nuclear arms reductions and to the negotiations of further nuclear arms reductions. So I don't think there's any reason to doubt that they're willing, if we can negotiate something that's clearly in the interests of both of us. And I think that's entirely a matter of political will.●

H.R. 6046—THE WRONG ANSWER TO THE PROBLEM OF TERRORISM

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. WYDEN. Mr. Speaker, I rise to urge my colleagues to oppose H.R. 6046, the Extradition Reform Act of 1982, if it is brought up for a vote on the floor of the House as presently written.

The objective of this bill is clear and commendable: to reform the process under which the United States, through extradition treaties with more than 90 foreign nations, attempts to combat the specter of international terrorism.

However, the mechanism embodied in H.R. 6046 is wrong. If we pass this bill as written, we would tie the hands of our courts and condone the suppression of political dissent in some of the world's most totalitarian countries.

By gutting the political exception defense to requests for extradition, we would tell political refugees seeking sanctuary in this country that our most cherished principles of freedom of expression and individual liberty do not apply to them.

By requiring our courts to jail foreign nationals solely on the basis of unsubstantiated allegations by foreign governments of violent activity, we would replace the fundamental safeguards of due process and probable cause with a system of arbitrary detention that is contrary to everything this country stands for.

H.R. 6046 also would not allow our courts to question the motives of a country seeking extradition or to attempt to determine whether the approval of a request would subject the individual involved to persecution and torture based on his political beliefs once expelled from this country.

Under this bill, the State Department—rather than the courts—would have the sole authority to determine whether an extradition request should be denied on the basis of gross violations of human rights in the country seeking extradition.

I, for one, feel very uncomfortable entrusting this determination to an agency that recently certified substantial progress in the protection of human rights and political freedom in El Salvador.

Mr. Speaker, I hope the leadership does not bring this bill up for a hurried vote as we rush toward adjournment. This is a serious matter that needs to be thoughtfully debated. If it is scheduled for floor action, I urge my colleagues to support a number of corrective amendments that will be offered.

For more than 200 years, this country has been a shining light for freedom-loving people throughout the world. The United States was founded on the principle of political dissent and we should proceed very cautiously with any attempts to abrogate that fundamental principle.●

THE MEDIA'S MISTAKE IN LEBANON

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. GREEN. Mr. Speaker, Bayard Rustin, president of the A. Philip Randolph Education Fund, wrote to the New York Times about the contrasting impressions of Lebanon he and a group of travelers to southern Lebanon and Israel found, and those presented by the news media.

Contrary to media reports, towns like Tyre, Sidon, and Nabatiya were not reduced to rubble; rather, they were swiftly rebuilding. Nor was the PLO's departure mourned; rather, the PLO was openly vilified by all who spoke with the group of Americans.

Mr. Rustin wrote hoping to set the record on Lebanon straight before media-inspired misconceptions of the war become rooted in our minds. If we are to understand the war properly, Mr. Rustin warns, we must take due note of the depth of and the reasons for the Lebanese hatred of the PLO. For the benefit of my colleagues, I ask that this letter be placed in the RECORD at this point. Thank you.

THE MEDIA'S MISTAKE IN LEBANON

To the EDITOR:

I am writing in behalf of a group of disparate people, from several religious faiths and representing different constituencies, who visited Israel and Lebanon together, having returned on Aug. 23.

We spent two days in Southern Lebanon, including east Beirut, with the cooperation of the Israeli Government, which hoped that our findings would help dispel what it considered the extremely unfair and grossly inaccurate media coverage of the events in Lebanon. The discussions among ourselves, both there and on our return, indicated remarkable agreement and a feeling that at least some of our findings should be made known as soon as possible.

First, we agree that the coverage of Israel's military advance into Lebanon was inaccurate and unfair and did not depict what actually happened.

Among other cities, we visited Tyre, Sidon and Nabatiya, which had been reported as virtually destroyed. We found them vital, populated and thriving, with their own civilian control, and, in every way we could see, ready and capable of picking up their lives. The energy and recuperative power of the Lebanese people were striking.

Sidon was the most damaged of these three cities, but even there only isolated sections of the main street—the road to Beirut—showed heavy damage. The side streets and most of the main thoroughfare were relatively untouched. So it was clear to us that the damage reported by the U.S. media had been grossly exaggerated.

The final, perhaps most important point we wish to convey is the widespread loathing of the Lebanese people for the P.L.O. We spoke to dozens, stopped at random on the streets. All were willing, indeed eager, to talk with Americans, and all damned the P.L.O.

The P.L.O. had seized a number of cities during its seven-year reign of terror in the area. All law there was P.L.O. law; all justice P.L.O. justice. And we heard stories of murder, rape, pillage, intimidation, sacrilege and what have you—from Maronite Christians and from Shi'a Muslims alike. One has only to visit the Christian cities of Damour or Aichiyah, or Shi'a Nabatiya, to be convinced.

Those who traveled with me were the Rev. Carl E. Flemister, executive minister of the American Baptist Churches of Metropolitan New York; Thomas Y. Hobart Jr., president of New York State United Teachers; John E. Nikas, former president of the Hellenic-American Neighborhood Action Committee, and the Most Rev. Joseph E. Sullivan, auxiliary bishop of the Roman Catholic Diocese of Brooklyn.

They have read and approved this letter and join me in urging that our media conduct intensive investigations among the Lebanese people. They will discover the depth of those people's hatred for the P.L.O., and the reasons therefore. It behooves us to pay heed.●

KEITH SEBELIUS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 15, 1982

● Mr. DERWINSKI. Mr. Speaker, it is with deep sadness that I wish to join my colleagues in honoring my old friend, Keith Sebelius, who died September 5, 1982. It was an honor and a privilege to serve with Keith during his 12 years in Congress. He was an outstanding Member of Congress, a true public servant, dedicated to his constituents.

Through his years of valuable service, Keith was a noted legislator in the field of agriculture. His knowledge and wisdom in the agriculture field were frequently sought out by other Members and widely respected both inside and outside of Congress.

Keith Sebelius' distinguished career in the House has left him with many friends who feel the loss of this wise and admirable man. My wife, Pat, joins me in our heartfelt condolences to his wife, Bette, and their sons, Doug and Gary.●

WHAT THE TAX BILL WAS ALL ABOUT

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. PORTER. Mr. Speaker, what was this tax package passed narrowly by the Congress and signed into law by the President last week all about?

We know generally what it does and who it affects. It increases Federal revenue by $96.3 billion over 3 years, primarily by closing out excesses written into the code in passing the tax reduction a year ago. Some sacrifice is asked of each of us, but the bill most impacts high income taxpayers and corporations.

It leaves intact three-fourths of the tax deductions set into law last year, reducing their impact from $430 billion to about $330 billion for 1983, 1984, and 1985. Most importantly, it reduces the projected deficit for fiscal year 1983 by $20 billion more for the next 2 years.

Finally, it carries out the revenue provisions of the budget resolution Congress adopted only last June. As for the $38.4 of spending cuts also directed by the resolution to be made over the 3 years, some have been made already, and the remainder, the President has said, if not made by Congress, would be made by his vetoing all over-budget appropriations.

We can conclude, that the tax conference report's adoption was a signal that Congress could act responsibly—in an election year to boot—to carry out its budget resolution and take action to help reduce the deficit, cut interest rates and get unemployed Americans back to work as soon as possible.

With all this and more at stake, then, one would think that at passage the focus was on the ability of the President and the Congress to govern.

Many Republicans to the end remained adamantly opposed to any kind of revenue increase. They felt that the President was backtracking on his own ideology and that more revenues in the Federal hopper would only give the spenders both the excuse and the means to avoid scheduled budget cuts. I have to admit to much the same feelings. I did not come to Washington to increase taxes either. But, clearly, without this part of the budget resolution in place, and even higher deficits—in the $200 billion range—facing us next spring, surely the pressure to undo the third year of the tax reductions would have been overwhelming. To protect that last 10 percent reduction, and tax indexing, I felt this measure was needed.

In the final analysis, however, for most of the 103 Republicans who, however reluctantly, supported the bill, it was the question of governing—of providing leadership and direction for our country—that pulled their votes in.

This President was elected in November 1980 to deal with an economic mess 20 years in the making. Last year, under his leadership, we put in place new policies to curb the rate of increase in government spending, reduce the burden of taxes, encourage savings and investment, and cut back excessive Government regulation of the economy.

This year, to gain further spending cuts, protect the tax reductions already enacted, and send a good signal to the economy by reducing projected deficits, the President determined that the tax package was necessary.

What does this mean in the Congress? Though the Democrats still control the House of Representatives, the Republicans are perceived as the party of power today in Washington. Republicans can no longer sit on the sidelines engaging in theoretical discussions of how it might be when their policies are put in place. They are no longer the minority. They now must govern dealing with the world as it is, pulling together the majorities needed to accomplish direction, and in some cases, compromising in the short term to preserve and assure that they ultimately reach their goals.

The change in mind-set from loyally opposing to governing is not easy. By its very nature, your ideology gets compromised to some degree when you try to reach a consensus. But, governing in a free Republic such as ours has never shown a history of philisophic purity, and never will. We move forward haltingly, gaining direction by pulling together for short times, groups of basically divergent ideologies.

This explains much of what this tax package is all about.●

KEITH SEBELIUS: ABLE, EFFECTIVE

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 15, 1982

● Mr. FUQUA. Mr. Speaker, it is with a feeling of deep personal loss that I rise today to join my many colleagues in honoring former Congressman Keith Sebelius who so ably represented the First District of Kansas for 12 years.

Keith Sebelius and I shared two major legislative interests, in agriculture and energy, as well as many personal interests during the years when we served together in this House.

His commitment to a sound and workable agricultural policy will probably be the intellectual monument for which he is best remembered both by his colleagues and the tremendous agricultural district he represented.

But having had the opportunity to work with him even more closely on a national energy policy, his devotion to the cause of America's energy independence will always be one of the hallmarks of my remembrance of Keith Sebelius.

Keith Sebelius will be remembered by all who had the honor of serving with him, and by those he served so well, as a wonderful, kind, thoughful, and intellectual human being.

I commemorate his spirit even as I mourn his loss.●

AMERICANISM FOUNDATION

HON. JEAN S. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mrs. ASHBROOK. Mr. Speaker, I am pleased to have within the 17th District of Ohio the Americanism Foundation, an organization dedicated to promoting the importance of maintaining the basic freedom and liberty which we as a nation have long enjoyed. The Americanism Foundation impresses upon the youth of the community of Norwalk the necessity of preserving and protecting our individual freedom.

Each year the foundation holds an essay contest. This year's theme was, "The Meaning of Freedom and How To Advance It." First place winner is Susan Bohart, a junior at St. Wendelin High School in Fostoria, Ohio. Second place winner, a senior at South Central High School in Greenwich, Ohio, is Cregg Fetter. It gives me great pleasure to congratulate these students on their fine essays, and insert them in the CONGRESSIONAL RECORD:

THE MEANING OF FREEDOM AND HOW TO ADVANCE IT

(By Susan Bohart)

What is freedom? What does it mean to you? John Stuart Mill declared: "The only freedom which deserves the name, is that of pursuing our own good in our own way." I believe that real freedom is the power to act, speak, and think without the imposition of restraint, but in a way that does not deny the rights of others.

We, as a nation, should be proud that we were one of the first to include the right of freedom in our doctrines. Our nation was built by those searching for freedom. Each building block of our country was placed there to support our ideas of life, liberty, and the pursuit of happiness. Our founders were setting a shining example to all those who suffered from oppression and inequality. The Declaration of Independence was of significance not only to us, but for all people because it upheld the basic rights of all men. Equality is not only necessary for liberty, it also allows man to work free of restraints and to excel in his own initiative and intelligence.

We are given many things in this world; but freedom is an especially significant gift given to us by God—one that no man has a right to take away. It gives us the right to make our own decisions about religion, politics, and many other important issues. Freedom gives us the power to be individuals.

Unbelieveably, some people try to take freedom away from others. We witness this fact everytime we turn on the T.V. and watch the news: murder, kidnappings, the invasion of Poland and the Falkland Islands. Communists even base a large part of their system on restricting personal rights and liberties. As the impending threat of war looms near, we must recognize and stand up for our own principles. We believe in the self-determination of peoples and we have the right to govern ourselves as we see fit.

Awareness is not enough. It is also necessary that we act to guarantee our freedom. We all need to exercise our democratic rights as citizens by voting and taking part in our government—especially we, the youth of America. As we grow up and begin to receive more and more liberties from parents, teachers, and other adults, we must also look to the future and plan for the preservation of America's freedom.

Our constitution gives us the right to vote, speak, assemble, and worship. By using the freedom of speech, as I am doing now, and by using the power of our vote, we are, as Martin Luther King once said, ". . . speeding up that day when all of God's people will be able to join hands and sing togehter 'Free at last, free at last, thank God almighty, we are free at last!'"

THE MEANING OF FREEDOM AND HOW TO ADVANCE IT

(By Gregg Fetter)

When one talks of freedom, a wide variety of responses will be received from different persons. If one were to converse with a former prisoner of war, his response would differ greatly from that of someone who has never helped defend his country from an aggressive force. In contrast, freedom is thought to be achieved at the completion of high school, living apart from one's parents, and free of their authority. Freedom is advanaced in various ways, also. Both radical and peaceful methods have been administered in trying to advance freedom. The following is my psersonal view of what freedom represents, and what is necessary to achieve the most freedom obtainable.

Freedom is the ability to do just about anything one enjoys, providing it is lawful, which, in a real sense is not freedom at all because of the restrictions placed upon every person. To find freedom, one must look deeper than the ability to perform things that are pleasing to oneself. If one were to try to think of anything that represents freedom, he would find this task impossible because every action performed by a person is regulated—in some way—and is not isolated from everything else. Freedom, therefore, is something that has no links with actions that can be performed; literally, freedom is nonexistent.

How one interprets freedom is the amount one has. To illustrate this point, if a person were to move from Russia to the United States to live, he would feel he has total freedom compared to what he had. Now compare this Russian's view to one of a lifetime United States resident. The two resulting opinions of the amount of freedom offered in the United States would greatly differ—even though no difference occurs. Both have the same amount of freedom, yet the two opinions conflict on the acutal amount received. Based on this example, it can be assumed that freedom is only a state of the mind. In the United States, one is not free to do anything one wishes, one is only less restricted than is an individual from a foreign country such as Russia.

Lastly, freedom is only advanced by protecting what gives individuals their "state-of-the-mind freedom"—our country. This country is one of the few where freedom is said to exist. It offers what serves as a model to other countries. "The land of the free," so-called because of the opportunities presented, will remain this way only if people are willing to fight for the ideals it stands for. How much freedom one is willing to fight for is what will determine how much freedom one will receive.●

AIRPORT AND AIRWAY SYSTEMS DEVELOPMENT ACT OF 1982

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. MARKEY. Mr. Speaker, I wish to commend those Members who worked so diligently for passage of the Airport and Airway Systems Development Act of 1982. The act creates set-aside funding for airport noise abatement programs to insure that these important programs continue as promised by the Aviation and Noise Abatement Act of 1979. Of particular importance is the recognition the conferees have given to the value of public building soundproofing, especially for educational institutions. The Massachusetts Port Authority (Massport), operator of Boston's Logan International Airport, has done an enviable job in the area of airport noise control and seeks to do more under this new legislation.

Logan presents Massport with a host of unique challenges in noise abatement. The world's 13th busiest airport, and the major hub for a six-State region, Logan is located largely within the city of Boston with its four major runways surrounded on three sides by heavily populated neighborhoods. Quite naturally, it produces adverse environmental effects on those who live near the airport or under its flight path.

As jet traffic and Logan itself expanded during the 1960's and early 1970's, those effects often led to considerable differences between airport and community. These frequent conflicts not only failed to reduce noise, they often impeded Massport's ability to respond to the legitimate air service needs of the New England region.

This deadlock was broken in 1976, when Massport instituted active noise abatement and community relations programs. Combined with intelligent and aggressive air service marketing, these programs allowed Massport to accomplish what had been considered impossible: A reduction in airport noise accompanied by an increase in air service. Massport's noise abatement office and public affairs staff working in conjunction with the community, the airlines, and various government agencies, particularly the Federal Aviation Administration, made this possible.

By pursuing a course of cooperation rather than confrontation, Massport has created a noise abatement program that is second to none, while providing the highest level of air service to the people and businesses of New England that use Logan International Airport.

For example, in the first 4 years of its existence, the Massport noise abatement program for Logan produced significant noise relief for over 65,000 people living near the airport. Even more dramatic, the number of people affected by noise at night—between the sleeping hours of 11 p.m. and 7 a.m.—has been cut nearly in half, 47 percent; and the affected land area has been reduced by 5 square miles. This success is due to both the Logan nighttime noise restrictions and to a decrease, 25 percent, in nighttime operations.

Paralleling this progress in noise reduction, Massport made major air service gains at Logan. During the same 4-year period, passenger traffic grew 29 percent and cargo volume increased 22 percent. Also, 18 new carriers, including 9 commuter lines, entered the Boston market, adding service to more than two dozen new U.S. cities. At the same time, annual commercial air carrier operations experienced a slight decrease, indicating more efficient use of the Boston hub, a benefit to the carriers, the community, the traveling public, and the Nation as a whole.

Aside from these overall gains in noise abatement, Massport has led the way in soundproofing for noise impacted public education facilities. In the fall of 1981, Massport received a FAA demonstration grant for the soundproofing of East Boston High School. The grant was the first of its kind and represented such an innovative approach to airport noise control that Massport received the First Aviation Environment Award issued by Administrator Helms. Massport, with the help of the FAA, hopes to carry this program to other schools located in Winthorp, Chelsea, and Revere, which are also noise impacted.

Passage of the Airport and Airway Systems Development Act will certainly aid in the enhancement of what is already an effective noise program at Massport. Again, I commend those Members who worked for the successful completion of this legislation.●

THE DEATH OF GEMAYEL

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. GOODLING. Mr. Speaker, the assassination of President-elect Bashir Gemayel of Lebanon has thrown an unexpected and immensely tragic twist in the already complex and highly volatile situation in Lebanon and the entire Middle East. Gemayel's death, along with the deaths of many high-ranking members of his party, creates a void in the political situation which can only be filled without much bloodshed if all the parties and factions in Lebanon, both Muslim and Christian, put aside their differences and work for the restoration of Lebanese sovereignty and stability.

While Gemayel's character and policies were uncertain, he at least introduced an element of hope to the war-torn land of Lebanon. The leader of the rightist Christian Phalange Party, Gemayel was thought to have been a puppet of Israel. However, when it came to the sovereign integrity of Lebanon, he did distance himself from Israel and Israeli policies, calling for the complete withdrawal of all foreign troops, Arab and non-Arab alike. At the same time he did begin to make overtures to the Muslim population of Lebanon. Described as an "iron-fisted man of law and order," Gemayel's elevation to the Presidency of Lebanon was the spark of hope that Lebanon needed: hope for an end to the foreign occupation, hope for an end to the civil war that has torn Lebanon asunder for so long now, hope for peace.

Gemayel was not a Sadat, but he was a democratically elected President, and like Sadat he carried the burden of bringing about a lasting peace for his war-weary country. It is not so much his death that threatens the hope for peace in Lebanon, as it is the manner of his death which has served only to continue the cycle of violence and hate that was just on the verge of being broken. In mourning the death of Gemayel, let us not also mourn the death of hope.

For myself, I have introduced a resolution calling upon the leaders of the parties and factions of Lebanon to put aside their differences and overcome this latest obstacle to peace. I also call upon all nations affected by this tragedy to join together and stop the senseless pursuit of conflicting policies and bring peace to Lebanon. If we can somehow achieve this end, Bashir Gemayel will not have died in vain.●

COAL SLURRY BILL NEEDS CONSUMER PROTECTIONS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. FLORIO. Mr. Speaker, the House may soon consider legislation to grant the right of eminent domain to coal slurry pipelines. I have a number of very serious concerns about this legislation, particularly about how coal slurry pipelines would affect utility rates. Some have contended coal slurry pipelines will result in reduced utility rates. I am afraid the result could instead be higher utility rates. I am also concerned about possible adverse environmental impacts of coal slurry pipelines.

To deal with these concerns, I have today inserted into the RECORD four amendments. The first three would provide important consumer protections and would help to prevent possible utility rate increases from the construction of pipelines. The last would require a comprehensive assessment of certain environmental effects—especially potential hazards of solid waste disposal—resulting from construction and operation of slurry pipelines.

AMENDMENT NO. 1—CERTIFICATE OF NEED

This amendment would require the appropriate State regulatory commission to certify to the Interstate Commerce Commission (ICC) that a proposed contract between a utility and a pipeline would further the interests of electric consumers, before such a contract could be entered into. This would insure that State regulatory commissions could review the effect of proposed pipeline contracts on the interests of consumers.

AMENDMENT NO. 2—CONSTRUCTION WORKS IN PROGRESS

This amendment would prevent a utility from passing on to its consumers any cost related to a coal pipeline, before the actual receipt of the coal. This would insure that consumers would not have to pay for a pipeline until they actually receive some benefit from it.

AMENDMENT NO. 3—COST CONTAINMENT AMENDMENT

This amendment would require the ICC to set a maximum allowable cost for the construction of a coal pipeline. There would be certain exceptions, such as inflation or unanticipated natural disasters.

Slurry proponents have argued against similar amendments in the past, saying you cannot prevent costs from rising through legislation. This provision deals with that criticism. The total pipeline cost could exceed the maximum set by the ICC, but the additional cost could not be passed on to pipeline customers, either through a contract or a regulated rate. Thus, cost overruns would be at the risk of the pipeline promoters.

I have been particularly concerned that pipeline construction projects would be subject to large cost overruns. This amendment would insure that consumers would not have to pay for these overruns.

AMENDMENT NO. 4—HAZARDOUS WASTE TASK FORCE

The last amendment would require an interagency task force consisting of the Departments of Interior, Energy, Transportation, and the Environmental Protection Agency to study the effects of a proposed pipeline on a number of environmental factors. These include the effects of a proposed pipeline on water quality at point of discharge, the extent of and hazards of solid waste disposal, and other health and environmental effects such as effects of possible pipeline rupture and release. The task force would recommend appropriate conditions to the ICC for inclusion in the pipeline's certificate. The ICC could not grant a certificate until the task force has finished its review. This is similar to an amendment I proposed to the coal slurry bill 2 years ago which the Slurry Transport Association indicated it would support.

Mr. Speaker, these amendments would insure necessary protections for the consumer and the environment. I urge my colleagues to support them.●

VAN H. PRIEST CO.

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. FUQUA. Mr. Speaker, I would like to call to the attention of my colleagues a retail business that has been an institution in my district for 57 years. The Van H. Priest Co., a chain of retail variety stores in north Florida and south Georgia, is closing its doors at the end of this year after being in business since 1925. The founder and president, Mr. Van Hood Priest, is retiring and I want the Members of this body to know about this friend of mine.

Van Priest was born in Levy County, Fla., where he grew up on a farm and small cattle ranch. His great grandfather, Gabriel Priest, was a member of the Florida Territorial Legislature and served as one of the first State senators after Florida gained statehood.

Mr. Priest moved to his current hometown of Madison, Fla., in 1918 to attend Florida Normal Institute. On his second day there, he met and fell in love with Rosalie Noegel. They were married a year and a half later on December 28, 1919. Van and Rosalie have

3 daughters, 9 grandchildren, and 14 great grandchildren.

The Priests are members of the First Baptist Church of Madison, where Van has been a Deacon since 1927. They have been active in church work both at the local and State level. He also served his country in World War II, as a Captain in the Army Air Force stationed in Europe.

Van became active in Florida politics in the mid-1930's. His involvement was sparked by the realization that something had to be done to combat restrictive governmental intervention in private enterprise. His career in politics and public service spanned 35 years of his life. This public service included a term in the Florida Legislature in 1940-41, and 20 years as a member of the city commission of Madison from 1945-65. For 11 of those years he served as mayor of the city.

Mr. Priest's public service is best exemplified in his participation and leadership in the various organizations that serve the retailing industry and the business community in general. His service to Florida retailers included the presidency of the Florida Chain Store Council, which was the forerunner of the Florida Retail Federation, an organization that he later served as chairman. He was also a director of the Florida Chamber of Commerce. Many national organizations have benefited from his leadership, including the American Retail Federation, the Association of General Merchandise Chains, and the U.S. Chamber of Commerce. His participation in these organizations has brought him to Washington to testify before several congressional committees. Van has been a successful retailer and a strong supporter of the business community.

Mr. Speaker, Van has become something of a legend as a toastmaster in civic and business organizations, due principally to his winning personality and warmth of his humor. With the House's indulgence, I would like to conclude my remarks with a few quotes from Van H. Priest that would serve all Members of this body well:

I am in this business and it has been good to me. The least I can do is work with friends and competitors alike for its progress.

A passive attitude toward government by businessmen will place us in a position of being dominated by those we elect. As a businessman, I have an obligation to myself and every other member of the community to do what I can to keep our commercial economy healthy and flourishing.●

NEED FOR CHILD AND FAMILY SERVICES

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. MOFFETT. Mr. Speaker, I am presenting today—in the series of presentations begun in the RECORD yesterday—the opening remarks made by Representative GEORGE MILLER at the forum on the New Federalism and its effect on the children of Connecticut. The eloquence of Congressman MILLER in stating the need for child and families services in this Nation was greatly appreciated by all who heard it at the forum, and I commend the following statement to all of my colleagues here in the House of Representatives.

REMARKS BY CONGRESSMAN GEORGE MILLER AT ST. JOSEPH COLLEGE, HARTFORD, CONN., SEPTEMBER 8, 1982

It is with a great deal of delight that I have come to Connecticut today. I am, of course, pleased to sit on this panel with my distinguished colleagues and friends, Toby Moffett and Barbara Kennelly. Both Toby and Barbara have recognized that the citizens of Connecticut are deeply concerned about the lives and futures of their children, and have persisted in consistently representing those concerns in the Congress. (Barbara has had less time, but is a welcome and thoughtful addition to the Connecticut delegation and to the all too few Members of Congress who have placed children, youth and families high on their agenda.)

St. Joseph College should also be commended for hosting this day's forum on the impact of New Federalism on Connecticut's children, youth and families. Connecticut is fortunate that its universities and colleges have developed strong programs in early childhood education and child development, which make the connection between the activities of front line professionals and workers in child-caring agencies—and the policies which governments at every level, and the private sector, develop and carry out.

I am greatly heartened by the numbers of people who have joined us today, including the students who are here, and hope the forum will be productive for all involved.

The subject of these hearings is especially important because, as some of you may have heard me say in the past, children are neither partisan nor are they powerful. They do not lobby Congress, they do not contribute to our campaigns, and as a result, generally they remain the victims of this administration's proposals for budget cuts and policy changes.

What outrages me is that the program cuts, the so-called New Federalism, or turnback of programs to the States, the deregulation which this administration has proposed or in many cases already achieved—these have touched the very programs which have been most successful in turning around poverty, in getting rid of illiteracy, in providing children a chance to read and write, in bringing millions of handicapped children into the educational system with their non-handicapped peers, in ridding this country of malnutrition.

They are the programs that have been least beset by fraud, waste and abuse.

They are the programs that have begun to bring equity to black and Hispanic and other minority children, to young girls, and to disabled children.

They are the programs that have worked, by the admission of the very officials who are calling for their dismantling. According to these officials, the programs save children, save money, and are effective.

The Education Secretary admitted that title I helps disadvantaged children do better in school. But he endorses cuts of hundreds of millions from that program. He admits that Public Law 94-142 has brought an appropriate education to millions of handicapped children, yet he calls for dramatic revisions in the regulations fundamental to this program which would clearly undermine the intent of Congress, and represent a substantial retreat from the hard fought rights for handicapped children and their parents.

The Deputy Agriculture Secretary testified that WIC saves lives and produces healthier babies. But he wants to slash hundreds of millions from that program. And most recently, he has begun to prepare regulations which tamper with the high protein foods carefully identified to aid low-income pregnant women and children who have been certified to be at nutritional risk.

The official in charge of Head Start and the President have called it one of the most effective programs, and yet have endorsed major cuts and regulatory changes.

It strains the imagination to believe that they, or the administration they represent, want to cut these programs to make them work better. I would be delighted if someone who testifies today could tell me that any of the changes that have occurred so far have been beneficial to the children and families affected. I have not heard this yet in my community, nor in the Education and Labor Committee, of which I am a member.

Now Connecticut is a small State, certainly compared to my home State of California, and Connecticut is known for its relative affluence. But let this not mask the needs of the 26 percent of its population who are its children:

More than 12 percent of these children live in poverty.

More than half of the mothers in Connecticut are in the labor force, including 42 percent of those with children under 5 and more than two-thirds of those with school-age children.

27 percent of the female-headed families in Connecticut lived below the poverty line in 1979; over 60 percent of those families with children under 6 lived in poverty.

Connecticut's black population is small—only 7 percent of the State's citizens—but its children are exceedingly vulnerable:

Nearly 30 percent of all blacks lived in poverty;

A black child in Connecticut is almost four times as likely as a white child to be classified mentally retarded for school purposes;

A black child in Connecticut is twice as likely as a white child to be suspended or expelled from public school.

Infant mortality and low birthweight seem to be significant problems in this State:

In 1980, 1 in 98 infants in Connecticut died;

In 1978, 1 in 43 black infants in Connecticut died;

Over 1 in 14 babies born in Connecticut is low birthweight;

20 percent of the births in Connecticut in 1977 were to women who had not completed high school;

Hartford alone has the highest teenage pregnancy rate, and the largest number of infants born to teenagers; Hartford's infant mortality rate is almost twice that of the State.

Surely it is tragic for a government to know of the great needs of its people, but be unable to aid them.

But it is far more tragic for a government to possess the ability to relieve the suffering of its people, and yet to turn away, or to single them out as frauds and loafers.

Last year alone, Connecticut lost $3.5 million in Federal funds which it uses to provide breakfasts and lunches for thousands of schoolchildren, clinics for maternal and child health care, teachers and aides for educationally disadvantaged children who need special help, training and work opportunities for unemployed teenagers and adults alike.

This administration would have you believe that the private sector can fill this gap. There is no question that neither this Nation, nor this State could deliver needed services to its residents without the aid of the private sector.

But there is also no denying that private family and child-serving agencies, churches, and others have been making a substantial contribution to the welfare of this Nation for years. We can all do more, and we should all do more.

Yet, even if corporate America, much of which is headquartered in Hartford and has contributed substantially to the life of this city, doubled or tripled its efforts in the next years, it would only touch a fraction of what has been cut from the Federal budget for child and family services.

No; in my view, budget cutting does not equal a policy; deregulation does not equal a policy; turning programs back to State and local governments does not equal a policy. These are just code words for those who argue, with considerable popular support, that government can do nothing to remedy the problems because government, itself, is the problem.

I reject that rhetorical and narrow view and so must you.

We are here today to learn from active and knowledgeable people in this State just how Federal policies in the past year or two—policies which represent a radical departure from the past several decades—have affected the children, youth and families in this State.●

PERSONAL EXPLANATION

HON. CLINT ROBERTS

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. ROBERTS of South Dakota. Mr. Speaker, weather conditions in South Dakota caused a flight delay which prevented me from being here to vote on several measures during yesterday's session.

Had I been here, I would have voted as follows: 'Yea" on rollcall No. 321, the Shipping Act of 1982; "yea" on rollcall No. 322, the Patent Term Restoration Act; "nay" on rollcall No. 323, the Federal Boat Safety Act amendments; "nay" on rollcall No. 324, the Sailing School Vessels Act of 1982; "nay" on rollcall No. 325, technical corrections in health laws.

Also, Mr. Speaker, I was necessarily absent during the session last evening. Had I been present I would have voted "yea" on rollcall No. 331, the Walgren amendment to H.R. 6956, and "yea" on rollcall No. 332 on final passage of H.R. 6956.●

NOTES ON THE MEXICAN CRISIS

HON. JIM JEFFRIES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. JEFFRIES. Mr. Speaker, in presenting the following material, I must respect the desire for anonymity of those Latin American neighbors who have brought to my attention an analysis of recent political, economic, and social trends in their country. Many live in countries in which it is unwise to be overly critical of the left.

Therefore, let the following stand on its merits. It is the position of many Latin Americans that the past two presidential administrations in Mexico, covering the 12-year period since 1970, have seen a deliberate change in the direction of political affairs from that which prevailed under President Gustavo Diaz Ordaz. It is their contention that both President Luis Echeverria and his hand-picked successor, President Jose Lopez Portillo, have conducted a deliberate campaign of renewed radical socialism within Mexico, and collaboration with the forces of communism in their conduct of foreign affairs.

While the following open letter may be difficult reading for those unfamiliar with Mexican affairs, I do believe that this information will reward your attention. Surely all of us are aware that Mexico's problems affect the United States in strong and complex ways.

The open letter follows:

MEMORANDUM: THE FINANCIAL AND POLITICAL SITUATION IN MEXICO

It would be a grave error if the current crisis in Mexico should be considered merely an economic phenomenon expressed by the devaluation of the Mexican currency in relation to the U.S. dollar, because of the serious difficulties in the payment of it's financial compromises which were acquired in order to promote it's development.

To explain the recent nationalization of private banking only as a method of controlling an extremely critical economic situation is to be guilty of ingenuity and superficial reasoning. Viewed seriously, as it must be, it is seen as a definite process, predetermined and well-planned, which will bring about the gradual socialization of Mexico in order to lead it to Communism. The President himself recognized as much in his last message to the nation when he reaffirmed that, "The revolution has lost its fears and has retaken its revolutionary course." "Today we nationalize the banks", he announced, "and we will continue to move forward with other measures".

The stage has been set, the actions of the Mexican government in the last twelve years have confirmed it and now, waiting in the wings are other entities of the private sector waiting to be nationalized, the announcement of which will be given at the propitious moment in a somewhat vieled form in order for these latest actions to be accepted in Mexico and not rejected by that zone of influence which we call the West or free world, and certainly not by the U.S.

BRIEF ANALYSIS OF THE ECONOMIC CRISIS

In 1970, at the end of the term of President Gustavo Diaz Ordaz, the external debt of Mexico was $3.6 billion. During the following twelve years, under Presidents Luis Echeverria and Jose Lopez Portillo, Mexico's national debt has risen to about $80 billion.

At the same time, because of the oil boom beginning for Mexico in 1975, a total of about $70 billion in oil reveneues became available to the Echeverria and Lopez Portillo administrations. Thus, there has been a tremendous inflow of capital directly into the hands of the Mexican government.

Consider that the internal needs of Mexico were always more or less covered by the internal income of the nation. The question then becomes, what has the government of Mexico done with $150 billion in foreign capital? And how is it possible that the international bankers should fail to notice the disappearance of such an enormous sum of money until very recently?

If this money had been truly invested in Mexico, the nation should have been transformed into the most developed country in Latin America. Instead, the Mexican peso has been made nearly worthless, the country's virtual bankruptcy is known to all, and Mexico faces its worst crisis in many decades.

There can be no doubt that the Communist Mafia within the government of Mexico, which has developed such power during the past two administrations, has put enormous sums of money to its own uses. In effect, this money has been stolen from the Mexican people.

We must note these additional facts:

1. That the peso has decreased in value from 12.50 per dollar to a current official rate of 70 per dollar. The "free market" rate is, in fact, less than one cent per peso.

2. That this tremendous devaluation has made it at least five times more difficult for Mexico to repay its debt, even at the official rate.

3. That Mexico needs emergency measures for ninety days to save the situation in relation to its debts, principally its interest payments as well as to prevent further erosion of its currency. Mexico also needs more profound and far-reaching measures in order to renegotiate its external debt and to pay within a reasonable length of time, which in our judgment will not be possible unless the new government of Mexico decides on an all-encompassing global plan which can save the economy of Mexico today and in the future with its petroleum, using it adequately and without extravagant waste. Besides this, Mexico must effectively accomplish a measure of self sufficiency in its food production, take advantage of its oceans, coasts and beaches in order to stimulate tourism with international cooperation, as well as developing its mineral resources. More than

all this, however, is the need to utilize its man-power and managerial capabilities for its development because no where in this world can this be accomplished if not under the system of free enterprise, away from the false and illusory formulas of Socialism, forerunner of the implantation of totalitarian Communism.

4. That the announced measures by the Bank of Mexico have established absolute control over the current rate of exchange and led to the expropriation and nationalization of the private banks. These measures are on target and present the only possible solution, given the seriousness of the current economic crisis in Mexico. Nevertheless, these measures can never in any way justify the nationalization of the banks and their expropriation, because these could have been dictated by the Banking Commission, a dependency of the "Secretaria de Hacienda y Credito Publico" (the equivalent of the IRS) since before the crisis and within the system of free enterprise, or the system of mixed enterprise which existed. What was being done by the private banking system is the same as is being done by the officials—all directed by the government officials. That is why is there is blame to be assigned, the principal offenders were the Mexican Officals, in their capacity as total guardians of the economy and finances of Mexico. The flight of private capital outside the country was a result of the alarm and lack of confidence which was generated by the government and in no way justifies the nationalization of the banks, especially since according to reliable statistics the principal looters of their own country were the Mexican government officials.

The factors which have caused this economical situation will not be discussed in detail because they fall into the sphere of public opinion and are well known to you, but to summarize:

(a) Lack of adequate planning in many official programs.

(b) Serious corruption carried to extremes not only by politicians at the highest levels but by the whole system and particularly by the Communist Mafia which has taken hold of the Mexican government and its official party, the P.R.I.

(c) The systematic nationalization of Mexican businesses and production media which has been accomplished by the government in order to enlarge what they have called the public business sector, to the detriment of the private sector. The result of this policy has been that the official administration has become highly inefficient as far as administrating and stimulating those businesses which it has acquired or expropriated, and not only does it not produce utilities in these state businesses, paralyzing the enormous resources invested therein, but instead it utilizes a very large part of the Mexican national tax base in order to cover the permanent deficit in these businesses. Of course, in these so-called parastate businesses, there exists intense corruption as well.

(d) An important part of the economic problems of Mexico is not only the unworkability of its socialist systems, but the fact that there is a real maliciousness in the upper political circles which know well that the road to Communism is made smoother by the chaos which is produced by an economic crisis.

The foregoing is a simple analysis of the economy of Mexico.

AN ANALYSIS OF THE POLITICAL AND SOCIAL SITUATION OF MEXICO

The Mexican revolution is nationalistic in its origens and founded on an excellent doctrinal and constitutional base. It was accepted and supported by the Mexican people and has merited international respect, including of course the U.S.A. This revolution provides a mixed economic system and a just balance of individual and social guarantees. It has generated, in several of the past presidential periods, effective progress and solid principles of development.

The Mexican revolution recently has deviated from its course because it has been managed by a Communist Mafia of intellectuals who were the leaders of the teachers and students during the so-called Student Movement of 1968. This movement was intended to be a Communist take-over led by the Communists who mobilized the students of Mexico. This intent was frustrated thanks to the energy and sacrifices of then President of Mexico, Gustavo Diaz Ordaz who put down the insurrection with the help of the army.

Unfortunately, President Diaz Ordaz made the mistake of nominating as his successor, President Luis Echeverria. He was a hidden director of the same revolutionary movement of 1968 who, on assuming power as President of the Republic, began calling his leaders and directors to power, nominating them as Secretary of State, Undersecretaries and directors of numerous dependencies of the Mexican Government. The unsuccessful University rebelling of 1968, for all practical purposes did succeed by rewarding its participants with key positions in government and in the official party. This was carried out with the complicity of President Luis Echeverria.

In reality, the socialist action has kept up a constant and continuous pace since 1970. At the beginning Echeverria acted very cautiously because he was afraid of President Richard Nixon but the trend toward Communism was accelerated when the Nixon administration was attacked and nullified. The socialization was effected through a series of unconstitutional laws such as the famous "Water Law" among others, which attempted to limit to twenty hectares the maximum ownership allowed under the law. Modifications to the Constitution were also introduced in order to facilitate the Socialist trend. The official workers union, the C.T.M. was in competition with the radical Communist unions which Echeverria secretly supported. Echeverria and the Communist Mafia were not able to accomplish their goal of socialization during his term of office. Echeverria finally passed on the Presidency to his friend and classmate not only from school days but also from the same socialist sect, Licenciado Jose Lopez Portillo, who continued slowly, patiently and efficiently to implant socialist measures.

The principal exponents of the socialist Mafia of 1968 who participated in diverse activities with Echeverria and who were transferred to the government of Lopez Portillo are, among others: Porfirio Munoz Ledo, Pedro Ojeda Paullada, Jesus Reyes Heroles, Augusto Gomez Villanueva, Horacio Flores de la Pena, Carlos Tello Macias, Jorge Castaneda, Andres de Oteiza, and dozens more who are still in government and are preparing to continue on into the next administration of Miguel de la Madrid, supported by Lopez Portillo. This Mafia of course is composed of many other directors who act in the extreme left wing of the party within the official plans of the so-called political reform which allows for other valid options within the framework of socialism and is one of the many strategies which the communist world uses.

During the last two presidential periods, the administrations of Echeverria and Lopez Portillo have brought to Mexico as immigrants or political exiles the widest range of agitators, pseudo-intellectuals and specialized guerrillas ever gathered in any country of the world. They have come from the rest of America and from all over the world, increasing the Communist danger which menaces from within and threatens also from outside the government. The risk is great not only for Mexico but for the security of the United States as well.

Of course they prefer the slow road of expropriations of different sectors of the economy and even of private property.

The political compromise felt by the last two presidents of Mexico, Echeverria and Lopez Portillo, especially the latter to collaborate with the plan of Communist aggression in the Caribbean and on the American continent is a clear and categorical compromise which he has carried out with true passion and socialist fanaticism. The intemperate cry of Lopez Portillo, "Viva Nicaragua" in his last State of the Union message and his passionate and incomprehensible defense of Nicaragua, of the guerrillas of El Salvador and even of Cuba, which culminated with the admission made by the President of Mexican investment of foreign aid to these outbreaks of Communism on American soil, help which he himself calculated at 700 million dollars (money which has borrowed at the expense of the Mexican people), speaks eloquently of the true posture of those who govern Mexico.

The explanations and diplomatic maneuvers which they accomplish in order to cover up and which produce results thanks to accomplices in the U.S. State Department or with certain "liberal" senators and representatives should be seen and judged for what they are.

This is a real tough brief explanation of the Mexican situation. One is the economical situation and the other is the social and political, and although both are interrelated, there should be no confusion. It must not be thought that the remedy will be found only in a technical-economic sense, the matter is not merely financial.

Conclusion.—If the ninety day grace period which President Lopez Portillo requested of the financial institutions and the United States is granted, he should be warned not to continue the process of nationalization which will lead this country to Communism. Simplistic and false explanations must be rejected.

It is known that the new President Miguel de la Madrid wants to remedy the situation fundamentally, but he is surrounded by the Communist Mafia which will try to tie his hands. Of course Mexico should be allowed the opportunity to cleanse itself which it needs, as well as the redirection of the labors of all Mexicans. In order to help him react and to shake off the Communist Mafia, he should carry out a clear and energetic policy for the well being of Mexico and the vital security of the United States and the free world.

Today, the principal weapon of the U.S.A. is represented by economic negotiations. If banking executives or middle management North American diplomats are permitted to manage these negotiations without supervi-

sion from the upper echelons, socialism or communism in Mexico will be reinforced.

Liberal bankers and diplomats should not be given the opportunity to solve the situations taking into account only the financial point of view, since they could help to build a political problem south of the border of incalculable gravity. They could be allied with the Communist Mafia.

Regarding Central America, we suggest ignoring the traps and subterfuges of Socialist Mexicans and liberal Americans and solving the situation of Central America fundamentally, as was outlined at the start of the Republican Administration—a policy which automatically would help to discipline the Communist Mafia in Mexico, which should be eliminated at the first opportunity.

The weaknesses in Central America have inspired Mexican Communism and the politicians which support it at the highest level of government.

The free world has relatively recently lost Cuba in favor of Communism, Viet Nam, Cambodia, part of Africa and other countries—the most recent being Nicaragua with the imminent risk of its spread throughout all of Central America.

Finally, can North America afford the luxury of tolerating Communism in Mexico?

A Group of Concerned Latin Americans.●

TRIBUTE TO MR. LEROY COX

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. SKELTON. Mr. Speaker, I take this opportunity to join the Raytown Area Chamber of Commerce in saluting Mr. Leroy Cox, Raytown, Mo.'s, first mayor.

Mr. Cox has a long and impressive record of service to the city of Raytown. He is a lifelong member of the Raytown Historical Society, the Sectoma Club, the Saddle Club, and the American Saddle Horse Association. He is also an honorary member of the Raytown Kiwanis Club, a 50-year member of the Raytown Masonic Lodge No. 391, and a member of the Scottish Rite of Free Masonry. Mr. Cox has served as a past president of the Brooking Township Democratic Club, past president of the Congress of Democratic Clubs, chairman of the YWCA Building Fund Committee, and a board member of the Jackson County Planning Commission Board of Zoning Adjustment. He is also a member, past president, and has served on the board of directors of the Raytown area Chamber of Commerce.

Aside from his memberships in various civic organizations, Leroy Cox has also taken a great interest in the young people of his area. He sponsored the Raytown Piperettes women's AAU basketball team which has ranked fifth or above nationally for 15 years and has also served as benefactor to numerous college students through the years.

Perhaps the most memorable of Leroy Cox's accomplishments came during his 9 years as mayor of Raytown. During that period he was instrumental in instigating sewer projects, resurfacing city streets, setting up the city police department, and installing street and traffic lights. Clearly, Mr. Cox's actions at this critical period of the formation of the city have paved the way for the city's successful operation.

The dedication and hard work of Americans like Leroy Cox have made this country what it is today. I join the citizens of Raytown, Mo., in thanking Mr. Cox for his service to his community and I want him to know how proud we are that he is a Missourian.●

EXTRADITION REFORM ACT OF 1982

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. FRANK. Mr. Speaker, I would like to take this opportunity to voice my concern about certain provisions of the Extradition Reform Act of 1982. The points I will discuss were recently brought to my attention by the American Civil Liberties Union. I think there is considerable reason to reform the extradition laws in this country. However, H.R. 6046, as it now stands presents several problems. My primary objection to this piece of legislation is that the bill would prohibit a court from determining if an accused individual is being extradited for political opinions, race, religion, or nationality. Under the new law, upon the simple request of a foreign government, extradition procedures may be commenced at the mere accusation of a foreign government under an extremely loose definition of "violent activity" on the part of the accused.

Historically, our Nation has taken in political leaders who have been persecuted in their home countries by oppressive regimes. The net effect of this law would be to create a vast loophole by which these regimes can extradite their political opposition leaving these individuals with little protection in this country. As much as we have an obligation to cooperate with countries in extraditing individuals who have committed criminal acts, we must not create a situation in which the United States becomes a partner in the persecution of individuals because they may have been involved in political activity which is displeasing to the regime in power. Currently, there is a case involving the Philippines where we have been told that the Philippine Government will seek extradition of Mr. Benigro Aquino, a leading opponent of the Marcos regime who advocates peaceful opposition. Yet he has been charged by the government with planting bombs and he will be vulnerable for extradition under the proposed law.

Mr. Speaker, I believe that we must seek reform of the current law. However, the adoption of this bill as it now stands will result in abrogating the standard of justice which this country has maintained for so long. We must be careful that we do not provide oppressive regimes with the means to manipulate American law by making accusations which rest on flimsy charges, yet which conform to the new extradition law. Mr. Speaker, based on the information which the ACLU has now brought to my attention, I would like to see some revisions of this bill in order that the United States maintain an extradition policy which provides for an equitable and just procedures in which criminals are extradited to stand trial for their crimes, but protects political activists who are subject to persecution by a ruling regime abroad.●

BILL GREEN COMMENTS ON THE PRESIDENT'S MIDEAST PROPOSALS

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. GREEN. Mr. Speaker, I was privileged to address the sisterhood of the Brotherhood Synagogue in New York City on Sunday, September 12, on the subject of the President's proposals for bringing peace to the Mideast.

I welcome the President's initiative in reviving the stalled peace process, but have serious reservations about some of the details of his plan. My speech on Sunday appraised the President's proposal, and for the benefit of my colleagues, I would ask that it be printed in the RECORD at this point. Thank you.

REMARKS BY REPRESENTATIVE BILL GREEN AT THE BROTHERHOOD SYNAGOGUE

I am delighted to join you today to discuss the situation in the Mideast. Little did I know when I accepted this invitiation that I would be speaking to you at such a crucial juncture, right after the PLO departure from Lebanon, and after the President's proposal for the next stage of the Camp David talks.

Despite the great attention that the President's proposals have received, they certainly are not an abrupt change in American policy. For many years, American Presidents have been discouraging Israeli settlements on the West Bank, have opposed the creation of a Palestinian state there, and have sought to involve Jordan in negotiations with Israel.

What is new is the decision of an American President to suggest a specific outcome of the negotiations called for in the Camp David plan. Though in the past it has been clear the American policy opposed annex-

ation of the West Bank by Israel, and opposed creation of a new country on the West Bank, the Camp David agreements had not precluded either as a possible outcome of the process. In that respect, the President's plan does change the bargaining process envisaged at Camp David.

Whatever one thinks of the President's proposals, and, as will be clear, I have serious concerns about these, one cannot assert that they are beyond the pale as far as Israel is concerned. Quite the contrary, the President's proposals appear to be consistent with the Allon plan, which has for some time been the Israeli Labor opposition's basic policy on the West Bank.

The Allon plan essentially proposed that Israel establish a strong military presence along the immediate West Bank of the Jordan River—a sparsely populated area—whose basic purpose would be to interdict any flow of weapons from Jordan to the West Bank. Under the Allon plan, Jordan would assume responsibility for civil governance of the balance of the West Bank. The border between Israel and the West Bank would be modified under the Allon plan so as to insure greater protection of Israel. And of course, the Allon plan assumes a united Jerusalem as the capital of Israel.

As one reads the President's proposals, the Allon plan is an entirely possible outcome. Small wonder then that the Labor coalition in Israel has expressed a willingness to proceed on the basis of the President's plan.

Having said all that, I must also say that I think there are some minor but nonetheless serious omissions in the President's proposal; there are some hard issues that all parties to the negotiations must face, and, finally there is one major aspect of the problem that the President totally ignores but that must be addressed if there is to be peace in the Mideast.

My first criticism of President Reagan's statement is that it appeared to place the onus on Israel for the present status of the Camp David negotiations. That is plainly unfair and incorrect. At the moment, the Camp David peace process is not in process because the Egyptians refuse to come to the bargaining table. They have done so by stating that they will not resume the process until Israel has totally withdrawn from Lebanon, and they have done so knowing that Israel will not withdraw from Lebanon until the Syrians have also done so. thus, Egypt has in essence given Syria the power to prevent the resumption of the Camp David process. I hope President Reagan will take due note that Syria, having been given this power by Egypt, has now rejected his plan.

My second criticism of President Reagan's proposal is its failure to acknowledge that the reason its proposed solution has not been on the table in the Camp David talks is that the Jordanians have not been at the table. For this reason, I was shocked when Secretary of Defense Weinberger suggested earlier this year that we sell weapons to Jordan: Jordan has been a consistently hostile opponent of Israel and the cause of peace in the Mideast. I was appalled by the idea of rewarding Jordan for its intransigent behavior. Though the administration has tempted the Jordanians with armaments to mitigate their hostility to peace, now it seems the President has taken a higher road, placing the diplomatic "ball" in King Hussein's "court." I am pleased the administration has realized that Jordan must be involved in the process, and has firmly challenged King Hussein to come to the table. This is clearly preferable to past unworkable suggestions of buying stability through selling arms to the opponents of peace.

I am also puzzled by the President's omitting Lebanon from his framework for peace. I would think an Israeli-Lebanese peace treaty should be a priority on the U.S. Mideast agenda. Until all foreign troops leave Lebanon and a peace with Isreali in the south is established, the potential for renewed violence and instability remains.

Now let me now step back and review the West Bank problem from both the Israeli and, as best I can, the Jordanian point of view.

From the Israeli point of view, the West Bank poses a most difficult dilemma. However, much one rectifies frontiers, the West Bank is inevitably the high ground from which modern weaponry can shoot down on the heart of Israel. So one does not have to go back to Biblical times to understand Israeli concern about the West Bank.

But demographics make annexation of the West Bank an uneasy solution for Israel. Israel proper has a total population of about 4 million, 15 percent of whom are Arab. Despite the differing birthrates of the two groups—about 4 percent for Arabs, and about 2 percent for Jews—Israel within its present boundaries and assuming continued immigration, will plainly be a predominantly Jewish state for the indefinte future. In stark contrast, in the West Bank, there are some 800,000 Arabs, and no more that 25,000 to 30,000 Jews. The birthrates for Arabs and Jews are for each group less than in Israel proper, but clearly the West Bank has a growing Arab population. In fact, if Israel absorbs the West Bank, it will go from having 15 percent of its population composed of Arabs, to having almost 30 percent of its population composed of Arabs. The problem this poses is even more acute if Israel seeks to absorb the Gaza Strip and its nearly one-half million Arabs.

Despite Jordan's past abortive effort—accepted only by Great Britain and Pakistan—to annex the West Bank, the West Bank represents very much the same demographic time bomb for King Hussein that it does for the Israelis.

Jordan, you will remember, was once Trans-Jordanian Palestine, that part of Palestine to the east of the Jordan River. After World War I, Great Britain, faced with its conflicting commitments to the Arabs and to the Jews, installed the present royal family in Jordan while equivocating on its commitment to create a Jewish National Homeland in the balance of Palestine. The Jordanian royal family imposed by Britain came from the Hashemite nomads rather than the Palestinian Arabs. Thus King Hussein has always been uncomfortable, despite the unsuccessful Jordanian effort to annex the West Bank, at the prospect of having to try to govern a country dominated by the Palestinians rather than the Hashemites. This is already a problem in Jordan, were the West Bank incorporated into Jordan, the problem would be very much aggravated.

Thus we face a situation where the Begin government in Israel appears ready to assume the demographic consequences of annexation of the West Bank, while the Labor opposition opposes such an approach as too fundamental an alteration of Israel's essential character as a Jewish state. King Hussein, too, faces a demographic bind as well. Clearly, negotiating the West Bank's status involves some very harsh realities for both sides of the negotiations, and promises some protracted difficulties.

In light of what the President's proposal may hold for either Israel or Jordan, I want to conclude by pointing out that gravest problem of the President's plan is not how it proposes to deal with the West Bank, but its silent assumption that once the West Bank is dealt with, peace will fall into place in the Mideast.

Unfortunately, that is simply not the case. The real problem has never been who gets the West Bank. The real problem has always been the failure to deal responsibly with the Arab end of the great Mideast population exchange that occurred in 1948, 1949, and the 1950's. In those years, hundreds of thousands of Arabs fled from what is now Israel. And hundreds of thousands of Jews fled from the Arab countries to Israel. The Jews who fled the Arab countries were integrated into Israel at Israeli expense. But, by and large, the Arabs who fled Israel were not integrated into the Arab lands to which they fled. Rather, by quiet agreement between those states and the United Nations Refugee and Works Administration—the latter financed in considerable measure by the United States—the Arab refugees were denied citizenship by the Arab states in which they came to live and were denied the opportunity to integrate themselves into the economic lives of those countries. So it is that we have refugee camps for Palestinians who fled Israel more than a third of a century after the event—and for their children and their grandchildren—though we have no refugee camps for the Jews who fled the Arab lands at that same time.

There is little prospect that the West Bank can absorb all of those Palestinian refugees. Some 3 million Palestinian Arabs live outside Israel, the West Bank, and Gaza. According to the U.N., there are approximately 420,000 Palestinians in camps in Jordan, Syria, and Lebanon. It is impossible to estimate what portion of these refugees would want to settle on the West Bank. But it is certain the West Bank cannot absorb more than a handful—probably just over 100,000—of additional inhabitants unless some major technological leap is made in solving the West Bank's water shortage. Even in the unlikely event that the technology of irrigation, and water distribution and disposal improves remarkably, many feel the area could hold no more than double its current population, or 1.6 million.

These figures indicate that the West Bank alone cannot solve the Palestinian refugee problem. Arab leaders must act responsibly toward these populations. If the administration wants peace between Israel and its Arab neighbors, it must make clear that those Arab neighbors must assume the same responsibility for Arab refugees that Israel did for Jewish refugees. The West Bank alone clearly cannot provide this.●

TWENTY-FIVE YEARS OF SPACE EXPLORATION

HON. RONNIE G. FLIPPO

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thrusday, September 16, 1982

● Mr. FLIPPO. Mr. Speaker, on June 30, 1982, the National Air and Space Museum of the Smithsonian commemorated 25 years of space exploration. A small ceremony was held to preview a new exhibit in the museum,

and Mr. R. L. Walquist, vice president and general manager of the TRW Space and Technology Group was the principal speaker.

Mr. Walquist very concisely summarized the results of those 25 years in his brief speech. Of course he could have spoken for hours but by recounting in a very few minutes all our achievements—by naming one success after another—he dramatically illustrated the great, cumulative progress we have made. Indeed, we tend to take for granted that there will always be such progress, but we must remember that our earlier progress and the consequent benefits followed large initial investments by the Federal Government. We must make further investment today to insure tomorrow's benefits.

Mr. Speaker, as the Shuttle becomes first operational and then routine we must not take it and our space program for granted, NASA is working hard to make Shuttle flights almost an everyday occurrence. They hope eventually to achieve 40 launches per year and if each flight lasts 5 days this will mean that at any given time there will be a Shuttle in orbit more often than not. As it becomes routine, we must not loose the excitement of space exploration. As we will be using the Shuttle routinely to transport us to space, we must concentrate our attention on the work being done there—the scientific results, the applications, the commercial ventures which build upon what we have already done.

In his fine speech at the Air and Space Museum, Mr. Walquist brilliantly recalled our historical successes, which form the basis for and point the way to our future. I would like to share this with my colleagues and, therefore, I want to insert it in the RECORD at this point.

NATIONAL AIR AND SPACE MUSEUM—25 YEARS OF SPACE EXPLORATION

(By R. L. Walquist)

Thank you very much, Mr. Walter Boyne, and good evening ladies and gentlemen. It is a great honor for me to be here at the National Air and Space Museum tonight to help welcome you to a preview of a very exciting new exhibit commemorating 25 years of space exploration.

I think it is appropriate at this time that we take a few minutes to remember some of the great space achievements of this past quarter of a century; to touch on a few of the benefits which have occurred to mankind because of it; and, finally, I would like to give you my opinion of some national space objectives which should be high on our priority list as we move into the next 25 years.

THE HISTORY

Twenty-five years ago tomorrow was the first day of the International Geophysical Year. This was an event which stimulated space exploration and led mankind to take its first steps away from the security of the Planet Earth into the unexplored reaches of space.

In October 1957, Sputnik was placed in orbit around the Earth. In January 1958, Explorer 1 was sent into orbit by a Jupiter C launch vehicle. The space adventure had started. For the balance of the 1950's, we tried many different space feats including unsuccessful space probes to the Moon. We discovered, and mapped, the Van Allen Radiation Belt that circles the Earth, and we sent back the first crude television pictures of our planet from space.

The decade of the 1960's probably contained the most spectacular advances in space exploration. After briefly testing the new environment of space on mice and monkeys, we declared this new frontier "fit for humans" with the Mercury Program and John Glenn's historic orbital flight in 1962. Several Mercury flights and the very successful two-man Gemini flights followed to pave the way for man's next giant step.

President Kennedy declared his intention to land a man on the Moon before the end of the decade, and we did just that when Neil Armstrong made his "small step for man and giant step for mankind" in 1969. The Apollo series was truly spectacular and showed man's ability to conquer the "New Frontier" and rise to the challenges and technological demands of the "Space Age." Mankind would never again be earth-bound.

The 60's also saw us laying the foundations for future applications of space to benefit man here on Earth. Navigation satellites like Transit, weather satellites such as Tiros, established the feasibility of using space for services to help our daily lives.

In a period of seven months, from July 1962 to February 1963, a trio of experimental satellites were launched that would have a major impact on our lives here on Earth. These were the Relay, Telstar, and Syncom communications satellites. Before the end of the decade, the world's first global, commercial communications satellite system, Intelsat III, was established. Man would never again be ignorant of events happening around his world.

The decade of the 70's saw many spectacular events in the Planetary Exploration Program. We explored the atmosphere of Venus and examined the planet Mercury. We landed on the planet Mars and, much to the disappointment of many, found no water in its canals and no Martians. We saw the first spectacular close-up pictures of Jupiter and Saturn. These programs generated much new scientific data and significantly increased man's understanding of the solar system, and clearly established the uniqueness of the third planet from the Sun-Earth. We also established several space applications systems a part of our daily life here on Earth. The Landsat Program gave us spectacular data on earth resources which have been of immense practical value in water conservation, forestry management, crop improvements, geological surveys, and oil exploration. The Nimbus and Tiros weather satellites have significantly improved our ability to forecast weather and their cloud cover maps are a regular item on TV news shows.

The most spectacular advancement was in communication satellites. The international Comsat area increased its capability by more than an order of magnitude with the evolution of the Intelsat IV and V systems. Domestic communications systems became established with the introduction of Westar, Satcom, Comstar and the Canadian Anik system. Space had finally come "down to Earth!"

At the end of the '70's, and into the early 1980's, the civilian space program has concentrated on the development of Shuttle, an exciting new space transportation system that will be the cornerstone of our space activities for the next decade and beyond.

To date, our space program has been spectacular and extremely successful. Much of the credit for this is due to the outstanding technological excellence and high quality performance of all the U.S. aerospace companies over the last 25 years.

THE BENEFITS

The spin-off benefits from the space program have been many. Major industries have developed on Earth as a result of space technology: computers, microelectronics, and advanced communications systems, to name a few; medical techniques on Earth have been improved by space technology. The Viking spacecraft, which landed on Mars, alone spawned several advances in medical devices. The technology which has gone into the computer enhancement of photos from our planetary probes has been put to work sharpening the images from human X-rays and from ultra-sound probes which examine blood flow and diagnose arterial blockages. The space communications business today generates more revenue in one year than the total NASA investments in that technology over the past 23 years!

Let us not underestimate another major benefit from our space program—national pride. Space exploration events are spectacular, get good coverage by the media, and instill a justifiable sense or pride in the American people. This same awareness and pride have motivated many of our young people to enter careers in science and engineering and to accept the technical challenges of the next generation.

THE FUTURE

A new national space policy is due to be released by the Administration any day now. In these days of extremely tight budgets it is imperative that we develop a well thought out space plan (within the space policy guidelines) and implement it without major, and costly, changes of direction over the next decade.

In an attempt to conserve dollars, we should look for more synergy between military and civilian space technology development, where it makes sense and does not jeopardize our national security. For instance, as a part of the space transportation system, including advance, lower cost, orbital transfer vehicles; possibly new, high frequency, communications technology.

Clearly, our number one space priority at this time must be to get Shuttle operational and use it as the cornerstone upon which to build our new space ventures. STS-4 is flying overhead today, some 160 miles up there. This is the last of the four orbital tests. STS-5, to be launched in November, is designated as the first operational Shuttle and will carry a pair of communications satellites for commercial, paying customers. However, development work will still continue on Shuttle until it becomes a dependable, cost-effective space transportation system. This should be achieved over the next two to three years.

We need to continue a well planned, sustained program of space exploration. This must include astrophysics programs such as the Gamma Ray Observatory, the Space Telescope, the Advanced X-Ray Astrophysics Facility, and the Solar Optical Telescope. We must also include a planetary and interplanetary program which presently has scheduled only one new vehicle for the 1980's, Gallileo.

We also need to take the next step and establish man's permanent presence in space. An evolutionary manned space station, launched and tended by Shuttle, will extend the scientific and applications capabilities of Shuttle, the European Spacelab, and of Man. This new national initiative will provide focus for NASA and the civilian space industry into the next century.

There is a quote from that great author, James Michener, that I like to use and I think it is a very appropriate way to end my talk tonight:

"A nation which loses its forward thrust is in danger, and one of the most effective ways to retain that thrust is to keep exploring possibilities. The sense of exploration is intimately bound up with human resolve, and for a nation to believe that it is still committed to forward motion is to ensure its continuance."

Thank you, and good evening.●

EMERGENCY MEDICAL SERVICES IN MARYLAND

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mrs. HOLT. Mr. Speaker, the State of Maryland in recent years has developed an emergency medical services system that ranks among the best in the Nation, and it is very fitting that our Governor has proclaimed this week as Emergency Medical Services Week to honor the people who make the system work.

I commend those personnel, who serve with great commitment and without much public recognition, I share the sentiments expressed in the proclamation.

Through the tireless and selfless efforts of emergency medical technicians, cardiac rescue technicians, aviation trauma technicians, nurses and physicians, all Marylanders are assured of a superior level of emergency medical care; and

Through many years of research, dedication and service, Maryland has established an outstanding EMS system which has won worldwide acclaim; and

It is fitting that our citizens recognize the 10,000 emergency medical technicians, and 1,200 cardiac rescue technicians, most of whom are volunteers, and our many medical and fire associates who devote themselves to administering the highest calibre of emergency medical care; and

It is important that all citizens become aware that trauma is the third leading killer in the United States and realize that preventative measures and an advanced and active EMS system are the most effective deterrents of trauma death.●

PROTRACTED NUCLEAR WAR

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. McKINNEY. Mr. Speaker, since the unsuccessful vote August 5 on the call for a nuclear arms freeze, public and congressional attention has turned away from arms reduction policy. Before the vote, there were massive demonstrations, a great deal of media attention, and large grass roots citizen participation. Since then efforts to end the nuclear arms race have been subdued. There is legislation still before Congress calling for a genuine nuclear freeze (H.R. Res. 571), for adoption of nuclear test ban treaties and for a policy for minimizing the risk of nuclear war (S. Res. 444). However, it appears unlikely they will be considered before the 97th Congress comes to a close. This is most disturbing to me since there still is not consensus on what U.S. arms control policy is. Last August 6 an editorial appeared in my State's largest newspaper, the Hartford Courant, which asks several very good questions on where U.S. policy is headed. As the article correctly concludes, it is terrifying. I commend the article to my colleagues.

PROTRACTED NUCLEAR WAR

What is the Reagan administration up to in arms control?

The question came in the form of a resolution, sponsored by 21 U.S. senators last week. Statements and actions by the president "have caused anxiety at home and abroad," said the chief sponsor, Sen. John C. Danforth, Republican from Missouri.

Anxiety does not quite describe the situation. The Reagan policy is downright terrifying. Plans apparently are being drawn to fight and win a nuclear war of several months duration. Mr. Reagan and the National Security Council reportedly are expected to give this scheme, which includes an $18 billion command and communcations center, their approval.

At one time, only generals came up with such bizarre options, as part of a pseudo-intellectual exercise that no civilian government actually would dare develop into a plan. No more. Six-month-long nuclear wars are actually being considered, at the highest level of government, as survivable and, incredibly, winnable.

The pattern of a radically new direction in policy has been evident for more than a year. Mr. Reagan has asked for relaxation of export controls on nuclear fuel and sensitive nuclear technologies. He has deferred negotiations on a comprehensive test ban treaty. He has raised the possibility of abrogating the 1972 ABM Treaty, which imposes limits on defense against ballistic missile weapons.

Mr. Reagan has refused to send to the Senate, for ratification, the Strategic Arms Limitation Treaty. Chemical weapons are to be developed. The president is unhappy with the Geneva Protocol of 1925 and the Biological Weapons Convention of 1972, prohibiting the production, development, stockpiling, transfer and use of chemical and biological weapons.

The pattern has alarmed a bipartisan group of 21 U.S. senators. Several former negotiators of the U.S. Arms Control and Disarmament Agency have expressed apprehension, as have former secretaries of state who served in Republican and Democratic administrations. Allies in Western Eurpoe have sent messages of "serious concern," noting the mass demonstrations against nuclear arms.

Mr. Reagan maintains that he supports significant and mutual reductions in arms, but with major qualifications. He will not sign agreements which do not have on-site verification procedures, because, he reminds critics, one cannot trust the Soviet Union. He will not sign an agreement until U.S. rearmament takes place.

These qualifications bar the signing of any meaningful arms control agreement during Mr. Reagan's term, unless he were to reverse himself. But a change in direction does not seem probable—not when the approval of a plan to win a nuclear war lasting perhaps half a year is on the president's agenda of feasible contingencies.

Terrifying.●

POST'S IMPRUDENT POLARIZATION OF NONPROLIFERATION

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mrs. BOUQUARD. Mr. Speaker, I would like to call to the attention of my colleagues a letter to the editor of the Washington Post by Deputy Secretary of Energy W. Kenneth Davis. This thoughtful letter, which appeared in the August 25 issue of the Post, deplores that newspaper's polarization of the nuclear nonproliferation issue.

I find it ironic that the Post has chosen the Carter administration's nonproliferation policies as the high standard against which to judge the Reagan approach. Indeed, the Post's characterization is such a gross misreading of contemporary history that it is no wonder that its staff must continually resort to hyperbole in order to obscure this fact.

In point of fact, the Carter approach to nonproliferation was totally nonproductive. Not only did it stimulate the proliferation of nuclear suppliers worldwide, but it also simultaneously caused us to lose significant nuclear export business and lessened our ability to influence the nuclear policies of other nations.

If the United States is to maintain a major leadership role in nuclear nonproliferation area in the years ahead, then we must adopt a genuine selective approach which carefully distinguishes those who wish to pursue peaceful nuclear power programs and those who represent real proliferation threats. The Post's continual advocacy of a return to a simpleminded, nonworkable, and discredited policy is not only unrealistic, but dangerous.

The letter follows:

WHY POLARIZE THE NUCLEAR ISSUE?

(By W. Kenneth Davis)

As one who had devoted much of his life to the goals of developing the beneficial uses of nuclear energy and at the same time taking strong and effective measures to restrain nuclear proliferation, I deplore the tone of The Post's editorial "The Bomb Trade" [Aug. 9] and disagree with its representation. That editorial characterized the

Reagan administration as insensitive to the nuclear nonproliferation issue. It asserted that the administration has displayed "contempt" for previous U.S. policies of keeping sensitive weapons-making materials and technologies away from inappropriate countries. And it also implied that the administration has no basic nonproliferation policy other than to ease the barriers on nuclear exports.

I believe it is a regrettable tendency on The Post's part to treat the nonproliferation issue in a polarized and biased fashion, which is contrary to the public interest.

President Reagan and this administration, like all recent administrations, deeply believe that the potential spread of nuclear weapons is a serious threat to global peace and security. Like its predecessors, the Reagan administration has been a strong advocate of the nonproliferation treaty, the Treaty of Tlatelolco, of the concept of full-scope safeguards where appropriate, of strengthening International Atomic Energy Agency safeguards and controls, and of other measures to avoid the spread of sensitive materials and technology to countries that might use them for making nuclear weapons.

The current adminstration differs specifically from the previous administration in dealing with Japan and those countries in Western Europe that already have operating nuclear power programs. All of these countries have excellent nonproliferation credentials, having either signed the nonproliferation treaty or agreed to abide by its requirements. Unfortunately, these particular countries, as well as others, viewed the policies of the previous administration as designed to disrupt their domestic nuclear programs, as unilateral in character and as incompatible with their needs for energy self-sufficiency. Hence, serious tensions arose in our normal relationships, even though President Carter alleged that he had no intention of interfering with the progress of their nuclear programs.

Moreover, the efforts of the previous administration in deferring U.S. domestic reprocessing and breeder programs had little or no effect on the direction of the Japanese and European programs, or on those of other countries. Each country's programs continued to advance; only the U.S. nuclear programs suffered technologically and commercially as a consequence of these policies.

Against this background, the Reagan administration is seeking to restore good working partnerships with Japan and Western Europe. In addition, we are trying to reestablish our own technological leadership and global influence by showing that the United States can be a reliable partner through credible export policies—export policies that strengthen and are consistent with nonproliferation objectives. We believe we cannot positively influence foreign nuclear programs if we are perceived as more interested in changing other countries' policies than in helping them meet their energy needs.

As a realistic matter, we believe that the United States must be selective in its international nuclear relationships, and we will differentiate between nations that possess good nonproliferation credentials and nations that do not. Those countries that are risks will not be sold critical American technology, and we will do everything possible to convince other nuclear supplier countries to refrain from selling to those countries as well.

The Post is incorrect in suggesting that we are abandoning prudent export controls. Several of the exports The Post has publicized in recent weeks are, in my view, not sensitive, or even relevant, from a realistic proliferation standpoint. In fact, the Department of Energy, along with the Department of State and others, conducts detailed reviews of export applications and will always use conservative criteria in rendering final judgments on applications. Moreover, we are not subordinating nonproliferation values to command gains. Rather, our objective is to restore U.S. credibility and influence by restoring predictability to our international relationships with countries having ongoing commercial nuclear power programs.●

H.R. 6307, THE RCRA REAUTHORIZATION ACT—CLOSING THE HAZARDOUS WASTE BURNING LOOPHOLE

HON. GUY V. MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. MOLINARI. Mr. Speaker, the House of Representatives passed last week H.R. 6307, the Resource Conservation and Recovery Act Reauthorization Act of 1982 by the overwhelming margin of 317-32. I strongly support it, and during the debate I addressed the necessity to regulate small quantity generators of hazardous wastes.

H.R. 6307 also includes provisions of particular importance to New York State, and to New York City and my district in particular. I have expressed my strong concerns about hazardous wastes being sold as fuel, or mixed with heating oil, posing a major health and environmental problem. But EPA has exempted from RCRA regulations the blending and burning of hazardous wastes for energy recovery.

The RCRA Reauthorization Act, H.R. 6307, closes this major regulatory loophole that now exempts from regulation one-half of all hazardous wastes generated in this country. Twenty million metric tons a year are burned in boilers, cement kilns, and other units that are not subject to EPA's hazardous waste regulatory program. A recent study done by Fred C. Hart Associates for SCA Services, the leading high-technology hazardous waste treatment company in the country, estimates that such uncontrolled burning may mean 1.2 million tons of pollutants are emitted annually—300 times more pollutants than EPA allows for an incinerator complying with applicable standards. I ask that a summary of that report be included at the conclusion of my remarks.

Unknown quantities of hazardous wastes are being blended with heating oil, diesel oil, and gasoline and are sold to consumers. EPA does not require any recordkeeping or data on this practice, let alone regulate it. The State of Michigan recently estimated that as much as 1 billion gallons of blended fuel may be sold annually in Michigan alone. The burning of inappropriate wastes in inappropriate boilers poses direct health risks to the individuals exposed, as well as contributes to overall air pollution. The selling of adulterated fuel to unknowing consumers may also mean their boilers are being damaged by hazardous wastes, and they are paying for heating value in the fuel that they are not receiving.

National media attention on hazardous wastes as a fuel has focused on New York City and the metropolitan area. Several Federal and State investigations are ongoing. I ask unanimous consent that articles on fuel blending abuses be included at the end of my remarks.

New York State is moving aggressively to deal with improper fuel-burning practices. New regulations are being proposed to regulate the burning of used oils, waste oils, and solvents in stationary sources to have a legally enforceable mechanism to prevent pollution caused by the burning of waste fuels. Without these regulations, the New York Department of Environmental Conservation says that "fuel dealers and owners and operators of air contamination sources currently would have no internal incentives to abate their emissions without these regulations." The proposed regulations, which I ask be included at the end of my remarks, will also take away the economic advantage now enjoyed by illicit fuel dealers, who currently sell adulterated fuel oil for which they pay less than they would for virgin fuel oil.

The New York State proposal to establish standards for waste fuels that may be burned, and also for the facility burning waste fuels, includes a prohibition on burning waste fuels in any facility of less than 1 million Btu's. New York State also is proposing reporting, sampling and analysis, and recordkeeping (including sources and destinations) of fuel oil and waste fuel.

The New York proposal for boiler standards is similar to regulations governing boilers now in effect in New Jersey. New Jersey allows burning of hazardous wastes in boilers if the boiler is greater than 50 million Btu per hour, has an air quality permit, burns for the primary purpose of recovering useful heat, and the amount of wastes burned does not exceed 10 percent by weight of the total material burned. Revisions to lower the Btu threshold, but add additional controls, are being considered.

Rhode Island currently regulates as incinerators boilers which burn hazardous wastes generated offsite and is proposing to regulate onsite generated wastes. Rhode Island is proposing also to establish a 1 million Btu cutoff, and

to require a regulatory program that essentially tracks the regulations that would be required by H.R. 6307.

California requires a permit program that basically parallels EPA's incinerator requirements, issued on a case-by-case basis, usually with the involvement of the air quality program.

But numerous States are able to regulate hazardous waste burning only if EPA regulates it, and cannot go beyond EPA's program. Thus, in the current absence of any EPA program, they cannot do anything to fill the EPA regulatory void. Interstate enforcement also is a problem. This is why a national program, as required by section 6 of H.R. 6307, is so urgently needed.

Mr. Speaker, New York State, as usual, is far ahead of the U.S. Environmental Protection Agency. The RCRA reauthorization bill will require EPA to close the regulatory loopholes for burning and blending of hazardous wastes. Section 6 will require notification to EPA by the owners and operators of facilities burning or blending hazardous wastes, and by persons selling blended fuels. Any person subject to the notification requirements is prohibited from selling a blended fuel if the bill of sale does not contain a warning label and an identification of the included wastes. This will help prevent the kind of consumer protection abuses found in New York City.

The bill also will require EPA to develop regulations under section 3004 governing burning and blending. I hope that EPA will draw upon New York's experience to assure that regulations will be promulgated within the statutory deadline. In particular, I want to reiterate the committee's urging that EPA phase in its regulations, so that the development of final performance standards need not hold up EPA proposing such interim measures as recommended in the Hart report and proposed by New York, that is, manifesting, reporting, recordkeeping, sampling, and analysis.

Mr. Speaker, I commend the Subcommittee on Commerce, Transportation and Tourism, its chairman, Mr. FLORIO, and the ranking member and neighboring New Yorker, Mr. LENT, for their initiative in acting so responsibly and so promptly to end the abusive fuel-burning practices in the New York metropolitan area. I hope the Senate will act promptly on this crucial legislation.

[From the New York Times, Apr. 18, 1982]

USE OF TOXIC WASTES IN GAS AND HEATING OIL SUSPECTED

(By Joseph P. Fried)

Federal and state investigators are looking into reports that significant amounts of heating oil, diesel oil and gasoline have been adulterated with toxic chemical wastes before being sold to consumers in the New York metropolitan area.

How frequent such adulteration might have been and the degree to which it may be continuing is not clear, the investigators say. But "there are indications" that, it has been carried on to a considerable extent, at least as far as heating oil is concerned, according to Jeremiah McKenna, counsel to the New York State Select Committee on Crime, one of the bodies looking into the matter.

Health specialists say that motorists who use adulterated gasoline and occupants of buildings where adulterated heating oil is used could be endangered, as could employees who handle the substances. The specialists also say the contaminated fuel oil or gasoline could add to environmental pollution generally.

Some of the wastes suspected of having been used have been linked to cancer.

According to the investigators and to industry spokesmen—who are themselves concerned about the problem—the adulteration has been engaged in by wholesalers and retailers seeking to boost profits or to undercut competitors who sell unadulterated products. There is no indication of involvement by the major oil producers, one investigator said.

Other investigators said that the offending fuel and gasoline companies worked with other companies that were in the business of disposing of toxic chemical wastes. Sometimes, they said, the waste-disposal companies and the suppliers of the adulterated fuel were one and the same.

Representative Guy V. Molinari said he believed that the reported abuses in the New York area were part of a larger problem. The Staten Island Republican, who is a member of the Energy and Environment Subcommittee of the House Small Business Committee, said that testimony at a subcommittee hearing indicated that the problem of "lacing" heating fuel with toxic substances "exists in many of the states."

In New York, the office of the State Attorney General, Robert Abrams, has "a number of specific cases under investigation" in which "adulteration of fuel oil by toxic materials" is believed to have occurred, according to Timothy Gilles, a spokesman for the office.

FEDERAL INQUIRIES REPORTED

Two Federal grand juries, one in Manhattan and one in Brooklyn, are also reported to be looking into the subject or preparing to do so. The investigation in Brooklyn is reportedly part of an overall inquiry into charges that some gasoline wholesalers and retailers in the metropolitan area have enhanced their profits through various illicit schemes that also include tax evasion.

Some investigators not involved with the Brooklyn inquiry said that, because of the nature of the products, it seemed that the adulteration of gasoline would be less successful than the adulteration of heating or diesel oil. But sources who are familiar with the inquiry said that the allegations that gasoline had also been adulterated were being looked into.

The Brooklyn inquiry is being conducted by the Justice Department's Organized Crime Strike Force for the Eastern District of New York. Its head, Thomas P. Puccio, declined to comment.

The separate Federal inquiry in Manhattan is said to be part of an investigation into the overall matter of the illegal disposal of toxic wastes. Previous public statements about this inquiry have dealt with charges that the wastes had been dumped at New York City landfills and into sewers. But last week, officials said that the investigation also covered the disposal of the wastes by mixing them into fuels.

"It's fair to say we're investigating all aspects of the illegal disposal of toxic chemical wastes," said John F. Kaley, an assistant United States Attorney in Manhattan. His office is cooperating with the State Select Committee on Crime, which is headed by State Senator Ralph J. Marino of Oyster Bay, L.I.

Mr. McKenna, the state committee's counsel, said that one of the toxic wastes suspected of being illicitly used to adulterate heating and diesel oil is benzene. This substance is normally used in the manufacture of such things as varnishes and dyes.

Dr. Bernard Davidow, an assistant New York City health commissioner, said that use of heating or diesel oil mixed with benzene could be hazardous if vapors from the illicit products escaped from the tanks in which they were stored. As for burning such substances, he said that if they were "completely burned, then there is no problem" because "you end up with carbon dioxide and water."

But if a furnace of diesel engine cannot burn the mixed product completely, he said, the resulting smoke or fumes could contain contaminants.

IMPACT OF BURNING OF HAZARDOUS WASTE IN BOILERS

(Prepared by Fred C. Hart Associates, Inc.)

Fred C. Hart Associates, Inc. was retained by SCA Services, Inc. to conduct a study comparing the potential environmental and public health impacts of the combustion of hazardous waste in industrial and commercial boilers as compared to hazardous waste incinerators. The results of that study are summarized as follows, which describe:

The issue—That hazardous wastes are substantially unregulated if burned in industrial or commercial boilers.

The risks—That far greater numbers of people are exposed to higher concentrations of hazardous air pollutants when wastes are burned in boilers.

The recommendation—That existing regulatory loopholes be closed through a national program establishing minimum regulatory safeguards.

THE ISSUES

1. Under a loophole in the RCRA regulations, hazardous wastes are substantially unregulated if burned in industrial or commercial boilers to recover usable energy:

A hazardous waste identified by one of the four RCRA tests (i.e., for toxicity, ignitability, corrosivity, or reactivity) is not regulated:

A generator need not noftify USEPA that he generates the waste; the manifest system need not be used for waste shipments; and the regulatory safeguards that govern treatment, storage, and disposal facilities (such as contingency plans, inspection plans, closure plans, and recordkeeping and reporting requirements) do not apply.

A hazardous waste which is listed is subject to certain minimal requirements: USEPA must be notified, the manifest system must be used, and certain storage requirements must be complied with.

Most important, boilers which are burning hazardous waste need not comply with strict standards for design, construction, and operation which apply to hazardous waste incinerators. Incinerators must:

Conduct test burns to show that 99.99 percent of the principal organic hazardous constituents are destroyed or removed; control

emissions of particulate matter (such as heavy metals) and hydrogen chlorides, with emission control systems such as wet scrubbers and/or electrostatic precipitators; and continuously monitor key operating parameters such as the combustion temperature, waste and air feed rate, and carbon monoxide emissions to assure optimal operating conditions.

Fuel blenders are not regulated as treatment, storage, and disposal facilities. Furthermore, shipment of blended fuels does not require a manifest or any type of notice.

2. While the extent of waste combustion in boilers is unknown, the use of the practice is extensive:

Industry has a strong incentive to burn waste in boilers because (1) it simplifies or eliminates the need to comply with RCRA requirements and (2) it provides for cost savings of roughly $2.00 for each gallon of fuel oil replaced by waste as fuel ($0.95 per gallon for fuel oil not used plus $1.00 per gallon for costs of hazardous waste disposal avoided).

A recent USEPA study estimated that roughly 20 million tons out of approximately 40 million tons of hazardous waste generated annually are currently burned as fuel in boilers.

COMBUSTION OF WASTE IN BOILERS

1. There are approximately two million industrial and commercial boilers in the United States. Large boilers provide the major portion of boiler capacity:

3 percent with capacities over 10 million BTU per hour account for about two-thirds of the firing capacity.

1.6 percent with capacities over 25 million BTU per hour account for about half of the firing capacity.

2. Boiler emissions are affected by a variety of factors:

Small boilers have lower destruction efficiencies than large boilers because of shorter residence time and other operational parameters.

If waste has different properties than the fuel for which a boiler was designed, a decrease in combustion efficiency will result, which will reduce the waste destruction efficiency.

In actual field operations, the waste destruction efficiency will be even lower as the result of system deterioration and less than optimal operating conditions.

3. Available data indicates that destruction efficiencies as high as 99.99 percent may be achievable in large, well maintained and carefully operated boilers, but that lower destruction efficiencies—from 97.0 percent to 99.9 percent—are more likely to be found in the field, with some small boilers as low as 95 percent.

4. Hence emissions of contaminants will be significantly higher:

	Emissions, percent of feed
Incinerator (99.99 percent destruction removal efficiency)	0.01
Boiler (99.9 percent destruction efficiency)	0.10
Boiler (99.0 percent destruction efficiency)	1.00
Boiler (97.0 percent destruction efficiency)	3.00

INCREMENTAL RISK ANALYSIS

1. The incremental effects on air contaminant levels and the attendant health risks were addressed by conducting an atmospheric dispersion modeling study to estimate the level of human exposure to emitted pollutants.

2. Methodology—Five waste combustion scenarios were evaluated:

A hazardous waste incinerator with the required waste destruction efficiency of 99.99 percent.

Three average-sized boilers with a waste destruction efficiency of 99.9 percent—the *upper* end to be expected in an industrial boiler.

Three average-sized boilers with an efficiency of 97 percent—the *expected* performance under actual field operations.

Fifteen small boilers with a waste destruction efficiency of 99 percent—the *upper* end to be expected in a small industrial boiler.

Fifteen small boilers with an efficiency of 97 percent—the *expected* performance under actual field operations.

Five widely used waste constituents were analyzed:

The benzene component of ethylene manufacturing waste.

The styrene component of ethylene manufacturing waste.

Toluene.

Stoddard solvent.

The trimethyl benzene component of Stoddard solvent.

Twenty-five scenarios (five combustion scenarios/five wastes) were assessed in an atmospheric dispersion/population exposure analysis using USEPA Population Exposure Model.

3. The results show that far greater numbers of people are exposed to higher concentrations of hazardous air pollutants under all boiler scenarios compared to the incinerator scenario (Figure 1). The difference is extremely pronounced at lower destruction efficiencies (e.g. 97 percent).

ANALYTICAL PERSPECTIVE

1. Other factors increase the hazard potential of emissions from boilers burning hazardous waste:

The destruction efficiencies used in the model are representative of better on-site combustion. In practice, wastes shipped offsite under the RCRA loophole may wind up in poorly operated facilities with much lower destruction efficiencies.

The scenario analyzed wastes that are good fuel substitutes. In practice, wastes with poor combustion properties (high chlorine content, poor burning characteristics) may be burned in boilers to avoid regulation. This would result in greater emissions of potentially hazardous organic matter and hydrogen chloride.

In an actual urban industrial station, a much greater number of boilers than those assumed in the study scenarios will be burning waste, which would increase public health risks.

Any real life situation would involve exposure to other sources of the modeled constituents, other hazardous air contaminants, and other sources of exposure (i.e. workplace exposure), thus increasing exposure levels and enhancing the potential for synergism.

Combustion of waste in boilers is likely to increase exposure to higher levels of potentially hazardous products of incomplete combustion as well as unburned waste constituents.

POTENTIAL NATIONAL IMPACT

1. All people living in industrialized areas are exposed to contaminants emitted from industrial boilers and would therefore be additionally exposed to potentially hazardous waste combustion process emissions if a number of these boilers burned hazardous waste.

2. If 20 million tons of hazardous waste is burned annually, the difference in annual emissions between the RCRA incinerator standard of 99.99 percent and the expected boiler destruction efficiency of 97 percent is 4,000 tons as compared to 1,200,000 tons—a factor of 300 to 1.

3. The potential increased national exposure is estimated at 147 million people, or 68 percent of the population.

STATE REGULATORY STATUS

1. Several states, including New York, New Jersey, Rhode Island, and California, have developed programs to regulate burning of hazardous waste in boilers. Nevertheless, regulation at the state level is limited and inconsistent at this time.

RECOMMENDATIONS

1. The existing regulatory loophole should be closed through a national program establishing minimum regulatory safeguards. The regulatory program should be carefully designed so as not to be burdensome to implement or onerous to comply with.

2. A workable regulatory program should be based on the following principles:

Waste combustion should be prohibited in boilers smaller than 25 million BTU per hour. This would eliminate boilers unsuited for effectively burning hazardous waste and reduce the number potentially in need of regulation from two million to 34,000.

Larger boilers should be permitted. Those which can meet the incinerator standards would be permitted to burn all appropriate hazardous wastes. Those which can safely burn particular wastes would be permitted to handle those wastes. A system of class permits should be used.

An exempt waste list—those wastes that cause no greater environmental or health risks than the fuels displaced—should be developed.

A prohibited waste list—those wastes that should never be burned in boilers unless they meet incinerator standards—should be developed.

3. The regulatory program should be implemented on a phased basis:

An interim program for the next two years should accomplish these objectives:

To bring boilers burning hazardous waste into the RCRA regulatory system;

To assure a minimum degree of protection of public health and the environment; and

To development of a better data base for a long-term program.

A full regulatory program should include performance and operating standards for all boilers burning hazardous waste.

4. The annualized costs of the regulatory program would be:

$7,000 per facility for the interim program.

$76,000 per facility for the full regulatory program.

5. As shown in Table 1, the savings in fuel costs from burning waste will significantly offset the increased compliance costs for most facilities burning substantial quantities of hazardous waste. For a 60 million BTU per hour boiler, the annual savings in fuel costs range from $250,000 to $2,500,000 depending on the percent waste burned, while annual compliance costs for the full program are estimated at $76,000. For a 25 million BTU per hour boiler, the annual savings range from $105,000 to $1,040,000 depending on the percent waste burned, while annual compliance costs are also $76,000.

EXAMPLE REGULATORY COMPLIANCE COSTS AND SAVINGS

Boiler size	Program cost		Annual savings	
	Interim	Annual full	Dollars	Percent of fuel replaced by waste
60 million Btu/hour	$7,000	$76,000	2,500,000	(50)
			2,000,000	(40)
			1,500,000	(30)
			1,000,000	(20)
			500,000	(10)
			205,000	(5)
25 million Btu/hour	$7,000	$76,000	1,040,000	(50)
			830,000	(40)
			625,000	(30)
			420,000	(20)
			210,000	(10)
			105,000	(5)

●

PERSONAL EXPLANATION

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. LEE. Mr. Speaker, due of official business, I was unable to be present on the House floor yesterday, September 15. Had I been present, however, I would have cast my vote in the following manner:

Rollcall No. 321, the Shipping Act of 1982, "yea."

Rollcall No. 322, the Patent Term Restoration Act of 1982, "yea."

Rollcall No. 323, the Federal Boat Safety Act Amendments, "yea."

Rollcall No. 324, Sailing School Vessels Act of 1982, "nay."

Rollcall No. 325, technical corrections in health laws, "nay."

Rollcall No. 326, Pretrial Services Act of 1982, "yea."

Rollcall No. 329, an amendment to the HUD/Independent Agencies appropriations bill, to increase the funding for EPA research and development activities by $25 million, "no."

Rollcall No. 330, an amendment to the HUD/Independent Agencies appropriations bill to delete $140 million for the continued integration of the NASA Centaur high energy upper stage into the Space Shuttle, "no."

Rollcall No. 331, an amendment to the HUD/Independent Agencies appropriations bill that prohibits the use of funds by EPA to implement a mandatory inspection and maintenance program for vehicle emissions, "aye."

Rollcall No. 332, HUD/Independent Agencies appropriation bill for fiscal 1983, "yea."●

HONORING NATIONAL HISPANIC HERITAGE WEEK

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. HAWKINS. Mr. Speaker, September 12 to 18 marks the fifth consecutive year of National Hispanic Heritage Week. The theme for this year is "Su Voto Es Su Voz" or "Your Vote is Your Voice."

In honor of this week, Mr. Speaker, it is only appropriate that we pay special tribute to the outstanding and vital contributions Hispanic Americans continue to make in our country.

Since the birth of our great Nation, Hispanic men and women helped forge new frontiers through the early establishment of settlements and missions across America. This great spirit of achievement is evidenced today in the lasting contributions Hispanic Americans have made in the field of politics, art, industry, science, technology and other important areas.

In my 29th Congressional District of California, Hispanic Americans have enriched the community with their intellectual and cultural achievements. Mr. Speaker, I am proud to associate myself with the agenda of events which will honor the proud history of our Hispanic brothers and sisters during National Hispanic Heritage Week.●

A CALL FOR AN END OF U.S. SUPPORT FOR MARCOS ABUSES

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. OBERSTAR. Mr. Speaker, in one's private life, one feels a certain reluctance to greet an invited guest with anything less than politeness; one certainly would not want to point out that one wishes the guest had not come. I do not feel the same reluctance in discussing the visit of President Ferdinand Marcos to the United States. Today, President Reagan receives President Marcos at the White House. I wish that such a visit, President Marcos' first visit since 1964, was not taking place.

This visit does a great injustice to the people of the Philippines and to those of us in the United States who believe that increasing respect for human rights should be a basic goal of American foreign policy.

Mr. Marcos kicked off preparations for his departure for the United States by arresting dissident labor leaders and by exercising emergency powers he retained despite the nominal lifting of martial law last year.

The Marcos family has given little assurance that it will allow democratic changes within the country. Continued U.S. support and encouragement of the regime are contrary not only to fundamental principles of human rights, but also to long-term interests of the United States in the Philippines and in the Pacific.

I am convinced that the United States will ultimately be far worse off by having given such extensive support to President Marcos, his family, and to their regime.

We provide over $100 million annually in military aid to a government whose military forces are responsible for gross violations of fundamental human rights. The military is a repressive antidemocratic force of terror.

The United States has a tremendous opportunity to encourage the development of democratic practices in the Philippines. Our extensive aid and longstanding cultural ties and warm relations between our two peoples place us in an important position of influence. Unfortunately, the administration has chosen not to exercise the positive potential of our position.

The unqualified and unconditional support for President Marcos and his attempts to suppress legitimate political dissent do nothing to further the principles of human rights about which the people of our country feel so strongly.

Earlier this month, I joined with seven of our colleagues in asking that the invitation to President Marcos be withdrawn. Perhaps it was unrealistic to expect the administration to grant such a request. It is not unrealistic, however, to expect the administration, at least privately, to express to President Marcos the very extensive and very grave reservation in the House regarding continued American moral, political, and economic support for an authoritarian, repressive, and apparent dynastic regime.●

SHIMON PERES AND PEACE IN THE MIDDLE EAST

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. FINDLEY. Mr. Speaker, no one yearns for peace more than the people of Israel whose own security is threatened by war and the risk of war in the Middle East. There are many now in Israel who are giving expression to their strong desire for peace.

One of the most prominent of these is Shimon Peres, the leader of the Labor Party, which is the largest single party in the Knesset. Shimon Peres is emerging as the bright star of hope for peace. His forceful encouragement of the peace process proposed

by President Reagan enhances the prospects for an eventual Middle East negotiated settlement.

Mr. Peres did not embrace the Reagan plan in all its aspects, but he is open to negotiations. In an editorial in the September 12 issue of the Washington Post, Shimon Peres demonstrates that he is a man of courage and vision, as he spells out his concept of Israel's needs in the peace process.

[From the Washington Post, Sept. 12, 1982]

THE REAGAN MIDEAST PLAN—CREATING PARTNERS FOR PEACE

(By Shimon Peres)

The difference between the Israeli-Egyptian peace negotiations and the negotiations that are to be conducted with respect to the Palestinian question lies in the fact that those with Egypt had definite and exclusive partners: Egypt on one side, Israel on the other. Regarding the Palestinian issue, however, there is only one definite side—Israel. It is not altogether clear who is the other side—Jordan, the population of the territories acquired in 1967, or the Palestine Liberation Organization itself.

I think that one of the important and clever aspects of President Reagan's speech of Sept. 1 is that he tried to create partners for negotiations even though no general trend for the negotiations has crystallized. In fact, defining the partners for negotiations is the primary condition in making negotiations possible, and therein lies the advantage of the Reagan plan as compared with former American plans.

In the past, the United States tried several times to propose peace plans—the Dulles and Rogers plans, for instance. But those plans immediately drove away the intended partners instead of bringing them to the table. The truth is that a plan that aspires to define in the opening phases the final character of the solution only stresses all the existing differences between the parties. Those differences can be overcome only by dialogue at the negotiating table. They cannot be solved without negotiations or prior to negotiations.

Reagan has made a special effort to present to the potential partners positive ideas that may being them to negotiations. But he has not proposed an enforced solution or formalized a final program in unequivocal language.

The conception that lies at the heart of Reagan's speech is interesting in several aspects.

First, he avoids laying out a final program, but he announces what the American position will be in two likely situations: during the transition period and during the negotiations for a lasting solution. Thus has he made clear that a solution cannot be found in one leap but can be achieved in stages. That will make it easier for the parties to conduct their negotiations gradually, as happened with Egypt. In that instance, the American positions were not presented as an order but as an approach based on the wish to serve as a bridge between the parties.

Second, in formulating the American positions, Reagan has attempted to respond to the principal issues in a way that will reassure each side in the opening phases of the negotiations. To Israel, he promises secure and defensible boundaries with no return to the borders of 1967. He says the United States will not support either an additional Palestinian state or negotiations with or recognition of the PLO as long as the PLO has not recognized the right of Israel to exist and has not agreed to U.N. Security Council Resolution 242.

These assurances to Israel also answer in a certain measure the secret expectations of the Kingdom of Jordan. The establishment of an additional Palestinian state means the establishment of a rival and hostile state not only at the gates of Jerusalem but also at the gates of Amman. King Hussein is sufficiently openminded to recognize that such a state might endanger the security of his country and its peace more than anything else. A separate state under the leadership of the PLO will not rest and will not remain idle until it succeeds in undermining the authority of Hussein in Jordan itself. Obviously, this is something that Hussein can do without.

Moreover, Hussein is promised two substantial things: trade, economic and cultural ties between the West Bank and the Gaza strip and Jordan during the transition period, but without isolating them from Israel, and association between those territories and Jordan in the permanent settlement. The final boundaries between Israel and Jordan will be determined in full negotiations and will take into consideration the security needs of Israel.

To the population of the territories, the Reagan plan presents an opening to take part with Jordan in the negotiations. However, the people there are not promised the "right of self-determination," because this privilege, as Reagan said, is understood in the Middle East as favoring the establishment of an additional Palestinian state. But they were promised "a leading role" in the determination of their future.

Egypt was assured that the American administration remains true to the Camp David Accords, which Egypt considers the cornerstone of the policy it has followed ever since President Anwar Sadat's historic visit to Jerusalem. It is only appropriate to stress the great importance of Egypt's participation in future negotiations. Egypt is the largest and most important Arab country. All parties to negotiations must have the will that the precedent of peace between Israel and Egypt will not go sour.

Third—and, in my opinion, this is decisive—the United Sttes has now stated who it sees as the partners participating in the negotiations. Selecting the partner actually means establishing the relationship to the most favored solution. It may be said that the selection of the partner is almost a condition to giving a chance to the negotiations. Because the truth is that the program repels partners more than it makes partners, whereas the selection of partners can create the possibility of an agreed solution. Reagan prefers Jordan to the PLO, as does Israel, and as secretly also does Jordan and possibly also Egypt. If God forbid, the president preferred the PLO, he would immediately lose Israel as well as Jordan.

Israel cannot conduct negotiations with the PLO: not only because of the PLO's past but because of the geographical map of Israel itself. Israel is settled in its length and not in its breadth. President Reagan has already pointed out that, at its narrowest, Israel does not exceed 10 miles. A country that has been attacked several times in the past not only from the north and south but from the east cannot agree that a hostile army—and a Palestinian army is necessarily an ambitious and hostile army—will be encamped on its narrow hips or at the gates of Jerusalem.

Unfortunately, the difference between the moderates and the extremists in the PLO lies here. The moderates propose to "deal" with Israel in two stages, the first being the establishment of a Palestinian state and the second being an attack by the army of this state on Israel. The extremists in the PLO want to achieve these stages simultaneously, using terror as the most suitable strategy.

No intelligent Israeli can agree either to the moderate program, establishment of a Palestinian army, which is predestined to attack Israel, or to the extremist's program to turn the West Bank and Gaza Strip into a base and state of terrorism. This was the situation that prevailed in Lebanon. On this issue, Israel is united.

On the other hand, it seems possible to achieve an agreement with Jordan, which will rule over the population in the territories, without its army crossing the Jordan River westward. Egypt, too, when it got back the Sinai, agreed of its own will to leave most of the Sinai peninsula demilitarized for the future, in order to release Israel from its suspicion of a sudden Egyptian attack. The Egyptian president can therefore serve future negotiations with Jordan.

Israel will and must insist that its army, which is supported by the network of settlements along the Jordan River, will ensure the security of its eastern border and will prevent the risk of a sudden attack when all those densely populated areas come to be administered by the Kingdom of Jordon and by representatives of the areas. Basically, this also suits the Jordanian interest.

The selection of partners to negotiations can also give an answer to another question—of boundaries. The issue is not as vague as it was in the past. Every modern state distinguishes between formal and informal boundaries, between economic, security and national boundaries. The best economic border is an open one, which makes possible an economic relationship between neighboring countries without unnecessary annoyance. The most secure border is the strategic one—to provide a certain time in the event that a sudden danger might arise. The best national border is that which reduces as much as possible the need of one people to rule over another—the national majority in one country must not rule over a large national minority of another people.

I believe that the basic assumption in Reagan's speech makes it possible to define such borders—or, even better, such a relationship—between the partners to the conflict today and the partners to peace tomorrow. Therein lies its great advantage. We cannot fully identify ourselves with the president's speech. Certainly as an Israeli I think there are some points that we reject, especially on the subject of the future of Jerusalem. Indeed, the president promises that he supports a "united Jerusalem," but that its destiny must be agreed upon in negotiations. Israel today is united in the resolute decision that Jerusalem must remain united in its entirety as the capital of the state of Israel.

Nevertheless, President Reagan's speech is a most realistic basis for negotiations and for the continuation of the peace process in the Middle East, and therefore it is a great asset. The Israeli Labor Party, which I represent, understood long ago that in negotiations and in peace, in contrast to war, there does not exist a sole and crushing decision. Negotiations for peace are built on patience,

on discussion and also on compromise, including territorial compromise.

The attitude of the Labor Party suffered in the past from the fact that its approach did not find sufficient Arab response. I believe that the president's speech will evoke a response in the Arab world directed at avoiding wars and building a peace on the basis of compromise.

The Reagan program has laid such a basis, though there is no certainty of it. I believe we must not miss the first step if only because there are so many people who envisage the difficulties entailed in the following steps. Difficulties will arise. But it is better to have peace with difficulties, than difficulties that lead to the resumption of military confrontations.●

TWENTY-FIFTH ANNIVERSARY OF MIDDLEWEIGHT CHAMPIONSHIP FIGHT

HON. GEORGE C. WORTLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. WORTLEY. Mr. Speaker, I would like to call your attention and that of my colleagues to the upcoming 25th anniversary of the greatest moment in the history of central New York sports personalities. Twenty-five years ago, on September 23, 1957, Carmen Basilio, a former onion picker from Chittenango, N.Y., a community I have the honor of representing, won his second world boxing title. On this night in a furious 15-round fight in Yankee Stadium, Carmen took the middleweight championship away from Sugar Ray Robinson. He had previously won the welterweight championship by clawing and scrambling his way up through the ranks. As the New York Times said after the middleweight fight: "* * * Basilio is the toughest little onion picker in the State of New York. He has a chin of iron and determination to match." He was elsewhere described as the "gallant warrior from Chittenango."

In recognition of his accomplishments as a fighter, Carmen was named the Professional Athlete of the Year in 1957.

A quarter of a century later, Carmen continues to be a source of pride to central New York. He is an active civic figure in the area he grew up in; he has never forgotten his friends. I salute this determined, classy gentleman on the eve of the anniversary of his great triumph.●

MAX AND MIM BLOOM RECEIVE HUMANITARIAN AWARD

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. EDWARDS of California. Mr. Speaker, it is with great pleasure I inform my colleagues that my good friends, Max and Mim Bloom, are the recipients of the 1982 National Humanitarian Award, presented by the Santa Clara Valley Friends of the National Jewish Hospital and Research Center. The Blooms will be honored at a dinner-dance on October 20.

Max is a fellow San Jose native, a long-time businessman and active partipant in community affairs. He has been involved with the Heart Association, the San Jose Light Opera Co., the San Jose Museum of Art, the Symphony Association and the Fine Arts Commission of the city of San Jose. He is also a valued member of the San Jose Rotary Club.

Mim Bloom, a native of Kentucky, met and married Max while he was in the service. Mim is a businesswoman and a vivacious and effective community worker. She has been active in the Cancer Society, the Symphony Association, the Crippled Children Society, the Villa Monte League, the San Jose Opera Guild and the San Jose Museum of Art.

It is a very real pleasure to have a small part in honoring Max and Mim for their many years of service to the people of the Santa Clara Valley. Besides being the kind of people who contribute their time and energy to their community, Max and Mim are delightful people. They are good company and approach life with a sense of humor that is infectious. Most important to me, they are my good friends. It is a joy to have known Max and Mim for these many years. I count their friendship as a very special privilege.●

TRIBUTE TO CAPT. ANTHONY MARICICH OF THE LOS ANGELES FIRE DEPARTMENT

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. ANDERSON. Mr. Speaker, it gives me great pleasure to pay tribute to Capt. Anthony Maricich, a hard-working man who will be honored on October 5, 1982, for his service to the Los Angeles-San Pedro community. On June 7, 1982, Captain Maricich retired from the Los Angeles Fire Department after 34 years of dedicated service.

A native-Californian, Anthony moved to San Pedro when he was 11. Upon graduation from San Pedro High School in 1941, Anthony went to work for Western Union. In 1943, heeding the call to serve his Nation, Anthony Maricich joined the merchant marine. He saw action in the Pacific and the Atlantic theaters. On December 1, 1947, Anthony Maricich joined the Los Angeles Fire Department.

When he started, Anthony Maricich manned the hoses that dosed the fires. As time passed, Anthony's achievements and capabilities were recognized and he was promoted. In 1955, he became an engineer, operating the fire pumps. In 1972, he was promoted to captain.

As a captain, Anthony Maricich's responsibilities increased tremendously. Recognizing that he needed further training, Captain Maricich took, and successfully completed, several officers training courses, including courses at the U.S. Navy Fire Fighting School, the Fire Officers' School, the Tank Vessel Inspectors' School, and the Scuba Fire Fighting School.

Captain Maricich is married to Louise Mary Maricich and they are the proud parents of a lovely daughter: Toni Marie.

Mr. Speaker, in Capt. Anthony Maricich we have an exemplary American: a family man, a man dedicated to the service of his community. I am sure that all Members of Congress would like to join me in congratulating Captain Maricich on his retirement and his remarkable contribution of service.

To Captain Maricich, his wife, Louise, and daughter, Toni Marie, my wife, Lee, and I, extend our warmest best wishes, good health, and personal fulfillment in the years ahead.●

TRIBUTE TO DOUGLAS FRASER, PRESIDENT, UNITED AUTO WORKERS

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. FAUNTROY. Mr. Speaker, this weekend, September 17 and 18, the men and women who comprise the Congressional Black Caucus will host the 12th annual CBC legislative weekend which will help the caucus formulate legislative issues for the future. In addition to our legislative work, we will also take time as a group to recognize those persons who have made outstanding contributions to our Nation, in general, and to black America specifically.

As chairman of the Congressional Black Caucus, I want to note that one of those who has worked with us in our program for progress, whom we will salute is Douglas Fraser, the president of the United Auto Workers Union. Mr. Fraser is retiring next year so we wanted to take this occasion of the coming together of the black nation to reflect on his stewardship as a leader in the American labor movement.

In his poem "Adjuration," black poet Charles Enoch Wheeler wrote:

Let those who can endure their doubts speak for the comfort of the weary . . .

In the tradition of his predecessors, Walter P. Reuther and Leonard Woodcock, Doug Fraser is an eloquent spokesman on behalf of the common folk, the working folk, and all Americans who seek to strengthen our country through a strong economy that recognizes the utility of a decent wage for an honest day's work. Not only has Doug Fraser been on the front line in seeking equitable pay and humane conditions in the workplace in which blacks have shared the benefits, he has also been at our side in the campaign to eradicate racism and bigotry from work places and the American labor movement.

Because he has accepted the responsibility to speak for the comfort of the weary without fear in times of worsening economic stagnation, we are proud to say that he is a friend of the Congressional Black Caucus and black America. We wish him and his wife Winifred much success and God's abundant blessings in the many years ahead.

To underscore what I have said above I enclose an informative and useful article about Douglas Fraser which recently appeared in the Washington Post.

[From the Washington Post, Sept. 5, 1982]

FRASER NEARS RETIREMENT AS UAW GRAPPLES WITH DETROIT'S DOWNTURN

(By Kathy Sawyer)

Douglas A. Fraser, leader of 1.2 million auto workers, stood at the foot of a long, descending escalator at the Atlanta airport, looking up.

"Think we oughta try it?" he asked Joe Loesche, who has been driver-bodyguard-companion for every United Auto Workers president since the late Walter P. Reuther. The two have a running joke about their occasional sprint up a Down escalator, about the funny looks they get, these two crazy silver-haired guys.

To travel around with Fraser for a few days just before Labor Day, it was hard to believe he is 65 and will soon give up his powerful position to retire to some quiet teaching job. And it was easy to forget that he is presiding over the darkest period in the history of his union.

Fraser acts like a guy who enjoys running up life's Down escalators. To many Americans, he is only vaguely familiar from television news as the down-to-earth labor leader who won a seat on the Chrysler board of directors and convinced his membership to make concessions estimated at $4.5 billion to help a mortally stricken auto industry recover.

Fraser's union has lost over 300,000 members in the past five years and many will never return to the assembly lines. Foreign auto makers have captured 31 percent of the market in the United States for what was once the quintessential American product.

Fraser's retirement, scheduled for next summer, is viewed by many in the labor movement as "the end of an era." He is the last UAW chief to be drawn from the inner circle of Reuther, the Depression leader who forged the union into a potent social and political force.

Fraser, who has been UAW president since 1977, is respected as a gutsy leader with a gruff, crusty humanity. A high-school dropout who married a university professor, he lives with his wife in a small co-op apartment near downtown Detroit, travels coach with his long legs scrunced up on his briefcase, refuses the fancier cars that come with his job and says nasty things about labor corruption. Open, approachable and good-humored, but with a hair-trigger temper betrayed by a sudden reddening of the face, he draws crowds wherever he goes.

In his recent round of speeches, news conferences, trips to Washington for an AFL-CIO meeting, to Knoxville and Tulsa for union gatherings, and work in his Detroit headquarters, Fraser started to acknowledge the strain of what promises to be a painful leave-taking from the world he entered as a teen-age fender-mender about a half century ago; months and months of sentimental hugs and handshakes and questions.

Some people may worry about pressure, but "I think Doug is worried about how he's going to get along *without* stress and pressure," said his trim, outgoing wife Winnifred—"Winnie" to friends—a dean at Wayne State University.

That week, Fraser had much to worry about. The Chrysler negotiations were heating up again. The Canadian UAW was threatening to strike rather than make concessions as its U.S. brothers had—the first major split in the union's international membership. General Dynamics, formerly the Chrysler tank division, was on the verge of potentially violent strike. All were expected to come to a head by mid-September.

Fraser also was getting angrier and angrier about congressional resistance to the union's number one legislative priority: a controversial bill to protect auto industry jobs by requiring foreign auto makers that sell cars in the United States to make the bulk of them here. Fraser blamed the delays on House Commerce Committee Chairman John D. Dingell, the Democrat from Detroit. By the end of the week, he vowed softly, "I don't think I'll ever speak to John Dingell again. He let us down."

Fraser said he gets weariest with all the questions about lazy, greedy workers and why aren't they to blame for the soaring prices and declining quality of cars, inflation-inducing high wages and so on. "It takes two to tango," he said at one point, insisting that managers share the blame with workers and that in any case the situation was not so easy to size up way back in 1979, before the roof fell in.

One night, he reminded a Detroit audience of auto industry managers and suppliers that just two or three short years ago even the Japanese small cars were hard to sell. "And you couldn't give away Vegas or Pintos—first of all they were rotten cars [big laugh]—but the people of the United States really wanted to drive large cars. . . . We had an absolute monopoly, in large cars. . . . So I think there was a tendency to be self-satisfied, complacent. All of this contributed to our downfall."

Another evening, Fraser had a rare, small "victory" to celebrate by sharing a pitcher of light beer with his staff at a neighborhood bar next to the bleak hulk of a shutdown rubber factory, near UAW's Solidarity House. A Reagan administration official, Michael Driggs of the Department of Commerce, had come to Detroit and enraged the community by saying unemployed auto workers weren't as bad off as everybody thought, thanks to their benefits and working wives and so on, and that in fact they had an average income of $28,000.

Fraser and his young public relations chief, David Mitchell, had thrown together an impromptu news conference at which Fraser, flanked by a couple of black unemployed workers whose benefits had run out, called Driggs a cynical, cruel "bum." The story got a lot of play across the country, at the same time the administration was trying to convince the public it is not insensitive.

Later, with his lopsided grin, Fraser said, "I know Mac Baldrige [Driggs' boss, Secretary of Commerce Malcolm Baldrige]. I think I'll give him a call and see if he'll let Driggs out of his cage one more time, see if we can't get him back here again before the election, maybe get him to go to Ohio, and Pennsylvania and some other states, too. . . ."

The "succession thing," Fraser said, as he waited in one of those plastic airport chairs one day, "is starting to bother me."

One of the fears that has caused him some sleepless nights is that, under his successor, the union might abandon its tradition as a progressive social force, he said. There is a belief in some quarters that this was a role UAW leaders could afford to play only as long as times were fat and the rank-and-file was in clover.

Although the membership, as wages improved, has grown more and more conservative and middle class, all of the contenders for Fraser's job express a commitment to what they call the "Reuther legacy:" compassion for the poor, support for the causes of women and blacks. But, said Fraser, "it's like anything else. There are shadings, and some are more committed than others."

Fraser, who was born in Scotland, the son of an electrician, has always been an activist, a left-wing Democrat, who counts among his credits the desegregation of a union hall toilet in Memphis as far back as the late 1940s.

It's true, he told a group of black journalists, that many union members resented certain costly social programs. But President Reagan has given them a new perspective. Many are no longer protesting because now "they're on food stamps themselves."

Fraser has refused to say whom he favors as a successor. The decision will be made by UAW's 26-member executive board. The two front runners reportedly are UAW Secretary-Treasurer Raymond Majerus and Vice President Donald Ephlin, with two other vice presidents trailing.

Fraser and his predecessor, Leonard Woodcock, each had 15 years in national union offices to establish themselves, he said. "These poor guys, all of them have only been there for 2½ years, the worst goddamned years in the history of our union, so it's really unfair . . ."

On a visit to Knoxville, Tenn., Fraser was greeted with the sort of spine-tingling union theater sure to shake up even the most hardened right-to-worker. It was a political "summer school" for union members from all up and down the eastern seaboard and across the South, designed to get out the union vote this fall.

As the regional leader proudly led him into the auditorium, 500 men and women in "Buy American" caps sprang to their feet, raised their clasped hands high over their heads and started to sing along with two union guitarists on the stage. They sand the union anthem, "Solidarity Forever," to the tune of "The Battle Hymn of the Republic."

"It is we who plowed the prairies, built the cities where they trade . . . Now we stand outcast and starving 'midst the won-

ders we have made . . . But our union makes us strong!"

Fraser talked to them, bluntly about the hard facts of life in the auto industry, but assured them he would grant no further concessions to Chrysler (they cheered).

And he told them goodbye. "This is the last time I will address you as president," he said, and went on to pave the way for the next fellow. The struggles of the '30s and '40s were difficult "physically," he said, but "not nearly as difficult and complex as those of today."

He said he has heard the talk that, because the new crop of leaders was not reared in the Depression, they lack the sense of commitment of Fraser's generation. "I don't accept that. Commitment is an intellectual development."

What his successor can look forward to coping with, besides "enormous pressures," Fraser said later are a smaller but more highly skilled and secure membership, more trimming in the staff of the UAW itself (Fraser has cut 95 people), a fast-changing industry, a continuing need for "flexibility" at the bargaining table. Also, there is the fact that layoffs have gutted a whole younger generation of workers.

He believes the old adversarial spirit will resurface in labor-management relations to some extent when the economic pie expands again. "But what will never, never change again is the so-called democratization of the work place."

Though many unionists miss the the good old days, Fraser said, he prefers the new, better-educated workers who question the union leader, as well as the boss. "When I was a steward, Christ, the people would just do anything I wanted and they didn't even ask me why."

He said this despite the fact he suffered one of his greatest disappointments in the recent General Motors negotiations, when he was unable to sell his membership on an initial agreement and, on a second try, won approval with only 52 percent of the vote.

On Labor Day, Fraser said, he planned to march in a parade in Detroit. "Me and probably about five other guys," he added with a sharp, dry laugh. The workers have other things to do these days, thanks to their union. "They go to their weekend cottages. Their cottages! Me, I still love a Labor Day parade."●

H.R. 6046—THE EXTRADITION ACT

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. BRODHEAD. Mr. Speaker, the full House may consider in the coming weeks H.R. 6046, the Extradition Act. Extradition law reform is needed to modernize and reform procedures while facilitating the extradition of those charged with serious crimes.

However, I believe it is essential that we include proper safeguards to insure that extradition procedures are not subject to political abuse. I have recently been contacted by the American Civil Liberties Union and the Women's International League for Peace and Freedom, which have raised serious concerns about H.R. 6046, including provisions that would:

Require the courts to hold an individual for at least 10 days based solely on a request of a foreign government, with no supporting evidence, unless the person can affirmatively demonstrate that he or she should be released;

Prohibit a court from inquiring into allegations that a State is seeking extradition of a person for the purpose of prosecuting such person because of his or her political opinions, race, religion, or nationality;

Define the long-standing political crime exception to extradition so narrowly as to exclude in almost all circumstances crimes which in any way include violent conduct—even in cases in which a person used violence to escape from a foreign prison where he was being tortured.

I think these are very serious concerns that deserve the fullest scrutiny and debate on the floor of the House. My colleague, GEORGE CROCKETT and others have prepared a series of amendments to H.R. 6046 to address the problems listed above.

Our Nation's extradition laws say a lot to other countries about our commitment to freedom, human rights, and the administration of justice. It is essential that we send the right message abroad and, at the same time, preserve the civil liberties of persons within our legal jurisdiction. It is for these reasons I believe this matter must be fully debated and discussed if it should come to the floor of the House.●

ANNIVERSARY OF THE BIRTH OF GENERAL VON STEUBEN

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. NELLIGAN. Mr. Speaker, September 17 is the anniversary of the birth of one of our country's most important Revolutionary War patriots, Gen. Friedrich Wilhelm von Steuben. This native of Prussia volunteered his services to Gen. George Washington, and arrived at Valley Forge in February 1778. He brought his military expertise to an army that was cold, hungry, and ill-clad after a rough winter, and inspired in our early patriots a great sense of discipline. For this, he is properly called "the first teacher of the American army." Without his services, our revolutionary fight would have been much more difficult. Along with German-Americans who have lent us such great cultural, scientific, and economic accomplishments, I wish to commemorate General von Steuben's outstanding service in helping to found our Nation.

Mr. Speaker, there is another person of German descent born on this date to whom this American is most certainly grateful: Mary Melissa Gansel Nelligan, my mother. Happy birthday, Mom!●

CONTRACT SANCTITY

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. FINDLEY. Mr. Speaker, last week, I introduced a bill to guarantee the sanctity of farm product export contracts. Today, many of the world's grain firms are reluctant to enter into contracts with the Soviet Union because they have no assurance that the U.S. Government will allow them to deliver products in excess of the 8 million tons guaranteed by the United States-Soviet grains agreement.

As I indicated last week, farm groups strongly support this legislation. In late July, the Senate Banking Subcommittee on International Finance and Monetary Policy held hearings on this issue. In that hearing, Charles E. Hamon, president of the American Soybean Association, said:

We all know how disastrous the 1980 Soviet embargo has been to American agriculture. In 1979, the Soviets were our fifth largest soybean market purchasing almost 2 million metric tons of soybeans and soybean products.

This year, our sales to the Soviets are only 700,000 metric tons, about one-third of the pre-embargo level. Our competitors in Brazil and Argentina are supplying the remainder of the Soviets' soybean needs, and we see little chance U.S. soybean and soybean product exports will reach their pre-embargo level in the near future.

Short of a U.S. policy to never impose an export embargo in the future, ASA believes the best alternative is for the Congress to adopt legislation forbidding the President from canceling previously reported outstanding commercial export contracts for agricultural commodities, except under the most dire circumstances.

Mr. Speaker, no one has worked harder to see this become law than the ASA affiliate in my own State, the Land of Lincoln Soybean Association. In testimony before the House Agriculture Subcommittee on Wheat, Soybeans, and Feed Grains in a field hearing in Springfield, Ill., last May, Jerry Gates, president of the association, said:

The integrity of the United States as a reliable supplier of farm products has been undermined as a result of at least four major grain embargoes since 1973.

The Land of Lincoln Soybean Association feels it is essential that the U.S. Government quickly establish a policy to honor the sanctity of export contracts. Such a policy declaration would immediately improve our international image as an exporting Nation and open the way for increased foreign sales. These potential increased sales are

needed to both help regain lost sales from previous buyers and to expand foreign markets further. Farm profitability shall be positively affected when export guarantee legislation is enacted.

Mr. Speaker, Mr. Gates will be in Washington next week to press the case for this legislation. I urge all of my colleagues to heed his message. With farm income projected to be well below normal, this country simply cannot afford to ignore its reputation as a reliable supplier. We cannot afford to forget that agriculture is the backbone of the Nation. Thank you.●

SOVIET JEWS DENIED VISAS

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. WOLF. Mr. Speaker, today in the Soviet Union there are hundreds of thousands of Jews who have applied for exit visas, and who have been refused these visas. At the same time they are being persecuted because of their desire to emigrate.

Aleksandr Yampolski is one of these refuseniks. After making known his desire to leave Russia and settle in Israel he lost his job as an electronic engineer and has been forced to labor as a janitor in Leningrad's Kirov Sports Stadium.

The "official" reason for the Government's refusal to allow Aleksandr Yampolski to have an exit visa involves security considerations. But he has not worked in his field of electronics for 8 years since he first made his application and any knowledge he may have retained must certainly be obsolete now.

There is, therefore, no real reason for the Soviet Union to keep Aleksandr Yampolski under its control and to deny him the freedom to go to Israel. I therefore call on the leaders in the Kremlin to allow him, and the thousands like him, to leave the country. At the same time I appeal to him not to lose heart and abandon his quest for freedom because there are thousands of us in the free world who support him in the desire to live in the country of his choice.●

JOBS BILL FLAWED

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. SYNAR. Mr. Speaker, I voted against the so-called jobs bill today. I am in full agreement that bold action is needed to help put America's 10 million unemployed workers back to work, but the program proposed in this bill is fatally flawed. It simply will not work. It will amount to nothing more than a symbol. And $1 billion is too high a price tag for mere symbolism.

What is worse, this bill holds out a false hope to unemployed citizens and gives only lipservice to a devastating problem that continues to grow.

I hope we have not forgotten the lesson of the Gramm-Latta/Reagan budget fiasco last year: Good legislation is not made in 1 day—or in 1 week. A budget drafted by David Stockman in the wee hours of the morning last summer, and passed with very little debate, created problems that we are still trying to correct. Let us not make the same mistake again.

As I said, this bill is fatally flawed. Let me point out some of the practical problems.

First, this appropriation would be spent by localities in the next 2 months, by December 31, 1982, to pay for road repair, bridges, rebuilding and repairing facilities, and other public projects. Mr. Speaker, any worker in the Frost Belt knows that you cannot build roads, paint bridges, or repair buildings in the cold of winter. It does not work. You get frozen paintbrushes, crumbling asphalt, and a lot of cold, wet mud.

Next, even if winter were miraculously delayed for 2 months, the program still would not work because it provides no funding for materials. This bill is based on the premise that there are severely depressed communities that are falling apart and need urgent help. Does it help to give them a payroll but no materials? And to expect them to come up with the materials in 2 months? It is obvious that we are creating an impossible situation.

And finally, even if winter were miraculously delayed and seriously depressed communities found bonanzas of unused, already-collected revenues to pay for materials, the program still would not help. The numbers tell the tale: Ten million Americans are out of work; the bill provides—at best—200,000 new jobs; and the net result is a net reduction in total unemployment of about two-tenths of 1 percent (and putting only about 2 percent of the unemployed back to work).

I share with my colleagues a deep concern for the unemployed and their families and I am frustrated by our inability to solve our economic problems. And I share their concern for our deteriorating infrastructure of road and other public facilities on which future commerce depends. But in my heart, I cannot support spending $1 billion on a program that is doomed to failure.●

DORIS AND ALLISTER MacKAY—50 YEARS OF COMMITMENT

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. MARKEY. Mr. Speaker, Representatives of Congress often have occasion to meet with constituents whose civic efforts add a rich and textured quality to community life. Two such constituents of mine are Doris and Allister MacKay.

Residents of Winchester, the MacKays represent the New England spirit of community involvement, civic responsibility and good old-fashioned respect and reverance for American traditions and values. Al and Doris MacKay, who will celebrate their 50th wedding anniversary on September 24, have made a personal and lasting commitment to each other and to their family that is matched only by their commitment to the community in which they live. In 1943, Allister MacKay became a member of the New England Deaconess Association, and became its president in 1952. During those years, the number of residents in the association's facilities increased from 24 to 300; its budget increased from $60,000 to $2 million yearly; and the range of its services expanded many fold. The association's services now include three retirement homes, one long-term facility, and apartments for the retired.

In addition to his many years as vice president of the First National Bank of Boston and his involvement in the New England Deaconess' many programs, Mr. MacKay has also been active in the First Methodist Church, Medford, Mass., and more recently in the Crawford Memorial United Methodist Church, Winchester, Mass. He has served as chairperson of the board of trustees; chairperson of the pastorial relations committee; member of the board of stewards; and Sunday school superintendent.

Mr. MacKay has also served as a member of the board of trustees of the Preachers' Aid Society. He has been chairperson of the finance commission and then treasurer of the Morgan Memorial, Boston, Mass.

In 1975, the Health and Welfare Ministries Division of the Board of Global Ministries conferred its highest honor on Al MacKay when it named him to the Hall of Fame in Philanthropy in Philadelphia.

Doris MacKay has worked beside her husband in his many church and civic activities. For the 50 years of their marriage, Doris MacKay has provided a supportive environment for her husband and family. An active member of the Winchester Garden Club, Doris MacKay has raised two

sons, both New Englanders: Gordon MacKay, a senior vice president at New England Life Insurance Co. of Boston and R. Bruce MacKay, chairman of the social studies department of Berlin High School in New Hampshire. Doris has also lavished her love and abiding attention on her four fine grandchildren.

The MacKays have raised a family that shares their sense of strong civic pride and their interest in good work and community involvement.

It is fitting to recognize the MacKays relatively quiet but exceptional achievements on their golden wedding anniversary. They have forged and maintained a relationship of respect, mutual understanding, caring, love, trust and personal growth that should be the bedrock of American family life. In addition, they have shared their gifts of permanence and giving with the people in their community. We are all the richer for that and I would like to acknowledge their personal and civic achievements on this, their 50th and golden wedding anniversary.●

CORPORATE CANNIBALISM IS HURTING INNOVATION

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. BEDELL. Mr. Speaker, the current takeover battle involving United Technologies Corp., Martin Marietta Corp., and Bendix Corp. has dominated the business news for much of the past month. Undoubtedly, a great deal of high-level planning went into designing the game plans for these takeover participants. And, I am sure that we can look forward to at least a few more weeks of tender offers and legal battles among these three corporate giants.

All this leads me to wonder, who is minding the store? It would appear that the customers that do business with these three companies have to seriously ask how efficiently their needs are being met when so much of the time and energy of the top management of Martin Marietta, United Technologies, and Bendix is spent concentrating on the "golden parachutes," tender offers, stock swaps, antitrust guidelines, and tax recaptures attendant to the proposed takeover attempts.

All three of these companies are major contractors to the Federal Government, especially in the vital areas of space technology and national defense. All three companies do business for the American taxpayer that collectively runs into the billions of dollars each year. Therefore, it is troubling to me that these companies are diverting so much of their top management's time and effort away from their primary tasks and directing them instead to the corporate equivalent of a feeding frenzy.

One company, Bendix, last week called a meeting of its board of directors. The most pressing business on the meeting schedule was not how the company could best serve its customers, including the U.S. Government, from which Bendix annually collects about $1.1 billion in contract sales. No; they spent their time considering how to design the best "golden parachute." A golden parachute, for those who are not familiar with the new language of the merger makers, is an employment contract that protects a company's top executives by guaranteeing their jobs and financial security in the event of a hostile takeover.

Mr. Speaker, at a time when our economy is in such deep trouble, I have to ask if our society's interests are well served by our corporate leaders spending so much vital human and capital resources on such unproductive and wasteful behavior. And, as a major client to these three companies, our Government has to take a close look at suppliers who spend more time on the phone with investment bankers than they do with their production staffs.

I know of few small businesspeople who can afford to go on a month-long shopping spree and leave their stores in the hands of employees who are not even sure if the owners are coming back. Their customers would not stand for it.

At this point, I would like to insert into the RECORD an excellent article by economics writer Robert Sammuelson that appeared in the Washington Post on September 14. He discusses the effect of megamergers, especially the Bendix-United Technologies-Martin Marietta merger, on our national productivity. I recommend it to my colleagues.

[From the Washington Post, Sept. 14, 1982]

CORPORATE CANNIBALISM MAY HURT INNOVATION

(By Robert J. Samuelson)

Perhaps the most striking thing about the struggle by Bendix Corp., Martin Marietta Corp. and United Technologies Corp. over who will swallow whom—or whether anyone will swallow anyone—is that it seems so routine. Megamergers are so frequent that they no longer startle.

The genuinely intriguing question about this corporate cannibalism is whether the quest for survival and growth compromises overall economic creativity. The economy derives much of its strength from its capacity to innovate. But many modern mergers are the antithesis of innovation and, at the same time, an attempt to accommodate it.

Innovation in this context does not mean exclusively, or even primarily, invention or discovery. It means the conversion of technical advances (including advances in management and marketing) into commercially useful products. This is something at which big companies do not necessarily excel.

Economist Joseph Schumpeter long ago observed that innovation is intitally a destructive process. It threatens markets for existing products and the companies, plants and workers serving those markets. Consequently, what is called innovation at many firms consists primarily of important—but derivative—improvements of existing technologies and products.

Major innovations often have originated outside existing industries. Horse and buggy companies generally did not become major automobile firms. Traditional office machine firms didn't perfect rapid photocopying; a newcomer, Xerox Corp., did that. Although the basic technology was no secret, oldline electronics firms—RCA Corp., General Electric Co.—didn't pioneer integreted circuits (electronic "chips").

Bendix typifies the path toward giantism followed by many American companies. Vincent Bendix, the founder, started his first auto company in 1907. It was one of 94 new automakers that year and one that didn't survive. His first big break came in 1913, when he designed an automatic engine starter; by 1919, production had reached 1.5 million.

Bendix was the classic entrepreneur; that is, he was almost a compulsive gambler. His company never made the automatic washing machine that bore his name. But Bendix reached the inventors and lent them laboratory space and his name. Bendix's company ultimately outgrew his personality. Heavy real estate losses forced him into personal bankruptcy in 1939. When he died in 1945, he no longer was associated with the firm.

Now his namesake is a sprawling enterprise (1981 sales: $4.4 billion) engaged in electronics, machine tools and auto parts. Chairman William Agee, 44, has a reputation for being brash, outspoken, self-confident and, so far, successful. He aims to reduce Bendix's dependence on auto parts—clearly a mature market—and emphasize high technology.

Agee has operated Bendix like a multi-billion-dollar jigsaw puzzle. By selling parts of the company, he raised more than $500 million, which, while interest rates were high, was invested in high-yielding securities. The $1.7 billion bid for Martin Marietta (1981 sales: $3.3 billion) represents an effort to expand Bendix's aerospace business. Martin Marietta is the prime contractor for the MX missile.

Bendix's history underlines the problem of the large modern corporation. As firms grow, they acquire distinct institutional interests: namely, self-preservation and growth. At the same time, they see the initial source of their growth fade while they face new outside threats.

Most companies cannot prevent shifts in technology or tastes. Eight of the original top 20 firms of the 1955 Fortune magazine list of the 500 largest industrial corporations in terms of sales have dropped in the rankings or disappeared. Among the missing: Bethlehem Steel Corp., Chrysler Corp and Swift & Co. The modern corporation either adapts or decays.

The voguish response to this is "strategic planning." Roughly speaking, this means examining your company, deciding where it ought to go and devising a plan to get there. This is the game Agee tried to play. Mergers, acquisitions and divestitures are standard tactics. In the first half of 1982, there were 1,198 of them, worth nearly $28 billion,

according to W.T. Grimm & Co. About one-third were divestitures.

The attraction of mergers is that they look easier and safer than starting businesses from scratch. A study by Ralph Biggadike of the University of Virginia reviewed ventures started by 200 of the Fortune 500 and found that, on average, it took eight years for new units to attain a positive cash flow. Acquiring a firm seems to promise faster and fatter profits.

Does this maximize innovation for society as a whole? In some ways, the answer is yes. As Bendix's history indicates, many entrepreneurs lack the temperament or intellect to oversee the expanded organizations needed to exploit their innovations. Acquisitions also can spread innovations. Thus General Electric is committed to the electronically controlled "factory of the future." Fulfilling the commitments, though, has meant acquiring small firms that make chips and specialize in computer-aided design and manufacture.

But the other side of the story is this: Management of big companies becomes increasingly abstract, divorced from intimate familiarity with its component parts; planning becomes a game with its own realities. Top executives and directors grow remote from the firms they're buying or the divisions they're managing. Their decisions increasingly reflect consultants' studies, personal power lust or financial fads.

Some years ago, the fad was diversification into many industries to neutralize fluctuations in any of them. Now, The Wharton Magazine of the University of Pennsylvania reports that companies with the greatest product diversity have the lowest profit rates. More recent, the fad was to buy natural-resource firms as a hedge against inflation. In a deflationary world, this looks increasingly suspect.

The Bendix brawl has precious little to do with innovation. The dilemma of a mature economy is that investment decisions are dominated by mature corporations, that may have a conservative bias. Doing big things to keep themselves big, they may ignore the small things that start tomorrow's industries.●

PROTECTING THE UNEMPLOYED AND WORKING TO SOLVE THE PROBLEM

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. PORTER. Mr. Speaker, high unemployment is one of the most pressing problems facing our Nation. It is the topic of conversation in board rooms and at dinner tables everywhere as newspaper headlines document the gloomy statistics.

Nationwide, the unemployment rate was 9.8 percent in August. In Illinois it was 11.8 percent in August, a drop from 12.3 percent in July, but still leaving much room for improvement.

The battle against unemployment has to be fought on two fronts. In the short run, we must cushion the financial impact unemployment has on families of laid-off workers. In the long term, we have to restore the strength of the economy which provides people with productive jobs, for which no financial compensation can substitute.

Steps have been taken in Congress to accomplish these goals. As a result of a provision in the tax bill passed August 19, starting next week the Federal Government will provide an extension of benefits from 6 to 10 weeks, depending on the State. Workers in Illinois will be eligible for the full 10 weeks.

This action, which I supported, was necessary to prevent about 50,000 Illinois jobless from losing financial support.

These additional benefits will be made available to the unemployed worker after he has received up to 39 weeks of benefits from the State and Federal Government combined.

I have cosponsored pending legislation aimed at relieving the strain that unemployment has placed on family finances and State budgets. One aspect of the bill sets up regions to which additional extended benefits would be targeted. The targeted areas would be locations where high unemployment continues, even if the State's overall economy has improved.

Another piece of pending legislation waives Federal interest charges for States where the unemployment rate has been high for extended periods. This would be a great help to Illinois, where the unemployment compensation fund is $1.7 billion in debt to the Federal Government.

However, unemployment benefits only provide temporary relief, they are no substitute for a job.

Steps are also being taken to address the needs of the unskilled and chronically unemployed. The House passed last month, with my support, a bill to establish a workable partnership between government and the private sector to provide job training and employment to those in need. Called the Job Training and Partnership Act, it is intended to replace the Comprehensive Employment and Training Act (CETA), which expires next month.

I believe this program promises to be far more cost effective than CETA because it allows the business community a greater role in determining how participants are trained and what they are trained for.

The Senate has passed its own version of a job training bill and the differences between the two programs will be resolved in conference committee next month. However, those two bills share a feature crucial to success: Emphasis on training people for jobs in the private sector—jobs with a future—rather than on creating costly and unproductive make-work.

I am hopeful that these programs, in conjunction with what appears to be the start of a long awaited economic recovery, can restore the American people's faith in our country as the land of opportunity. It is that faith that has provided America with its greatest natural resource—the initiative, the energy and the integrity of the American worker.

TRIBUTE TO HALF A CENTURY OF COMMUNITY SERVICE

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. GREEN. Mr. Speaker, I rise today to pay tribute to a woman who has devoted nearly half a century of service to her community in New York City. The leadership and guidance Mrs. Celine G. Marcus provided the Lenox Hill Neighborhood Association (LHNA) as executive director for 12 years will indeed be missed when she retires this month.

It was a great pleasure for me to have had the opportunity to work with her in the community. Mrs. Marcus, who joined LHNA in 1959, served as assistant and associate executive director before assuming her present post in 1970. A graduate of Barnard College in the field of social services, she has worked continuously on programs that would improve the quality of life in the community.

Through her direction and innovative ideas the LHNA has grown and developed a wide variety of programs to handle local needs. For the elderly, several programs were established including a comprehensive senior citizen center, an outreach program to the homebound, and the Caring Neighbor, a program that provides round-the-clock home attendant services for elderly and handicapped persons.

Programs for the youth of the community were also developed to include job development and vocational guidance services for local teenagers, urban and rural environmental education for school district No. 2 students, year-round camping at Lenox Hill Camp in Connecticut, and youth involvement in service projects for older persons. Mrs. Marcus and the association worked to expand self-help efforts in the community stressing local anticrime initiatives, block and tenant associations, and community recreation leagues.

Mrs. Marcus, apart from her service to LHNA, was instrumental in the founding of Stanley M. Isaacs Neighborhood Center, Interfaith Neighbors, Volunteer Services to the Elderly of Yorkville, and the Yorkville Emergency Alliance. In conjunction with her years at the association, she was actively serving on the boards of the Criminal Justice Coordinating Council, Community Board No. 8, the Yorkville Civic Council, United Neighborhood Houses, and the New York State

Association of Settlement Houses, among others to numerous to list.

I take pride in paying tribute to someone so dedicated to service for the benefit of the community and wish Mrs. Marcus well in her future endeavors which, undoubtedly, will involve service for the betterment of our neighborhoods.●

KEITH SEBELIUS

HON. JOHN T. MYERS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 15, 1982

● Mr. MYERS. Mr. Speaker, I remember well the first time I met Keith Sebelius. As a new Member of Congress representing the big First District in Kansas, the Committee on Agriculture was a natural for him. He requested assignment to the committee and received it because of his experience and knowledge in agriculture. We sat next to each other in the committee for 2 years. Because of our seating arrangements I learned to know Keith very early in his distinguished service in the Congress.

Keith had a quality that many people wish they had. He had the ability to see beyond the surface of issues to the far-reaching impact that amendments on legislation we were considering might have. Never, did he lose his temper or back down when he believed he was right. Most often, he was right and those of us who learned to know him, learned to seek his counsel.

We were saddened when he announced in 1980 that he would not seek reelection. I called him a number of times after he returned to his home in Kansas. Many of us still sought his advice. When we learned of his physical problem, we remembered him in our prayers.

The First District of Kansas, his native Kansas, the Congress, and the Nation, has lost a great friend. Carol and I extend our sympathy and our prayers to his wife Betti and his family.

Thanks for sharing Keith with us those years.●

ASSASSINATION ATTEMPT ON THE POPE

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. RITTER. Mr. Speaker, I would like to insert a couple of articles regarding the assassination attempt on the Pope into the CONGRESSIONAL RECORD for the benefit of my colleagues and encourage them to read them.

[From the Washington Post, Sept. 3, 1982]

BULGARIA AND THE ATTACK ON THE POPE

(By Stephen S. Rosenfeld)

The problem with modern life is that something hits you at a particular time but you have no direct way to react to it. You can fuss or oh and ah but then your anger or delight dissipates and you are left feeling, if you remember to feel anything, at all, that you have responded inadequately and are the worse for it. It is the disconnect syndrome.

So it was that I read in a vacation-place newspaper last month a brief report on Claire Sterling's investigation of the May 1981 shooting of Pope John Paul II by one Mehmet Ali Agca, since sentenced to life by a Rome court. The thrust of it was that the Bulgarian secret service, which does nothing except on the instructions of the Soviet KGB, had set up a young Turkish terrorist to assassinate the Polish-born prelate for being the spiritual father of Poland's Solidarity movement.

Since I admire Claire Sterling's work on uncovering the facts of international terrorism and since I do not put anything past the Kremlin, I was inclined to believe that brief report on her Reader's Digest investigation. Meanwhile, however, I boiled at the thought of the lousy, slavish Bulgarians doing Moscow's truly dirty work for it. But it was vacation time and, soon, time for tennis, for the sweet hush of sunset in Vermont. Who could maintain a rage against Bulgaria?

Only back in Washington was it possible to read the full Sterling text. What needs to be said is that it demolishes virtually any possibility that Agca was simply a nut, either right-wing or left-wing, or that he was somehow the typical product of a turbulent, avenging Islamic fundamentalist wave.

He was an international terrorist, a low-born student recruited at university and trained in Beirut who escaped from a Turkish military prison while on trial for killing an editor and took sanctuary for 50 days in Bulgaria before returning to Europe, where he spent some $50,000 in cash living the high life before shooting the pope. In Sofia, Agca had met two men who provided him with the requisite passport and assassination pistol. They are associates of a Turk long used by the Bulgarian secret service to run guns to the terrorists (of all stripes) who almost destroyed Turkey in the 1970s.

As always in these matters, Sterling's account is factual, documented, unattributed and circumstantial in turn. I found her making of the case judicious and her suggested conclusions at the very least plausible. She convinced me it is highly probable the Bulgarians, which is to say the Soviets, contrived "The Plot to Murder the Pope."

The very idea of a state's undertaking to arrange a crime of this boldness is unthinkable to many people, either preposterous at face and in any event beyond courtroom proof or evidence in itself of a hostile political intent on the part of the person raising the question. It takes an imaginative leap or, perhaps better, a realistic leap to contemplate it, unless you come at it from the point of view of the weary cynic who has seen and who excuses everything.

Once you are ready to contemplate the idea, there is the further difficulty of accepting its implications. How is one to deal with a government that may have ordered up or encouraged such a monstrous crime? What might a government that would do that not do?

In respect to the Soviet Union, perhaps there should be and can be no special response—beyond the airing of the charge. Either you reject it or you credit it, in which case you probably see it as confirmation of something very ugly that you already knew. Your reaction feeds into everything else.

In respect to Bulgaria, however, things are a bit different—and here I come to my Vermont impulse to connect, to act on the anger stirred by reading that the Bulgarians were into murdering popes. Not many of us know much about Bulgaria or have a Bulgaria policy. I was in that category until last Wednesday, when I saw in The New York Times a full-page ad peddling Bulgarian wine.

"Bulgaria," the ad copy said, "is the fifth leading exporter of wine in the world. And for good reasons."

And I thought: Bulgaria is the fifth (or whatever it is) leading exporter of terrorism in the world. And for bad reasons. You may wish to buy their "smooth and elegant" Trakia Merlot (catch the name), "a Monsieur Henri selection with the modest price of less than $3 a bottle." Please do not ask me to share a glass.

DOCUMENTARY BY JIM ANDERSON

WASHINGTON (UPI).—The Soviet Union may have been behind the attempted assassination of Pope John Paul II last year because the pontiff threatened to go to Poland to defend the Solidarity Union movement, a network documentary reports.

The NBC documentary, "The Man Who Shot the Pope, a Study in Terrorism," to be broadcast next Tuesday, lays out a chain of circumstantial evidence and allegations by Vatican and Western intelligence sources to conclude:

"The evidence suggests the possibility that the Russians watched the plot against the Pope, or, at a minimum, knew about the plot and did nothing to stop it."

The documentary's narrator, correspondent Marvin Kalb, said, however, "a Soviet connection is strongly suggested, but it cannot be proved."

NBC quotes Vatican sources as saying the Polish-born Pope sent a secret emissary to the Soviet Union at the time of the rise of the Solidarity labor movement in Poland with a letter to President Leonid Brezhnev.

According to NBC, John Paul's letter said "If the Russians moved against Poland, he would lay down the crown of St. Peter and return to his homeland to stand shoulder to shoulder with his people."

The documentary says this persuaded the Soviets "to gamble on coexistence with Solidarity rather than run the risk of an open confrontation with the Pope."

But when Solidarity became stronger, and more independent, the Russians became desperate and decided to strike at the principal international support behind the Polish freedom movement, the Pope.

Cardinal Silvio Oddi of the Vatican, interviewed in the program, says of the attempted assassination, "Who is interested in this affair? A private person is not interested unless he's a fool. And this man (the attempted assassin, Nehmet Ali Agca), he was not a fool. That's proved. He's a killer, really, a professional. So, he was certainly acting in the name of others."

The Pope was shot May 13, 1981, as he rode through St. Peter's Square in an open vehicle. Agca was immediately arrested, con-

victed July 22 after a 2-day trial, and sentenced to life in prison.

John Paul spent 2½ months in the hospital recovering from three bullet wounds from a 9mm pistol, one in the hand, another in the arm, and third in the abdomen. Part of his large intestine was removed.

The NBC program, shown to a preview audience Tuesday, follows a complicated chain of links between Agca and the Bulgarian secret police and the Kremlin.

The links, described as characteristic of complex espionage operations, run from Agca to the Turkish neo-fascist "Gray Wolf" organization, to the Turkish mafia, which runs drugs and guns to Bulgaria, to the Bulgarian Secret Service, to the Soviet KGB.

The strongest evidence comes from the financial trail left by Agca, ostensibly a 23-year-old student and escaped prisoner, who had access to some $50,000 between the time he broke out of jail in Turkey in November 1979 up to the time he shot the Pope.●

TRIBUTE TO A DEDICATED CITIZEN, GEORGE JOHANSSEN

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. LENT. Mr. Speaker, one of the distinctions of Nassau County, N.Y., part of which I have the honor to represent, is that it has more volunteer firefighters than any other county in the United States.

I rise today to bring to the attention of my colleagues the outstanding record of service of one of those Nassau County volunteers, George Johanssen. His devotion to duty exemplifies the work of the dedicated volunteer firefighters, whose selfless efforts benefit their fellow citizens, their communities and our great Nation.

Mr. Johanssen is now observing his 50th year as an active volunteer firefighter with the Wantagh, N.Y., Fire Department. For half a century, Mr. Johanssen has responded faithfully to the calls of assistance from residents of the Wantagh community.

To honor this amazing record of service, Mr. Johanssen's friends and neighbors are planning a celebration for him at the Wantagh Fire Department Headquarters on October 9. I know that my colleagues will wish to share in this tribute to a most remarkable man.

During his half-century as a volunteer firefighter, Mr. Johanssen has seen great changes in the Wantagh Fire Department, as his community has grown from a small rural village to a thriving suburban community. Its growth reflects the tremendous commercial and residential development in Nassau County over the past five decades.

During his 50 years with the Wantagh Fire Department, Mr. Johanssen has served in many capacities. He has been a lieutenant and a captain, and for 15 years was chief chaffeur of the department. In that capacity he supervised the training of Wantagh firefighters in driving the various pieces of fire equipment, operating the pumping equipment on the rigs, and in other training activities. He has responded to thousands of fire and rescue calls, and demonstrated courage and leadership qualities of the highest kind.

Mr. Johanssen is a life-long resident of Long Island. He was born and raised on his family's vegetable farm in Queens County, near the present La-Guardia Airport. In 1925, his father moved the family to the Hunt Farm on Wantagh Avenue, near its present intersection with Hunt Road, and Mr. Johanssen has lived in the community ever since.

The changes he has seen in the Wantagh community and in the fire department are only a small part of the changes that have taken place in every phase of American life in the decades since his birth.

But sweeping as those changes have been, Mr. Johanssen has never swerved from his devotion to the principles of service to his fellow citizens and neighbors, and to his community. Through all of those decades, he has done his very best to be of assistance when assistance is needed. His service is in the highest traditions of good citizenship. Such individual efforts and dedication have helped to build our country and have made it the envy of the world.

Mr. Speaker, I salute George Johanssen for his outstanding public service. His dedication to his community deserves the highest commendation. I know that every one of my colleagues in the U.S. House of Representatives joins me in offering our sincerest congratulations and our best wishes to this exemplary citizen.●

THE NEED FOR LONG-TERM SOLUTIONS TO UNEMPLOYMENT

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. YOUNG of Missouri. Mr. Speaker, today, we consider the urgent supplemental appropriation for jobs bill (H.J. Res. 562), an important attempt to put the unemployed back to work. This bill will employ 200,000 jobless Americans for up to 6 months in a variety of community service projects, including repairing and rebuilding our bridges, roads, and water systems. Funds under this bill will be targeted to areas with the highest unemployment rate, and priority will be given to those who have exhausted their unemployment benefits.

The benefits of the urgent supplemental appropriation for jobs bill are twofold. On the one hand, it would put the unemployed back to work. At the same time, it would enable economically troubled communities to undertake badly needed public service projects. I do not think that we can afford to vote against this measure.

However, I want to caution my colleagues that in singing the praises of this legislation, we must not lose sight of the fact that it is a band-aid approach to our unemployment problems. Most of the public service jobs which are provided under this bill will not lead to permanent employment because there is an essential ingredient missing in this legislation—the private sector. Only by forging a public-private partnership can we hope to put this country back to work.

Fortunately, both the House and Senate have approved comprehensive employment and training measures in which the private sector is an essential ingredient. As I indicated in my testimony at the March hearings which culminated in this employment legislation, of all the lessons to be learned from the CETA program, "I think that the most important is the need to involve the private sector in Federal jobs programs." The House and Senate jobs legislation, which is collectively known as the Training for Jobs Act, is currently pending before a conference committee. Both the House and Senate measures give private industry councils, which are made up of business and industry leaders, an equal voice with local officials in determining how Federal job training funds should be spent. This type of private sector involvement is essential if we are going to place the unemployed in unsubsidized jobs. While I support House Joint Resolution 562, I urge my colleagues to turn away from stopgap approaches to unemployment and concentrate their efforts on long-term solutions such as the "Training for Jobs Act."●

MAKING OCTOBER 1982 NATIONAL SPINAL CORD INJURY MONTH

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. WALGREN. Mr. Speaker, today, I am introducing a resolution designating October 1982 as "National Spinal Cord Injury Month." I hope that my colleagues will join me seeking prompt House approval of this bill.

Spinal cord injury and paralysis are conditions that could happen to any of us at any time. In the next 24 hours, spinal cord injuries will paralyze another 68 Americans. It just happens. And once it happens, it is devastating.

In the words of one mother of a spinal-cord-injured son:

It's more than just being stuck in a wheelchair. It's an on-going, life-threatening, painful trauma, an insatiable consumer of energy, time and psychological strength. The emotional hurt is relentless—and it gets harder, not easier.

Spinal cord injury exacts tragic and painful emotional costs. And it may also be the single most expensive medical problem in the country today. The same mother, Louise McKnew, head of the National Spinal Cord Injury Association, described her family's costs in this way:

Were my son to spend the rest of his life paralyzed, it would cost anywhere from $1 to $5 million. His initial hospitalization averaged $1,000 a day, the rehabilitation hospital cost $7,000 a month, the surgeon's fee for his first operation cost $2,500—and the expenses continue:

A modified van which he drives cost $25,000.

The house addition and modification cost $30,000.

Aides total $9,000 a year.

Physical therapy is $54 an hour.

Leg bags are $128 each.

Wheelchair batteries cost $84 each.

And that's just a sample.

Medical deductions filed with my income tax for 1978, the year he spent in the hospital, totaled $14,872. These were expenses not covered by high option Blue Cross-Blue Shield insurance. This past year they were $24,226. The indirect costs are also high: Yale University invested over $170,000 in architectural modifications for Donny's freshman year—he was their first undergraduate to come in a wheelchair. The total continues to climb, and so does my debt.

For the Federal Government, the annual costs for the support and care of spinal-cord-injured persons is approximately $3 billion. There is another $3 billion in private expenditures. And these costs are rising rapidly, as antibiotics keep those with spinal cord injuries alive longer.

In good conscience, we must direct more resources to the needs of those faced with spinal cord injury. We must do more on research for a cure, on medical care, and on rehabilitation programs, housing, and education, and training opportunities.

Most people have no way to be aware of the trauma involved and the staggering costs faced by victims of spinal cord injury and their families. To focus public attention on the need to address this critical health care problem and the need to find a cure, we propose that Congress designate October as National Spinal Cord Injury Month. A number of States have already taken this step. It is the least we can do.

Out of greater awareness may come much future progress.

This small step can serve as an impetus to accelerate research and to increase public support for programs to help the 500,000 spinal cord injured Americans today.

I hope my colleagues will join me and cosponsor this effort.●

HOW ABOUT RADIO HAVANA?

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. HARKIN. Mr. Speaker, the absurdity of spending the $7½ million (or $10 million, which the cost may be eventually) to build Radio Marti is captured in a recent editorial by Rick Morain, the editor of the Jefferson Herald in Jefferson, Iowa. Congress should put an end to this nonsense for once and for all and get down to the serious business of negotiating with Castro to put an end to these "radio wars" before they become "shooting wars." I commend the editorial to my colleagues.

[From the Jefferson (Iowa) Herald, Aug. 12, 1982]

HOW ABOUT RADIO HAVANA?

It appears that Congress is giving its approval to the administration's plan to spend $7½ million for a government-operated radio station to beam news and propaganda from the U.S. to Cuba. It also appears that the Cuban people will never hear the station: Castro has promised to jam the transmission with a 500,000 radio transmission of his own.

The battle of the airways would knock WHO Radio off the air everywhere except for a small area within 45 miles or so of Des Moines. Greene county might or might not be able to pick up WHO broadcasts. The new U.S. station, to be called "Radio Marti", would broadcast on 1040 kh, the same frequency as WHO's 50,000 watt clear-channel station. When Castro jams Radio Marti, he will also jam the Des Moines station.

We were pleased to see that all six U.S. Representatives from Iowa worked against the wild-eyed Radio Marti proposal, although their efforts proved unsuccessful. The government's about to spend $7½ million for a radio station that the Cuban people will never hear, and Iowans will lose the WHO signal in the bargain.

But it won't be a total loss. If Castro can beam 500,000 watts of power to the United States, it seems reasonable that we in Iowa will be able to pick up his station's signal. After all, WHO goes coast-to-coast and border-to-border with just 50,000 watts. Think of what we'll hear:

Havana talk-radio, with citizen comment on local Cuban candidates, the pros and cons of evolution, and welfare cheaters in Santiago.

Ag programs on the prospects for this year's sugar cane crop, the possibilities of sugar-cane gasohol, and comments about the National Sugar Cane Expo.

The latest hurricane warnings from the entire Caribbean area.

And finally, and most important, Havana's counter to Jim Zabel, with statistics, prospects, coaches' interviews, recruiting accomplishments and play-by-play of the University of Havana Redeyes soccer team.

Maybe Castro will add an English-language overlay to the Spanish for us, the way French and English are both broadcast in Montreal and Quebec. And who knows—maybe some obscure broadcaster at the Havana station will catch the eye of the Cuban entertainment industry and go on to stardom, and from there to politics, rising eventually to succeed Castro himself.

Nah—no chance.●

SOME SPENDING CUTS ARE STUPID

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. ECKART. Mr. Speaker, the Lake County News Herald recently published an editorial opposing the Reagan administration's foolish and thoughtless proposal to scale back the Nation's waste water treatment program. Clearly, this proposal is anti-clean water, antienvironment and as the editorial states succinctly "one examle of Government economy that is ill advised and stupid."

This Congress should not sound any retreat on any program that is proving to be successful. Any action that allows an increase in water pollution is, indeed, a turning back of the clock.

SOME SPENDING CUTS ARE STUPID

Cutting back on the federal government's unnecessary intrusions into our everyday lives was one of the chief campaign promises of candidate Ronald Reagan when he sought the presidency in 1980.

So far, he has been trying mightily to succeed in this area of endeavor.

Hardly a week goes by that we do not get word of some sector in which an attempt is being made to trim the government's role.

That's because much of the government's work is sheer bureaucracy—full of sound and fury and signifying nothing, as Shakespeare so eloquently put it.

The key to success, though, is for the administration to keep in mind that its goal is to cut back only on "unnecessary" intrusions.

There are a good many functions of the government that are vital to the health and well-being of our citizens because they involve the sort of things that people simply cannot do for themselves.

Individuals, for example, cannot protect their environment without the government's assistance.

Yet it was reported this week that the administration is taking a new look at the Clean Water Act, with results that could prove disastrous to residents of this area.

The administration is encouraging cities to scale back on their sewage treatment facilities. This would increase the flow of organic pollutants into rivers and coastal waters.

The government expects up to 800 applications to allow discharge of incompletely treated sewage.

If the requests are granted, it is estimated that municipalities would save between $4 billion and $10 billion in construction and operating costs of sewage treatment plants.

Would you care to put a price tag on Lake Erie?

Would you like to sit on the edge of a dead lake, with fish floating belly up and the stench rolling in like the fog, and con-

sole yourself with the thought that, oh well, some cities saved a lot on money on their sewage plants?

There seems to be some difference of opinion, though, over what effect the proposal would have.

Environmental Protection Agency officials admitted the change would increase the flow of organic pollutants into the nation's waters, but said the agency would not permit enough additional pollution to endanger fish habitats or recreational use of the waterways.

Robert G. Hampston, an assistant director of the New York State Department of Environmental Conservation, said, "We will maintain water quality. We're essentially saying it will not affect water standards."

But Richard Newman, regional water engineer with the same department, warned that marine life and recreational use of the region's waters could be hurt if cities are allowed to cancel plans to build secondary sewage treatment facilities.

Cuyahoga County Sanitary Engineer John J. Garner is even more alarmed. He says that if the removal rate of biological material is allowed to go down to 25 percent, "there will be significant deterioration of our rivers and lake. Some of it will occur immediately." He's talking about Lake Erie.

There are better ways for our government to save money than by turning our rivers and lakes into open sewers.

This is one example of government economy that is ill-advised and stupid.●

CONCERN ABOUT H.R. 6046

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. BONIOR of Michigan. Mr. Speaker, I rise to express my concern over H.R. 6046, the Extradition Act of 1982.

I understand the need to revamp our current extradition laws, which have not been revised since 1882, and to bring them in line with the evolving tenets of international law. In doing so, however, we must take precautions to protect those values upon which this Nation was founded—the respect for individual liberty, especially the right to political dissent.

This bill does not provide adequate protection for these rights. Under its provisions, an individual—even an American citizen—could be held without bail on the mere allegation by a foreign government that an extraditable crime had been committed. This would provide foreign governments with powers that our Constitution and laws have explicity prohibited to our own authorities. The bill would also greatly narrow the definition of the political defense exemption, which now protects political dissidents from extradition proceedings. Moreover, the bill contains insufficient safeguards to insure that a request for extradition is not a veiled attempt to persecute political opposition, and lacks provisions to insure that due process will be guaranteed for the accused.

Democracy and the right to political dissent are uncommon entities in the modern world. If this bill is passed unamended, we in Congress will strike a blow against these all too fragile principles. While international cooperation is necessary to combat terrorism, we must take steps to insure that our own laws do not become an arm of foreign governments engaged in terrible repression of their own peoples.

The Extradition Act is significant not only as an expression of our own Nation's commitment to human rights and individual liberties; it is a matter of life and death to many courageous people who have spoken against tyranny in their own land and sought refuge in this country. It deserves the most careful consideration. I hope this bill will not be scheduled for floor consideration in the next week. If it is, I intend to participate in the debate and will urge others to speak out in support of amendments to protect civil liberties.●

EXHIBITIONS OF AMERICAN ARTISTS

HON. HAROLD WASHINGTON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. WASHINGTON. Mr. Speaker, the paintings and graphics of Dr. Margaret Burroughs, a long-time friend and resident of the First Congressional District in Chicago, Ill., will be jointly exhibited in Washington, D.C., with sculptures of the late Marion M. Perkins.

Patrons and scholars of the visual arts will be treated to a highly significant and historical event from September through November 1982 when the talents of Dr. Burroughs and Mr. Perkins will be displayed at the Evans-Tibbs Collection of American Art. The Evans-Tibbs Collection, located at 1910 Vermont Avenue NW., is a nonprofit organization formed to preserve and exhibit works of art by and bibliographic material on American artists of known African ancestry. Named for Mrs. Tibbs, an internationally acclaimed lyric soprano known professionally as Madam Evanti, the collection undertakes the presentation of artistic exhibits of historical significance in its galleries for the benefit of the public.

Dr. Burroughs was cited in a White House ceremony honoring Afro-American artists by former President Carter for her achievements in the arts. Gifted with a wide range of artistic talents, she has established herself in the Chicago community not only as a fine artist, but also as a leader in the effort to educate and develop young artists. These efforts and her interests in African-American history and culture led to her to becoming a founding member of the South Side Community Art Center, originator of the Lake Meadows outdoor art fair, and one of the founders and presently director of the DuSable Museum of African American History.

Mr. Perkins chose to work with stone to create his works. As one of the leaders of the social realist movement in Chicago, Perkins' work communicates this realism within a didactic artistic milieu. His work has been exhibited worldwide and is included in the collections of Chicago's DuSable Museum, the Embassy of Ghana, the National Conference of Christians and Jews, and the South Side Community Art Center in Chicago—to name a few. In the 1950's, Perkins was awarded several purchase prizes from the famous Chicago Art Institute.

This retrospective exhibition which will highlight the contributions of these two great American artists to 20th century American art, is significant and deserving of national recognition. It is through the brilliant statements in the works of Burroughs and Perkins that significant artistic movements materialized to further develop an American school of expression known as social realism. And, it is through their works and those of other artists, that the American esthetic is preserved.●

RCRA REAUTHORIZATION

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. GORE. Mr. Speaker, the burning, for energy recovery, of hazardous wastes in boilers and cement kilns without the application of any RCRA requirements is a serious environmental problem that may grow larger in the future. EPA now exempts burning hazardous wastes for the "primary purpose of energy recovery." EPA has never defined what that test is, or how such a test would be applied. Unregulated burning will become even more economically attractive as EPA's regulatory program becomes more effective in closing down illegal practices and in restricting land disposal of hazardous wastes. This burning loophole must be closed now.

The seriousness of this problem has been underscored by a recent report, "Impact of Burning of Hazardous Wastes in Boilers," prepared by Fred G. Hart Associates, Inc., for SCA Chemical Services.

Citing EPA studies, the Hart report shows that one half of all the hazardous waste generated annually in this country is burned as fuel in boilers. That is 20 million metric tons a year exempt from environmental control.

Boilers can destroy as much as 99.99 percent of the hazardous waste feed if they are large, well-maintained, and carefully operated. This is the same standard required by EPA of existing and new hazardous waste incinerators.

But lower destruction efficiencies—from 97 percent to 99.9 percent—are more likely to be found in actual field operations, with some boilers as low as 95 percent. A boiler with a 97 percent destruction efficiency will emit 300 times more pollutants than a permitted incinerator. This means that 1.2 million tons of pollutants may be put into the environment because the boilers cannot meet the same destruction and removal standard as an incinerator. The Hart study estimates that 147 million more people, or 68 percent of the population, may be exposed nationally to pollutants from burning hazardous wastes in boilers with an expected destruction efficiency of 97 percent, rather than 99.99 percent.

This loophole will be eliminated by section 6 of the RCRA reauthorization bill, H.R. 6307. It will require EPA to develop regulations applicable to all facilities that burn hazardous wastes as a fuel. While flexibility is needed, it is clear from this bill that the present regulatory loophole for boilers and cement kilns burning hazardous wastes will not be tolerated. This is not to say that all facilities burning hazardous wastes must be subject to all the requirements applicable to an incinerator, although the incinerator regulations should be the starting-off point.

The Hart report identifies three factors that must be considered in developing a regulatory program for the incineration of [hazardous] waste in boilers:

The design of the boiler—its size and type;
The operating characteristics of the boiler in terms of residence time, temperature, turbulence, and other operating conditions;
The waste to be burned.

The national boiler regulatory program recommended in the Hart report would "differentiate between different types and sizes of boilers and different hazardous wastes to determine whether, and under what conditions, hazardous wastes could be burned."

Until the full regulatory program recommended by the Hart report and required by section 6 of H.R. 6307 is established, EPA should promptly implement an interim regulatory program for manifesting, monitoring, waste analysis, reporting, and recordkeeping. This also is a recommendation of the Hart report, which is entirely consistent with the committee's report on H.R. 6307:

The Committee believes that the Standards (under 3004(e)) should include the requirements listed in subsection (a) of Section 3004 as appropriate. EPA may make different standards effective at different times. For example, manifesting and recordkeeping may be immediately required, while other substantive standards may be imposed at a later time within the two year deadline.

H.R. 6307 also requires EPA to regulate persons who blend and sell hazardous wastes as a fuel, in addition to regulating the owners and operators of facilities burning the hazardous wastes. Blended fuels will have to be accompanied by a warning label. Customers would otherwise have no way to know that they are being sold adulterated fuel oil. These provisions applicable to fuel blenders will close this additional regulatory gap, as well as provide consumers with protection against the unscrupulous marketing of blended fuel to unknowing purchasers. The magnitude of this problem is evident from a recent survey by the State of Michigan that estimated that close to 1 billion gallons of blended fuel may be marketed annually in Michigan.

Mr. Speaker, section 6 of H.R. 6307 closes one of the last major loopholes in Congress program to regulate hazardous wastes. Approval of the RCRA Reauthorization Act should be a clear signal that there is a bright economic future for those companies like SCA that are committed to providing environmentally sound hazardous waste treatment services. Profitability and environmental controls are, in fact, mutually reinforcing. The demand for high technology hazardous waste treatment services will continue and grow, because the Congress will not tolerate midnight dumping, indiscriminate land disposal, or unregulated burning of hazardous wastes.●

THE CHERISH PROGRAM

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. COELHO. Mr. Speaker, I rise today to recognize the Second Annual Cherish Picnic, which is being held in Merced, Calif., on Wednesday, September 29. The Cherish program is a project of the Merced County Community Action Agency and is a model for other senior citizens programs throughout the State and Nation.

The Cherish project has provided nutritional, health, recreational, and information services at seven locations throughout Merced County and has been able to do so with the support and cooperation of the communities of Merced County.

I would like to take this opportunity to commend those who have contributed their time and efforts to make the quality of life better for the senior citizens of Merced County and to recognize the outstanding support which the community has given to the Cherish project.●

A SALUTE TO ELDER BURTON D. CLEMONS

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. STOKES. Mr. Speaker, I take this opportunity to join with the members of the Tower of Prayer Church of God in Christ and countless other persons in northeastern Ohio in saluting Elder Burton D. Clemons' 25th year in the ministry. Mr. Speaker, my good friend, Elder Clemons, is the pastor of this well-known and highly regarded church in Akron, Ohio. On Saturday, September 18, 1982, the church membership will host a testimonial dinner in Akron in honor of his tireless work in the church and the community.

Mr. Speaker, I can think of few other persons who have been such a pillar of strength and shining star in the community as Elder Clemons. Through his successful business endeavors and the religious inspiration he has shared with his church members and the community, Elder Clemons has made an indelible mark on the fiber of that community and the souls and hearts of many people.

Because of his numerous achievements within the church and the community, Mr. Speaker, I would like to take this time to capsulize the life of Elder Clemons for my colleagues.

Elder Burton Delano Clemons came to Ohio and the city of Cleveland in 1946. He attended and graduated from the Cleveland public schools in 1950. He later received a bachelor of arts degree in marketing psychology from my alma mater, the Cleveland State University. Currently, he is a senior candidate for a masters degree in pastorial counseling and psychology at the Ashland Theological Seminary.

Mr. Speaker, Elder Clemons and his lovely wife, Gene, have seven children, one of which, Lori, served a few years ago as my congressional page. All of his children have excelled educationally and have become productive contributors in their respective communities.

Mr. Speaker, the excellence of his children and their instinctive determination to succeed mirrors Elder Clemons' drive for success. He has reached heights of achievement that few men even dare to dream of.

Elder Clemons was involved in several businesses over a period of 28 years. He owned and operated two successful service stations. The last one was one of the highest volumed Shell stations in Ohio. He was awarded a franchised auto dealership by the Chrysler Motor Corp. and became the first black to be so designated in the State of Ohio. During 1977, Elder Clemons was saluted by Black Enterprise magazine as

the youngest member of the top 100 black businesses in America. He remained a member of this exclusive group of black entrepreneurs as long as he was in business. Mr. Speaker, in 1977, during the Holy Convocation in Memphis, Tenn., the Church of God in Christ honored him as the Pentecostal businessman of the year.

Mr. Speaker, perhaps more than any other achievement, Elder Clemons is respected for and would point to his work in the church as his primary reason for existence. He accepted his call into the ministry in 1957. He was licensed in 1958 and ordained in 1965.

During that time, he worked with the Williams Temple Church of God in Christ in a host of positions including the trustee board, youth Sunday school superintendent, Boy Scout institutional representative, associate minister and district Y.P.W.W. president.

In March 1968, Elder Clemons was appointed pastor of the Prayer Tower Church of God in Christ in Akron, Ohio. Even though the spirits of the church members were low when elder Clemons came, effectively combining his spirit and positive determination to uplift the work of the Lord, Elder Clemons became a positive catalyst for the church and the surrounding community. Under his leadership, the church has acquired and paid for property valued at over $100,000. Elder Clemons was given a vision by the Lord and decided to change the name of the church to the Tower of Prayer. This name change was to appropriately reflect the new mission of the church which he believes will become the center of prayer for Akron and northeastern Ohio.

Together with his wife and the support of the members of the Tower of Prayer Church of God in Christ in Akron, Elder Clemons is bringing a new meaning to the word "church". The church services and ministries are extended far beyond the church building in an attempt to wrestle with the problems of the community.

Mr. Speaker, it is evident that Elder Burton Delano Clemons is a rare and dynamic human being and servant of God. During his 25 years in the ministry and 28 years in the business world, he has done more than the average human being could ever hope to achieve in a lifetime. He has truly been a blessing to all of those who have come to know and love him. On behalf of the residents of the 21st Congressional District of Ohio, I take this opportunity to salute Elder Clemons on the occasion of the testimonial dinner in his honor on Saturday, September 18, 1982.●

REFORM OF THE BUDGET PROCESS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. CONYERS. Mr. Speaker, yesterday I testified before the Task Force on the Budget of the Rules Committee. The relationship of the Federal budget to the social and economic needs of the Nation is a paramount issue. The task force has the responsibility to consider changes in the budget process that will make it more responsive to what is happening in the Nation.

I want to share with my colleagues a few of the points I made and recommendations that I offered. A summary follows:

Mr. Chairman and Members of the Task Force. What is it we are budgeting for, when we consider budget resolutions? Where do we want to go in the nation, and do the budgets we write enable us to get there?

As it now stands, the budget process is, at best, counterproductive to the necessary task of debating, determining, setting and implementing national social and economic goals. As long as budgets are written, as they are now, without a conception of the goals we ought to pursue and the policies and programs we ought to create, we then are simply budgeting in a vacuum.

I suggest that my colleagues review, if they have not already, an article that appeared in the Washington Post on September 5, 1982, entitled "Summer of '82: A Journal of Distress: Across the Land, Recession Takes Toll." The article describes the following reality: mainstreets of small towns across the country in which most of the shops are boarded up . . . families, roaming nomadically from town to town, camping out on riverbeds or in public parks, unable to find work . . . individuals who scavenge for food or things of value . . . children separated from their fathers so that they can obtain meager public assistance . . . disillusion and despair in many places, in the sunbelt as well as the frostbelt.

These Americans described in the article are simply unable to pull themselves up by their own bootstraps, which happens to be the official social theory in Washington today. Nor can the corporations, or State and local governments, or voluntary organizations do for them what they need to have done. They need jobs, adequate income, security. They need to see the factories of America at full production. This will not happen in any decent interval of time without a national, federal effort and a national, federal plan of action.

What do the budgets we write have to do with this reality? I am afraid, very little. In our budget process, we basically set aside consideration of national social and economic needs. Because our budgets do not relate to national goals—a number of which like full employment are statutory goals, in the law—our nation's needs go unaddressed in any rational, systematic way, and whatever our goals happen to be, they are simply unimplementable and unenforceable.

The Council of State Planning Agencies a year ago published a report entitled, "America in Ruins: Beyond the Public Works Pork Barrel." The study depicts a national public infrastructure of roads, bridges, dams, water and sewage systems, and public buildings that is in a state of acute decay. The study estimates that it will cost upwards of $3 trillion to repair and rebuild the nation's infrastructure. Do our budget resolutions address this reality? Unfortunately, no.

I am proposing that the budget process be directly linked, and become a part of, a framework for national and local economic planning. Budgeting has to be linked to planning. There is no other way for Congress to deal with the economic crisis in the nation today other than to inventory and assess the needs of citizens and communities in a comprehensive way, formulate alternative national plans for dealing with them, and set a series of economic and social goals, as well as fiscal ones, through the budget process, that would become the instrument for implementing these goals and plans.

A proposal similar to this was advanced in 1975 by Chairman Bolling, which he called a "Balanced Economic Growth Plan." A proposal for planning and budgeting that I happen to think is very sound was advanced several years ago by Mr. Nat Weinberg, chief economist of the U.A.W. for 28 years, and a member of the National Commission on Supplies and Shortages, to whom he presented his plan. That proposal was subsequently printed by G.P.O. under the title, "Additional Views of Commissioner Weinberg on Indicative Planning."

Mr. Weinberg envisages that alternative national plans would be proposed by a independent, federal planning commission. The President and Congress would consider the plans or propose entirely new ones. These plans would be debated before the American people. Congress would approve a plan, and the budget resolutions would be required to be consistent with the objectives of the plan.

Under this framework of planning an budgeting, budget resolutions world stipulate goals for employment, production, investment, etc., as well as the current revenue and spending goals.

In 1945, Congress and the President were concerned about the 11 million fighting men and women, and the 12 million other citizens engaged in wartime production, who would have to find jobs in a post-war civilian economy. In response to President Roosevelt's call for a right to a job for every American, a group of Senators led by James Murray of Montana introduced the first full Employment bill. A centerpiece of that legislation was the "National Production and Employment Budget," a form of budgeting that is very close to what I have been talking about today.

Today we are discussing budget reform in the context of a deepening and spreading economic crisis. It has been festering for years. The crisis is not just a matter of cyclical ups and downs, but of long-term industrial and economic decline. The economy may perk up now and then, and yet it is likely to remain chronically stagnant. The cumulative impact of this long-stand decline and distress is staggering. The Task Force, in recommending changes in the budget process, has an opportunity to transform the budget process into an instrument for achieving the goals that all of us want to see achieved.●

"CHINA CARD" IS RUSSIAN ROULETTE

HON. DANIEL B. CRANE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. DANIEL B. CRANE. Mr. Speaker, President Reagan, in his historic address to Parliament in London, called for all freedom-loving peoples to relegate communism to its rightful place on the ash heap of history.

We in the United States can best respond to that call by consistently opposing communism in whatever form, be it Soviet-style, Chinese-style or Eurocommunism.

Much has been made of the differences between the Marxism of Mao and his successors in Red China and the Marxism of Lenin and his legacy in the Soviet Union.

Some even suggest that U.S. policy should exploit these differences. In our relations with the Soviets, it is called playing the China card.

Mr. Speaker, foreign policy is not a game. Playing the China card is closer to Russian roulette than diplomacy. It does not comfort me that the Soviets and Red Chinese disagree over how to bury us.

In fact, the stronger the Chinese Communists become, the more likely it is they will find accommodation with the Soviets. The game of playing the China card can only end in one of two ways: War with the Soviet Union or Chinese-Soviet reconciliation.

Dr. Ku Cheng-kang examined this subject in depth in an address before the Captive Nations Week meeting of the Republic of China in Taipei. I hope my colleagues will study his remarks of July 23, 1982, carefully.

GLOBAL CAMPAIGN FOR DEMOCRACY TO DEFEAT MARXISM-LENINISM

(By Dr. Ku Cheng-Kang)

Premier Sun, Distinguished Guests, Ladies and Gentlemen, A sacred task of all men is to protect and promote freedom. A fundamental requirement of the task is salvation of captive peoples. More than 1 billion people of the world are in chains under Communist tyranny, and the freedom of the free world is seriously threatened by expansionist Communists. This Captive Nations Week Meeting today is to make freedom-loving people the world over bring forth their strength for freedom against Communism so as to enhance the freedom of the free and wipe slavery off the other half of the world.

I. ULTIMATE VICTORY OF FREEDOM AND DEMOCRACY

All indications are that the present dark period of man's history is about to be over. Forces of freedom and democracy are rising vigorously as the main stream of the age.

Communist rule is suffering insuperable crises, as testified by the heroic Polish struggle and by the Chinese mainland situation that has forced the Peiping regime to call for learning from Taiwan. The Afghans and Salvadoreans are bravely hitting back at the Communists.

The march of the Chinese in the name of the Three Principles of the People against Peiping's Marxist-Leninist-Stalinist-Maoism is the most forceful proof that those who stand for freedom and democracy will ultimately triumph over all Communists.

II. RED UNITED FRONT SCHEMES

The Communists are bent on world communization and human enslavement. There is no possibility whatsoever of their peaceful coexistence with freedom and democracy. We must not entertain the wishful hope that we may through negotiation maintain the balance needed for coexistence with Communists.

Nevertheless, the Communists have kept launching peace offensives, proffering baits of peace possibilities. Such united front moves are to spiritually disarm free democratic forces, weaken the free world defense, and create conditions for armed aggression.

The Soviets have since World War II used negotiations as covers for their positive development of nuclear weapons and missiles, and of naval and air strength.

The Chinese Communists are pushing their peace talk united front schemes. Their attempt is to hoodwink international circles, deceive and force the United States into stopping arms sales to the Republic of China, weaken and isolate the ROC, then use force for their venture across the Taiwan Straits.

Free nations must know well that this is not the first time the Chinese Communists are pushing peace talk united front designs. They had on three occasions in the past half century relied on such offensives for expansion. They repeatedly said that Communism did not suit the Chinese environments, that the Three Principles of the People should be implemented, and that they would not resort to rioting and other tactics of communization. Away from the conference table, however, they augmented their strength through treacherous means and rose to usurp the Chinese mainland power. These bitter lessons must be remembered by all, not just by the Chinese but by all the free people of the world. We must blast all such Communist united front schemes. We should never allow the Communists to wreck the morale and unity of the free democratic camp.

III. IDEALS OF CAPTIVE NATIONS WEEK

Observance of the Captive Nations Week is to promote assistance to the struggle for freedom, democracy, and human rights waged by those held captive behind the Iron Curtain. Communist tyranny over them should never be regarded as an unchangeable fact.

Truly praise-worthy are President Reagan's Captive Nations Week Proclamation of July 16 and the speech he made, in a tone fully reflecting his righteous spirit and moral courage, at that first public signing of the annual proclamation. We strongly support Mr. Reagan's call for the renewal of "our sacred resolve that someday all the people of the earth will enjoy the God-given rights of free men and women," and for the reaffirmation of "our faith over the rule of force and coercion which denies human rights to many other parts of the world today." The President also said: "We renew especially our hope that those countries of Eastern Europe, Asia, Africa, and Latin America now under Communist domination will someday regain their national sovereignty and, again, enjoy the dignity of their own national tradition." This should be taken earnestly by all as the sacred goal of the "Captive Nations Week" campaign today.

The lofty ideals of Captive Nations Week observance must be held high. If free nations were to reconcile with the Communists and let them continue human enslavement, masses of people behind the Iron Curtain of the East and the West would be grievously disappointed in the free democratic forces outside.

The lofty ideals of Captive Nations Week observance must be fully attained. All the people of the free world must rise and squarely face the crises provoked by the expansionist Red slavemasters. Unity and action must be enhanced against them. Efforts must continue for the return of freedom and independence to captive peoples and nations.

IV. RESPONSE TO PRESIDENT REAGAN'S CALL

When addressing Members of Parliament in London on June 8, President Reagan called for a global march of democracy to leave Marxism-Leninism on the ash heap of history.

As we respond to that call, we must emphasize that a global campaign for democracy requires first of all a clear demarcation between friend and foe, and that all the Marxist-Leninist regimes should be dealt with. We must stand against Soviet Russia, against the Chinese Communists, and against all other Red regimes. As a tyrannical regime with persistence in Marxism-Leninism written into its constitution, Peiping should be a primary target of the campaign. The Marxist-Leninist regimes of Peiping and Moscow must both be left on the ash heap of history. Fundamentally, anti-Marxism-Leninism does not allow any double standard permitting cooperation with the Chinese Communists for opposition to the Russians.

A strong stand against Marxism-Leninism on the Chinese mainland is the effective first step against Marxism-Leninism in the Soviet Union. Once the 1 billion Chinese are freed from the Marxist-Leninist yoke, peace and security can be assured in the entire Asian-Pacific region. Once the 1 billion people are added to the free democratic camp, the Marxist-Leninist Russian expansionists certainly will be checked.

A global campaign for democracy requires full implementation of President Reagan's stand for peace through strength. In other words, all the free democratic nations must first be able to effectively defend their freedom and security. A global campaign for democracy must start with the U.S. extending assistance to those free democratic nations requiring help against Red aggression.

V. REQUIRED ANTI-COMMUNIST STEPS TODAY

We fully concur in President Reagan's outstanding view that the nature of the struggle between freedom and slavery "is ultimately one that will be decided, not by military might, but by spiritual resolve and confidence in the future of freedom, especially in the face of the decaying and crumbling dreams of Marxism-Leninism."

A prerequisite of anti-Communism is that the free world should not be so eager about peace through power balance as to sacrifice captive peoples or damage the rights and interests of any free democratic nation.

The focus of the "Captive Nations Week" campaign in the present stage should be fully in line with the calls President Reagan issued in his latest historic speech. The weapon in our hand that is much stronger than conquest, deception, and sabotage is the strength of truth. We must fully inject

this strength into Iron Curtain campaigns for freedom and into a global alliance for peace.

The U.S. Government must immediately translate into action the clear-cut, forceful calls of President Reagan. The first step should be rejection of the contradictory tactics of cooperation with the Chinese Marxist-Leninists for opposition to the Marxist-Leninist Russians.

As proven by facts, rapport with the Marxist-Leninist Chinese can only spur the expansionist moves of Marxist-Leninist Russians into the Western Pacific, South Asia, Latin America, and Africa. The United States must refrain from creating another strong Marxist-Leninist force by helping the presently confused and backward Chinese Communists.

What if the Chinese Communists really grow? The better they become able to confront Moscow, the greater the possibility will be of reconciliation between the two Marxist-Leninist regimes. The danger of American association with Peiping is either walking into the regime's trap where the U.S. will find itself at war with the Soviets, or prompting Moscow and Peiping to rejoin hands for a joint world communization drive.

To avert such dangers, the United States must stop befriending the Marxist-Leninist Chinese, sternly reject their interference, faithfully implement the Taiwan Relations Act, and help the Republic of China enhance its military strength for the defense of freedom and democracy. Support to the ROC is also to facilitate China's free democratic unification. That is the only way to end Marxism-Leninism in China. That also is the only effective way to blot Marxism-Leninism out of Russia.

Ladies and gentlemen: Communist challenges to man's freedom are unprecedented. Now is the time for all the free democratic forces to unite strongly and deal blows at Marxist-Leninst forces of enslavement. We should urge all the free democratic nations to respond to President Reagan's call for a global campaign for democracy. We should see to it that free nations convene a conference on anti-Marxism-Leninism. All those who stand for democracy, irrespective of race, nationality, political background, diplomatic connection, and religious belief, should forge a strong unity and carry out these three major tasks:

First, development of the "Captive Nations Week" Movement into a global campaign for the elimination of Marxism-Leninism and enslavement, and for the establishment of a great alliance for freedom, democracy, and peace.

Second, establishment of a global anti-Communist strategy that joins the regional defense organizations and expand them into a global common security system for freedom and democracy.

Third, positive support to the anti-tyranny struggle everywhere behind the Iron Curtain and to the struggle of threatened nations to safeguard their freedom. Spiritual resolve and strength of truth must be fully brought forth for a thorough destruction of the Marxist-Leninist stronghold.

Ladies and gentlemen: At this turning point of history, all the Chinese should, together with all other freedom-loving people of the world, enhance unity and redouble efforts for a thorough defeat of Marxism-Leninism, and for a decisive victory of freedom and democracy.●

THE EXTRADITION ACT OF 1982—FULL DEBATE IS NEEDED

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. ROSENTHAL. Mr. Speaker, I am deeply concerned that what happened in the Senate in mid-August not be repeated in the House—that the proposed Extradition Act of 1982, H.R. 6046, not be rammed through this legislative body without due consideration, debate and amendment. If this bill is brought to the floor at all, it should be with an open rule allowing full and complete consideration.

While our extradition procedures do need to be modernized, this must not be done at the expense of weakening civil liberties and the United States reputation as a refuge for those who are victims of authoritarian regimes.

There are a number of specific provisions in the bill which bear further debate and modification. First, the proposed act would remove the authority of the courts to decide whether the alleged criminal is protected by the political nature of his crime and would instead give sole discretion to the Secretary of State. Not only would this pose a threat to our constitutional system of checks and balances, but it would make these decisions subject to political pressure from countries with whom we have extradition treaties—El Salvador, for example.

Second, the accused, even if he is an American citizen, could be arrested without any proof that he is guilty of a crime. As the ACLU, which joins many other civil liberty and human rights groups in opposing this bill, states.

A foreign government's mere, unsubstantiated allegation that an American citizen had, on a visit to the country, conspired to commit a violent act, coupled with a promise to produce evidence at a later date, would compel that the person be held without bail for at least 10 and perhaps for more than 60 days.

Finally, the bill would restrict the definition of political offense to exclude ameliorating circumstances such as when a person uses violence to escape from a foreign prison where he is being tortured. Under the present language there would be no political exception defense to extradition in this, or similarly justifiable circumstances.

This bill is in opposition to everything we hold sacred in the American system of justice. It presumes guilt, puts the burden of proof on the accused and subordinates the U.S. judiciary to foreign regimes who would deal in torture and repression.

I feel certain that when my colleagues take a good look at the provisions of this bill, they will have a good deal more to say about it—and against it.●

H.R. 6113—OCEAN DUMPING AMENDMENTS ACT OF 1982

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. JONES of North Carolina. Mr. Speaker, on Monday, September 20, 1982, the House will consider under suspension of the rules H.R. 6113, the Ocean Dumping Amendments Act of 1982. H.R. 6113 was ordered reported by the Committee on Merchant Marine and Fisheries on May 5, 1982, and was referred sequentially to the Committee on Public Works and Transportation which reported the bill with amendments on July 29, 1982. Subsequently, both committees have reached an agreement on amendments to H.R. 6113 that would reconcile the differences in the bill as reported by each committee. An amendment in the nature of a substitute will be offered in the motion to suspend the rules. The following is the substitute that will be offered:

That this Act may be cited as the "Ocean Dumping Amendments Act of 1982".

SEC. 2. DUMPING PERMIT PROGRAM.

(a) Section 102 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1412) is amended—

(1) by amending subsection (a)(C) by striking out "and beaches." and inserting in lieu thereof ", beaches, and wetlands."; and

(2) by amending subsection (c) to read as follows:

"(c)(1) The Administrator shall designate sites at which materials may be dumped pursuant to this section and, after consultation with the Secretary, at which materials may be dumped pursuant to section 103; except that no site may be designated by the Administrator under this subsection until the Administrator undertakes and completes an analysis of the characteristics of the site and its suitability for dumping and of the environmental effects which will likely result from dumping. In undertaking such an analysis of each site, the Administrator shall take into consideration the criteria set forth in subsection (a) and shall specifically take into account the following factors:

"(A) The types and quantities of wastes and pollutants projected to be deposited in, and adjacent to, the site from dumping and other sources.

"(B) the ability of the waters at the site to disperse, detoxify, or neturalize the materials.

"(C) The importance of the site to the surrounding biological community, including the presence of breeding, spawning, nursery or foraging areas, migratory pathways, or areas necessary for other functions or critical stages in the life cycle of marine organisms.

"(D) The immediate and cumulative effects on human health and on the ecosystem adjacent to the site and the persistent effects on the ecosystem within the site.

Nothing contained in this paragraph shall be construed to limit the authority of the Secretary under section 103.

"(2) The Administrator shall—

"(A) periodically monitor, or cause to be monitored, the effects of the dumping of materials at or adjacent to each site for which the Administrator determines, on the basis of the characteristics of the site and the materials to be dumped, that such monitoring is necessary to accomplish the purposes of this title; and

"(B) at the close of the third year after the site designation and at every three-year interval thereafter until such time as the designation is terminated, estimate the extent of the dumping and other waste inputs that will occur in and adjacent to each site during the next three-year period.

"(3) If at any time the Administrator, on the basis of the factors taken into account under subparagraphs (A) through (D) of paragraph (1), or on the basis of the monitoring or estimates, or both, required under paragraph (2), determines that the site is no longer suitable for such dumping, the Administrator shall—

"(A) limit dumping at the site to certain materials or at certain times or both; or

"(B) suspend or terminate the designation of the site under paragraph (1).

In making a determination under the preceding sentence that a site is no longer suitable for dumping pursuant to section 103, the Administrator shall consult the Secretary.".

(b) Section 103(b) of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1413(b)) is amended by striking "recommended" in the last sentence.

SEC. 3. PERMIT CONDITIONS.

Section 104 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1414) is amended as follows:

(1) Subsection (a) is amended to read as follows:

"(a) Permits issued under this title shall designate and include—

"(1) the type of material authorized to be transported for dumping or to be dumped;

"(2) the amount of material authorized to be transported for dumping or to be dumped;

"(3) the location where such transport for dumping will be terminated or where such dumping will occur;

"(4) the length of time for which the permits are valid and their expiration date;

"(5) any special provisions deemed necessary by the Administrator or the Secretary, as the case may be, to minimize the harm from dumping, which may include measures that the permittee must take to plan, develop, acquire, or implement, as appropriate—

"(A) alternatives for the disposal of the material,

"(B) processes for reducing or eliminating any contaminants in the material, or

"(C) processes for recycling the material;

"(6) after consultation with the Secretary of the Department in which the Coast Guard is operating, any special provisions deemed necessary by the Administrator or the Secretary, as the case may be, for the monitoring and surveillance of the transportation or dumping; and

"(7) such other matters as the Administrator or the Secretary, as the case may be, deems appropriate.".

(2) Subsection (b) is amended to read as follows:

"(b) The Administrator or the Secretary, as the case may be, shall prescribe and collect from the applicant, unless the applicant is a Federal agency, an application fee in an amount commensurate with the reasonable administrative costs incurred or expected to be incurred by the Administrator or Secretary in processing the permit. The application fee shall be deposited to the principal appropriation account or accounts used to carry out the processing of permits under this title.".

(3) The following new subsections are added at the end thereof:

"(h) The Administrator or Secretary, as the case may be, may prescribe such reporting requirements as he or she deems appropriate with regard to actions taken by permittees pursuant to permits issued under this title.

"(i)(1) Two years after the date of the enactment of the Ocean Dumping Amendments Act of 1982, the Administrator may not issue a permit under this title for the disposal of radioactive waste material until the applicant, in addition to complying with all other requirements under this title, prepares, with respect to the site at which the disposal is proposed, a Radioactive Material Disposal Impact Assessment which shall include—

"(A) a listing of all radioactive materials in each container to be disposed, the number of containers to be dumped, the structural diagrams of each container, the number of curies of each material in each container, and exposure levels in rems at the inside and outside of each container;

"(B) an analysis of the environmental impact of the proposed action, at the site at which the applicant desires to dispose of the material, upon human health and welfare and marine life;

"(C) any adverse environmental effects at the site which cannot be avoided should the proposal be implemented;

"(D) an analysis of the resulting environmental and economic conditions if the containers fail to contain the radioactive waste material when initially deposited at the specific site;

"(E) a plan for the removal or containment of the disposed nuclear material if the container leaks or decomposes:

"(F) a determination by each affected State whether the proposed action is consistent with its approved Coastal Zone Management Program;

"(G) an analysis of the economic impact upon other users of marine resources;

"(H) alternatives to the proposed action;

"(I) comments and results of consultation with States officials and public hearings held in the coastal states that are nearest to the affected areas;

"(J) a comprehensive monitoring plan to be carried out by the applicant to determine the full effect of the disposal on the marine environment, living resources, or human health, which plan shall include, but not be limited to, the monitoring of exterior container radiation samples, the taking of water and sediment samples, and fish and benthic animal samples, adjacent to the containers, and the acquisition of such other information as the Administrator may require; and

"(K) such other information which the Administrator may require in order to determine the full effects of such disposal.

"(2) The Administrator shall include, in any permit to which paragraph (1) applies, such terms and conditions as may be necessary to ensure that the monitoring plan required under paragraph (1)(J) is fully implemented, including the analysis by the Administrator of the samples required to be taken under the plan.

"(3) The Administrator shall submit a copy of the assessment prepared under paragraph (1) with respect to any permit to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Environment and Public Works of the Senate.

"(4)(A) No permit to which this subsection applies shall take effect before the 45th calendar day of continuous session of the Congress after the day on which the permit was issued, and shall be terminated by the Administrator if before the close of such 45th day either House of Congress by resolution disapproves its taking effect.

"(B) For purposes of subparagraph (A), the continuity of a session of the Congress shall be considered as broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in the computation of the 45-day period. If a permit subject to this subsection is issued during any Congress and the last session of such Congress adjourns sine die before the expiration of the 45 calendar days of continuous session (or a permit is granted after the last session of the Congress adjourns sine die), the permit shall be deemed to have been reissued on the first day of the succeeding Congress and the 45-day period referred to in subparagraph (A) shall commence on the day after such first day.".

SEC. 4. CONVENTION ADHERENCE.

Section 106 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1416) is amended by adding at the end thereof the following new subsection:

"(g) To the extent that they may do so without relaxing the requirements of this title, the Administrator and the Secretary shall adhere to and apply the requirements of the Convention, including its annexes, that are binding upon the United States.".

SEC. 5. TRANSITIONAL PROVISIONS.

(a) Until completion of the site designation or denial of site designation by the Administrator of the Environmental Protection Agency with respect to any areas of ocean waters approved for dumping on an interim basis before July 1, 1982, and any areas of ocean waters used for dumping pursuant to a court order, the amendments made by this act to the Marine Protection, Research, and Sanctuaries Act of 1972 (other than subsection (c) (2) and (3) of section 102 thereof as added by section 2(a)(2) of this Act and other than those made by sections 3, 5(b), 8, 9, and 10 of this Act) shall not be applicable to those areas of ocean water.

(b) Notwithstanding any provision of title I of the Marine Protection, Research, and Sanctuaries Act of 1972 to the contrary, during the two-year period beginning on the date of the enactment of this Act, no permit may be issued under such title I that authorizes the dumping of any low-level radioactive waste unless the Administrator of the Environmental Protection Agency determines—

(1) that the proposed dumping is necessary to conduct research—

(A) on new technology related to ocean dumping, or

(B) to determine the degree to which the dumping of such substance will degrade the marine environment;

(2) that the scale of the proposed dumping is limited to the smallest amount of such material and the shortest duration of time that is necessary to fulfill the purposes

of the research, such that the dumping will have minimal adverse impact upon human health, welfare, and amenities, and the marine environment, ecological systems, economic potentialities, and other legitimate uses;

(3) after consultation with the Secretary of Commerce, that the potential benefits of such research will outweigh any such adverse impact; and

(4) that the proposed dumping will be preceded by appropriate baseline monitoring studies of the proposed dump site and its surrounding environment.

Each permit issued pursuant to this subsection shall be subject to such conditions and restrictions as the Administrator determines to be necessary to minimize possible adverse impacts of such dumping.

SEC. 6. DEFINITION OF "MONITORING".

Section 3 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1402) is amended by adding at the end thereof the following new subsection:

"(m) 'Monitoring' means the systematic, time-series observation of materials, contaminants, or pertinent components of the marine ecosystem over a period of time sufficient to determine the existing levels, trends, and natural variations of measured components in the water column, sediments, and biota for the purpose of ensuring that immediate harmful effects of dumping are detected, and cumulative and long-term effects are detected, forecasted, and evaluated. Observations may include, but are not limited to, the following procedures, depending upon the type of waste to be dumped and the characteristics of the site: (1) seasonal sampling and analyses of the infaunal community and sediment for purposes of characterizing structural composition and size distribution; (2) sampling and analyses of sediment and selected organisms to determine levels of hydrocarbon, trace metals, and chemical and pathogenic contaminants identified as constituents of wastes to be dumped; (3) profiling measurements of standard oceanographic parameters including dissolved oxygen, salinity, and water temperature; (4) characterization of large-scale surface topography and megafaunal structure and composition; and (5) sampling and analyses to determine levels of nutrients and organic carbon.".

SEC. 7. DEFINITION OF "OCEAN WATERS".

Section 3(b) of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1402(b)) is amended by inserting ", and the subjacent areas," immediately after "those waters".

SEC. 8. WRITS OF MANDAMUS.

Section 105(g) of the Marine Protection, Research and Sanctuaries Act of 1972, as amended, is amended—

(1) by redesignating subparagraph (5) as subparagraph (6) and adding the following:

"(5) Upon application of any person, the district courts of the United States shall have jurisdiction to issue writs of mandamus commanding the Administrator to implement in a timely manner the site designation provisions of this title, as applicable either pursuant to court order or upon application for a permit under section 102 or section 103, except that nothing in this paragraph is intended to affect the conduct of any dumping activity under a permit issued under this title pending the completion of site designation proceedings. Paragraph (4) of this subsection shall not apply to any suit brought pursuant to this paragraph."; and

(2) by striking the word "injunctive" in redesignated subparagraph (6).

SEC. 9. AUTHORIZATION OF APPROPRIATIONS.

Section 111 of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1420) is amended by striking "and" immediately following "fiscal year 1981," and inserting "and not to exceed $4,213,000 for fiscal year 1983," immediately after "fiscal year 1982,".

SEC. 10. SCHEDULE FOR COMPLETION.

The Administrator of the Environmental Protection Agency shall establish a schedule for expeditiously completing the study and designation or denial of designation of all areas of ocean waters approved before July 1, 1982, for dumping on an interim basis and areas of ocean waters used for dumping pursuant to a court order. The Administrator shall submit this schedule to Congress not later than the one hundred and eightieth day after the date of enactment of this section.●

LONG-TERM SOLUTION TO UNEMPLOYMENT?

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. GUNDERSON. Mr. Speaker, our unemployed people today need permanent, productive jobs in the private sector, not temporary, make-work jobs funded by the taxpayers.

Yet that is what they would get if we pass the public works job proposal. If we have learned nothing more in the last 2 years, most Americans have learned that we must not retrogress to the worn-out, bankrupt public jobs programs of the past.

Federal spending on such short-term, unproductive efforts has been one of the major causes of today's chronic unemployment predicament. We are confusing the cure with the cause of the insidious unemployment illness that plagues the country today.

Indeed this proposed "cure" may well be worse than the disease. While the proposals contained in the urgent supplemental for the Department of Labor for a job creation program may at first appear inviting, they do little, in reality, to solve the plethora of unemployment difficulties facing our Nation in the long run. Unemployment has remained the one area which the economic recovery program has yet failed to conquer and, to aid the American jobless, Congress recently extended the termination deadline for unemployment compensation benefits.

The jobs program contained in House Joint Resolution 562 appropriates a sum equal to 5 percent of the latest estimated level of unemployment compensation benefits, a figure approximating $1 billion, for the creation of public and community service jobs. It is estimated that this program will provide jobs for 200,000 workers for a period of 6 months.

Although I would rather see these unemployed Americans working than collecting unemployment as they look for a job, this program is simply a short-term, quick-fix answer to a long-term problem. It is unacceptable to promote this temporary program as a solution to employment difficulties facing this Nation. Employing 200,000 of the Nation's 10 million unemployed to perform make-work services for 6 months, only to throw them back into the streets with no new marketable skills or training will not even begin to heal our unemployment wounds.

The return of a healthy labor force will require a drastic reshaping of our work force so that it will keep up with the technological, fast-moving economic world of America's future. Clearly, the retraining of our workers is the primary task necessary to prepare America for its latest industrial revolution and, at the same time, reduce unemployment. In response to this challenge, Congress has already initiated legislation, the Job Training Partnership Act which is presently in conference, to redraw the face of labor.

Examples of the shortage of certain skills are quickly becoming apparent. Machinists are a case in point. The average age of the Nation's machinists is 58 and many are beginning to retire, but only a quarter of those needed to replace them are being trained. It is estimated by the National Tooling and Machining Association that the shortage of machinists will grow to 240,000 by 1985.

In fact, the Bureau of Labor Statistics estimates that over 1 million skilled jobs went unfilled last year, despite the 10 million Americans who were looking for work. The face of American industry and business is rapidly changing. Labor must be provided the opportunity to change it. Just as American agriculture became mechanized and reduced its work force, American manufacturing and other industries are doing the same. It is therefore urgent that our workers be retrained for the skilled jobs that will be demanded.

Along with this retraining effort, the President's program to reduce interest rates must be continued. These high rates have remained the principal cause of unemployment in such beleaguered industries as housing and construction. The economic recovery program has already yielded a significant reduction in interest rates. These initiatives must not be halted in order that the rates may be further reduced.

This program is further unacceptable because it will add significantly to the Federal deficit. As such, the Martin substitute, drawing its funds from the unused synfuels budget, will not counteract the deficit reductions already accomplished by this Con-

gress. However, neither of these alternatives will achieve a long-term solution to the unemployment problem we currently face. Both, despite their obvious differences, would not offer a permanent cure.

Finally, the American people must not be mislead to believe that quick fix programs such as this jobs bill will yield long-term corrective solutions to the deep-seated difficulties of unemployment. This proposal is simply a temporary solution which will not correct the problem, but will delay the constructive application of real solutions. Retraining labor and lowering interest rates are the answer for the long run, while this jobs program will continue the attempt to postpone reality another 6 months.●

CHRIST CHURCH OF SHORT HILLS, N.J.

HON. MILLICENT FENWICK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mrs. FENWICK. Mr. Speaker, I rise today to recognize the 100th anniversary of an organization which has played a significant role in the lives of many people of my district. Christ Church of Short Hills, N.J., is celebrating its centennial this year. In the past century, the church has grown from 19 founding members to an active body of over 800 congregants.

Since its first service on October 15, 1882, Christ Church has continued its tradition of involvement with the town of Short Hills, one of the oldest and most beautiful suburban communities in the United States. True to Short Hills' community ideals, Christ Church, as reflected in its motto "Ye are all one in Christ," has been operated as a community church to serve all denominations. Through programs such as Outreach, which donates time and money to worthy projects, the church has developed its long and distinguished history of worship, fellowship, and service.

I am introducing a joint resolution to commemorate the centennial of Christ Church of Short Hills. I ask the Members of the 97th Congress to join me in offering their congratulations in the hope that 100 years from now our successors will be able to offer it bicentennial congratulations.●

A FRENCH PERSPECTIVE ON THE U.S. BREEDER PROGRAM

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mrs. BOUQUARD. Mr. Speaker, on August 18, Dr. George Vendryes, Director Delegate attached to the Office of the Chairman of France's Atomic Energy Commission, and one of the chief architects of that country's fast breeder reactor development program, visited with me and other Members to discuss the French nuclear power development activities and to give us his view of the role of the U.S. nuclear breeder reactor program from a global perspective. I would like to submit for the RECORD a report of that meeting prepared by the staff of my Energy Research and Production Subcommittee.

REPORT ON MEETING WITH MEMBERS AND DR. G. VENDRYES (CEA) AND MR. BARRE (NUCLEAR ATTACHÉ)

The morning meeting was attended by the following Members: Mrs. Bouquard, Mr. Brown, Mr. Shamansky, Mr. Bevill, Mr. Morrison.

Dr. Vendryes began with a discussion of the status of the Super Phenix plant at Creys-Malville. Construction is about 75 percent complete. All of the critical parts of the reactor structure are enclosed and under security. Within six months, all nuclear parts will be enclosed. By mid-year of 1983, they will begin sodium tests at uniform temperature as well as check the operation of components under sodium. Power production is expected to begin in mid-1984.

Mr. Bevill asked Dr. Vendryes to express his views regarding the Clinch River project. Accordingly, he reiterated his strong support for this U.S. effort, "The U.S. needs a vigorous breeder program, because the breeder will be needed in the future to solve the world's energy problem." He did not place much credence in the timing arguments used by the project's detractors. In France, the urgency is probably greater than in the U.S. because of their lack of domestic resources such as coal, gas or oil. However, the fact remains, according to Dr. Vendryes, that the breeder will be needed on a global scale. In his view, the U.S. invests more dollars than France in breeder research and technology; but this larger investment is meaningless unless it is focused on producing and operating a powerplant such as CRBR.

The U.S. was definitely the world leader in breeder technology when France decided to develop their own program some 28 years ago. Dr. Vendryes recalled his early visits to the U.S. and his discussions with Walter Zinn of Argonne. These visits and conversations influenced France's decision to start their own fast breeder program. It was clear at that time that (1) sodium technology was well in hand; (2) the U.S. was confident of its ability to produce breeders. As a result the French engineers (Vendryes, et al.) became convinced that they also could master the technology of breeders and operate them safely.

Since that time France has pursued its program without interruption. The effort has had the political and financial support of the political leadership throughout this period of some 27 years, not an insignificant fact when one considers the multiplicity of governments ruling France over this period of time. The French Government did not question priority or budgets as far as France's effort to develop nuclear power in general, and the breeder in particular. He cited the following reasons for this support. First, all French leaders were sure that the breeder will be needed as an important component of the global energy supply. Second, over the past 25 years, France was able to develop solid expertise through its national utility system and assembling and training highly qualified technical and engineering support personnel. In his view, continuity of effort in a project of the magnitude of CRBR cannot sustain a five-to-ten-year delay without risking the loss of expertise and competence. People become disenchanted and leave for greener pastures. It took France 20 years to develop the level of professional expertise they have.

Mr. Bevill then asked if Parliament has been supporting their breeder work at 100 percent, or has their been opposition? Dr. Vendryes responded by noting that of the four major political parties in France, and before the present administration was elected to office, the two majority parties strongly supported the nuclear power program. Of the two minority parties, the Communists were in support of France's strong nuclear posture, while the Socialists were divided on the issue. Following the elections, with the Socialists now in the majority, an intense and heated national debate ensued which lasted from June to September of 1981. In October 1981, the Socialists presented their energy proposal to the Parliament for a vote. Regarding the nuclear power issue, there were two prevailing options to be decided: to essentially terminate the program upon completion of projects in progress, or to continue a strong nuclear power development posture that included continuation of the fast breeder development. The result of this vote was that the nuclear effort received its first majority vote to continue national support. Since then, there has been no problem, according to Dr. Vendryes. In fact, the Prime Minister of France, Mr. Mauroy, has taken an active role in policy related matters associated with the program.

Dr. Vendryes made some reference to the La Hague operation, noting that it is the largest reprocessing plant in the world. France reprocesses all its spent fuel and vitrifies the fission products. He noted that this may become a big issue when they have to consider the next plant after Super Phenix. People there are still sensitive to the waste disposal problem, because this waste occupies such a relatively large volume in a country where most land is at a premium. Thus, final disposal of both high and low-level waste still remains a problem. Dr. Vendryes believes, based on his personal inquiries, that the chief concern of those in opposition to the breeder is that it prolongs the nuclear power option well into the future.

Mrs. Bouquard then asked him if the U.S. could buy breeder technology from France when it is needed here. In Dr. Vendryes' opinion, this would be a mistake. He again argued that the U.S. spends more money than France does on its breeder technology development program. The U.S., he said, needs to build a demonstration plant and a reprocessing facility so that the program can be focused and rendered meaningful to potential users, suppliers and others. The U.S. "needs to revitalize its fast breeder program." The CRBR design has been reviewed and improved over the years, even though delays have been imposed on the project. He made some additional strong arguments in support of our CRBR effort, noting that even though Super Phenix is not considered by French engineers to be the ultimate design, it is needed to understand safety and engineering aspects better. Such under-

standing cannot be gained without actually constructing and operating a plant. He suggested also that using the information derived from CRBR, we could perhaps work together to develop the best systems for the future.

Mr. Brown asked Dr. Vendryes if there was any U.S. contractor involvement in the multinational agreements on Super Phenix. The answer was that to the best of his knowledge—no; at least there was no major U.S. involvement. He then proceeded to describe the multinational agreement on Super Phenix in some detail. The principals in this arrangement are France (51%), Italy (33%), and Germany (17%). There are some management problems (e.g., any decision must be made jointly), but on the whole the arrangement has worked fairly well. Some features of the agreement are as follows:

All partners have full access to data and plant operation experience.

The three countries receive a share of the generated electricity in proportion to their percentage contribution to project.

The various participants share, also proportionately, in equipment contracts. This has produced some serious constraints on deliverable equipment and schedules.

Even with such a complex arrangement, the division of labor and collaboration has worked.

Finally, Mr. Morrison inquired as to whether FFTF capabilities would be of use to the French program. Dr. Vendryes responded that FFTF schedules are geared toward U.S. program needs. If France were to use this facility, they would want to control projects to meet their needs. He did not think that this arrangement would be possible at this time.●

THE FAIR PRACTICES IN AUTOMOBILE PRODUCTS ACT

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. LUNDINE. Mr. Speaker, today I am joining a growing number of my colleagues in the House in cosponsoring the Fair Practices in Automobile Products Act. As someone who has long supported an enlightened free trade policy, I do not take this action casually. But, we cannot ignore the fact that our U.S. automobile industry is rapidly yielding its markets to foreign producers. Since 1978, the percentage of foreign sales in the U.S. market has increased from 17.7 percent to over 27 percent currently.

The effects of this trend are far-reaching. As sales continue to decline, hundreds of thousands of U.S. auto workers have been permanently put out of work. Auto production facilities have continued to close as the rate of capacity utilization in the U.S. auto industry continues to hover below 50 percent. Unless we soon take action to preserve a U.S. auto industry, we may very likely soon be without one.

The threat of total erosion of this country's capacity to produce automobiles demands our serious attention and consideration of extraordinary measures such as that being proposed in H.R. 5133. The auto industry is a key linkage industry that is central to almost every aspect of both our civilian and defense industrial productive capacity. Rubber, glass, steel, and many other critical industries depend upon the existence of a viable American automobile industry.

I am persuaded that a domestic content law can positively contribute to the problems facing the automobile industry for several reasons. First, we must address this problem without further delay. A recent report issued by the National Research Council appropriately confirms this.

The U.S. automobile industry is in a crisis. Vigorous import competition, drastic shifts in consumer preferences, and anemic final sales combined to make 1980 and 1981 two of the most difficult years in the industry's history.

The study goes on further to point out that the future prospects for recovery are uncertain.

If the industry is to survive, the next five years will see wrenching changes in its productive and financial base as new product technologies are introduced, manufacturing plants are retooled, and new relations are established among management, labor, and government.

There are other available options for dealing with the crisis in our automobile industry. I can conceive of even more positive options. Unfortunately, there appears to be little resolve to seriously pursue them on the part of this administration through international negotiation with our trading partners or domestic policies. In addition, there is no other policy option realistically available to Congress in the short term.

Earlier this year, I wrote letters to several of the key congressional leaders on this subject, as well as key administrative trade officials urging them to work together to pursue alternatives to imposition of a domestic content requirement on automobiles. However, neither a coordinated nor a serious effort has been forthcoming to deal with the massive unemployment and erosion of our automobile productive capability in response to my concern.

Second, the fundamental structural adjustment which will be needed to insure a healthy auto industry over the long term will take time. The effects of the current recession on auto industry efforts to achieve this adjustment have been devastating. The lack of a clear and specific national policy to help facilitate this adjustment is also contributing to the erosion of the auto industry. Continuity in the economy will be necessary to maintain the kind of environment to permit successful structural adjustment. A content requirement can provide this continuity.

Third, I am particularly concerned with the increasing tendency on the part of major U.S. car manufacturers to move to foreign out-sourcing of components and parts for their cars. If this trend continues, the vision of only two or three world automobile companies in the future may be closer than we believe. Certainly the recent emphasis on talks regarding a joint venture between General Motors and Toyota for the manufacture of small cars are indicative of such a movement. I believe that were this to occur, it would be extremely unfortunate for our economy and seriously handicap our ability to compete effectively in many, many areas of industrial production.

Four, the threat or actual imposition of such a requirement by the United States would certainly demonstrate to our trading competitors the U.S. resolve to take strong action when critical U.S. interests are threatened by the trade policies of our international partners. In my opinion, we have been all too lax in our pursuit of a firm and tough international trade policy. As a result, we have often done serious damage to the ability of many of our most important industries to remain competitive. While imposition of a domestic content requirement per se would be a departure from past U.S. foreign trade policies, such a requirement is not unprecedented on the part of many of our trading partners who maintain content and/or quota requirements on a variety of products, including cars.

All this notwithstanding, I also continue to have some concerns about the impact such a content requirement might have on the incentive over the long term for U.S. auto firms to modernize and compete. As a result, I believe that the House should consider attaching a sunset provision to the content requirement, or develop a scheme to insure maximum reinvestment of profits by U.S. auto firms in their domestic operations.

At the outset of this debate I had additional concerns over the feasibility of meeting the size of the percentage content requirement that was contained in the original legislation. Since that time, however, this percentage requirement has been made more realistic in redrafted versions of the bill.

In summary, Mr. Speaker, we need to strengthen our international trade policy. No longer can we afford to blindly pledge allegiance to a free-trade doctrine when other nations clearly do not do so when their vital interests are at stake. Movement of the content bill can contribute to strengthening our resolve in this area of national policy.

Our domestic auto industry is in serious trouble. I challenge the Administration to propose an effective alternative to this proposed legislation.

For several months now, I have advocated the development of a national industrial strategy based on development of a consensus between labor, management, Government, and the public interest for both troubled and growth industries. This would also require strengthening our international trade policy. I remain committed to the continued development of such an economic policy for the coming decade and intend to continue to develop other options for assisting the auto industry as a part of these efforts.●

CONGRESSIONAL SALUTE TO LT. FRANK JOSEPH STEVENS, OF PATERSON, N.J., DISTINGUISHED CITIZEN, ESTEEMED PUBLIC SAFETY OFFICER, AND GREAT AMERICAN

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. ROE. Mr. Speaker, on Friday, September 24, the residents of my congressional district and State of New Jersey will join with Local No. 265 of the P.B.A. in testimony to the outstanding public service rendered by one of our most esteemed public safety officers, distinguished citizen and good friend, Lt. Frank Joseph Stevens, of Paterson, N.J., who has announced his retirement as lieutenant of detectives of the Passaic County Prosecutor's Office.

Mr. Speaker, as Lieutenant Stevens retires from his law enforcement career, I know that you and our colleagues here in the Congress will want to join with me in deep appreciation of all of his good works and share great pride in the success of his achievements with his good wife Naomi (nee Brooks); his sister, Kathlyn Stevens Conlon, and family.

Lieutenant Stevens has indeed earned the highest respect and esteem of all of us for the quality of his leadership and highest standards of excellence in seeking to achieve optimum public safety for all of our people. We applaud his 35 years and 5 months of public safety and law enforcement career pursuits in service to our people.

Mr. Speaker, in 1947, Frank served as a fireman for the city of Paterson, N.J., and in December 1947, he was fondly referred to as one of the "Blizzard Cops" appointed by Mayor Furrey to the Paterson Police Department. In October 1951, he was appointed to the Paterson Police Detective Bureau where he was promoted to sergeant in 1956, and 2 years later, on April 1, 1958, was appointed to the Passaic County Prosecutor's Office. He attained his present high office of public trust as lieutenant in April 1976.

Lieutenant Stevens is a lifetime resident of the city of Paterson in my congressional district and served overseas with the U.S. Marine Corps in World War II. He enlisted in the U.S. Marine Corps in June 1942, and served our country with distinction as a sergeant in the Asiatic Pacific and Philippines. He received his honorable discharge in October 1945.

Mr. Speaker, throughout his lifetime, Frank has forged ahead with dedication, devotion, and sincerity of purpose in combating crime and protecting the life of our people. He was the recipient of the New Jersey State PBA's highest Award of Valor in September 1951 and has received many decorations for his valiant courage and heroic deeds performed at great risk and violent danger to his personal well-being. Among some of his major commendations are the following exemplary citations of merit and esteem that he received from the most prestigious Board of Police and Fireman: Capture of murderer (armed) Tom Carino; capture of holdup man (Peter Poth); capture of Mutt-Jeff holdup men; and capture of Ugene Ali when Ed Post was shot (cat-burglar).

We applaud Frank's knowledge, training, hard work, and personal commitment that has enabled him to achieve the fullest confidence and strongest support of his fellow-officers and the people of our community. He has always applied the most sophisticated and advanced techniques of his profession.

Lieutenant Stevens has been a staunch supporter and active participant in many civic and community improvement programs and we commend the quality of his professional expertise and leadership endeavors for over three decades in the vanguard of our public safety officers.

Mr. Speaker, it is indeed appropriate that we reflect on the deeds and achievements of our people who have contributed to the quality of our way of life here in America and I am pleased to have the opportunity to call your attention to his lifetime of outstanding public service.

As Lieutenant Stevens retires his official leadership badge of courage and valor, I respectfully seek this national recognition of his contribution to our country in placing others above self in providing safety on the streets, security in the home, and optimum public safety for all of our people. We do indeed salute a great American—the Honorable Frank Joseph Steven of Paterson, N.J.—for his contribution to the quality of life for the people of our community, State and Nation.●

REPRESENTATIVES MOFFETT, DINGELL, AND RODINO INTRODUCE RESOLUTION TO CREATE A SELECT COMMITTEE ON REINDUSTRIALIZATION

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. MOFFETT. Mr. Speaker, I am introducing today—with our friends, committee chairmen RODINO and DINGELL—a resolution to create a House Select Committee on Reindustrialization. The committee would work for 1 year, beginning with the 98th Congress, to conduct a thorough study of American industry. At the conclusion of this period, the committee would report the results of its investigation to the House for possible legislative action.

The Reagan economic program of tax and budget cuts has failed markedly to deal with the deeply seated economic problems which plague our industries and Nation.

The program ignores the issues of skill shortages in professions as diverse as computer science to mechanics.

The program ignores the problems of scarce capital for small business.

The program does nothing to increase exports or to deal with unfair foreign trade products.

The program has done nothing to increase lagging steel production despite the fact that our mills are running at 40-percent capacity.

The program pleads poverty at a time when our infrastructure—the bridges, ports, highways, railroads of this Nation—are in shocking disrepair.

All of the committees in the House have legislative jurisdictions which can attack the discrete segments of these problems. But there does not exist a forum for discussing the issues which cross committee jurisdictions. And, there is no central policy panel within the Congress that can build the coalition needed to push through a comprehensive program to deal with these issues.

Because of this, our select committee will draw from nine major policymaking committees members with expertise in these areas. It will examine the issues for a year, and then issue a report. The members will return to their committees and develop a legislative program, where appropriate, to deal with the problems identified in the study. And the result will be a substantial and workable alternative to the economic program which has produced little besides unemployment, high interest rates, high deficits, and no hope.

Printed below is a brief factsheet on our proposal. I would urge the support

and cosponsorship of this measure by all my House colleagues.

FACT SHEET—SELECT COMMITTEE ON REINDUSTRIALIZATION

POLICY

The resolution would create a Select Committee on Reindustrialization. It would begin work at the start of the 98th Congress. The resolution provides for a year long investigation and would require the Committee to report legislative recommendations to the House by December 31, 1983.

The Committee would be directed to conduct a thorough study of the condition of U.S. industry focusing on—whether capital markets generate sufficient investment; what education programs should be emphasized in the 1980's; whether existing training or retraining programs are adequate; the skill areas in which personnel shortages can be forecast; whether industry can improve its adoption of new technologies; the causes of America's lagging productivity; how to address our deteriorating infrastructure; the role of small business in reindustrialization; whether the tax code should be revised to increase investment; what needs to be done about the housing, steel and auto firms; whether existing trade laws adequately protect domestic industry against unfair foreign practices; the proper role for exports in reindustrialization.

MEMBERSHIP

A total of 27 Members will be appointed from the House Committees on Banking, Education, Energy, Government Operations, Judiciary, Public Works, Science, Small Business and Ways and Means.

POINTS TO REMEMBER

1. The Committee will not have special legislative jurisdiction; rather, its role will complement the activities of the legislative Committees by providing a forum for discussion of issues which naturally cross the existing Committee jurisdictions.

2. The existence of the Committee will help publicize problems and solutions which fall outside the narrow and unworkable policies of the Reagan Administration.

SPONSORS

Congressman Toby Moffett; House Judiciary Committee Chairman Peter Rodino; House Energy and Commerce Committee Chairman John Dingell.●

TRIBUTE TO TWO PENNSYLVANIA SCOUTS

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. NELLIGAN. Mr. Speaker, I join my colleagues today in honoring two Boy Scouts from the 11th District of Pennsylvania, which I am privileged to represent. These two Scouts have recently received the highest Scouting award, the coveted Eagle Scout Award.

Mark A. Harmon, 18, son of Mr. and Mrs. Donald Harmon, will be entering the U.S. Marine Corps this fall. As an active member of a Danville, Pa., Scout troop, he provided volunteer services for an area nursing home facility. He is a graduate of Danville Senior High School.

Jeffrey B. Hall, 14, son of Mr. and Mrs. Alfred Hall, is a sophomore at Dallas High School, where he is an honor student involved in wrestling and football. He is a member of Trinity United Presbyterian Church in Dallas.

I commend the troop's Scout leaders for spurring these young men on to such an outstanding achievement, and I join parents, friends, and members of the communities in wishing these young men equal success in their future endeavors.●

CONGRATULATIONS TO MS. SARAH ALICE WRIGHT

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. ADDABBO. Mr. Speaker, I would like to take this opportunity to congratulate Ms. Sarah Alice Wright of St. Albans, N.Y., who recently received the coveted Candace Award of the National Coalition of Black Women. This significant national organization of 15,000 members named only 17 recipients nationwide, and Ms. Wright was the only winner from New York. Because of the great honor and prestige associated with the Candace Award, I would like to share the following article written by Stephen McFarland of the New York Daily News:

ST. ALBANS WOMAN WINS A NATIONAL AWARD

(By Stephen McFarland)

Sarah Alice Wright of St. Albans, national executive director of the Young Women's Christian Association, has been named one of 17 national winners of the annual Candace Award of the National Coalition of 100 Black Women. Wright is the only winner from the New York area this year.

"It's an honor to receive this award," Wright said yesterday, "because 100 Black Women is a very significant national organization, but I was really quite surprised. I was not aware that I was under consideration for the award."

The National Coalition of 100 Black Women is an advocacy organization of socially active black women drawn from all walks of life that seeks the "empowerment of black women," according to Jewel Jackson McCabe of 100 Black Women. It has 15,000 members in 19 states and the District of Columbia. The Candace (pronounced "can-DAY-say") Award takes its name from the ancient Ethiopian title for queen or empress.

The award, which is being presented for the first time this year, recognizes achievement in eight fields of endeavor. Wright is receiving her award in the field of community service. There are two recipients in each of the eight fields and a special Distinguished Service Award that has been won by Rachel Robinson, widow of Jackie Robinson, the first black baseball player in the major leagues.

Wright, who was born in Harrisburg, Pa., has been professionally associated with the YWCA for 30 years. She received a bachelor's degree from the Pennsylvania State College at West Chester, a master's in education from the University of Pennsylvania in Philadelphia and a master's in social work from the University of Pittsburgh.

She began her career with the YWAC in Youngstown, Ohio, and, after coming to New York, served as associate executive director before being named national executive director in 1974. Wright is the first black woman to hold that post.

Wright, who admits to being "60ish," said that in the 1950s and '60s she was active in the Program for Youth of the National Board of the YWCA. "I guess you could say that my first love is working with young people," she said. She also teaches Sunday school and is an active member at Christ Memorial Baptist Church in St. Albans, of which her husband, Emmett, is pastor.

The Candace Award program has been made possible by a subsidy from Bailey's Original Irish Cream Liquer. The awards themselves have been donated by Avon through Tiffany, the Fifth Ave. jewelry concern, which is an Avon subsidiary. The awards are in crystal and depict the head of a black woman.

They will be formally presented at ceremonies on Sept. 30 in the Temple of Dendur of the Metropolitan Museum of Art, Fifth Ave. at 81st St., Manhattan.●

TURKEY

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. COLLINS of Texas. Mr. Speaker, in a recent speech on the House floor, I included a statement relating to the Ecumenical Patriarchate. We have all been concerned with the outstanding historical role of the Eastern Orthodox Church which is headquartered in Istanbul, Turkey. Various issues were raised concerning this report.

I was delighted to hear from the Turkish Ambassador to the United States, Sukru Elekdag. He expressed a full and deeply concerned voice in support of religious freedom with the strong belief of Turkey in complete religious freedom.

I would like to include this statement to me by Ambassador Sukru Elekdag of Turkey.

Allow me to inform you that all Turkish citizens and existing religious institutions in Turkey enjoy religious freedom. Historically, Turkish people have traditionally been tolerant towards other religions and nations. Turkish people are proud of this exemplary tolerance and the privilege of Turkey to have the historical sites of the principal religions. The Ecumenical Patriarchate, a Turkish religious institution, is also under the guarantee of the Turkish Constitution and laws.

The Patriarchate, as a religious institution, discharges its duties without any restraint whatsoever. The Patriarch and the personnel of the Patriarchate as a whole enjoy all the fundamental rights and liberties recognized in the Constitution for all the Turkish citizens. The Patriarch himself,

had the opportunity to state on several occasions to world public opinion that Turkish citizens belonging to Christian minority groups were under no repression in a secular state where all citizens enjoy religious freedom.

In 1979, during his visit to Turkey, His Holiness Pope John Paul II himself testified to this and said (as translated from french): "Today you Christian residents of Turkey are living within a modern state which respects faiths without identifying itself with any and which gives to all the freedom of expressing their belief."●

REDBOOK REPORTS ON HEALTH RISKS OF FORMALDEHYDE FOAM INSULATION

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. ROSENTHAL. Mr. Speaker, the October 1982 issue of Redbook magazine provides a fascinating and inspiring first person account of how one Michigan family fought against and overcame the health hazards of urea formaldehyde foam insulation.

On May 18 and 19, 1982, the Commerce, Consumer, and Monetary Affairs Subcommittee, which I chair, held hearings into the Federal response to the health risks of formaldehyde in home insulation, mobile homes, and in other consumer products. On August 4, the Subcommittee on Safety Issues Affecting Small Businesses of the House Committee on Small Business also examined the formaldehyde issue.

Mr. Speaker, legislation is pending in the House, including my bill H.R. 6524, which would, in various ways, compensate the victims of formaldehyde offgassing. The health hazards associated with formaldehyde are extremely serious and widespread throughout our Nation. In many ways, the Federal Government "endorsed" the use of formaldehyde foam insulation. It is now the Government's responsibility to assist those whose health and economic well-being have been jeopardized by formaldehyde products.

Redbook magazine should be congratulated for bringing home to the American people in such a human way the tribulation and triumph of a family threatened by a dangerous chemical product. The text of the Redbook article appears below.

[From Redbook Magazine, October 1982]

OUR HOUSE WAS ENDANGERING OUR HEALTH

(By Diane Burton Rabb)

My husband Chris and I couldn't quite believe we were the owners of a brand-new yellow Cape Cod. It was our first house, and though the building process had been carefully orchestrated, we still found it hard to realize it was ours.

We'd planned our home with an eye toward the future—a huge yard and a vegetable garden, bedrooms assigned to future children, a school within walking distance. Built in the wake of the energy crisis, it also had energysaving features most people hadn't even begun to consider. For example, we installed most of the windows on the south side of the house so that we could take advantage of the sun's warmth during our cold Michigan winters. Central to the plan was a new kind of wall insulation that seemed far superior to anything else on the market. Even at nearly double the cost of fiber glass, we were certain urea-formaldehyde foam insulation would be of enormous benefit in that northern climate.

It certainly was strange-looking stuff. A crowd of neighbors gathered as the installers hauled long hoses from the truck into the unfinished house. They filled every wall cavity with a white, powerful-smelling material that spewed out like shaving cream and later dried to a crumbly, spongelike consistency. The fumes were overwhelming, and for several weeks my allergy-prone sister couldn't walk upstairs without having her eyes smart. But by the time we moved in, the house had only a pleasant "new" smell we attributed to fresh paint and wood. Months later we still remarked on our house's newness with pride, savoring the smell every time we came home after a few days' absence.

It was not until our daughter was born, three years later, that we began to suspect the persistent odor might mean that something was very wrong. One evening early in the winter, I was half listening to the news and my attention was caught by a story about a family forced to move from a trailer insulated with urea-formaldehyde foam. The fumes were unbearable. The little girl had cancer. Was there a connection? I looked at Chris, whom I'd hurriedly called in. "That's different. It was a trailer," he said. But that moment a nagging, unspoken fear took root in both of us.

Our concern grew into anxiety a few weeks later when we read a newspaper article citing the growing numbers of complaints from homeowners whose houses were insulated with urea-formaldehyde foam. Tests performed with rats suggested potential health hazards such as tumors and Massachusetts had already banned the material. Yet, other scientists insisted that it would be impossible for human beings to endure the level of fumes necessary to cause tumors in the rats. Still, tumors. Hidden in the assurance was a frightening possibility.

We had already experienced the sinus problems and irritations the article listed as possible effects of formaldehyde. We'd always blamed them on Michigan's fickle weather, but now our symptoms took on a new importance. The thought of our newborn daughter's spending 24 hours a day in an environment that could jeopardize her health made our tight, energy-efficient home seem like a prison. Without telling our friends or each other, Chris and I each began to scout our favorite areas for "for sale" signs.

Some days the whole idea that formaldehyde could be dangerous seemed ridiculous. My father, a chemist with a healthy disrespect for cancer scares, didn't think we should worry. My husband's family voiced its concern. Friends offered a sympathetic ear. I wanted to yell out loud, "Why doesn't someone just tell us this is silly!"

But no one did, including the Michigan Department of Public Health, which began offering an air-testing service [now discontinued] for those who suspected a formaldehyde problem in their homes. The man from the state put testing equipment in an upstairs bedroom and in the family room, and left it to collect air samples for three hours. He told me about a family that had tried pumping ammonia into the insulation to bind the irritant chemically; another family had been forced to move into a trailer behind its home, and later built a room to live in separate from the house. As he left he offered sympathetically, "I hope we don't find anything. Especially with a baby in the house."

I thanked him, assuring him he probably wouldn't. But my confidence was shaky.

For weeks we awaited the test results. My last hope sank as I walked away from the mailbox, letter in hand. "We've got it." I said quietly to Chris as I walked into the house. "Higher in our bedroom than down here." I felt panicky as I thought of our daughter's room, next to ours. It was smaller, and often seemed stuffy.

Chris tried to put the letter into perspective. "Look how small the levels are," he said, and he was right. The figures were infinitesimal, measured in parts per million. We had no idea what they meant. But they shouldn't have been there at all.

The letter said that it couldn't be concluded that exposure at our levels caused health problems, but warned that sensitized individuals could suffer adverse effects at levels below those detectable by smell or eye irritation. Sensitization could happen immediately or after months of exposure. The Public Health Advisory accompanying the letter included a health-effects disclosure that listed possible eye, nose and throat irritation, coughing, dizziness, nausea and other symptoms. It warned, among other things, that formaldehyde gas could continue to be released over a long period of time. Worst of all, in some cases the gas could not be controlled by "ventilation or other inexpensive means." There was a doctor's form attached to the letter, to be returned to the state. We could hardly believe it. This was serious.

We became increasingly unable to cope with the problem, alternating between periods of intense anxiety and slumps of apathy. When one of us was ready to take action, the other retreated, pretending nothing was wrong. We seldom talked about it, and as the problem began to pervade our every thought, we hardly talked at all. We began driving around endlessly, looking for houses for sale, too numb to discuss how we were to find another house like ours when inflation and spiraling mortgage costs meant we could no longer afford it. We didn't talk about how we could sell a house with a serious fault. We never mentioned the immensity of what we would be giving up, or how dearly we loved our house, much of which we had built ourselves. Emotionally we had already deserted it.

Later in the spring the Consumer Product Safety Commission replied to my request for information with a copy of their proposed ban on urea-formaldehyde foam insulation. There were 22 pages of figures and conclusions drawn from a two-year inhalation study on mice and rats, and it was worse than we could have imagined. It stated that even people who were exposed to formaldehyde and didn't suffer acute illness still risked developing cancer. Most frightening of all was the conclusion that there is no exposure level "below which it is certain that formaldehyde will not induce cancer." The only reliable remedy: "physically removing the product from the walls

of the building," at a cost of thousands of dollars.

The information jarred us out of our apathy. We consulted a lawyer. He thought we might have a case, but in the absence of any serious present illness or disability we would be able to sue only for the cost of replacement, and the fight might be expensive. He suggested that we first talk with the local installer, expressing our concern and firmly suggesting the company take responsibility.

The installer was sympathetic but didn't feel the results of the study were conclusive. No, the product was no longer being used; no, they hadn't had any other complaints out of 2,800 homes (we knew of problems in others); no, they weren't responsible. If we wanted an air purifier, he'd lend us one. We felt like frightened children who had just been offered a night light. Chris was furious when he hung up the phone. "I hope he has it in his house," he fumed.

The lawyer had also told us we shouldn't sell the house without a full disclosure. If the new owner proved sensitive to formaldehyde, we could be liable. Admission of the problem would certainly damage the selling price. And it looked as if the cost of any attempts to remedy the problem ourselves would come out of our own pockets. Whichever way we turned, we lost.

Meanwhile there seemed to be a new and growing realization on every level of the hazards of formaldehyde. When Dad, our last remaining advocate for staying in the house, urged us not to spend another winter there, we knew we had to remove the insulation at any cost.

For the first time we began to open up to neighbors and friends. Almost miraculously, the casual discussions that followed generated countless suggestions, as well as commitments of labor and equipment. The contractor building a house across the street was interested in taking on the job during a slack period, letting Chris and a volunteer crew provide the labor. A call to the original siding contractor led us to speculate that it might be possible to pull off and reuse the siding and Styrofoam-board insulation. Buoyed for the first time in months, we decided to go ahead.

On a hot August morning, refrigerator well stocked for the band of friends, relatives and neighbors assembled outside, the project began. Every piece of siding was carefully removed, numbered, and laid out on the lawn like a jigsaw puzzle. The foam sheeting was taken off and carefully stacked. The white insulation broke into chunks and crumbled, littering the yard and swirling like snow as it was stuffed into huge bags. The workers wore face masks, but that didn't keep particles of foam from covering their hair, their clothing and their sweating skin. The foam came out easily, but every stud had to be carefully scrubbed with a stiff brush to remove the residue. It was unnerving to watch the house being stripped bare—a sudden thunderstorm could have meant disaster.

In just one long, arduous weekend, two sides of the house had been stripped, cleaned out, reinsulated and put back together without a single telltale mark. The whole project took three weekends. Because volunteers supplied the labor, the contractor charged us only for his time and materials, bringing the total cost to a little over $1,000. (We have since spent an additional $500 to remove some interior walls to get at insulation inaccessible from the outside). We had received an initial rough estimate of $6,000 for the entire job, so we were thrilled. Recycled materials and volunteer labor saved us thousands. We consider it our great good fortune to have had friends and neighbors who rallied behind us, working up to ten hours a day in sweltering weather without ever making us feel this was anything but the most vital project in the world. To them we owe our health and peace of mind, as well as the spirit of sharing that has pervaded our neighborhood ever since, making us doubly glad we were able to stay.

We'd decided even before we tackled the project not to take legal action. We were afraid that if we lost, we would no longer have the money to remove the material from the walls. Afterward, just being free of the problem was like a brand-new start, one we didn't want to muddle with the anxiety and expense of a court battle. But we're still angry at having had to pay twice over for our energysaving efforts; furious that the product was placed on the market without testing; impatient with the snail's pace of action to establish whether there truly was a hazard; concerned for the countless families for whom there is no simple solution. And sometimes, in the wee hours, I'm unable to shake the tiny bur of anxiety that says there may still be health effects to come. My husband and I have realized for the first time just how alone the consumer can really be. And as new parents, how vast our responsibilities are.

And yet, some very good things came out of our experience. We have a clean, odor-free house. Most of our symptoms have lessened or vanished. We've come to recognize the strong network of people we can count on. And ultimately we have the satisfaction of knowing that as consumers and as parents, we were able to stand up and take action against what seemed at first an insurmountable threat to our family's well-being.●

BANKRUPTCY DILEMMA

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. KASTENMEIER. Mr. Speaker, almost 4 years ago, in the final hours of the 95th Congress, this House approved the Bankruptcy Reform Act of 1978 (Public Law 95-598), designed to extensively amend the Nation's bankruptcy laws and upgrade the bankruptcy courts. Legislative approval followed months of debate among House Members and weeks of negotiations with the Senate over the kind of court that should be created for resolving bankruptcy law cases. The issue was relatively simple: Should bankruptcy courts be established as supporting units within the U.S. district courts or as independent separate entities with a general jurisdiction grant of authority fully equal to the district courts? The Congress answered that the former view was preferable. The Supreme Court has now called at least part of that judgment into question.

Advocates of both arrangements regarded the bankruptcy courts as "specialized courts" designed to handle a type of "specialized cases"—bankruptcy cases. Those of us who believed they should remain supporting units within the district courts felt that the "specialized" nature of the work did not require conferring authority which would permit bankruptcy judges to render final decisions in antitrust, criminal, and civil rights cases. Those supporting expansive jurisdiction argued that the bankruptcy courts' work was of vital enough importance to require a conferral of the full range of Federal judicial power.

The House first rejected general jurisdiction for the bankruptcy courts on October 28, 1977, but later approved it on February 1, 1978 (H.R. 8200, 95th Cong.). The Senate, in September of 1978, passed a bill (S. 2266) in which a supporting-unit-arrangement was created. The compromise between the two bodies which was finally sent to the President for approval retained bankruptcy courts as supporting units within the district court structure, but conferred upon them expansive jurisdictional authority equivalent to the district courts in an allegedly narrow field of practice.

On June 28, 1982, in *Northern Pipeline Construction Co.* v. *Marathon Pipe Line Co., Inc., et al.* U.S. , 50 U.S.L.W. 4892 (Nos. 81-150 and 81-546, June 28, 1982), the Supreme Court of the United States concluded that at least a portion of the compromise arrangement approved by Congress in 1978 is unconstitutional. The Court stayed its judgment until October 4 to "afford Congress an opportunity to reconstitute the bankruptcy courts or to adopt other valid means of adjudication * * *."

On August 19, the Committee on the Judiciary ordered reported a bill, H.R. 6978, which would "restructure" the bankruptcy courts as courts of general jurisdiction under article III of the Constitution. The bill may be before this House next week. I do not intend to vote for it. It is the wrong way to respond to the Supreme Court's decision.

In the Northern Pipeline case, the Court held that powers conferred in one section of the 1978 act could not be constitutionally exercised by bankruptcy judges. According to the certiorari petition, the issue before the Court was:

> Whether the assignment by Congress to bankruptcy judges of the jurisdiction granted in Sec. 241(a) of the Bankruptcy Act of 1978, 28 U.S.C. Sec. 1471 . . . violates Article III of the Constitution.

The Court concluded that language in section 1471 as created by section 241(a) of the act conferring jurisdiction over "all civil proceedings arising under title 11 or arising in or related to cases under title 11" was not constitutionally valid. Because the 1978 act did not create bankruptcy courts as

courts under article III of the Constitution—courts whose judges would hold office for life with an absolute guarantee that their salaries of office could not be reduced—the Court held that jurisdiction over all civil proceedings "arising in or related to cases under title 11" is invalid. Whether the Court went further is open to a serious legal dispute.

Realistically, one way Congress can easily correct that jurisdictional defect directly is by amending section 241(a) of the 1978 act. That action would not cost any money at all, and would immediately provide clarification for the bar and business community. In a report filed on September 10 with every Member of the House, the Judicial Conference of the United States recommended precisely that course of action. The conference also specifically recommended that a restructuring of the bankruptcy courts in the manner provided in H.R. 6978 be rejected by Congress as unnecessary, disruptive of sound principles of court administration, and immediately and potentially very expensive. I commend to the attention of all members the conference's analysis and its cost estimates which anticipate immediate increases in expenditures of at least $33 million.

We only have a few weeks left in which to take action. We should act to reassure the public. But we should not rush to judgment by creating an entirely new court structure. Those persons urging adoption of H.R. 6978 tell us bankruptcy judges' work consists of thousands of contested and complex cases. The Judicial Conference tells us that is not a correct assessment. The Conference claims that cases of the type involved in the Marathon case involve only about 5 percent of the bankruptcy filings.

Proponents of H.R. 6978 argue that a new court system is the only way to avoid costly litigation to resolve questions of jurisdictional validity. Yet that is not certain. Any competent lawyer can almost always find a way to raise a jurisdictional question. A new court structure will not eliminate jurisdictional issues; it will generate as many questions as it answers. We literally have no idea, and the Judicial Conference candidly admits that it has no idea how much work will be created for appellate courts by H.R. 6978. How many more judgeships can we create? H.R. 6978 alone will add 227 new lifetenured judges to the more than 1,000 judges already in the Federal courts. I fear we are rushing heedlessly down a road to creating more and more judges and authorizing more and more appropriations for supporting personnel and courthouses, without realizing what the final costs to our court structure and our budget will be.

In sum, we should act responsibly. We could clarify jurisdiction as the Judicial Conference has recommended. I have introduced such a measure today. If problems arise, we can later correct errors easily. Alternatively, we could establish a small number; for example, 15 to 20, of article III bankruptcy judges to hear the cases that require adjudication by a life-tenured judge. Yet a final option is to seek a further stay of the Supreme Court's October 4, 1982, mandate.

If we create a huge new court system like that proposed in H.R. 6872 and then we find 2 years from now that the system is not needed, we cannot correct the damage. Those judges will be there for life. The new court structure is not a proven necessity. If it turns out to be an error, the cost of the mistake will be tremendous and the error will apparently be irreversible.

I noted at the beginning of this statement the origin of our problem: a hasty compromise at the end of the 95th Congress. That effort to compromise then created this problem. Let us not repeat the mistakes of the past.●

GOLD, SILVER, AND BRONZE FOR THE VIRGIN ISLANDS

HON. RON de LUGO

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. DE LUGO. Mr. Speaker, athletes from the U.S. Virgin Islands recently participated in the Central American and Caribbean games (CAC) that took place in Cuba. These athletes competed in a variety of events including swimming, boxing, and wind surfing.

Even though the Virgin Islands may be small in size, a number of outstanding athletes have come forth from our shores. The young people who have competed in the CAC games were quite successful in their endeavors, winning a total of two gold, five silver, and four bronze medals—the largest number of medals won by a Virgin Islands group in an international competition.

Shelly Cramer and Jodie Lawaetz had outstanding performances in the swimming competitions. Shelly, a senior at the University of South Carolina, captured the gold medal in the 200-meter butterfly event and established a new record 2:18:54 in the event. She collected a total of six medals during the games. Jodie, who is 16 years of age and a senior at Good Hope High School in St. Croix, won a silver medal in the 400-meter individual medley and a bronze medal in the 100-meter butterfly event.

A gold medal was won by Kenneth Klein in the wind surfing event. James Larson, who serves in the U.S. Navy, was awarded a silver medal in the boxing competition. A bronze medal was presented to Clifton Charles Wells in his particular event.

These outstanding young people represented the U.S. Virgin Islands and the United States in a manner of which we can all be proud during the course of the Central American and Caribbean games held in Cuba. I am sure that my colleagues in the House join me in congratulating and showing appreciation to these athletes for a job well done.●

JOURNAL OF COMMUNITY ACTION

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. CONYERS. Mr. Speaker, the Journal of Community Action is only a few years old, but already it has established itself as one of the leading publications in the field of community economic development, neighborhood government, and Federal, State, and local relations. Edited by two veteran community organizers and analysts, Nelson Rosenbaum, formerly of the Urban Institute, and Milton Kotler, founder of the National Association of Neighborhoods, the journal is fast becoming an indispensable source of news, analysis, and ideas on community life.

Each issue contains research reports, policy perspectives, and a section entitled, "Notes From the Field," which surveys the most innovative experiments in community action taking place across the Nation. To illustrate its high standards of journalism, I am attaching for the Members' review an article that appeared in the January/February issue of this year. Lawrence Bailis' article, "Community-Based Organizations and CETA," is an important contribution to understanding the role of community organizations in job training and employment programs. Excerpts from the article follow:

COMMUNITY-BASED ORGANIZATIONS AND CETA

(By Lawrence N. Bailis)

As is almost always the case, federally funded employment and training programs are now at a critical crossroads. During the past fifteen years, supporters of these programs have seen expenditures for the Comprehensive Employment and Training Act (CETA) and its predecessors grow from less than a billion dollars a year to more than $10 billion, only to see them reduced sharply to less than one-third that size, with further cuts likely.

The growth of these programs has been accompanied by the rise of non-profit organizations that claim to serve all or portions of the client community, groups known as "community based organizations" (CBOs) in the CETA parlance. Many nationwide as well as local unaffiliated community groups

were created largely in response to the availability of funding for what were then known as manpower programs (and are now known as employment and training programs since the term "manpower" is currently considered a sexist word). Other community groups had been in existence long before the creation of manpower programs but used the CETA program and its predecessors as an opportunity to widen the range of services that they were providing to the community.

During the past decade, the destinies of the employment and training programs and the CBOs that have provided services in them have become increasingly intertwined. Aided in part by federal regulations that encourage utilization of community groups, CBOs have received as much as one-fifth of the monies allocated to training adults, and the bulk of the monies for certain youth employment and training programs.

The importance of community based organizations to CETA has outweighed their share of total funding dollars. The documented successes of certain community groups in reaching, training, and employing disadvantaged Americans—and the political support enjoyed by many of these organizations—helped to promote the sustained growth in CETA funding. The equally well documented shortcomings in CBO management practices have, on the other hand, hurt the overall image of the program, and thereby contributed to the atmosphere that has helped to promote the recent and ongoing cutbacks.

While many CBOs have developed a broad base of public and private sector funding sources, CETA has become the primary source of funding for many others. Federal grants have helped to sustain many organizations which have become spokesmen for the disdavantaged in areas that go far beyond preparation for the world of work. The cutbacks in CETA and other federal funding sources are thus jeopardizing the viability of many community groups, and forcing almost all of them to step up their efforts to provide alternative sources of funding.

Most of the discussion about the future of federally funded employment and training programs has focused on structural issues such as whether or not the current Prime Sponsor system should be preserved, or on the roles to be played by state government, local government, and the business community. However, for the reasons outlined above, analysis of the potential roles to be played by community groups should play an important part in ongoing efforts to enact a new federally funded employment and training system to replace CETA.

FRAMEWORK FOR DECISIONMAKING

Decisions about the future role of CBOs in employment and training systems should be made on the basis of two kinds of considerations: (a) the future shape of these systems and their objectives, and (b) assessments about the ability of community-based organizations to promote achievement of these objectives as evidenced by their previous track record.

At first glance, neither of these considerations can provide clear guidance. First, while a large number of different legislative proposals have been considered, no one can be sure what federal employment and training programs of the future will look like. Second, nearly a decade of CETA research and evaluation studies has failed to provide definitive conclusions about the strengths and weaknesses of CBOs as service deliveries, or even more general information about what factors contribute to making an organization an effective provider of training services.

However, prudent planners cannot wait until the future is totally clear and predictable, and those who seek to affect the future do not have the luxury of waiting until all of the relevant data had been collected and analyzed. If they do wait, they will find that others have already made key decisions without ever consulting them. Therefore, now is an opportune time to review the role of CBOs in the past and reach conclusions about the role that they can play in the future.

WHITHER CETA?

Before attempting to prescribe the proper role for community based organizations in future federally funded employment and training systems, one must first address two sets of issues:

Is there likely to be any federal funding for such programs beyond the next year or two, and

If so, what are the program goals and structure likely to look like?

While it is always hazardous to make predictions on topics such as this (and doubly hazardous to put one's predictions into print where they can be so easily retrieved and reviewed), several conclusions appear justified by the contents of the legislative proposals offered by Senators Quayle and Kennedy and Representatives Hawkins and Jeffords.

First, major changes in the structure and functioning of employment and training programs seem inevitable. Even those who are happiest with the current CETA system admit that severe cutbacks are raising questions about such previously fundamental aspects of the CETA system as reliance upon local general-purpose governments representing 100,000 or more citizens as the basic planning and operational unit ("Prime Sponsor") under the system, and the importance of providing training allowances to permit low-income disadvantaged men and women to participate in training programs at all

Beyond this, a general consensus appears to have emerged from recent Congressional hearings on CETA that the goals of the reauthorized or redesigned program should stress provision of training opportunities rather than Public Service Employment to the disadvantaged, and in particular to disadvantaged youth.

Despite these changes, the goals of future employment and training efforts are likely to resemble many of the current ones. It also seems reasonable to expect important continuities in the overall structure in which planning and service delivery takes place. Some have called for retaining the current Prime Sponsor System in which cities and counties with a population of 100,000 or more are responsible for employment and training, with the state governors responsible for portions of states that do not meet the 100,000 cutoff. Others have called for raising the population cutoff, and/or increasing the role of the governor as overseer or operator of the entire system within a state. Almost everyone seems to be calling for an increased role by the business community in planning and operating future programs. But, whichever of these or other alternatives is finally chosen, it is clear that some organization will be given responsibility for providing training and related services in a given jurisdiction. That organization will have to decide (a) whether it wishes to provide these services directly or to subcontract for at least some of them, and (b) if they are subcontracted, whom to subcontract them to.

In short, it seems increasingly likely that there will be either government bodies or consortia including government that will be deciding what role—if any—CBOs should be playing in the planning and administration of skills training programs for disadvantaged Americans. While politics will inevitably play a role in making these decisions, empirically based evaluations of the potential and limitations of community groups can also be expected to be influential. The remainder of this article seeks to provide information that will further such planning at both the federal and local levels.

LESSONS FROM THE PAST

During the first eight fiscal years of CETA, community-based organizations have played virtually every conceivable role in the planning and delivering of employment and training services. Many Prime Sponsors, especially the larger ones, have permitted CBOs to function as comprehensive service deliverers, i.e., to perform all needed services from outreach and recruitment of trainees through provison of training and supportive services to eventual placement of clients and followup on their progress on-the-job. Other Prime Sponsors have divided responsibility for client services among a number of organizations, but have given CBOs a number of important functions to carry out.

A recent survey of utilization of CBOs among twenty Prime Sponsors revealed the extent to which CBOs provide training services in adult programs. (Urban Systems, 1979). In cases where community outreach was subcontracted, it was done exclusively by community based organizations. Nearly 80 percent of the subcontractors with responsibility for provision of counseling and related supportive services were CBOs, and more than half of the agencies that provided specialized job development and/or placement were community groups. In addition to this, nearly half of the combined outreach, intake, assessment, and classroom training responsibilities that were subcontracted were assigned to CBOs as well. CBOs were also the leading choice of Prime Sponsors to deliver so-called work experience (on-the-job programs in which the primary benefit is developing work habits rather than skill acquisition) and represented more than 40 percent of the sub-grantees with responsibility for on-the-job training.

If there were universally accepted standards of performance for community-based service deliverers and adequate data to assess their performance, one could review this past experience and decide what CBOs did best, under what circumstances, and so forth. Unfortunately, neither the standards nor the data exist, and so the lessons from the past are more dependent upon judgment than mathematical manipulation of performance data. While there are disputes about all parts of the CBO record to date, it is possible to make relatively conclusive assessments of the role of CBOs as advocates for the client community, as links between that community and the more mainstream training institutions, and as direct deliverers of classroom training services.

THE ADVOCACY ROLE

While statistics about impact of training on earnings of trainees are sometimes hard to come by, there is broad recognition of the fact that community based organizations have been playing a client advocacy role

since their initial involvement in employment and training programs. While all agencies that provide CETA services have felt pressures to "cream," i.e., to serve those who are most likely to succeed within the overall eligible group, many CBOs have apparently been relatively successful in resisting these pressures. While the employer community has incentives to press for serving those who are most likely to become model employees, CBOs have competing incentives to remind government agencies and employers alike that one cannot measure the effectiveness of programs in terms of overall placement rates and cost per placement.

The creative tension between the drive to demonstrate cost-effectiveness and the need to serve those most in need is likely to persist into the forseeable future. While government agencies serving as Prime Sponsors or overseers of employment and training programs might try to resist pressures to cream, a review of the CETA record to date does not give one total confidence that this can be expected to occur throughout all of the decentralized components of employment and training programs across the Nation.

Given this situation, it would seem reasonable to maintain the current statutory role for CBOs in planning employment and training programs—and to consider expanding it. Care must be taken, of course, to insure that advocacy of client needs does not become distorted into advocacy for providing money for CBOs regardless of their merits. The experience with CETA to date, however, suggests that there is little reason to be concerned that CBOs will become overly influential in a planning process that is shared among government officials, business leaders, and other key actors.

LINKAGES TO THE COMMUNITY

Community based deliverers of employment and training services have been funded, in large part, to remedy the perceived failures of so-called mainstream service deliverers (such as public schools, community colleges, and proprietary schools) to serve minorities and other disadvantaged clients. While CBOs have sometimes been seen as competitors to these mainstream groups, they have also often served as the "glue" that has linked the mainstream employment and training system together with the minority and disadvantaged client community.

The history of employment and training programs is replete with examples in which community groups have successfully promoted linkages between mainstream agencies and their disadvantaged clientele through the conduct of such activities as:

Outreach to the client community that is promoted by formal and informal ties between CBO staff and potential client groups,

Intake that is promoted by the location of many CBOs directly in the neighborhoods where clients live,

Assessment of client needs that is promoted by the rapport that can be developed between CBO staff and clients, and

Direct placement of minority groups to further affirmative action goals of major employers that is promoted by all of the other three above-listed factors.

With the increased emphasis on economic develoment within the employment and training systems, community-based organizations have the potential to provide new forms of linkages. Perhaps the most promising of these is promoting ties between minority small businesses and larger Chambers of Commerce or Private Industry Councils.

In recent years, there has been a trend toward centralization of the functions of outreach, intake, assessment and placement, with Prime Sponsors directly carrying out these activities rather than subcontracting them to CBOs and other groups. It is widely believed that these centralized efforts are most desirable in smaller Prime Sponsors where geographic compactness and the relatively small numbers of clients permit centralized facilities to be accessible to those from outlying neighborhoods and where it is administratively feasible to carry them out in a single location. If, as seems likely, the service delivery areas of the future will be larger than the current prime sponsorships, the desirability of centralized outreach, intake, assessment, and placement will decline, and the relative attractiveness of delegating these tasks to community groups with a strong base in the neighborhoods where clients are drawn from will increase.

The above discussion provides logical arguments in favor of utilizing community groups to deliver services that link the mainstream organizations that are delivering employment and training services with the members of and organizations within the client community. But even if the logic is convincing to supporters of community groups, it is doubtful whether it will be enough to convince those with operational responsibility for future employment and training systems. Therefore, the burden of proof is likely to fall on community groups themselves to demonstrate that (a) such linkages are necessary if the overall system is to function as intended and (b) the community groups are better equipped to provide these linkage services than other organizational alternatives.

Doing so will not be easy. The CETA evaluation literature does not provide definitive conclusions on the relative advantages and disadvantages of utilizing community groups for outreach, intake and placement, as opposed to centralizing them within a single government agency. But the difficulty of the task does not diminish the need to proceed with it.

OSHA'S FIRST RULEMAKING: A BIT OF FANCY FOOTWORK?

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. GAYDOS. Mr. Speaker, after more than a year of concentrating on administrative changes and standard modification, the new management of the Occupational Safety and Health Administration has taken a clear first step of its own in originating regulation.

It is a half step at best or, at worst, a piece of fancy footwork that gives the dancer the appearance of moving forward while actually shuffling back, critics say.

In February 1981, in one of its first acts, the new administration pulled back a formally proposed health protection standard that was meant to give workers useful information on dangerous chemicals in the substances they use at work. This was called the hazards identification standard and it was proposed in the closing days of Eula Bingham's administration at OSHA.

The withdrawal was accompanied by promises to proceed expeditiously with a new and equally effective standard that would be drawn according to the commandments of cost effectiveness and the other imperatives of deregulation such as performance orientation.

OSHA Under Assistant Secretary of Labor Thorne Auchter published a notice of proposed rulemaking on the promised new measure in March 1982. This is called the hazard communication standard. It is in the comment stage.

However, the changes made in the intervening year are more than the difference between identification and communication many health professionals and labor unions say.

The chief difference is in the starting point, apparently. Normally a Government agency begins rulemaking with a broad scope that often is narrowed and modified to a point of more-or-less universal acceptability in the give-and-take of the process. This one begins from a point of weakness that critics say may never be overcome.

So the criticism is that the new hazard communication standard inverts the rulemaking process that had been followed in the old hazards identification standard; that the new standard approaches worker health with an air of foot-dragging acceptance of duty rather than deep concern.

Mr. Speaker, the standard and the idea of labeling hazardous material is of deep concern to the Subcommittee on Health and Safety, of which I am chairman, and the subcommittee held 8 days of oversight hearings on it during this Congress.

American workers deal with more than 55,000 substances and compounds containing chemicals and combinations, many of which cause some early reaction and others that bury themselves in parts of the body to show up years later as cancer and nerve diseases and damaged lungs and deformed or stillborn children. Many of these substances in their containers carry only trade names and offer no information on composition or the danger they hold.

Furthermore, the 91st Congress was discussing the idea of labeling more than 10 years ago when the Occupational Safety and Health Act passed. Labeling was one of the hypothetical protections the new agency could offer. The idea was to provide a warning, to state appropriate aid in case of accident, and to establish records of who used what substance to assist in

treatment if disease developed years after the exposure.

How would the recordkeeping be useful? Right now the automobile industry is finding higher than usual rates of certain kinds of cancer in the craftsmen who do its wood modeling work. The agent is not yet identified, but we must assume it will be someday.

Suppose it turns out to be a substance in wide industrial use? Would it not immeasurably advance the effectiveness of occupational health and public health to know when it was used? And where it was used? And to have those who used it alerted to a potential danger? Would it not help avoid future mass confusion of the type we see today with asbestos?

Mr. Speaker, no one in any oversight hearing on labeling disputed that some of these substances are highly dangerous or that the Nation needs to establish some way of dealing with them; not one witness that we heard.

Now, one criticism of the communication standard is the number of workers it affects compared to the number of workers who use these substances.

According to the United Steelworkers of America, about 14 million workers in manufacturing would be under it while about 50 million in construction, utilities, transportation, warehousing, and agriculture would go uncovered.

Another objection is that OSHA's standard would preempt more stringent State and local regulation that began developing in the absence of Federal action. Preemption would overturn the generally accepted idea that States are free to be tougher than the Federal Government if they choose. And it would contradict the trend that OSHA has been fostering by encouraging more States to take up health and safety responsibilities.

One of the more detailed criticisms comes from Dr. Arthur Oleinick, a medical doctor and a lawyer, who is an associate professor of the University of Michigan's School of Public Health. His field is public health law.

Dr. Oleinick, the physician, questions the communication standard's claim of performance orientation.

For example—

He said—

the present proposal neither defines carcinogen nor specifies the minimum data set that will trigger a finding that a chemical poses a cancer hazard. Regardless of which hazard evaluation process the chemical manufacturer uses, the standard's objective in the area of carcinogen labeling and hazard communication remains obscure.

Dr. Oleinick, the lawyer, sees a possibly illegal redelegation by OSHA of the authority delegated to it by Congress.

The standard as proposed—

He said—

will permit the chemical manufacturers to define individually the health hazards to be covered and then to determine whether a hazard is present, using their own notion of what constitutes proof of hazard.

Dr. Oleinick's opinion is that the new communication standard will not yield uniform labeling results while the old identification standard would.

The old would impose costs of $248 million while the new would have a price tag of $230, he estimated, adding the new, "can hardly be justified on the grounds that it will be substantially less expensive than the more comprehensive process" first proposed.

He finds shortcomings medically and legally and in economic justification.

What is Dr. Oleinick's overall opinion?

These deficiencies are so substantial, in my mind, as to raise grave doubts as to both the potential effectiveness and the legality of the present proposal,

He commented.

Dr. Oleinick's perspective for these comments and conclusions is as the consultant who was the guiding hand in drafting the old standard. But even making a substantial allowance for that role, the questions point to the possibility of extensive and expensive litigation and to lengthy delay. Such developments would benefit no one.

The rulemaking process still is open and will be for some time, and right now there is no reason on the record to believe that Secretary Auchter will not heed those critical comments that are valid and well meant.

The subcommittee hearings show there is a universally recognized need for a standard.

They show effective labeling can be attained. We saw instances in which innovative companies established good programs that met most of the needs outlined. And they give away no trade secrets in doing it, by the way.

So to fall short of the mark toward which this first step should lead will put indelibly on record much about this administration.

Foremost, it will say whether this administration is attempting to move toward effective regulation by a new method or whether it is engaged in just another fancy fast shuffle that leads nowhere.●

PUBLIC HIGH SCHOOL FOOTBALL CENTENNIAL YEAR

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. MOAKLEY. Mr. Speaker, I would like to take this opportunity to bring to the attention of my colleagues the 100th anniversary of the first Needham and Wellesley High School football games. This Massachusetts high schools football rivalry represents the oldest such high school rivalry in the Nation.

On November 30, 1982, teams from Needham and Wellesley High School met at Hunnewell Park in Wellesley, starting what has now become a significant lasting Thanksgiving Day tradition. Of course, today, events like the Needham-Wellesley football game have joined the turkey dinner as an important part of our Thanksgiving Day ritual. And, since that initial encounter in 1882, generations of young people from Needham and Wellesley have squared off every Thanksgiving morning and have provided countless thrilling moments for their friends and families and for local sports fans alike.

Today, the Needham-Wellesley rivalry embodies all of the virtues of athletic competition. The contests have always been noted for their exciting and enthusiastic nature, epitomizing the type of hearty spirit that is unique to high school athletics. Second, the young athletes have consistently demonstrated a high caliber of skill and talent, the dividends of their diligence and their many long hours spent in practice. And finally, while vigorously engaging in competition and striving for victory, the participants have refused to compromise their admirable standards of sportsmanship and have—much to the communities' benefit—fostered good relations and friendship among all those involved.

We are all proud of the history and competitive spirit of this long-standing rivalry. In commemoration of the centennial anniversary of "The Nation's Oldest Public High School Football Rivalry" the year 1982 has been proclaimed "Public High School Football Centennial Year" in the Commonwealth of Massachusetts. Mr. Speaker, I would like to conclude by joining with the Governor and the people of Massachusetts in congratulating all of those past and present, who have taken part in this traditional rivalry and in wishing them every success in their future endeavors.●

CONTINUING STRONG FIRE PREVENTION EFFORTS

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. WALGREN. Mr. Speaker, I am pleased that yesterday the House passed H.R. 6956, the Department of Housing and Urban Development-Independent Agencies appropriations bill for fiscal year 1983 which included $6 million for the U.S. Fire Administration (USFA). The Reagan administration did not propose funding for the USFA for 1983. The Senate Appropriations Committee has reported

$4.15 for the USFA. Both appropriations and authorizing committees have gone on record in support of continuing the USFA.

The USFA, now a part of the Federal Emergency Management Agency has provided valuable technical and education assistance to local fire departments that respond to approximately 2.7 million fires each year.

I stand with many of my colleagues in Congress, the Joint Council of Fire Services Organizations, and State and local leaders across the country, in support of continuing the USFA and carrying out the mandates of the Federal Fire Prevention and Control Act of 1974.

America's fire problem is grim—approximately 8,100 deaths, over 200,000 injuries, $5 billion worth of property damage and $1.23 billion in direct losses due to arson each year. The 8,100 deaths are roughly equal to having two jumbo jets crash in midair every month. Our national fire problem leaves little justification for a haphazard approach to preventing and controlling fires.

Fire prevention and control is a national problem which demands a national coordinated approach. We must support this effort to continue the USFA.●

HUMAN DRAMA OF GUATEMALA

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. BEDELL. Mr. Speaker, we all know of the great human drama of El Salvador. Less well known, however, is what is happening today in Guatemala. There is an Iowa priest who has been serving in Guatemala for 25 years. For 25 years, he has served and watched the human rights situation there deteriorate. For 25 years, he has been concerned, but he maintained his silence, writing occasionally on what he knew, but insisting on his anonymity.

On Sunday, his silence was broken. On Sunday, the Des Moines Register carried on the front page Father Hennessey's accusations of atrocities by the Guatemalan Army. Why did he change his mind and ask his sister, a nun from Dubuque, Iowa, to release to the public the letters he has written about the conditions of Huehuetenango Province? There are two reasons that have caused him to now place his life in a position of extreme jeopardy.

First, the level and scope of the massacre in the Indian highlands have dramatically increased since the March 23, coup that brought Gen. Efrain Rios Montt to power. "Please use this and anything else I sent to get others to stop this madness," he wrote to his sister.

Second, Father Hennessey learned that the Congress had approved the Reagan administration's request to send $11 million in economic assistance to the Montt government (in reality this figure was $10 million—$1 million being cut by the Appropriation Committee). He decided that if we could approve that aid, it meant that the American people and the Congress were totally unaware of the real conditions that exist within Guatemala today.

The "madness" Father Hennessey speaks of is the wholesale slaughter of Indians in the rural highlands of Guatemala. While he, like many other independent observers, always point out that the guerrilla factions do kill those individuals who refuse to cooperate with them, it is only the army and its allies which engage in the massacres and total destruction of entire Indian villages and hamlets.

Father Hennessey reported that there were 20 incidents in his parish alone during July. For instance, 300 Guatemalan soldiers hearded the people of town 13 into three buildings and told them to pray. The soldiers then set fire to the buildings and 60 families, save 3 men, perished in the flames.

That represents one incident alone. I have asked that his letter to the Des Moines Register be inserted into the RECORD.
